

# The One Health Future We Want...

## Youth Art Contest

Our planetary health, overarching human, animal, environmental health, is interconnected. When one goes wrong, it is inevitable that the other gets affected as well.

We can see this interconnectedness everywhere in our lives. When crops are produced with contaminated water, people risk food safety hazards while consuming those harvested foods. The lack of biodiversity in food and agriculture makes pest and disease control more challenging, affecting our food security, nutrition and health. When antibiotics are excessively used as growth promoters in livestock, antibiotic resistant microbes could be developed and transmitted to people. As air pollution worsens, it can cause a variety of adverse

health outcomes including respiratory infections, heart disease and lung cancer. And this list of One Health cases can continue on and on.

With the COVID-19 pandemic giving a wake-up call to build transformative resilience across our health, food and ecosystems, the momentum to strengthen a One Health approach is gaining greater political and stakeholder traction.

We are all interconnected, and it is time to address health risks with a holistic concept, called the 'One Health' approach. And we are inviting YOU to tell us how the One Health concept should be applied to move the agenda forward for a healthy life for all on this planet.

## What is FAO planning to do?

As part of the [World Food Forum](#), we are inviting youth to enter the art contest where young people will be encouraged to send their creative art pieces on **The One Health Future We Want**, including slam poetry, song, or skit performance. The winner(s) of this competition will be granted a paid internship opportunity with FAO's One Health team to support global advocacy efforts to achieve optimal planetary health.

## Who can participate?

Nationals of FAO Members, between 21 and 30 years old, enrolled in a degree programme or recent graduates within three years after graduation of a degree programme, are invited to join the competition. All participants must have working knowledge of at least one FAO official language (English, French, Spanish, Arabic, Chinese or Russian) and you may submit your creative art piece as an individual or as a group (maximum 3 people).

*The internship may be home-based. The period of an internship assignment will be a minimum of three months.*

## Why do we need youths' voice?

We want to put your voice at the centre of our advocacy works. We are hoping to curate a platform for youth to demand to the UN, international organizations and the Member States about the **One Health Future YOU Want**. Your voices will be used in our advocacy works to show policy makers what the youth generations are requesting to governments and the UN to change the One Health systems.

## When can youth join?

Submissions will be open from 24 September 2021 and will close on 20 November 2021 11:59pm CET (Rome time).
