

GLOBAL FOREST RESOURCES ASSESSMENT 2015

COUNTRY REPORT

Saudi Arabia

Rome, 2014

FAO, at the request of its member countries, regularly monitors the world's forests and their management and uses through the Global Forest Resources Assessment (FRA). This country report is prepared as a contribution to the FAO publication, the Global Forest Resources Assessment 2015 (FRA 2015).

The content and the structure are in accordance with the recommendations and guidelines given by FAO in the document Guide for country reporting for FRA 2015 (<http://www.fao.org/3/a-au190e.pdf>). These reports were submitted to FAO as official government documents.

The content and the views expressed in this report are the responsibility of the entity submitting the report to FAO. FAO may not be held responsible for the use which may be made of the information contained in this report.

TABLE OF CONTENTS

Report preparation and contact persons.....	4
1. What is the area of forest and other wooded land and how has it changed over time?	5
2. What is the area of natural and planted forest and how has it changed over time?	11
3. What are the stocks and growth rates of the forests and how have they changed?	15
4. What is the status of forest production and how has it changed over time?	23
5. How much forest area is managed for protection of soil and water and ecosystem services?	28
6. How much forest area is protected and designated for the conservation of biodiversity and how has it changed over time?	33
7. What is the area of forest affected by woody invasive species?	36
8. How much forest area is damaged each year?	39
9. What is the forest area with reduced canopy cover?	43
10. What forest policy and regulatory framework exists to support implementation of sustainable forest management SFM?	44
11. Is there a national platform that promotes stakeholder participation in forest policy development?	46
12. What is the forest area intended to be in permanent forest land use and how has it changed over time?	47
13. How does your country measure and report progress towards SFM at the national level?	50
14. What is the area of forest under a forest management plan and how is this monitored?	52
15. How are stakeholders involved in the management decision making for publicly owned forests?	54
16. What is the area of forest under an independently verified forest certification scheme?	55
17. How much money do governments collect from and spend on forests?	57
18. Who owns and manages the forests and how has this changed?	59
19. How many people are directly employed in forestry?	63
20. What is the contribution of forestry to Gross Domestic Product (GDP)?	65
21. What is forest area likely to be in the future	66

Introductory Text

Place an introductory text on the content of this report

<p>No report has been received from Saudi Arabia.</p> <p>This report is the result of a desk study prepared by the FRA secretariat in Rome, which is based on the existing available information using the established format for FRA 2015 country reports.</p>

Desk Study?

Check "yes" if this survey is a Desk Study, "no" otherwise	
Desk Study?	yes

1. What is the area of forest and other wooded land and how has it changed over time?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

1.1 Categories and definitions

Category	Definition
Forest	Land spanning more than 0.5 hectares with trees higher than 5 meters and a canopy cover of more than 10 percent or trees able to reach these thresholds in situ. It does not include land that is predominantly under agricultural or urban land use.
Other wooded land	Land not classified as "Forest" spanning more than 0.5 hectares with trees higher than 5 meters and a canopy cover of 5-10 percent or trees able to reach these thresholds ; or with a combined cover of shrubs bushes and trees above 10 percent. It does not include land that is predominantly under agricultural or urban land use.
Other land	All land that is not classified as "Forest" or "Other wooded land".
...of which with tree cover (<i>sub-category</i>)	Land considered as "Other land", that is predominantly agricultural or urban lands use and has patches of tree cover that span more than 0.5 hectares with a canopy cover of more than 10 percent of trees able to reach a height of 5 meters at maturity. It includes bothe forest and non-forest tree species.
Inland water bodies	Inland water bodies generally include major rivers, lakes and water reservoirs.
Forest expansion	Expansion of forest on land that, until then, was not defined as forest.
...of which afforestation (<i>sub-category</i>)	Establishment of forest through planting and/or deliberate seeding on land that, until then, was not defined as forest.
...of which natural expansion of forest (<i>sub-category</i>)	Expansion of forests through natural succession on land that, until then, was under another land use (e.g. forest succession on land previously used for agriculture).
Deforestation	The conversion of forest to other land use or the longterm reduction of the tree canopy cover below the minimum 10 percent threshold.
...of which human induced (<i>sub-category</i>)	Human induced conversion of forest to other land use or the permanent reduction of the tree canopy cover below the minimum 10 percent threshold.
Reforestation	Natural regeneration or re-establishment of forest through planting and/or deliberate seeding on land already in forest land use.
...of which artificial reforestation (<i>sub-category</i>)	Re-establishment of forest through planting and/or deliberate seeding on land already in forest land use.

