## Note on methodology

Data on trade volumes published in this statistical compendium were compiled from: country responses to the annual questionnaire of the FAO Intergovernmental Sub-Group on Bananas (2007-2019); data from the UN Comtrade database; and secondary data from desk research. Price data were collected from several official sources, as respectively stated in the footnotes. In particular, for the Banana Statistical Compendium 2019, primary data on global trade flows and prices were kindly provided by the following agencies:

- Ministerio de Agricultura, Ganadería y Pesca, Argentina
- Australian Bureau of Statistics, Australia
- Federal Ministry for Sustainability and Tourism, Austria
- Observatorio Agroambiental y Productivo, Bolivia
- Ministry of Foreign Trade and Economic Relations, Bosnia and Herzegovina

All datasets refer to global trade of fresh bananas, excluding plantains, as covered by HS code 080390 under the harmonized tariff nomenclature system of the World Customs Organization. All data are provisional. Data on the import volumes of the European Union and the United States of America by origin were compiled from data provided by the European Commission and the US Department of Agriculture (USDA), respectively.

Data are reported as collected and totals may differ from the processed and validated data reported in the 'World import by country' tables. In the current edition of the statistical compendium, this results in a significant discrepancy between exports of bananas reported from Cameroon, the Dominican Republic, and the Philippines in Table 1: 'World gross exports by country' and those reported in Table 6: 'Gross imports by countries of origin'.

## Foreword

---

The Banana Statistical Compendium is issued on an annual basis to Members and Observers of the Sub-Group on Bananas of the Intergovernmental Group on Bananas and Tropical Fruits, which is a subsidiary body of the Committee on Commodity Problems (CCP).

It is prepared by the Team on Responsible Global Value Chains, Markets and Trade Division, Food and Agriculture Organization of the United Nations (FAO), Rome, and the tables contained bring together the information available to FAO, supplemented by data obtained from other sources in particular with regard to preliminary estimates.

The Team on Responsible Global Value Chains provides research and analyses on agricultural value chains in developing countries, and economic data and analyses on tropical fruits. Regular publications include market reviews, outlook appraisals and projections for bananas and tropical fruits. The team also provides assistance to developing countries in designing and implementing national policies regarding responsible value chains in agriculture.

The report is available at the following FAO website:
