

GLOBAL FOREST RESOURCES ASSESSMENT 2015

COUNTRY REPORT

Vanuatu

Rome, 2014

FAO, at the request of its member countries, regularly monitors the world's forests and their management and uses through the Global Forest Resources Assessment (FRA). This country report is prepared as a contribution to the FAO publication, the Global Forest Resources Assessment 2015 (FRA 2015).

The content and the structure are in accordance with the recommendations and guidelines given by FAO in the document Guide for country reporting for FRA 2015 (<http://www.fao.org/3/a-au190e.pdf>). These reports were submitted to FAO as official government documents.

The content and the views expressed in this report are the responsibility of the entity submitting the report to FAO. FAO may not be held responsible for the use which may be made of the information contained in this report.

TABLE OF CONTENTS

Report preparation and contact persons.....	4
1. What is the area of forest and other wooded land and how has it changed over time?	5
2. What is the area of natural and planted forest and how has it changed over time?	12
3. What are the stocks and growth rates of the forests and how have they changed?	16
4. What is the status of forest production and how has it changed over time?	22
5. How much forest area is managed for protection of soil and water and ecosystem services?	27
6. How much forest area is protected and designated for the conservation of biodiversity and how has it changed over time?	32
7. What is the area of forest affected by woody invasive species?	37
8. How much forest area is damaged each year?	40
9. What is the forest area with reduced canopy cover?	44
10. What forest policy and regulatory framework exists to support implementation of sustainable forest management SFM?	45
11. Is there a national platform that promotes stakeholder participation in forest policy development?	47
12. What is the forest area intended to be in permanent forest land use and how has it changed over time?	48
13. How does your country measure and report progress towards SFM at the national level?	51
14. What is the area of forest under a forest management plan and how is this monitored?	53
15. How are stakeholders involved in the management decision making for publicly owned forests?	55
16. What is the area of forest under an independently verified forest certification scheme?	56
17. How much money do governments collect from and spend on forests?	58
18. Who owns and manages the forests and how has this changed?	60
19. How many people are directly employed in forestry?	65
20. What is the contribution of forestry to Gross Domestic Product (GDP)?	67
21. What is forest area likely to be in the future	68

1. What is the area of forest and other wooded land and how has it changed over time?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

1.1 Categories and definitions

Category	Definition
Forest	Land spanning more than 0.5 hectares with trees higher than 5 meters and a canopy cover of more than 10 percent or trees able to reach these thresholds in situ. It does not include land that is predominantly under agricultural or urban land use.
Other wooded land	Land not classified as "Forest" spanning more than 0.5 hectares with trees higher than 5 meters and a canopy cover of 5-10 percent or trees able to reach these thresholds ; or with a combined cover of shrubs bushes and trees above 10 percent. It does not include land that is predominantly under agricultural or urban land use.
Other land	All land that is not classified as "Forest" or "Other wooded land".
...of which with tree cover (<i>sub-category</i>)	Land considered as "Other land", that is predominantly agricultural or urban lands use and has patches of tree cover that span more than 0.5 hectares with a canopy cover of more than 10 percent of trees able to reach a height of 5 meters at maturity. It includes bothe forest and non-forest tree species.
Inland water bodies	Inland water bodies generally include major rivers, lakes and water reservoirs.
Forest expansion	Expansion of forest on land that, until then, was not defined as forest.
...of which afforestation (<i>sub-category</i>)	Establishment of forest through planting and/or deliberate seeding on land that, until then, was not defined as forest.
...of which natural expansion of forest (<i>sub-category</i>)	Expansion of forests through natural succession on land that, until then, was under another land use (e.g. forest succession on land previously used for agriculture).
Deforestation	The conversion of forest to other land use or the longterm reduction of the tree canopy cover below the minimum 10 percent threshold.
...of which human induced (<i>sub-category</i>)	Human induced conversion of forest to other land use or the permanent reduction of the tree canopy cover below the minimum 10 percent threshold.
Reforestation	Natural regeneration or re-establishment of forest through planting and/or deliberate seeding on land already in forest land use.
...of which artificial reforestation (<i>sub-category</i>)	Re-establishment of forest through planting and/or deliberate seeding on land already in forest land use.

