Women’s Empowerment

FAO’s Dimitra project has been running in Africa for over 20 years, and it has become a label of quality for improving gender equality and women’s visibility as agricultural producers and agents of change.

By the end of 2017, an estimated 57,000 people, two-thirds of them women, were taking part in 1,900 clubs, which meet regularly to decide how to face key challenges.

Blue Growth

In 2015, district authorities, fishermen and fish farmer representatives of Kenya were trained on how to implement an ecosystem approach to aquaculture. The knowledge base of the ecosystem services was also improved and will serve as a basis for an upcoming action plan covering governance and good practices implementation.

Climate-Smart Agriculture

The Dry Corridor of Central America—particularly those areas in Guatemala, Honduras and El Salvador—has become increasingly prone to extreme weather, damaging livelihoods and worsening poverty. Prolonged droughts, exacerbated by El Niño from 2014-2016, have led to over 3.5 million people needing humanitarian assistance.

By the end of 2017, an estimated 57,000 people, two-thirds of them women, were taking part in 1,900 clubs, which meet regularly to decide how to face key challenges.

The FMM has been FAO’s main pooled funding mechanism for partners willing to contribute flexible funds to the Organization since 2010. It has allowed FAO to test and/or support the scaling up of proven and innovative development initiatives at global, regional and country levels.

Flexible funding is indispensable for responding to development challenges in a timely and cost-effective manner.

The FMM has enabled investments in new approaches and practices, and the strengthening of capacities to help women and men in rural communities respond to pressing challenges, while also creating global impact through the development and dissemination of knowledge products.

Why join the FMM: working towards the SDGs

Pooled funding mechanisms have a strong track-record in strengthening coherence and coordination; broadening the contributor base; improving risk management and leverage; and providing better incentives for collaboration within the UN Development System or across pillars in relevant contexts.  

The interconnected nature of the Sustainable Development Goals (SDGs), calls for integrated approaches to development, expanded partnerships, innovation and financial predictability. It also encourages cross-sectoral responses and requires the aid community to break sectoral silos.

Galvanizing partnerships and mobilizing pooled resources increases the chances of achieving the Sustainable Development Goals (SDGs) and the 2030 Agenda.

Why join the FMM:
- Better coherence at country levels.
- Greater flexibility in programme implementation.
- Stronger impact on the ground.
- Opportunities for ambitious approaches.
- Greater financial predictability.
- Greater predictability, trust in the UN.
- Greater financial predictability.
- Greater predictability, trust in the UN.
- Greater financial predictability.
- Greater predictability, trust in the UN.  

FMM contributions to FAO Strategic Programmes

Make agriculture, forestry and fisheries more productive and sustainable

Reduce rural poverty

Enable inclusive and efficient agricultural and food systems

FMM has supported....

- Rwanda + Morocco + Bangladesh
- Policy and capacity development on sustainable food and agriculture promoted

- Mongolia + Indonesia + Liberia
- Policy dialogue on governance of tenure facilitated

- Angola + Ethiopia + South Africa
- Food security monitoring implemented

- Lebanon + Cambodia + Philippines
- Landscape restoration implemented

- Egypt + Morocco
- Food loss and waste reduction promoted

- Cabo Verde + Guinea + Kenya
- Blue growth stimulated

- Senegal + Nepal + Tajikistan
- Investments in agriculture and rural development in migration-prone areas promoted

- Mali + Burundi
- Rural organizations and institutions strengthened

- Niger + Democratic Republic of Congo + Ghana
- Gender-sensitive participatory approaches enhanced

- Guatemala + Uganda
- Decent rural youth employment supported

- Thailand + Zambia + Uruguay
- Climate-smart agriculture implemented

- Senegal + Rwanda
- Digital inclusion for smallholders and family farmers implemented

- Bolivia + Honduras + Ecuador
- AMR containment supported

What is the FMM?

Providing the system with more predictable and flexible resources is not only about reassuring trust in the UN. It is about investing in results for the people we serve, and it allows to strengthen the system’s ability to address critical global challenges.

The FMM has been FAO’s main pooled funding mechanism for partners willing to contribute flexible funds to the Organization since 2010. It has allowed FAO to test and/or support the scaling up of proven and innovative development initiatives at global, regional and country levels.

Flexible funding is indispensable for responding to development challenges in a timely and cost-effective manner.

The FMM has enabled investments in new approaches and practices, and the strengthening of capacities to help women and men in rural communities respond to pressing challenges, while also creating global impact through the development and dissemination of knowledge products.

Why join the FMM: working towards the SDGs

Pooled funding mechanisms have a strong track-record in strengthening coherence and coordination; broadening the contributor base; improving risk management and leverage; and providing better incentives for collaboration within the UN Development System or across pillars in relevant contexts.

The interconnected nature of the Sustainable Development Goals (SDGs), calls for integrated approaches to development, expanded partnerships, innovation and financial predictability. It also encourages cross-sectoral responses and requires the aid community to break sectoral silos.

FMM contributions to FAO Strategic Programmes

Less earmarked funds can....

- Reduce transaction costs through simplified and harmonized processes that avoid duplication.
- Reduce fragmentation by applying a consistent programmatic approach.
- Help achieve catalytic and multiplier effects by fostering cross-sectoral integration.
- Help improve aid coordination and coherence through pooled funding, joint programming and shared outcomes.
- Facilitate transformative change by supporting scaling up and innovative initiatives.
