INTRODUCTION

Only with knowledge can we free the world from hunger, malnutrition and poverty. According to the Basic Texts of the Food and Agriculture Organization of the United Nations (FAO), the Organization's first function is to "collect, analyse, interpret and disseminate information relating to nutrition, food and agriculture".

FAO plays a unique role as a neutral forum, providing unbiased, high-quality information across all areas relating to food, agriculture and sustainable natural resources management. In 2019 FAO published 766 publications, ranging from authoritative analysis for policy-makers and expert guidance for farmers to general knowledge for young people.

In addition to English, numerous reports were also produced in Arabic, Chinese, French, Russian and Spanish.

This catalogue includes a selection of the Organization's most recent titles, as well as some older publications that have become references in their respective fields. The Sustainable Development Goals (SDGs), agreed by the United Nations and the international community in 2015, provide the roadmap guiding all of FAO's work.

FLAGSHIPS

FAO'S FLAGSHIPS ARE THE LEADING PUBLICATIONS WITHIN THEIR RESPECTIVE DOMAINS. THEY STAND TOGETHER AS A COMPREHENSIVE OVERVIEW OF **THE STATE OF THE WORLD**.

COMMODITY
MARKETS**

FAO's "The State of the World" publications provide a comprehensive overview of the most pressing global issues and challenges affecting the world today. These global reports are considered to be the most important FAO products in a given programme or thematic area. They primarily target policy-makers and decision-makers, but are also relevant to experts, academia, students, the media and the general public.

THE STATE OF FOOD SECURITY AND NUTRITION IN THE WORLD 2019

SAFEGUARDING AGAINST ECONOMIC SLOWDOWNS AND DOWNTURNS

FAO, IFAD, UNICEF,
WFP & WHO, Rome 2019
ISBN 978-92-5-131570-5; 236 pp.,
210 x 297 mm, USD 70.00,
Paperback; Also available in e-book
format, Available in Arabic, Chinese,
English, French, Russian, Spanish

*This yearly report informs on
progress towards ending hunger,
achieving food security and
improving nutrition, and analyses
the key challenges to achieving
these goals.*

According to this year's report,
hunger is increasing in many
countries where economic
growth is lagging, particularly
in middle-income countries
and those that rely heavily on
international primary commodity
trade. Income inequality is rising

in many of the countries where
hunger is on the rise, making it
even more difficult for the poor,
vulnerable or marginalized to
cope with economic slowdowns
and downturns. This calls for
integrating food security and
nutrition into poverty reduction

efforts, while reducing gender
inequalities and social exclusion.

THE STATE OF AGRICULTURAL COMMODITY MARKETS 2018

AGRICULTURAL TRADE, CLIMATE CHANGE AND FOOD SECURITY

Global agricultural trade has increased significantly in value terms since 2000. Its pattern has also changed: emerging economies and developing countries play a bigger role in international markets, and South–South agricultural trade has expanded significantly. Climate change is expected to affect agriculture, food security and nutrition unevenly across countries and regions. Changes in comparative advantage in agriculture around the world will also affect international trade. This edition of **The State of Agricultural Commodity Markets** focuses on the role of agricultural trade in promoting food security and sustainable agricultural production in the context of climate change.

Published biennially, the series presents commodity market issues in an objective and accessible way to policy-makers, commodity market observers and stakeholders interested in these issues.

THE STATE OF FOOD AND AGRICULTURE 2019

MOVING FORWARD ON FOOD LOSS AND WASTE REDUCTION

This year's edition provides new estimates of the percentage of the world's food lost from production up to the retail level. It suggests that identifying and understanding critical loss points in specific supply chains – where considerable potential exists for reducing food losses – is crucial to deciding on appropriate measures. It also provides some guiding principles for interventions

based on the objectives being pursued through food loss and waste reductions, be they in improved economic efficiency, food security and nutrition, or environmental sustainability.

This series, published annually, aims at bringing to a wider audience balanced science-based assessments of important issues in the field of food and agriculture.

PRESS RELEASE

Key messages

1. Reducing food loss and waste is a key objective of the Sustainable Development Goals (SDGs), in particular SDG 12, which calls for responsible consumption and production. This is a challenge that requires action at all levels of the food system, from production to consumption.