1.2 National data

1.2.1 Data sources

	References to sources of information	Variables	Years	Additional comments
1	Reports of Dept. of Range and Forestry.	Forest Cover	1996	Estimate is based on reports sent by the regions.
2	Agriculture Statistics	Agricultural Land	2003	N/A

3	Reports of Dept. of Natural Resources	Forest Cover	2008	Estimate is based on reports of National Forest Inventory by using GIS
4	Agriculture Statistics	Agricultural Land	2008	N/A
5	National Forest Inventory (NFI)	Diversity of tree spp., Growing stock.	2008	NFI started in 2001 and finished in 2009.
6	Dept. Of Natural Resources	Establishment of forest through planting	2010	N/A
7	Ministry of Rural Affairs	Trees established through planting	2010	N/A
8	Ministry of Transportation	Trees established through planting	2010	N/A

1.2.2 Classification and definitions

National class	Definition
Forest	It corresponds to FRA 2010 but minimum area not stated. FRA 2010 definition - Forest Land spanning more than 0.5 hectares with trees higher than 5 meters and a canopy cover of more than 10 percent, or trees able to reach these thresholds in situ. It does not include land that is predominantly under agricultural or urban land use.
Riyad, Fiads and Valleys	It corresponds to FRA 2010 (Other wooded Land) FRA 2010 definition - Other wooded Land Land not classified as “Forest”, spanning more than 0.5 hectares; with trees higher than 5 meters and a canopy cover of 5-10 percent, or trees able to reach these thresholds in situ; or with a combined cover of shrubs, bushes and trees above 10 percent. It does not include land that is predominantly under agricultural or urban land use.
Oasis	Predominantly planted date palms (Other land) – FRA 2010 definition - Other land All land that is not classified as “Forest” or “Other wooded land”.
Rangeland	Corresponds to FRA 2010 definition of Other land, Other land with tree cover. FRA 2010 definition -Other land with tree cover Land classified as “Other land”, spanning more than 0.5 hectares with a canopy cover of more than 10 percent of trees able to reach a height of 5 meters at maturity.
Agricultural Land	Rainfed or irrigated land (Other land).
Parks and Gardens	Corresponds to FRA (Other wooded land).
Others	Cities, Roads, bare hills etc (Other land).
Afforestation	Establishment of forest through planting and/or deliberate seeding on land that, until then, was not classified as forest. (Same as FRA 2010)
Reforestation	Re-establishment of forest through planting and/or deliberate seeding on land classified as forest. (Same as FRA 2010).

1.2.3 Original data

Forest area			
National class	Area (1000 hectares)		
	1996	2003	2008
Forests	2,728	2,728	977
Riyad, Fiads and Valleys	280	280	959
Oasis	250	250	250
Rangelands	170,000	170,000	170,000
Agricultural lands	1,131	1,216	1,075
Parks and gardens	11	11	11
Others	40,569	40,569	26,023
	214,969	214,969	200,000

The forest inventory realized and finished in 2009 generated new data on forest and rangeland resources based on remote sensing studies. The new data is considered more accurate and reliable than the 1996 data.

1.3 Analysis and processing of national data

1.3.1 Adjustment

Forest area
The area of the Kingdom of Saudi Arabia has changed according to the convention on the borders with the Republic of Yemen to become 200.000.000 hectares. For the purpose of this report, adjustments have been made to the Other Land category and will not affect the area of forest/other wooded land.

