THE STATE OF THE WORLD

FAO’s “The State of the World” publications provide a comprehensive overview of the most pressing global issues and challenges affecting the world today. These global reports primarily target policymakers and decision-makers, but are also relevant to experts, academia, students, the media and the general public.

THE STATE OF FOOD AND AGRICULTURE

The State of Food and Agriculture brings balanced science-based assessments of important issues in the field of food and agriculture to a wider audience. Each annual edition contains a comprehensive, yet accessible, overview of a topic of major relevance for rural and agriculture development and global food security.