Forests and trees make vital contributions to both people and the planet, bolstering livelihoods, providing clean air and water, conserving biodiversity and responding to climate change. **The State of the World's Forests 2018** provides new information on the interlinkages between forests and trees and the Sustainable Development Goals, shedding light on their

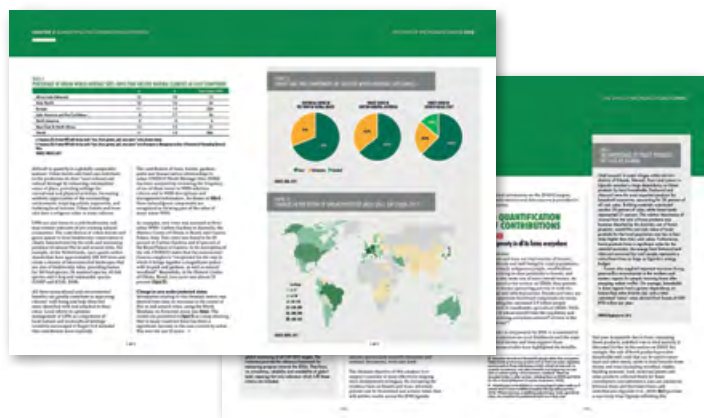

significance for water quality, climate, biodiversity, future energy needs and designing sustainable cities.

This series covers the status of forests, policy and institutional developments, and other key issues concerning the forest sector. It shares current, reliable and relevant information to facilitate informed discussion and decision-making.

THE STATE OF THE WORLD'S FORESTS 2020

FORESTS, BIODIVERSITY AND PEOPLE

This issue will focus on the correlation between forests' health and the sustainable management of their extraordinary biodiversity. Forests are home to some 80 percent of life on land and need to be used wisely. They keep the planet healthy and contribute to the livelihoods of millions of people who depend on them.

THE STATE OF WORLD FISHERIES AND AQUACULTURE 2018

MEETING THE SUSTAINABLE DEVELOPMENT GOALS

The State of World Fisheries and Aquaculture 2018 emphasizes the fisheries and aquaculture sector's role in achieving the 2030 Agenda and measuring progress towards these goals. It notes the particular contributions of inland and small-scale fisheries, and notes the importance of rights-based governance for equitable and inclusive development. The publication highlights specific areas, including: aquatic biodiversity; climate change impacts and responses;

the sector's contribution to food security; issues related to international trade, consumer protection and sustainable value chains; and global developments in combating illegal, unreported and unregulated fishing, as well as ocean pollution.

The State of World Fisheries and Aquaculture series is a unique source of objective, reliable and up-to-date global information on fisheries and aquaculture development, of relevance to policy-makers, managers, scientists and all those interested in the sector.

INSIDE FAO

A TRULY GLOBAL FORUM

This book showcases the archeology, history and works of art of FAO's headquarters in Rome, through spectacular photographs - and informative texts, and reveals the places where world leaders and worldwide experts meet to fight world hunger.

The current Rio headwaters are located in an area of land created by a structural depression formed in the late geological history of the region between the Colorado Plateau and the Rio Grande towards the north, and the axis of the rift between the north, previously known as Sonora or Arizona Mesas. In fact, one of the main features of the Rio Grande is the whole of Raton's topography (even specifically, the rise and fall of the land) has changed significantly. The first flow (a) of the axis of flat land that characterizes all of the Rio Grande has been cut apart since the creation time by small tributaries of the River Tinto the banks of which is a little further to the north, causing the formation of what we have come to know today as the Rio Grande. Raton has been cut apart since the time, the flatness of the Sonora Mesas and the current Viala del Norte & Canada corresponds to the course of the tributary known as the Agua Mariana (previously referred to as the Rio Colorado) which flows into the Rio Grande in Latorca, separating the Palmito Hill from the Arizona. The current Viala Gregorio Mendez, leading towards the Colima, follows the course of another tributary, which has been known since the time of the Palmito Hills. Finally, what is now Viala Arizona follows the course of another body of water, which divided the Arizona from the head and flowed towards the Rio in the area of what is now Santa Piedad.

TOWARDS ZERO HUNGER

1945–2030

This book shows that, acting together, we can achieve “zero hunger” by 2030. It showcases a unique collection of images documenting how FAO has long been there – in the fields, in the mountains, on the oceans, in the heat and dust, in the cold and wet – helping people to survive, progress and prosper.