1.3.2 Estimation and forecasting

--

1.3.3 Reclassification

Forest area					
National class	FRA Categories				
	Forest	OWL	Other land	Total	OLWTC
Forests	100%			100%	0%
Riyad Fiad and valleys		100%		100%	0%
Oasis			100%	100%	0%
Rangelands			100%	100%	0%
Agricultural lands			100%		0%
Parks and Gardens			100%		0%
Others			100%		0%

The reclassification % for OWL are based on that Riyad, Fiad and Valleys are wooded areas, while 20% of Rangelands are considered to be covered with natural forests.

Due to a lack of updated information same figures were adopted for the year 2015.

1.4 Data

Table 1a

Categories		Area (000 hectares)				
		1990	2000	2005	2010	2015
	Forest	977	977	977	977	977
	Other wooded land	1117	1117	1117	1117	1117

1.5 Comments

Category	Comments related to data definitions etc	Comments on the reported trends

Forest	N/A	The forest inventory realized and finished in 2009 generated new data on forest and rangeland resources based on remote sensing studies. The new reported data is considered more accurate and reliable than the 1996 data. For the year 2015 as it was not possible to derive any trend, the same figures as 2010 were adopted.
Other wooded land	Includes 158,000 ha of mangroves (see table 6). Compared with FRA 2005, the Other wooded land figure has been corrected. In FRA 2005 20% of the range lands were considered OWL, this has been corrected in FRA 2010 100% of the rangelands are now considered Other land.	N/A
Other land	N/A	N/A
Other land with tree cover	N/A	N/A
Inland water bodies	N/A	N/A
Forest expansion	N/A	N/A
Deforestation	N/A	N/A
Reforestation	N/A	N/A

Other general comments to the table

The total area of the Kingdom of Saudi Arabia changed after the new agreement on the borders between the Kingdom and the Republic of Yemen. The new area is 2,000,000 ha instead of 214,969,000 ha. The Data for the year 2010 is based on a national forest inventory started in 2001 and was completed in 2009. It Provides reliable and accurate data.

2. What is the area of natural and planted forest and how has it changed over time?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

2.1 Categories and definitions

Term	Definition
Naturally regenerated forest	Forest predominantly composed of trees established through natural regeneration.
Naturalized introduced species	Other naturally regenerated forest where the tree species are predominantly non-native and do not need human help to reproduce/maintain populations over time.
Introduced species	A species, subspecies or lower taxon occurring outside its natural range (past or present) and dispersal potential (i.e. outside the range it occupies naturally or could occupy without direct or indirect introduction or care by humans).
Category	Definition
Primary forest	Naturally regenerated forest of native species where there are no clearly visible indications of human activities and the ecological processes are not significantly disturbed.
Other naturally regenerated forest	Naturally regenerated forest where there are clearly visible indications of human activities.
...of which of introduced species (<i>sub-category</i>)	Other naturally regenerated forest where the trees are predominantly of introduced species.
...of which naturalized (<i>sub-sub category</i>)	Other naturally regenerated forest where the trees are predominantly of naturalized introduced species.
Planted forest	Forest predominantly composed of trees established through planting and/or deliberate seeding.
...of which of introduced species (<i>sub-category</i>)	Planted forest where the planted/seeded trees are predominantly of introduced species.
Mangroves	Area of forest and other wooded land with mangrove vegetation.
...of which planted (<i>sub-category</i>)	Mangroves predominantly composed of trees established through planting.