1.2 National data

1.2.1 Data sources

	References to sources of information	Variables	Years	Additional comments
1	Baldwin P. Hidson J.Siebuht J. Pedro F. 1993 Forest Resources of Vanuatu	Forest, OWL, Other land	1992	A summary of the forest resources of Vanuatu
2	FAOSTAT. 2009	Land area, Inland water	all	N/A

4	N/A	N/A	N/A	N/A

1.2.2 Classification and definitions

National class	Definition
Mid height forest (20-30m)	Mid height forest with emergents (Fme) Mid height forest with Agathis- Calophyllum (FgCl) Mid height forest with Calophyllum (FmeClAg) Mid height forest with Kleinhovia hospital (FmKh) Mid height forest with small to medium crowns (Fmml) Mid height forest with small to medium crowns; medium dense remnants (Fmm2) Mid height forest with small to medium crowns; sparse remnants (Fmmo3) Mid height forest with an open canopy (Fmo) Mid height forest with an open canopy; dense remnants (Fmol) Mid height forest with an open canopy; medium dense remnants (Fmmo3) Mid height forest with an open canopy; with Calophyllum; local Agathis (FmoCl) Mid height forest with an canopy, with emergents (Fmoe) Mid height forest with small crowns (Fms) Mid height forest with Metrosideros-weinmannia(FmW)
Low forest (10-20m)	Low forest Low forest with Acacia spirorbis (FIAs) Low forest with Barringtonia asiatica (FIBa) Low forest dominated by Casuarina equisetifolia (FICe) Low forest with Calophyllum neo-ebudicum (FICI) Low forest with Metrosideros (FIM) Low forest with Metrosideros weinmannia(FIMW) Low forest with mixed species composition (FIMx) Low forest with a high proportion of deciduous trees(Flid) Low forest with emergents (Fle) Low forest with Kleinhovia hospital (FIKh) Low forest with medium crowns (Flm) Low forest with medium crowns and emergents (Flme) Low forest with an open canopy (Flo) Low forest with an open canopy; medium dense remnants (Flo2) Low forest with an open canopy; dominated by Acacia spirorbis (FloAs) Low forest with small crowns (Fls) Low forest; swampy (Flsw)
<10m)" /> Woodland (<10m)	Woodland dominated by Acacia spirorbis (WAs)
Thicket (3-8m)	Thicket of unspecified composition (T) Thicket with Agathis-Calophyllum (TAg) Thicket dominated by Acacia spirorbis (TAs) Thicket dominated by Acacia spirorbis and Casuarina equisetifolia (TAsCe) Thicket dominated by Hibiscus tiliaceus(TB) Thicket dominated by Hibiscus tiliaceus and palms (TBPI) Thicket dominated by Casuarina equisetifolia (TCe) Thicket dominated by tree ferns (TF) Thicket dominated by tree ferns and Casuarina equisetifolia (TFCe) Thicket dominated by tree ferns and palms (TFPI) Thicket dominated by Leucaena (TL) Thicket dominated by Leucaena and Acacia spirorbis (TLAs) Thicket of Leucaena and mixed species (TLMx) Thicket with Metrosideros-Weinmannia (TMW) Thicket with Metrosideros and Pandanus Thicket of mixed species (TMx) Thicket of mixed species and palms (TMxPI) Thicket dominated by Pandanus and tree ferns (TPF) Thicket dominated by Pandanus (TP) Thicket dominated by Psidium goyava (TPg) Thicket dominated by palms and Casuarina equisetifolia (TPICe)