Since 1945, FAO, the UN’s first agency, has played a leading role in combating hunger worldwide. FAO’s photo archives contain more than a million images covering its seven decades of commitment. This book contains just

Rome, 2017
ISBN 978-92-5-109435-8

French, Russian, Spanish

a representative sample of shots to give readers an authentic picture of the Organization's activities from its pioneering early years through to today, with older images in black and white later giving way to colour. The photographs reflect FAO's various fields of activity (agriculture, fisheries, forestry, nutrition, etc.), and span the globe.

Some photographs have served as historical records, documenting situations and FAO's projects. Others have been used for didactic purposes, also as part of films and slideshows,

to explain innovative techniques and how to carry out practical operations in the field. A good picture can indeed paint more than a thousand words, especially in areas with high levels of illiteracy or where material is not available in local languages.

In addition to the photographs and their captions, text describes FAO's work and significant moments in its history through the decades. Some photographers also share their experiences and insights. Thus, readers can see the captured detail in the context of an evolving whole.

PULSES

NUTRITIOUS SEEDS FOR
A SUSTAINABLE FUTURE

Part guide, part cookbook, and peppered with informative visuals, this beautifully illustrated book provides an overview of pulses and a step-by-step guide on how to cook them. It presents the impact of pulses on nutrition, health, climate change, biodiversity and food security, and shows how pulses can be grown in garden patches.

70 YEARS OF FAO

(1945–2015)

This book tells the story of the Food and Agriculture Organization of the United Nations (FAO), its protagonists and their endeavours – such as the visionary David Lubin who campaigned tirelessly at the turn of the twentieth century for an international organization to defend farmers' interests. The publication brings to light previously unpublished images of the Organization's early years and recounts ten of FAO's success stories, such as the eradication of bovine rinderpest and the creation of the Treaty on Plant Genetic Resources.

MODULE 3

What can we take from forests?

I wonder

What parts and how many of our everyday products come from the woods? How do you tell the difference between these products? Can we make things from what we find in the forest? Can we take as much as we want or need? In this module, you will make discoveries in class and explore various forest materials and foods, such as the insects shown below. You will also learn about fascinating forest resources, including honey, rubber and medicines.

10 UP THE STATE OF OUR FORESTS

investigate

Forests from around the world – and more
There are several kinds of forest around the world. Tropical dry forests (shown here) are from regions with a dry

South America, mountain forests, near the sea mangrove forests, forest conifers. Forests from cold climate lands and more.

Forest from around the world

manage the planet wisely and become the agents of change. The modules provide insights on a variety of wooded areas, from the field or park next door to the world's major forests, and cover a wide range of subject matter, from forest ecosystems to water resources, products and tenure issues.

The learning approach draws inspiration from the enquiry method, while content draws upon FAO's major biennial report on the **State of the World's Forests** and other key forestry publications. The modules are conceived to be customizable to help teachers tie in with curriculum objectives, ranging from science to geography and citizenship.

TEACHING GUIDE

- ▶ Practical and flexible
- ▶ Customizable interdisciplinary content (science, geography, citizenship, language)
- ▶ Designed by teachers for teachers
- ▶ Learning-by-doing approach
- ▶ Teaching plans for each module
- ▶ Indoor and outdoor activity guide
- ▶ Reading and writing exercises
- ▶ Active and effective pedagogical approach (enquiry method)

LEARNING GUIDE

- ▶ Backup documentation for students
- ▶ Easy-to-follow infographics
- ▶ Attractive layout

This book provides information about hazards and disasters, reducing risk, what to do after disaster strikes and how we can all help towards disaster risk reduction.

YOUTH GUIDES

Providing even deeper insight into topics such as biodiversity and oceans, the Youth Guides complement the Challenge Badges.

YOUTH GUIDE TO BIODIVERSITY

This biodiversity guide was designed as an educational resource for schools, youth groups and curious young learners. It explains biodiversity in terms of genes, species and ecosystems, exploring its many shapes and forms under the sea, on land, up in the air, in rivers and lakes, and on the farms that produce our food.

The guide considers why biodiversity is important, how humans affect it, and what we must do to conserve the world's biological resources. At the end of the guide there are inspiring examples of youth-led initiatives and an easy-to-follow action plan to help readers develop their own projects.

YOUTH GUIDE TO THE OCEAN

This guide takes young readers on a voyage from coastal zones to the frozen poles, and deep into the sea. It takes a close look at the physical features and natural processes that shape the incredible plant and animal life to be found underwater as well as life forms exposed by the tides.