2.2 National data

2.5 Comments

Category	Comments related to data definitions etc	Comments on reported trend

Primary forest	The Juniperus forest was considered as a primary forest. The area was estimated based on the comment mentioned under comments for table 6 regarding the growing stock of broadleaved / coniferous	N/A
Other naturally regenerating forest	N/A	N/A
Planted forest	Data not available. Areas of planted forest are included under the other categories.	N/A
Mangroves	However "The world's mangroves 1980-2005 report" indicates 20,000 ha in 2005.	N/A

Other general comments to the table

N/A

3. What are the stocks and growth rates of the forests and how have they changed?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

3.1 Categories and definitions

Category	Definition
Growing stock	Volume over bark of all living trees with a minimum diameter of 10 cm at breast height (or above buttress if these are higher). Includes the stem from ground level up to a top diameter of 0 cm, excluding branches.
Net Annual Increment (NAI)	Average annual volume of gross increment over the given reference period less that of natural losses on all trees, measured to minimum diameters as defined for "Growing stock".
Above-ground biomass	All living biomass above the soil including stem stump branches bark seeds and foliage.
Below-ground biomass	All biomass of live roots. Fine roots of less than 2 mm diameter are excluded because these often cannot be distinguished empirically from soil organic matter or litter.
Dead wood	All non-living woody biomass not contained in the litter either standing lying on the ground or in the soil. Dead wood includes wood lying on the surface dead roots and stumps larger than or equal to 10 cm in diameter or any other diameter used by the country.
Carbon in above-ground biomass	Carbon in all living biomass above the soil including stem stump branches bark seeds and foliage.
Carbon in below-ground biomass	Carbon in all biomass of live roots. Fine roots of less than 2 mm diameter are excluded because these often cannot be distinguished empirically from soil organic matter or litter.
Carbon in dead wood	Carbon in all non-living woody biomass not contained in the litter, either standing, lying on the ground, or in the soil. Dead wood includes wood lying on the surface, dead roots and stumps larger than or equal to 10 cm in diameter or any other diameter used by the country.
Carbon in litter	Carbon in all non-living biomass with a diameter less than the minimum diameter for dead wood (e.g. 10 cm) lying dead in various states of decomposition above the mineral or organic soil.
Soil carbon	Organic carbon in mineral and organic soils (including peat) to a soil depth of 30 cm.

3.2 National data

3.2.1 Data sources

	References to sources of information	Variables	Years	Additional comments
1	Dept. of Range and Forestry	Forest area	1994	N/A
2	Partial forest inventory carried out by Attalah in (1984), Natural Forests in Saudi Arabia, and the possibility to exploit it economically.	Growing stock	1984	N/A
3	National Forest Inventory (NFI) (Ongoing)	Diversity of tree spp., Growing stock	2005	N/A

4	Dept. of Range and forestry, Ministry of Agriculture.	Growing stock composition	2000	N/A
5	FAO, Guidelines for country reporting to FRA 2010 Working Paper 143. Rome 2008	Biomass expansion factor. Basic density of woods Root-shoot ratio, Carbon Fraction, carbon in litter 2008 and soil	2008	N/A

3.2.2 Classification and definitions

National class	Definition
Growing stock	Volume over bark of all living trees more than X cm in diameter at breast height (or above buttress if these are higher). Includes the stem from ground level or stump height up to a top diameter of Y cm, and may also include branches to a minimum diameter of W cm. (Same as FRA 2010)
Above-ground biomass	Same as FRA 2015
Dead wood	Same as FRA 2015
Dead wood	All non-living woody biomass not contained in the litter, either standing, lying on the ground, or in the soil. Dead wood includes wood lying on the surface, dead roots, and stumps larger than or equal to 10 cm in diameter or any other diameter used by the country. Same as FRA
Carbon in above-ground biomass	Same as FRA 2015
Carbon in below-ground biomass	Same as FRA 2015
Carbon in dead wood	Same as FRA 2015
Carbon in litter	Same as FRA 2015
Soil carbon	Organic carbon in mineral and organic soils (including peat) to a specified depth chosen by the country and applied consistently through the time series. (Same as FRA 2010)

3.2.3 Original data

Growing stock	
National class (Broad classes of forest types)	Volume (m3/ha)
Natural Forest (NF)	8.4
OWL	5.0

The above figures are expert estimates based on a partial inventory undertaken in 1984 and some preliminary findings from the ongoing NFI.

For growing stock composition no National Forest Inventory has been carried out to estimate the volume for each species. All the figures presented in the final table are rough estimates based on experience.