<3m)"/> Scrub(<3m)	Scrub of unspecified composition (S) Low scrub of Vaccinium – Cyperaceae (SV)
Grassland	Grassland and /or herbaceous communities (G) Tall grassland (Gt)
Swamp	Swamp community complex (Sw) Herbaceous swamp (Swg) Woody swamp(Sww) Sago swamp (SwMs)
Mangrove	Mangrove communities
Bare ground	Bare ground or man-made
Classifications and descriptions as defined in the Vanuatu Resource Information System (VANRIS):	N/A
Forests	Land with forest having tree canopy greater than 10m in height. This includes mid height forests of 20-30m and low forests 10-20 meters. The main type of forests that contain most of our commercial timber species for timber productions
<10m)"/> Wood land (<10m)	<10m tall. A clearly visible ground layer of herbs and /or small grasses." /> Forest areas with separated crowns, generally <10m tall. A clearly visible ground layer of herbs and /or small grasses.
Thickets (3-8m)	Forests with dense canopy of poorly formed trees and/or other arborescent life forms 3 to 8 m tall and no ground layer being visible.
<3m)"/> Scrub (<3m)	<3m tall." /> Forests that are dense to open layer of shrubs and <3m tall.
Grassland or Herbaceous communities	Land covers consisting of grasses, sedges, herbs and low woody shrubs. Few scattered trees may be present
Fresh waterSwamp communities	Land having a complex comprising thicket, scrub and herbaceous vegetation. It is subjected to permanent or near permanent inundation. Other where possible it can be mapped as woody or herbaceous.
Mangrove communities	Forest areas also having a complex comprising low trees, shrubs and herbs subjected to tidal inundation
Bare ground/man made	Land areas where there is manmade activities going on. It could be agricultural subsistence farming or any other activities or development made by inhabitants within the area

1.2.3 Original data

Forest area	
Vegetation classifications into 9 categories	
Vegetation Type	Area (Ha)
Mid height forest (20-30m)	205,307
Low forests (10-20m)	234,089
Wood land (<10m)	386

Thickets (3-8m)	433941
Scrub (<3m)	45018
Grassland	51128
Swamp communities	2261
Mangrove communities	2519
Bare ground/man made	252256
TotalLandarea	1226905

Reference Year 1992

1.3 Analysis and processing of national data

1.3.1 Adjustment

Forest area	
The national total land area does not correspond to the official FAOSTAT figures, so a calibration factor of 1.0065 has been applied.	
Source	TotalLandArea
National data	1226905
FAOSTAT	1219000
Calibration factor	1.00648
Calibrated national data	
Vegetation Type	Area (1000ha)
Mid height forest (20-30m)	204.0
Low forests (10-20m)	232.6
Wood land (<10m)	0.4
Thickets (3-8m)	431.1
Scrub (<3m)	44.7

Grassland	50.9
Swamp communities	2.2
Mangrove communities	2.5
Bare ground/man made	250.6
Total Land area	1219

1.3.2 Estimation and forecasting

Forest area
Not applicable, data are only available for one point of time.

1.3.3 Reclassification

Forest area			
National Class	Forest	OWL	Other land
Mid height forest (20-30m)	100%		
Low forests (10-20m)	100%		
Wood land (<10m)	100%		
Thickets (3-8m)		100%	
Scrub (<3m)		100%	
Grassland			100%
Swamp communities			100%
Mangrove communities	100%		
Bare ground/man made			100%

1.4 Data

Table 1a

Categories		Area (000 hectares)				
		1990	2000	2005	2010	2015

Category	Tier for status	Tier for reported trend
Forest	Tier 1	Tier 1
Other wooded land	Tier 1	Tier 1
Forest expansion	N/A	N/A
Deforestation	N/A	N/A
Reforestation	N/A	N/A

Tier criteria

Category	Tier for status	Tier for reported trend
<ul style="list-style-type: none"> • Forest • Other wooded land • Afforestation • Reforestation • Natural expansion of forest • Deforestation 	Tier 3 : Data sources: Either recent (less than 10 years ago) National Forest Inventory or remote sensing, with ground truthing, or programme for repeated compatible NFIs Tier 2 : Data sources: Full cover mapping / remote sensing or old NFI (more than 10 years ago) Tier 1 : Other	Tier 3 : Estimate based on repeated compatible tiers 3 (tier for status) Tier 2 : Estimate based on repeated compatible tier 2 or combination tier 3 and 2 or 1 (tier for status) Tier 1 : Other

1.5 Comments

Category	Comments related to data definitions etc	Comments on the reported trends
Forest	N/A	Due to the fact that only one major national forest inventory has been carried out in Vanuatu, it not possible to make trend estimates
Other wooded land	N/A	N/A
Other land	N/A	N/A
Other land with tree cover	N/A	N/A
Inland water bodies	N/A	N/A
Forest expansion	N/A	N/A
Deforestation	N/A	N/A
Reforestation	N/A	N/A