It also demonstrates the many benefits the ocean provides us with, discusses the negative impacts that human activities can have, and explains ways of protecting and conserving the ocean and ocean life, including activities and initiatives that young people can carry out themselves.

Rome, 2014
ISBN 978-92-5-108435-9
240 pp., 210 × 220 mm
USD 54.00, Paperback
Available in: English

YOUTH GUIDE TO FORESTS

This fact-filled guide explores forests around the world, from the depths of the rainforest to high-altitude mountains. It also demonstrates the many benefits that forests provide, discusses the negative impacts that humans unfortunately have on forests, and explains how good management can help protect and conserve forests and their biodiversity. At the end of the guide, inspiring examples of youth-led initiatives and an easy-to-follow action plan will help young people develop their own forest conservation activities and projects.

FAO ACTIVITY BOOK SERIES

These books familiarize young people with FAO's work and how they can take action to become the Zero Hunger Generation.

EATING HEALTHY MATTERS

This children's colouring and activity book, produced as part of the World Food Day 2019 campaign on healthy diets for a #ZeroHunger world raises awareness of the importance of healthy diets and calls for action across sectors to make healthy diets available and affordable to everyone.

Rome, 2019

AGRICULTURE

Sustainability underpins all of FAO's work in agriculture, and is the explicit focus of several publications that explore promising **ecosystem-based approaches** for the sustainable intensification of agriculture (see p. 39).

Some other titles provide specific guidance on the management of **land and water resources** (pp. 42–43). Soils is a key focus, with a Global Symposium on Soil

Biodiversity taking place in Rome in March 2020 and several recent publications produced on the subject (pp. 44–45).

An increasing number of publications explore **innovations and technology** as a path towards sustainability, from blockchain to the use of drones (pp. 46–47).

Food systems and the increasingly complex interconnections between producers and consumers are

another important area, and are the subject of several recent titles on questions such as the place of cities in the food security equation (p. 41). One of the key events for FAO was the International Consultation on the Urban Food Agenda, which took place in November 2019. ■

SUSTAINABLE FOOD AND AGRICULTURE

AN INTEGRATED APPROACH

FAO & Elsevier's Academic Press, Rome, 2019

DIGITAL TECHNOLOGIES IN AGRICULTURE AND RURAL AREAS

STATUS REPORT

This publication looks into the opportunities and challenges digitalization will bring for agriculture and food systems, as well as the economic, social and environmental impacts it will generate.

FAO, 2019
ISBN 978-92-5-131546-0
152 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English
Briefing paper available in: Arabic, Chinese, English, French, Russian, Spanish

EMERGING OPPORTUNITIES FOR THE APPLICATION OF BLOCKCHAIN IN THE AGRI-FOOD INDUSTRY

FAO & ICTSD, Geneva, Rome, 2018
40 pp., 210 x 297 mm, Price available upon request
Paperback, Available in: English

DIGITAL OBJECT IDENTIFIERS FOR FOOD CROPS

DESCRIPTORS AND GUIDELINES OF THE GLOBAL INFORMATION SYSTEM

Rome, 2018
ISBN 978-92-5-130418-1
44 pp., 148 x 210 mm
Price available upon request, Paperback
Available in: Arabic, English, French, Spanish

BLOCKCHAIN FOR AGRICULTURE

OPPORTUNITIES AND CHALLENGES

According to this paper, blockchain could be useful for land registrations, where it can provide an incorruptible ledger, as well as in supply chains, where it can provide an immutable record from the farm gate to the store.

FAO & ITU, Bangkok, 2019
ISBN 978-92-5-131227-8
68 pp., 210 x 297 mm
USD 70.00, Paperback
Available in: English

E-AGRICULTURE IN ACTION

DRONES FOR AGRICULTURE

This book promotes replicable ICT solutions for agriculture, focusing on drones and their usage in crop production, early warning systems, disaster risk reduction, forestry, fisheries, and wildlife conservation.

FAO & ITU, Bangkok, 2018
ISBN 978-92-5-130246-0
124 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

FAO and the International Atomic Energy Agency (IAEA) help their Members apply nuclear and related techniques to increase agricultural productivity sustainably, taking into account national and local specificities and priorities.

DATA MANAGEMENT AND VISUALISATION IN RESPONSE TO LARGE-SCALE NUCLEAR EMERGENCIES AFFECTING FOOD AND AGRICULTURE

This publication presents the challenges and solutions of real-time data management, geo-visualization and decision-making, as well as two case studies on how innovative IT systems can assist in nuclear emergency response affecting food and agriculture.