Biomass stock

Data on growing stock was used as input.

Carbon stock

The data on biomass stock was used as input.

3.3 Analysis and processing of national data

3.3.1 Adjustment

3.3.2 Estimation and forecasting

Growing stock

The above average volumes per hectare were applied to the area of forest and other wooded land from Question 1.

The growing stock/hectare was estimated at 4.86 and 1.5 m³/ha for Forest and Other Wooded Land respectively in 1984. It was then refined to **8.40 and 5 m³/ha respectively** based on some results of the ongoing forest inventory. This is still a very low figure, but it is the best estimate we have until more results from the ongoing NFI become available.

The area of forest is 977455 ha, the area of mangroves was added to the area of OWL to be: 959460 + 158000 = 1 1 17460 ha

Biomass stock

The following conversion factors were used (tropical Asia, deciduous and broadleaved forests)

Basic wood density for *Zizyphus Spina-christi* is 0.76 and for *Ficus* spp is 0.4, the average was considered 0.6

Biomass Expansion Factor = 2

Root-shoot ratio for broadleaf forest < 20 ton/hectare = 0.28

Dead-live ratio = 0.14

Carbon stock

The default factor of 0.47 was used to convert the biomass stock to carbon stock according to 2006 IPCC guidelines.

The soil carbon was calculated for LAC soils (35 ton/ha)

The default value for carbon stock of litter in tropical forests (2.1 ton C/ha) has been used.

3.3.3 Reclassification

3.4 Data

Table 3a

Category		Growing stock volume (million m ³ over bark)

3.5 Comments on growing stock biomass and carbon

Category	Comments related to data definitions etc	Comments on the reported trend
Total growing stock	The data for the year 2010 is more reliable. It is based on GIS survey	N/A
Growing stock of broadleaved coniferous	Expert estimate - the juniperus growing stock (coniferous) is about 37 % of the total GS - reported to all categories and years.	N/A
Growing stock composition	N/A	N/A
Net annual increment	N/A	N/A
Above-ground biomass	N/A	N/A
Below-ground biomass	N/A	N/A
Dead wood	N/A	N/A
Carbon in above-ground biomass	N/A	N/A
Carbon in below-ground biomass	N/A	N/A
Carbon in dead wood	N/A	N/A
Carbon in litter	N/A	N/A
Soil carbon	N/A	N/A

Other general comments to the table

-The weakness of this data is that only one and rough estimation of the growing stock was done in 1984, so the dynamics and productive capacity of forests and other wooded land cannot be accounted for. -There is no industrial wood production and legal removals of firewood were stopped since three years ago and for the two coming years, so officially there is no wood production during these five years. The data for the year 2010 is more accurate because it is based on actual remote sensing survey and ground truth

4. What is the status of forest production and how has it changed over time?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

4.1 Categories and definitions

Term	Definition
Primary designated function	The primary function or management objective assigned to a management unit either by legal prescription documented decision of the landowner/manager or evidence provided by documented studies of forest management practices and customary use.
Non wood forest product (NWFP)	Goods derived from forests that are tangible and physical objects of biological origin other than wood.
Commercial value of NWFP	For the purpose of this table, value is defined as the commercial market value at the forest gate.
Category	Definition
Production forest	Forest area designated primarily for production of wood, fibre, bio-energy and/or non-wood forest products.
Multiple use forest	Forest area designated for more than one purpose and where none of these alone is considered as the predominant designated function.
Total wood removals	The total of industrial round wood removals and woodfuel removals.
...of which woodfuel	The wood removed for energy production purposes, regardless whether for industrial, commercial or domestic use.

