Enable
An enabling environment for the further development and spread of these practices

Engage
Convince policy makers and scientists of the need to support and alleviate policy constraints

Reflect
With alliances such as rural communities, scientists and development agencies to strengthen synergies

Share
Through word of mouth and using media such as magazines, radio and social media

Systematise and analyse
The practices to distil lessons learnt, factors of success and difficulties

Co-create
Innovative agroecological practices together with researchers and field workers

Identify
Existing innovative agroecological practices in the field
