Web-based products

- The **Cultured Aquatic Species (CASIP)** collection has been enriched with the **new** fact sheets of [greater amberjack](#) (*Seriola dumerilii*) and [striped bass, hybrid](#) (*Morone* hybrid).

Projects

- **GCP/HAI/030/EC** entitled “Improving food security in the North East of Haiti”. The project has adopted a Farmer Field Schools (FFS) approach to build up a platform for learning and experience sharing among the selected beneficiaries (mainly small-scale farmers and fishermen). The project has several agriculture production components. The aquaculture component includes three main activities: (1) in site production of red tilapia hybrid (*Oreochromis mossambicus x Oreochromis niloticus*) fingerlings; (2) growing out red tilapia in floating cages in lakes; and (3) establishing good practices for fish processing and marketing.