Other general comments to the table

At this stage, Vanuatu is not in a better position yet to provide an exact land size of the extent of forests and other wooded land in Vanuatu. The Department of Forests still relying on the National Forest Inventory Data gathered in 1989 # 1992 which is 17 years old data. If Vanuatu undergo another National Forestry Inventory in the future then reliable data should be used to report on to FRA as required. Vanuatu forests must be resurveyed and forest zoning as one of the priorities stated in the National Forest Policy in identifying land best suitable for production, protection and conversion. This will enable efficient reporting against each forest land types as stated above.

2. What is the area of natural and planted forest and how has it changed over time?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

2.1 Categories and definitions

Term	Definition
Naturally regenerated forest	Forest predominantly composed of trees established through natural regeneration.
Naturalized introduced species	Other naturally regenerated forest where the tree species are predominantly non-native and do not need human help to reproduce/maintain populations over time.
Introduced species	A species, subspecies or lower taxon occurring outside its natural range (past or present) and dispersal potential (i.e. outside the range it occupies naturally or could occupy without direct or indirect introduction or care by humans).
Category	Definition
Primary forest	Naturally regenerated forest of native species where there are no clearly visible indications of human activities and the ecological processes are not significantly disturbed.
Other naturally regenerated forest	Naturally regenerated forest where there are clearly visible indications of human activities.
...of which of introduced species (<i>sub-category</i>)	Other naturally regenerated forest where the trees are predominantly of introduced species.
...of which naturalized (<i>sub-sub category</i>)	Other naturally regenerated forest where the trees are predominantly of naturalized introduced species.
Planted forest	Forest predominantly composed of trees established through planting and/or deliberate seeding.
...of which of introduced species (<i>sub-category</i>)	Planted forest where the planted/seeded trees are predominantly of introduced species.
Mangroves	Area of forest and other wooded land with mangrove vegetation.
...of which planted (<i>sub-category</i>)	Mangroves predominantly composed of trees established through planting.

3. What are the stocks and growth rates of the forests and how have they changed?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

3.1 Categories and definitions

Category	Definition
Growing stock	Volume over bark of all living trees with a minimum diameter of 10 cm at breast height (or above buttress if these are higher). Includes the stem from ground level up to a top diameter of 0 cm, excluding branches.
Net Annual Increment (NAI)	Average annual volume of gross increment over the given reference period less that of natural losses on all trees, measured to minimum diameters as defined for "Growing stock".
Above-ground biomass	All living biomass above the soil including stem stump branches bark seeds and foliage.
Below-ground biomass	All biomass of live roots. Fine roots of less than 2 mm diameter are excluded because these often cannot be distinguished empirically from soil organic matter or litter.
Dead wood	All non-living woody biomass not contained in the litter either standing lying on the ground or in the soil. Dead wood includes wood lying on the surface dead roots and stumps larger than or equal to 10 cm in diameter or any other diameter used by the country.
Carbon in above-ground biomass	Carbon in all living biomass above the soil including stem stump branches bark seeds and foliage.
Carbon in below-ground biomass	Carbon in all biomass of live roots. Fine roots of less than 2 mm diameter are excluded because these often cannot be distinguished empirically from soil organic matter or litter.
Carbon in dead wood	Carbon in all non-living woody biomass not contained in the litter, either standing, lying on the ground, or in the soil. Dead wood includes wood lying on the surface, dead roots and stumps larger than or equal to 10 cm in diameter or any other diameter used by the country.
Carbon in litter	Carbon in all non-living biomass with a diameter less than the minimum diameter for dead wood (e.g. 10 cm) lying dead in various states of decomposition above the mineral or organic soil.
Soil carbon	Organic carbon in mineral and organic soils (including peat) to a soil depth of 30 cm.

