Soil biodiversity: a nature-based solution

Supports
- nutrient cycling, plant growth and productivity

Forms
- soil and improves soil structure

Enhances
- water retention and purification

Is a source of medicines and supports human health

Contributes to remediate soil pollution

Improves
- resilience against pests and diseases

Maintains and restores ecosystems

Helps to mitigate and adapt to climate change

Supports nutrient cycling, plant growth and productivity

Enhances water retention and purification

Maintains and restores ecosystems

Helps to mitigate and adapt to climate change

Improves resilience against pests and diseases

Forms soil and improves soil structure

Is a source of medicines and supports human health

Contributes to remediate soil pollution
