Toolkit

www.fao.org/nutrition/policies-programmes/toolkit

► Key recommendations for improving nutrition through agriculture and food systems
  • 10 recommendations for designing food and agriculture programmes in a nutrition-sensitive way
  • 5 recommendations for creating an enabling environment for nutrition-sensitive food systems

► Designing nutrition-sensitive agriculture investments. Checklist and guidance for programme formulation
  • Key questions, tips, and sources of information for situation analysis, programme design, monitoring and evaluation, in order to operationalize the Key recommendations

► Nutrition-sensitive agriculture and food systems in practice. Options for intervention
  • 20 interventions with the potential to improve nutrition, organised around 4 key functions of the food system and as cross-cutting issues

► Compendium of indicators for nutrition-sensitive agriculture
  • Guidance on a range of indicators for monitoring and evaluating the nutritional impacts of agricultural investments
The course illustrates the linkages between agriculture, food systems and nutrition, and provides concrete examples of opportunities for integrating nutrition into food and agriculture policies, investments and programmes.