FAO & IAEA, Vienna 2019
ISBN 978-92-5-131879-9
48 pp., 210 x 297 mm
Price available upon request,
Paperback
Available in: English

FRUIT SAMPLING GUIDELINES FOR AREA-WIDE FRUIT FLY PROGRAMMES

These guidelines provide useful information on pests' spatial distribution and abundance on fruits, and seek to standardize procedures for fruit sampling, including collecting suitable fruit hosts.

FAO & IAEA, Vienna, 2019
ISBN 978-92-5-131722-8
46 pp. 297 x 210 mm
Price available upon request,
Paperback
Available in: English

TRAPPING GUIDELINES FOR AREA-WIDE FRUIT FLY PROGRAMMES

Available in: English

AZERBAIJAN COTTON SECTOR REVIEW

Based on field visits, interviews and meetings with the public and private sector, this study identifies prospective investment challenges and opportunities associated with the Azerbaijani cotton system by focusing on major agronomic, economic and social issues.

Rome, 2019
ISBN 978-92-5-131979-6
136 pp., 148 x 210 mm
Price available upon request, Paperback
Available in: English

FOOD CHAIN CRISIS SERIES

The FCC (Food Chain Crisis) Early Warning Bulletins inform on threats to the food chain and food security for the three months ahead.

FOOD CHAIN CRISIS EARLY WARNING BULLETIN OCTOBER–DECEMBER 2019

This bulletin provides information about animal and plant health threats to food security, including cassava mosaic disease in Africa, banana Fusarium wilt disease in the Americas and Asia, and Xylella fastidiosa on olive trees in Europe.

Rome, 2019
72 pp., 148 x 210 mm
Price available upon request, Paperback
Available in: English

FOOD CHAIN CRISIS EARLY WARNING BULLETIN JANUARY–MARCH 2020

An update on FAO's work to monitor transboundary animal and plant pests and diseases for the period of January to March 2020. A total of 260 forecasts were conducted in 116 countries with a focus on locusts and animal and aquatic diseases.

Rome, 2019
76 pp., 148 x 210 mm
Price available upon request, Paperback
Available in: English

ANIMAL PRODUCTION AND HEALTH

Healthy and productive animals play a key role in the health and prosperity of people and the environment. The most recent report in the **World Livestock series** (p. 51) demonstrates the profound transformation required by the sector to strengthen its contribution to the UN Sustainable Development Goals (SDGs). In order to optimize benefits while reducing risks, the report considers

livelihoods and economic growth, food security and nutrition, climate change and natural resource use, and animal health and welfare. The **Global Agenda for Sustainable Livestock** is a multi-stakeholder initiative hosted by FAO, which provides evidence around these issues to facilitate policy dialogue, develop tools and support changes in practice (p. 53). Sector growth has led to increased use of antimicrobials. Subsequent **antimicrobial resistance** (AMR) and risks associated with animal diseases now pose major challenges. FAO produces

analysis and guidance to minimize antimicrobial use and to improve awareness of AMR at policy level (pp. 51 and 52).

High impact emerging and transboundary animal diseases are a constant threat to livelihoods and food security. Global programmes on foot-and-mouth disease and **Peste des Petits Ruminants** (p. 55) remain a high priority in 2020, as does preventing the spread of African swine fever (p. 52). In collaboration with international partners, essential guidance has been provided for countries tackling zoonoses (pp. 52 and 54). ■

CLIMATE CHANGE

The agriculture, forest and land use sectors are increasingly affected by **climate change**. Stronger and more frequent droughts, floods, storms and wildfires threaten the agricultural sectors and consequently people's food security and livelihoods. These sectors are a major part of the climate problem and solution, being responsible for almost one quarter of all greenhouse

gas emissions, while at the same time offering one third of all existing solutions for climate change mitigation. To tackle this challenge, FAO supports countries to both **mitigate** and **adapt** to the effects of climate change and make the livelihoods of rural populations more resilient. FAO works to enhance countries' capacities to implement their **Nationally Determined Contributions** (NDCs) under the

Paris Agreement (pp. 58–59), and to develop and deploy comprehensive adaptation and resilience strategies. To further strengthen this endeavour and provide guidance to governments and other stakeholders working on climate change, FAO has developed a wide range of publications and guidance notes, focusing on topics ranging from **youth** (p. 57), to **climate-smart agriculture** (p. 60). ■

ECONOMIC AND SOCIAL DEVELOPMENT

Achieving food security for all requires giving vulnerable communities access to adequate **economic opportunities** and **social protection**. FAO provides research and analysis to inform decision-making and help governments mainstream food security into agricultural policy. FAO's work emphasizes social protection (67–68) systems that diversify rural employment opportunities, improve rural

people's access to land and resources, and reduce social inequalities.

