

How to reduce the use of antibiotics in poultry production

Corrigendum

13 April 2022

The following corrections were made to the PDF of the report after it went to print.

Page	Location	Text in printed PDF	Text in corrected PDF
1	Second paragraph	Keep a high level of biosecurity - Restrict visitors, make sure they change clothes and boots and wash their hands. Clean and disinfect vehicles before they enter the farm. Control access of vermin, pets and wild animals that may transmit diseases. Practice “all-in/all-out”.	Keep a high level of biosecurity – Restrict visitors, make sure they change clothes and boots and wash their hands. Clean and disinfect vehicles before they enter the farm. Control access to vermin, pets and wild animals that may transmit diseases. Practice “all-in/all-out.”
1	Fourth paragraph	Inspect daily - Inspect your poultry’s health and behavior daily to detect changes promptly, whether sudden or gradual. At these inspections, remove and dispose any dead birds.	Inspect daily – Inspect your poultry’s health and behaviour daily to detect changes promptly, whether sudden or gradual. During these inspections, remove and dispose of any dead birds.
1	Fifth paragraph	Provide comfortable environment – Follow recommendations regarding ventilation, feeding and drinking spaces, light and stocking density and other conditions.	Provide a comfortable environment – Follow recommendations regarding ventilation, feeding and drinking spaces, light and stocking density, and other conditions.
2	First paragraph	Use special feed additives - Prebiotics, probiotics, essential oils, organic acids, insoluble ber may be benecial. They promote useful bacteria in the gut, have antibacterial properties and keep intestines healthy	Use special feed additives – Prebiotics, probiotics, essential oils, organic acids and insoluble fibre may be beneficial. They promote useful bacteria in the gut, have antibacterial properties and keep intestines healthy.
2	Fourth paragraph	Ensure a good start for your chicks - After arrival of the chicks to the farm, provide immediate access to feed and water. Make sure you meet all their nutritional and physiological requirements.	Ensure a good start for your chicks – After the arrival of the chicks to the farm, provide immediate access to feed and water. Make sure you meet all their nutritional and physiological requirements.
2	Fifth paragraph	Use high quality water - Ensure available water of good hygienic quality. Clean and sanitize water systems often. Flush drinking lines weekly.	Use high-quality water – Ensure available water is of good hygienic quality. Clean and sanitize water systems often. Flush drinking lines weekly.