5. How much forest area is managed for protection of soil and water and ecosystem services?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

5.1 Categories and definitions

Category	Definition
Protection of soil and water	Forest area designated or managed for protection of soil and water
...of which production of clean water (<i>sub-category</i>)	Forest area primarily designated or managed for water production, where most human uses are excluded or heavily modified to protect water quality.
...of which coastal stabilization (<i>sub-category</i>)	Forest area primarily designated or managed for coastal stabilization.
...of which desertification control (<i>sub-category</i>)	Forest area primarily designated or managed for desertification control.
...of which avalanche control (<i>sub-category</i>)	Forest area primarily designated or managed to prevent the development or impact of avalanches on human life assets or infrastructure.
...of which erosion, flood protection or reducing flood risk (<i>sub-category</i>)	Forest area primarily designated or managed for protecting communities or assets from the impacts of erosion riparian floods and landslides or for providing flood plain services.
...of which other (<i>sub-category</i>)	Forest area primarily designated or managed for other protective functions.
Ecosystem services, cultural or spiritual values	Forest area primarily designated or managed for selected ecosystem services or cultural or spiritual values.
...of which public recreation (<i>sub-category</i>)	Forest area designated or managed for public recreation.
...of which carbon storage or sequestration (<i>sub-category</i>)	Forest area designated or managed for carbon storage or sequestration.
...of which spiritual or cultural services (<i>sub-category</i>)	Forest area designated or managed for spiritual or cultural services.
...of which other (<i>sub-category</i>)	Forest area designated or managed for other ecosystem services.

8. How much forest area is damaged each year?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

8.1 Categories and definitions

Category	Definition
Number of fires	Number of fires per year
Burned area	Area burned per year
Outbreaks of insects	A detectable reduction in forest health caused by a sudden increase in numbers of harmful insects.
Outbreaks of diseases	A detectable reduction in forest health caused by a sudden increase in numbers of harmful pathogens, such as bacteria, fungi, phytoplasma or virus.
Severe weather events	Damage caused severe weather events, such as snow, storm, drought, etc.

9. What is the forest area with reduced canopy cover?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

Category	Definition
Reduction in canopy cover	Forest that has undergone a reduction of canopy cover of more than 20% between the years 2000 and 2010 within the forest canopy cover range of 30-80% as detected by the MODIS VCF sensor.

Table 9

Category	Area of forest with reduced canopy cover (000 ha)
Reduction in canopy cover	N/A

Tiers

Category	Tier for reported trend
Reduction in canopy cover	N/A

Tier criteria

Category	Tier for reported trend
Reduction in canopy cover	Tier 3 : Remote sensing with ground truthing and/or Landsat imagery Tier 2 : Remote sensing using Modis (using pre-filled data provided by FAO) Tier 1 : Expert opinion

10. What forest policy and regulatory framework exists to support implementation of sustainable forest management SFM?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

10.1 Categories and definitions

Category	Definition
Policies supporting sustainable forest management	Policies or strategies that explicitly encourage sustainable forest management.
Legislation and regulations supporting sustainable forest management	Legislation and regulations that govern and guide sustainable forest management, operations and use.

10.2 National data

10.2.1 Data sources

	References to sources of information	Variables	Years	Additional comments

11. Is there a national platform that promotes stakeholder participation in forest policy development?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

11.1 Categories and definitions

Category	Definition
National stakeholder platform	A recognized procedure that a broad range of stakeholders can use to provide opinions, suggestions, analysis, recommendations and other input into the development of national forest policy.

11.2 National data

11.2.1 Data sources

	References to sources of information	Years	Additional comments

12. What is the forest area intended to be in permanent forest land use and how has it changed over time?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

12.1 Categories and definitions

Category	Definition
Forest area intended to be in permanent forest land use	Forest area that is designated or expected to be retained as forest and is highly unlikely to be converted to other land use.
...of which permanent forest estate (<i>sub-category</i>)	Forest area that is designated by law or regulation to be retained as forest and may not be converted to other land use.

12.2 National data

13. How does your country measure and report progress towards SFM at the national level?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

13.1 Categories and definitions

Category	Definition
Forest area monitored under a national forest monitoring framework	Forest area monitored by a national monitoring framework or systems that provide measurement based periodic monitoring of forest extent and quality.
Forest reporting at national scale	National reporting of forest extent and characteristics that includes some measure of progress toward sustainable forest management.