Migration is a key area. Several titles (pp. 63–64) look at the drivers of migration, assess impacts, and propose alternatives. These include **decent rural** employment, with an emphasis on **youth** – a particularly vulnerable group. Other titles focus on **gender** (pp. 74–75), from gender mainstreaming in the use of information and communication technologies to women's rights to land.

Preparing for shocks and crises and responding rapidly when they occur is also crucial to protecting vulnerable communities. This is why FAO issues early warning reports on the food security situation of countries in **emergencies**, and guidance for coping with threats and crises, including through crop diversification and improved access to credit, education, and **social protection** (pp. 70–71). At the same time, FAO fieldwork aimed at helping people increase their **resilience** and reduce disaster risks is charting a path towards stronger agricultural livelihood systems. ■

FAO FRAMEWORK ON RURAL EXTREME POVERTY

TOWARDS REACHING TARGET 1.1 OF THE SUSTAINABLE DEVELOPMENT GOALS

In the face of an expected slowdown in growth, this framework provides guidance for FAO's work on poverty eradication, identifying four action areas: food security and nutrition, economic inclusion, sustainable and resilient livelihoods, and protection against risks.

REBUILDING RESILIENT AND SUSTAINABLE AGRICULTURE IN SOMALIA

FULL REPORT

This report documents the pressures on Somalia's livestock and crop subsectors over the years but notes that there is cause for optimism thanks to the country's resilience and resources. These include a variety of agroecological zones and vast tracts of arable land and areas suitable for livestock production, which in turn can support markets, export trade and overall growth.

RESILIENCE ANALYSIS AND POLICY SERIES

The series provides programming and policy guidance to improve the resilience of households in food-insecure countries.

FOOD SECURITY AND RESILIENCE OF REFUGEES AND HOST COMMUNITIES IN SOUTHWEST UGANDA

Rome, 2019
64 pp., 210 x 297 mm
Price available on request, Paperback
Available in: English

This report describes the food security and resilience status of refugee families in southwest Uganda as well as that of the communities that host them, offering recommendations on interventions that can help both populations strengthen their resilience and improve household nutrition.

RESILIENCE ANALYSIS OF PASTORAL AND AGROPASTORAL COMMUNITIES IN SOUTH SUDAN'S CROSS-BORDER AREAS WITH SUDAN, ETHIOPIA, KENYA AND UGANDA

Rome, 2019
32 pp., 210 x 297 mm
Price available on request, Paperback
Available in: English

According to the report, conflict is a key driver of food insecurity in South Sudan and neighbouring areas, and internal and cross-border displacement have a negative impact on people's livelihoods. This study points towards a range of resilience interventions that can have a positive impact.

FISHERIES AND AQUACULTURE

The 2030 Agenda for Sustainable Development sets aims for the contribution of fisheries and aquaculture towards food security and nutrition through a better management of the sector's natural resources. In this connection, the **International Symposium on Sustainable Fisheries** held in November 2019 highlighted some key factors like the importance of

sustainable fisheries livelihoods (p. 88) or the impact of **climate change** (p. 77) on ecosystems. A series of events will take place in the first half of 2020, including the celebration of the 25th anniversary of the **Code of Conduct for Responsible Fisheries**, the release of the new edition of the **State of World Fisheries and Aquaculture** (p. 13), the 2nd United Nations Oceans Summit

to be held in Portugal in June 2020 and the 34th session of the FAO Committee on Fisheries (13–17 July 2020). FAO will be supporting these events through a number of technical publications on climate change, **artisanal fisheries**, bycatch (p. 85) or **illegal, unreported and unregulated (IUU) fishing** (pp. 81 and 87), among others. ■

REPORT OF THE FIRST MEETING OF THE REGIONAL FISHERIES DATA AND STATISTICS WORKING GROUP

BARBADOS, 14–16 MAY 2018

Rome, 2019
ISBN 978-92-5-131716-7
148 pp., 210 x 297 mm
Price available upon request,
Paperback
Available in: English, Spanish
(bilingual)

During the meeting, participating countries agreed on the need for a more coherent data collection framework, and discussed new technical tools to support the regional database implementation for more standardized data.

