World agriculture: towards 2030/2050

Interim report

Prospects for food, nutrition, agriculture
and major commodity groups

Global Perspective Studies Unit
Food and Agriculture Organization of the United Nations
Rome, June 2006

This interim report presents an update, revision and extension to 2050 of Chapters 2 and 3 of the *FAO Study World agriculture: towards 2015/2030, an FAO Perspective*, published in 2003 (Bruinsma, 2003). It is mainly meant to disseminate interim results and to solicit comments, as an intermediate step in the preparation of a more complete report.

Comments can be send to:

Chief, Global Perspective Studies Unit
Food and Agriculture Organization of the UN

Acknowledgement: This report was prepared by Nikos Alexandratos in collaboration with Jelle Bruinsma, Gerold Bödeker, Josef Schmidhuber, Sumiter Broca, Prakash Shetty and Maria Grazia Ottaviani.

The designations employed and the presentation of the material in this information product do not imply the expression of any opinion whatsoever on the part of the Food and Agriculture Organization of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

In the presentation of statistical material, countries are, where appropriate, aggregated in the following main economic groupings: "Developed countries" (including the developed market economies or 'Industrial countries' and the Transition countries) and "Developing countries". The designation "developed" and "developing" economies is intended for statistical convenience and does not necessarily express a judgement about the stage of development reached by a particular country.

Contents

Chapter 1 Overview	1
1.1 Why the new outlook to 2050	1
1.2 Main findings	3
1.3 Conclusions	7
Chapter 2 Prospects for food and nutrition	8
2.1 The broad picture: historical developments and present situation	8
2.2 The outlook for food and nutrition to 2015, 2030 and 2050	16
2.3 Structural changes in the commodity composition of food consumption	22
2.4 Concluding remarks	
Chapter 3 Prospects for agriculture and major commodity groups	30
3.1 Aggregate agriculture: historical trends and prospects	30
3.2 Cereals	36
3.3 Livestock commodities	45
3.4 Oilcrops, vegetable oils and products	52
3.5 Roots, tubers and plantains	58
3.6 Sugar	60
3.7 Concluding remarks	64
Appendix: Countries and commodities	66
References	69

List of Tables

Table 2.1	Per capita food consumption (kcal/person/day)	8
Table 2.2	Population living in countries with given per capita food consumption	10
Table 2.3	Prevalence of undernourishment, developing countries	14
Table 2.4	Population data and projections	16
Table 2.5	Income growth assumptions	17
Table 2.6	Estimates and projections of \$1 poverty, World Bank	19
Table 2.7	Changes in the commodity composition of food consumption by major country groups	25
Table 2.8	Changes in the commodity composition of food consumption, developing regions	26
Table 3.1	Growth rates of aggregate demand and production	33
Table 3.2	Cereal balances, world and major country groups	39
Table 3.3	Cereal balances, developing regions	40
Table 3.4	Wheat, rice and coarse grains: Demand and production	41
Table 3.5	Wheat, rice and coarse grains: Net trade balances	44
Table 3.6	World cereals trade: Matching net balances of importers and exporters	44
Table 3.7	Meat: Aggregate production and demand	47
Table 3.8	Milk and dairy products	50
Table 3.9	Oilcrops, vegetable oils and products, production and demand	53
Table 3.10	Sources of increases in world production and consumption of oilcrops	54
Table 3.11	Net trade balances for oilseeds, oils and products	55
Table 3.12	Major oilcrops, world production	56
Table 3.13	Sugar (raw sugar equivalent)	62

List of Boxes

Box 2.1	Indian paradox: Near stagnant average food consumption in midst of rapid economic growth	11
Box 2.2	Measuring the prevalence of undernourishment: the key role of the estimates of food available for direct human consumption	14
Box 2.3	Countries with high population growth for 50 years and limited agricultural resources: An untenable combination	17
Box 3.1	Measuring change in agricultural aggregates	31
Box 3.2	Uncertainties concerning China's cereals consumption and stocks	38

List of Figures

Figure 2.1	Per capita food consumption, developing countries with over 100 million population in 2000.	9
Figure 2.2	Evolution of apparent food consumption/capita in relation to income per capita: three country typologies	9
Figure 2.3	Developing countries with under 2200 kcal in 1999/01. Highest and lowest 5-year average kcal recorded during 1961-2001	13
Figure 2.4	Growth rates of per capita GDP, 1980s, 1990s and 2001-15	18
Figure 2.5	Countries with undernourished over 40 percent in 1999/01	22
Figure 3.1	Net agricultural trade balance: Developing countries, 1961-2004	32
Figure 3.2	Developing countries excluding Brazil, net trade balances by major commodity groups, 1984-2004	34
Figure 3.3	Developing countries, net exports of coffee	35
Figure 3.4	World cereals production: Growth rates in successive 10-, 20-, 30-, and 40-year periods	37
Figure 3.5	China: Production, stocks and two views on consumption; aggregate of wheat, maize, rice and barley	38
Figure 3.6	Per capita consumption (all uses) of individual cereals	42
Figure 3.7	Coarse grains: Food and non-food use	42
Figure 3.8	Cereals: Importers and exporters	45
Figure 3.9	Meat: Net trade, major importer/exporter country groups	48
Figure 3.10	Dairy net trade: Developing countries and EU15	49
Figure 3.11	Sugar: Net trade positions, 1970-2002	60
Figure 3.12	Industrial use of sugar (Brazil and rest of world) and (Brazil only) alcohol production	61
