iRecruitment - Browser Requirements

iRecruitment is currently compatible with Windows PC only. Other operating systems such as Linux, Mac are not supported. The system is set up to work with most computers default browser settings. However, in the event that you experience technical problems, please follow the steps below to ensure that your Internet Explorer settings are set appropriately to enable you successful navigation of the site:

Version and Cipher Strength

Ensure your Internet Explorer is version 6.0 or above and your cipher strength is 128 bit or above. To verify, from your browser tool bar click on Help and then select About Internet Explorer.

The About Internet Explorer window will be displayed.

Disable Pop-up Blockers

Ensure you have disabled all pop-up blockers which may prevent Oracle web pages from launching. Go to your Pop-up Blocker settings to disable the tool WHILE YOU ARE USING ORACLE APPLICATIONS.

To verify, from the Internet Explorer menu bar click on Tools >Pop-up Blocker> Turn Off Pop-Up Blocker.
**Additional Browser Requirements**

If you still encounter problems once you have the minimum browser requirements setup on your computer, please review the following sections.

**Disable Script Debugging**

Ensure your browser is set to **Disable Script Debugging**. To verify, click on **Tools** at your web browser tool bar and then select **Internet Options**.

1. **Click here**

2. The **Internet Options** window will be displayed. Click on the **Advanced** tab.
Enable Active and Java Scripting

Ensure Active and Java Scripting are enabled.

1. From your web browser tool bar, click on Tools and then select Internet Options.

2. Click on the Security tab.

3. The next screen will be displayed; click on the Custom Level button.

4. Verify that Active scripting and Scripting of Java applets are enabled under the Scripting section as shown on the next page.
5. Click on the Advanced tab to ensure that Disable Script Debugging has been selected. Click OK.

**Refresh Web Pages**

We advise you to do the following, although it is an optional step.

1. Click on Tools at your browser tool bar and then on Internet Options. Click on the General tab and then click on Settings at the Temporary Internet files section.
2. Select Every visit to the page and set Amount of disk space to use to 50MB.

Clear Internet Files and Delete Cookies

1. To Clear Temporary Internet Files

To ensure that your temporary internet files have been cleared, click on Tools at your browser tool bar. Then click on the tab General.

a. Go to the section Temporary Internet Files and click on Delete Files.
2. The **Delete Files** window will be displayed. Tick the check box for **Delete all offline content** and then click OK.