REPORT OF THE THIRD SESSION OF THE COFI ADVISORY WORKING GROUP ON AQUATIC GENETIC RESOURCES AND TECHNOLOGIES

ROME, 20–21 AUGUST 2019

A series of recommendations were made to FAO and to the Committee on Fisheries' sub-committee on aquaculture, including the development of a global information system on aquatic genetic resources.

Rome, 2020
ISBN 978-92-5-132024-2
40 pp., 210 x 297 mm; Price
available upon request, Paperback;
Available in: English

REPORT OF THE THIRTY-THIRD SESSION OF THE COMMITTEE ON FISHERIES

ROME, 9–13 JULY 2018

The Committee on Fisheries 2018 welcomed the increasing number of Parties to the FAO Agreement on Port State Measures, discussed progress in implementing small-scale fisheries guidelines, and noted the key role of FAO's work for SDG 14, among other issues.

Rome, 2019
ISBN 978-92-5-131590-3; 72 pp., 210 x 297 mm

FOOD SAFETY

FAO is working with countries around the world to improve food systems and ensure that everyone has access to **safe** and **nutritious food**. FAO and the World Health Organization (WHO) will celebrate the second **World Food Safety Day** on 7 June 2020. Jointly with WHO, FAO is responsible for the **Codex Alimentarius**, a collection of internationally adopted food

standards that protect consumer health and ensure fair practices in food trade (pp. 91–92). The annual Codex report (p. 92) provides an engaging overview of how Codex works. To achieve safe food, **standards** must be implemented. FAO has developed guides and training tools to address official food controls and support implementation of standards, which provide regulators and the

private sector with the guidance needed to ensure that consumers have access to safe and quality food (pp. 94–95). FAO also provides guidance regarding the risk to consumers from specific **foodborne diseases** (p. 93) and the safety of food additives and **drug residues** in foods (p. 92). ■

UNDERSTANDING CODEX

CODEX ALIMENTARIUS

This publication presents the Codex Alimentarius Commission, what it is and how it works. Established by FAO and WHO in the 1960s, it has become the most important international reference point for developments associated with food standards. Throughout much of the world, an increasing number of consumers and governments are becoming aware of food quality and safety issues and are realizing the need to be selective about the foods being consumed. It is now common for consumers to demand that their governments take legislative action to ensure that only safe food of acceptable quality is sold and that the risk of food-borne health hazards is minimized.

CODEX NUTRIENT REFERENCE VALUES

ESPECIALLY FOR VITAMINS,
MINERALS AND PROTEIN

The review was created to educate the general population about healthy eating for the next 10 to 20 years and forms the basis for establishing a suite of required nutrient reference values for more specific population groups, the first of which are older infants and young children.

FORESTRY

Forests are high on the 2030 Agenda for Sustainable Development – as key carbon sinks and as providers of crucial ecosystem and social services. A comprehensive outlook on the **future of forests** in the Asia-Pacific region was launched in June 2019 at Asia-Pacific Forestry Week in the Republic of Korea (p. 97). The year 2019 saw also the release of the FAO Forestry

paper **“Trees, forests and land use in drylands: the first global assessment”** (p. 99), shedding light on forest and tree resources as well as land use in the drylands of the world. Two major publications will be released in the first half of 2020, the flagship **“The State of the World's Forests 2020”** (p. 12), and the **“Global Forest Resources Assessment”** (FRA 2020) (p. 35). The first is expected to be launched at the Twenty-fourth meeting of the Subsidiary Body on Scientific, Technical and Technological Advice of the Convention on

Biological Diversity in Montreal in May 2020, while the other will be released at the 25th Session of the Committee on Forestry (COFO 25), at FAO headquarters in Rome on 22–26 June 2020.

Forest-water linkages are also at the core of FAO's work: the latest issue of *Unasylva* (p. 97) explores the role of forests as nature-based solutions for water management, while **“Advancing the forest and water nexus”** provides guidance to improve the management of forests and trees for the provision of water-related ecosystem services. ■

FOREST FUTURES

SUSTAINABLE PATHWAYS FOR FORESTS, LANDSCAPES AND PEOPLE IN THE ASIA-PACIFIC REGION

This publication describes the drivers of change that are likely to affect forests in Asia and the Pacific towards 2030 and 2050 (e.g. population growth, economic growth, new technologies) in order to help policy-makers understand the future role of the forest sector and the challenges ahead.