4. What is the status of forest production and how has it changed over time?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

4.1 Categories and definitions

Term	Definition
Primary designated function	The primary function or management objective assigned to a management unit either by legal prescription documented decision of the landowner/manager or evidence provided by documented studies of forest management practices and customary use.
Non wood forest product (NWFP)	Goods derived from forests that are tangible and physical objects of biological origin other than wood.
Commercial value of NWFP	For the purpose of this table, value is defined as the commercial market value at the forest gate.
Category	Definition
Production forest	Forest area designated primarily for production of wood, fibre, bio-energy and/or non-wood forest products.
Multiple use forest	Forest area designated for more than one purpose and where none of these alone is considered as the predominant designated function.
Total wood removals	The total of industrial round wood removals and woodfuel removals.
...of which woodfuel	The wood removed for energy production purposes, regardless whether for industrial, commercial or domestic use.

4.2 National data

4.2.1 Data sources

4	N/A	N/A	N/A	N/A

4.2.2 Classification and definitions

National class	Definition
Production Forests	Production forests are forests identified and mapped for which the main management emphasis will be on long term timber production and further classified into:- <ul style="list-style-type: none"> • Natural forests management areas • Land suitable for plantation reforestation • Cleared land suitable for afforestation

Conversion Forests	Forest areas where they are suitable to be cleared for alternative land uses.
Uncommitted Forests	Forests areas where a use classification has not yet been determined. It can be converted into any three forest types stated above.

5. How much forest area is managed for protection of soil and water and ecosystem services?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

5.1 Categories and definitions

Category	Definition
Protection of soil and water	Forest area designated or managed for protection of soil and water
...of which production of clean water (<i>sub-category</i>)	Forest area primarily designated or managed for water production, where most human uses are excluded or heavily modified to protect water quality.
...of which coastal stabilization (<i>sub-category</i>)	Forest area primarily designated or managed for coastal stabilization.
...of which desertification control (<i>sub-category</i>)	Forest area primarily designated or managed for desertification control.
...of which avalanche control (<i>sub-category</i>)	Forest area primarily designated or managed to prevent the development or impact of avalanches on human life assets or infrastructure.
...of which erosion, flood protection or reducing flood risk (<i>sub-category</i>)	Forest area primarily designated or managed for protecting communities or assets from the impacts of erosion riparian floods and landslides or for providing flood plain services.
...of which other (<i>sub-category</i>)	Forest area primarily designated or managed for other protective functions.
Ecosystem services, cultural or spiritual values	Forest area primarily designated or managed for selected ecosystem services or cultural or spiritual values.
...of which public recreation (<i>sub-category</i>)	Forest area designated or managed for public recreation.
...of which carbon storage or sequestration (<i>sub-category</i>)	Forest area designated or managed for carbon storage or sequestration.
...of which spiritual or cultural services (<i>sub-category</i>)	Forest area designated or managed for spiritual or cultural services.
...of which other (<i>sub-category</i>)	Forest area designated or managed for other ecosystem services.

6. How much forest area is protected and designated for the conservation of biodiversity and how has it changed over time?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

6.1 Categories and definitions

Category	Definition
Conservation of biodiversity	Forest area designated primarily for conservation of biological diversity. Includes but is not limited to areas designated for biodiversity conservation within the protected areas.
Forest area within protected areas	Forest area within formally established protected areas independently of the purpose for which the protected areas were established.

6.2 National data

6.2.1 Data sources

	References to sources of information	Variables	Years	Additional comments
1	Conservation unit, Department of Forests,	N/A	2005, 2007	Summary of existing and proposed conservation areas
2	Environment Unit	N/A	1990	Protected areas
3	N/A	N/A	N/A	N/A
4	N/A	N/A	N/A	N/A

6.2.2 Classification and definitions

National class	Definition
Protection Forests	A forests declared as a Protected area purposely referring to environment and promote forest development consistent with the principals of sustainable development, recognition and respect the rights of resource owners on protecting sites of cultural, historical, archaeological, geomorphic, biological or spiritual significance. In addition to this promoting the conservation measures for flora and fauna, maintain forest regenerative capacity and species diversity, ensure the health and safety of forest workers and maximize the economic return from the forests

N/A	N/A
N/A	N/A

6.2.3 Original data

Vanuatu Department of forests has data on both existing and proposed conservation/protected areas in Vanuatu. The areas have been mapped by on screen digitising and yet to be properly mapped using GPS to get precise location of the individual areas.

