A database of stocks and fisheries inventoried at global level with standard unique identifiers

Sources of information: Fisheries and Resources Monitoring System (FIRMS), FishSource and RAM legacy Stock Assessment Database

A tool to support:

- **SDG 14.4.1** “Proportion of fish stocks within biologically sustainable levels”
- Traceability and ecolabelling schemes connecting seafood industries and consumers to the status of stocks and fisheries

**Global Record of Stocks and Fisheries (GRSF)**

- Stock status (reported at national, regional level) - SDG 14.4.1 indicator
- Traceability schemes