STATE OF MEDITERRANEAN FORESTS 2018

This report warns that forests in the Mediterranean are affected by climate change, population increase and water scarcity. Recommendations include planting mixed tree species to reduce the impact of drought, and increasing urban forested areas.

FORESTRY

ADVANCING THE ROLE OF NATURAL REGENERATION IN LARGE-SCALE FOREST AND LANDSCAPE RESTORATION IN THE ASIA-PACIFIC REGION

A workshop organized on the challenges of natural forest regeneration highlighted the benefits of assisted natural regeneration, such as watershed protection, restoration of wildlife habitats and carbon sequestration.

FAO & APFNet, Bangkok, 2018
ISBN 978-92-5-130144-9; 124 pp., 210 x 297 mm
Price available upon request, Paperback
Available in: English

THE ROAD TO RESTORATION

A GUIDE TO IDENTIFYING PRIORITIES AND INDICATORS FOR RESTORATION MONITORING

This guide helps stakeholders to develop a customized monitoring system for the restoration of forests to meet their goals. The guide emphasizes the need to understand potential trade-offs and synergies when designing a restoration project.

FAO & WRI, Washington DC, 2019
ISBN 978-92-5-131943-7
80 pp., 279.4 x 215.9 mm
Price available upon request, Paperback

NUTRITION

FAO is the custodian of **Sustainable Development Goal 2** “End hunger, achieve food security and improved nutrition and promote sustainable agriculture”. FAO also co-leads – together with the World Health Organization – the United Nations Decade of Action on Nutrition (2016–2025). FAO has a unique advantage to address the food-related

causes of malnutrition in all its forms. Given its work across all elements of food systems, the Organization has the capacity to play a key role in reorienting the global food system to deliver **good nutrition and health**, in partnership with other key stakeholders.

FAO’s publications on nutrition provide guidance to policy makers, programme planners and local practitioners, to ensure that policies, practices and innovations are conducive

to healthy, **balanced** and **sustainable diets**, and to help countries scale up nutrition-sensitive agricultural policies that support both human and environmental health. These publications cover a wide range of topics, from school feeding programme to food-based **dietary guidelines**. They provide information and access to key data on food composition and food consumption, needed to inform policies and programmes. ■

SUSTAINABLE HEALTHY DIETS GUIDING PRINCIPLES

Released in conjunction with World Food Day, this publication supports countries in transforming food systems to deliver healthy diets, while contributing to the achievement of the SDGs.

DO GOOD: SAVE FOOD!

EDUCATION PACKAGE

This education package is designed to raise awareness among school children, teachers, staff and their related families and networks on food loss and waste issues and introduce food waste reduction good practices.

DOWNLOAD THE MODULES

PLANT PRODUCTION AND HEALTH

Plants are essential for life on earth. We rely on them for 80 percent of the food we eat and 98 percent of the oxygen we breathe. However, despite their importance, healthy plants are constantly under attack. Every year, plant pests and diseases are responsible for the loss of up to 40 percent of global food crops, leaving millions of people with no food to eat. The

impact of plant pests (p. 109) and diseases is particularly felt in developing countries. To ensure plant health, FAO promotes a number of environmentally sensitive approaches, such as **integrated pest management** and **conservation agriculture** (p. 107), as well as supporting the implementation of **International Standards for Phytosanitary Measures**. Managing **pesticide use** is just as important as managing pests, and FAO therefore works closely with the World

Health Organization on an ongoing basis to set standards and codes of conduct for pesticide use. This work is reflected in a number of annual publications (p. 109). To raise global awareness of the importance of healthy plants, the UN General Assembly has proclaimed 2020 the **International Year of Plant Health**. Under the slogan "Protecting plants, protecting life", FAO and the International Plant Protection Convention are joining forces to finally make plant health a global issue. ■

FAO PUBLICATIONS SERIES 2019

Download the
catalogue

For the first time, FAO's major publications series are presented together in a user-friendly catalogue. The catalogue features all of the most active series, both new and long-standing, and is divided into areas of work, including agriculture, forestry, fisheries, trade and investment, among others.

Each series entry includes technical specifications, language versions, most recent titles, relevant ISSNs, and QR codes linking to online resources in the FAO Document Repository.

For more information, please visit fao.org/publications or write to publications-sales@fao.org