13.2 National data

13.2.1 Data sources

14. What is the area of forest under a forest management plan and how is this monitored?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

14.1 Categories and definitions

Category	Definition
Forest area with management plan	Forest area that has a long-term documented management plan, aiming at defined management goals which is periodically revised
...of which for production (<i>sub-category</i>)	Forest management plan mainly focused on production
...of which for conservation (<i>sub-category</i>)	Forest management plan mainly focused on conservation
Monitoring of forest management plans	Government monitoring of forest management plan implementation conducted through field visits or audits of forest management plan performance

14.2 National data

16. What is the area of forest under an independently verified forest certification scheme?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

16.1 Categories and definitions

Category	Definition
FSC certification	Forest area certified under the Forest Stewardship Council certification scheme
PEFC certification	Forest area certified under the Programme for the Endorsement of Forest Certification scheme
Other international forest management certification	Forest area certified under an international forest management certification scheme with published standards and is independently verified by a third-party, excluding FSC and PEFC certification.
Certified forest area using a domestic forest management certification scheme	Area certified under a forest management certification scheme with published standards that are nationally recognized and independently verified by a thirdparty

16.2 Data

17. How much money do governments collect from and spend on forests?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

17.1 Categories and definitions

Category	Definition
Forest revenue	All government revenue collected from the domestic production and trade of forest products and services. For this purpose revenue include: <ul style="list-style-type: none"> • Goods : roundwood; sawnwood; biomass; woodbased panels; pulp and paper and non-wood forest products. • Services : including concession fees and royalties, stumpage payments, public timber sales revenue taxes and charges based on forest area or yield, taxes on domestic trade and export of forest products, special levies on forestry activities and payments into forest related funds, other miscellaneous inspection, licence and administrative fees levied by forest administrations, permit and licence fees for recreation and other forest related activities.
Public expenditure on forestry	All government expenditure on forest related activities.

18. Who owns and manages the forests and how has this changed?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

18.1 Categories and definitions

Category	Definition
Public ownership	Forest owned by the State or administrative units of the public administration or by institutions or corporations owned by the public administration.
...of which owned by the state at national scale (<i>sub-category</i>)	Forest owned by the State at the national scale or administrative units of the public administration or by institutions or corporations owned by the public administration.
...of which owned by the state at the sub-national government scale (<i>sub-category</i>)	Forest owned by the State at the sub-national government scale or administrative units of the public administration or by institutions or corporations owned by the public administration.
Private ownership	Forest owned by individuals, families, communities, private cooperatives corporations and other business entities, private, religious and educational institutions, pension or investment funds, NGOs, nature conservation associations and other private institutions.
...of which individuals (<i>sub-category</i>)	Forest owned by individuals and families.
...of which private business entities and institutions (<i>sub-category</i>)	Forest owned by private corporations cooperatives companies and other business entities as well as private nonprofit organizations such as NGOs nature conservation associations, and private religious and educational institutions etc.
...of which local tribal and indigenous communities (<i>sub-category</i>)	Forest owned by a group of individuals belonging to the same community residing within or in the vicinity of a forest area or forest owned by communities of indigenous or tribal people The community members are coowners that share exclusive rights and duties and benefits contribute to the community development.
Unknown ownership	Forest area where ownership is unknown includes areas where ownership is unclear or disputed.
Categories related to management rights of public forests	Definition
Public Administration	The Public Administration (or institutions or corporations owned by the Public Administration) retains management rights and responsibilities within the limits specified by the legislation.
Individuals households	Forest management rights and responsibilities are transferred from the Public Administration to individuals or households through long-term leases or management agreements.
Private companies	Forest management rights and responsibilities are transferred from the Public Administration to corporations, other business entities private cooperatives, private nonprofit institutions and associations, etc., through long-term leases or management agreements.
Communities	Forest management rights and responsibilities are transferred from the Public Administration to local communities (including indigenous and tribal communities) through long-term leases or management agreements.
Other form of management rights	Forests for which the transfer of management rights does not belong to any of the categories mentioned above.