1. Existing Declared Protected areas

Conservation Area	Location	ForestType conserved	Area (ha)
Erromango Kauri Reserve	Happy Land, South Erromango	Mid height forests	3,025
Wiawi Protected Area	Wiawi, NE Malekula	Coastal & lowland forests	1,056
Vatthe Conservation Area	Big Bay, NE Santo	Coastal & Lowland forests	2,760
Loru Protected Area	Khole, East Santo	Coastal & Lowland forest	50
Etaslep Protected area	East Efate	Cultural trees Banyan trees and flying foxes	5
Efate Reserve Park	Teuoma, Efate	Mid height forests with native stands and water catchment, etc	19
TOTAL			6,915

1. Proposed conservation areas

Conservation Area	Location	ForestType conserved	Area (ha)
Antioch area	South east Erromango	Native forests	2,000
Nagingo point Ex- Situ area	Tangoa, South Santo	Coastal forests	3,000
Middle bush area	NW Tanna	Cultural site	265
Nevnal area	Leviamp, Malekula	Marine areas	400
Pankumu area	Unua/Tisman	Water catchment area	215

Aserehubwe area	Labwaru, N Pentecost	Lowland forests, wildlife, and native forests	355
Bai area	Bai, N Epi	Historical sites	150
Spuaki area	Mere, Nguna	Coastal forests	120
Vanbounq area	Namaram, C Pentecost	Coastal and low land forests	300
Togongo and Borgalia area	Burumba, Epi	Low land forests	200
Nial ex-situ area	Malekula	Cultural sites	500

9. What is the forest area with reduced canopy cover?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

Category	Definition
Reduction in canopy cover	Forest that has undergone a reduction of canopy cover of more than 20% between the years 2000 and 2010 within the forest canopy cover range of 30-80% as detected by the MODIS VCF sensor.

Table 9

Category	Area of forest with reduced canopy cover (000 ha)
Reduction in canopy cover	87.96

Tiers

Category	Tier for reported trend
Reduction in canopy cover	Tier 2

Tier criteria

Category	Tier for reported trend
Reduction in canopy cover	Tier 3 : Remote sensing with ground truthing and/or Landsat imagery Tier 2 : Remote sensing using Modis (using pre-filled data provided by FAO) Tier 1 : Expert opinion

Comments

Category	Comments related to data definitions etc
Reduction in canopy cover	Tier 2 data from Modis

Other general comments

Tier 2: Remote sensing using Modis (using pre-filled data provided by FAO)

10. What forest policy and regulatory framework exists to support implementation of sustainable forest management SFM?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

10.1 Categories and definitions

Category	Definition
Policies supporting sustainable forest management	Policies or strategies that explicitly encourage sustainable forest management.
Legislation and regulations supporting sustainable forest management	Legislation and regulations that govern and guide sustainable forest management, operations and use.

10.2 National data

10.2.1 Data sources

13. How does your country measure and report progress towards SFM at the national level?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

13.1 Categories and definitions

Category	Definition
Forest area monitored under a national forest monitoring framework	Forest area monitored by a national monitoring framework or systems that provide measurement based periodic monitoring of forest extent and quality.
Forest reporting at national scale	National reporting of forest extent and characteristics that includes some measure of progress toward sustainable forest management.

13.2 National data

13.2.1 Data sources

14. What is the area of forest under a forest management plan and how is this monitored?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

14.1 Categories and definitions

Category	Definition
Forest area with management plan	Forest area that has a long-term documented management plan, aiming at defined management goals which is periodically revised
...of which for production (<i>sub-category</i>)	Forest management plan mainly focused on production
...of which for conservation (<i>sub-category</i>)	Forest management plan mainly focused on conservation
Monitoring of forest management plans	Government monitoring of forest management plan implementation conducted through field visits or audits of forest management plan performance

16. What is the area of forest under an independently verified forest certification scheme?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

