## FOREWORD

---

The Market and Policy Analyses of Raw Materials, Horticulture and Tropical Products Team provides economic data and analyses on major agricultural raw materials and horticultural and tropical products. Commodities covered under the Team include, bananas and tropical fruits, citrus fruits, cotton, hard fibres (abaca, coir and sisal), hides and skins, jute, kenaf and allied fibres, sugar, and tea.

The Team also undertakes market reviews, outlook appraisals and projections, and provides assistance to developing countries in designing and implementing national policies for those agricultural commodities which enter into international trade.

This document is the sixteenth edition of the *World Statistical Compendium*, whose first issue was published in 1980.

The present edition, prepared in response to the ever growing demand for coherent statistical data in the hides, skins and derived products sector, contains up-dated figures up to 2014. Country series have been revised in cases where new information has become available and an integrated approach used in the previous compendia has been adopted.

The compendium contains results of statistical analysis of some 190 countries linking stages of processing from the raw hide to the finished product stage. The methodological approach adopted is described in more detail in the 1986 edition.

Please note that some countries are listed under different country groups, for different years, according to their change in geographic aggregation.

The detailed statistical data on production, utilization and trade of hides and skins, leather and leather footwear are preceded by eleven summary tables highlighting the salient features and changes which have taken place in the hides and skins and leather sub-sector.

Despite progress in enhancing the coherence and comparability of the data presented, shortcomings still exist. In particular, the growing difficulty encountered during the years in finding and collecting comprehensive and reliable data on leather and footwear production at world level, has led to the total estimation of the figures shown for heavy leather, light leather from bovine and light leather from sheep and goats. Production estimates are based on the availability of raw material and on volume of exports.

Please note that subheading 4103.10 (goatskins and kidskins) has been deleted from the harmonized commodity coding system of the World Customs Organization as of 1.1.2007 because of the low volume of trade. Therefore, collection of trade data on raw goatskins and kidskins is discontinued. This change affects tables IV, V, 12, 15, 18 and 21.

## SUMMARY TABLES

Summary Tables I-XI have been aggregated from country data presented in the Compendium. They provide information on the hides and skins, leather and leather manufactures economy at global and regional levels.

- Table I: Raw Hides and Skins, Leather and Leather Footwear: Production, Trade and Apparent Availability Balance at All Levels of Processing, Average 2011-2013
- Table II: Raw Hides and Skins: Factors determining Level of Output, Average 2011-2013
- Table III: Raw Hides and Skins: Changes in Output by Type and Economic Zone
- Table IV: Raw Hides and Skins: Exports by Type and Economic Zone
- Table V: Raw Hides and Skins: Structure of World Trade
- Table VI: Leather: Output by Type and Economic Zone
- Table VII: Leather: Exports by Type and Economic Zone
- Table VIII: Footwear with Leather Uppers: Production, Trade and Availability by Economic Zone
- Table IX: Leather Manufactures: Changes in Utilization of Leather in Footwear and Other Leather Products
- Table X: Hides, Skins, Leather, Leather Footwear: Value of Exports
- Table XI: Hides, Skins, Leather and Leather Footwear: Their Significance in Relation to Trade in Other Commodities, Average 2009-2011

<sup>1/</sup> Theoretically, net trade at the global level should be close to zero, but in practice due to shipping time and reporting discrepancies the difference can be significant.

<sup>2/</sup> Wet salted for bovine, dry without wool for sheep and dry for goat

<sup>3/</sup> While there is a certain quantity of leather from sheep and goat going into footwear, leather shoes balances have only been shown against the bovine part of the table for reasons of simplicity and lack of data.

Apparent Availability = Production + Imports - Exports.

Net Trade = Exports - Imports
