Agreeing on causes of malnutrition for joint action

Learn to handle workshops for joint action
in nutrition

www.fao.org/elearning/#/elc/en/course/ACMJA

My name is Jaden and I will take you through a journey in the fictional country of Namambar, close to field realities.

Together, we will facilitate a workshop and **improve our skills** in designing integrated strategies that **address the root causes of malnutrition** and **strengthen resilience**, by combining agriculture, health, education, social affairs and many other sectors.

For more information, please visit:

www.fao.org/nutrition/policies-programmes

The workshop methodology uses the malnutrition problem and solution trees. This tool is very powerful **to better understand the complexity of and the interrelations between causes of malnutrition.** It helps to **build consensus** among participants and strengthen ownership of nutrition issues.

The module is designed into 4 phases:

- The preparation of the workshop;
- The introductory and Problem tree sessions;
- The solution tree session;
- The action-Plan session and the follow-up of the workshop.