16.1 Categories and definitions

Category	Definition
FSC certification	Forest area certified under the Forest Stewardship Council certification scheme
PEFC certification	Forest area certified under the Programme for the Endorsement of Forest Certification scheme
Other international forest management certification	Forest area certified under an international forest management certification scheme with published standards and is independently verified by a third-party, excluding FSC and PEFC certification.
Certified forest area using a domestic forest management certification scheme	Area certified under a forest management certification scheme with published standards that are nationally recognized and independently verified by a thirdparty

16.2 Data

17. How much money do governments collect from and spend on forests?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

17.1 Categories and definitions

Category	Definition
Forest revenue	All government revenue collected from the domestic production and trade of forest products and services. For this purpose revenue include: <ul style="list-style-type: none"> • <u>Goods</u> : roundwood; sawnwood; biomass; woodbased panels; pulp and paper and non-wood forest products. • <u>Services</u> : including concession fees and royalties, stumpage payments, public timber sales revenue taxes and charges based on forest area or yield, taxes on domestic trade and export of forest products, special levies on forestry activities and payments into forest related funds, other miscellaneous inspection, licence and administrative fees levied by forest administrations, permit and licence fees for recreation and other forest related activities.
Public expenditure on forestry	All government expenditure on forest related activities.

17.2 National data

17.2.1 Data sources

	References to sources of information	Variables	Years	Additional comments
1	Dept. Of Forests Business Plan 2003	N/A	2000 2002 2003	Summary of expenditures similar for 2000 & 2001

18. Who owns and manages the forests and how has this changed?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

18.1 Categories and definitions

Category	Definition
Public ownership	Forest owned by the State or administrative units of the public administration or by institutions or corporations owned by the public administration.
...of which owned by the state at national scale (<i>sub-category</i>)	Forest owned by the State at the national scale or administrative units of the public administration or by institutions or corporations owned by the public administration.
...of which owned by the state at the sub-national government scale (<i>sub-category</i>)	Forest owned by the State at the sub-national government scale or administrative units of the public administration or by institutions or corporations owned by the public administration.
Private ownership	Forest owned by individuals, families, communities, private cooperatives corporations and other business entities, private, religious and educational institutions, pension or investment funds, NGOs, nature conservation associations and other private institutions.
...of which individuals (<i>sub-category</i>)	Forest owned by individuals and families.
...of which private business entities and institutions (<i>sub-category</i>)	Forest owned by private corporations cooperatives companies and other business entities as well as private nonprofit organizations such as NGOs nature conservation associations, and private religious and educational institutions etc.
...of which local tribal and indigenous communities (<i>sub-category</i>)	Forest owned by a group of individuals belonging to the same community residing within or in the vicinity of a forest area or forest owned by communities of indigenous or tribal people The community members are coowners that share exclusive rights and duties and benefits contribute to the community development.
Unknown ownership	Forest area where ownership is unknown includes areas where ownership is unclear or disputed.
Categories related to management rights of public forests	Definition
Public Administration	The Public Administration (or institutions or corporations owned by the Public Administration) retains management rights and responsibilities within the limits specified by the legislation.
Individuals households	Forest management rights and responsibilities are transferred from the Public Administration to individuals or households through long-term leases or management agreements.
Private companies	Forest management rights and responsibilities are transferred from the Public Administration to corporations, other business entities private cooperatives, private nonprofit institutions and associations, etc., through long-term leases or management agreements.
Communities	Forest management rights and responsibilities are transferred from the Public Administration to local communities (including indigenous and tribal communities) through long-term leases or management agreements.
Other form of management rights	Forests for which the transfer of management rights does not belong to any of the categories mentioned above.

18.5 Comments

Category	Comments related to data definitions etc	Comments on the reported trend
Public ownership	N/A	No surveys has determine a possible trend of public ownership on forests in Vanuatu.
Private ownership	N/A	There are some private institutions owning some Sandalwood plantations under leased lands. Actually they own the trees in their plantations established. Only three private institutions (Far North Timber Sales, Equity Investment and Tropical Rainforest aromatics) have been establishing three Sandalwood plantations on Efate while the only largest sawmill industry in Santo/Vanuatu owns a whitewood plantation. However the number of plantations owned is very small compared to woodlots owned by the indigenous.
