

**Project Evaluation Series**

**Evaluation of the project “Strengthening  
National Forest Inventory and Satellite Land  
Monitoring System in support of REDD+ in  
Bangladesh”**

**Project code: GCP/BGD/058/USA**

**Management response**

Evaluation of the project “Strengthening National Forest Inventory and Satellite Land Monitoring System in support of REDD+ in Bangladesh” – Management response					04/2023
Evaluation recommendation	Management response Accepted, Partially accepted or Rejected	Management plan			
		Actions to be taken, and/or comments about partial acceptance or rejection	Responsible unit	Time frame	Further funding required (Y or N)
<b>Recommendation 1.</b> FAO should pursue the dissemination of knowledge and exert influence over the use of the results in national forest management programmes and policies.	Accepted	The results as shown in the final report will be used to reports on greenhouse gas (GHG) emissions (e.g. National Communications and BUR) and SDG indicators (e.g. 15.1.1). Opportunities for using socioeconomic data will be explored.	FAOBD	2020	N
<b>Recommendation 2.</b> FAO to identify potential forest ‘hotspot’ areas for action.	Accepted	The Chittagong Hill Tracts (CHT) is the clearest candidate. FAO will desing a CHT Strategy that will include actions to mitigate deforestation issues.	FAOBD	2021	Y
<b>Recommendation 3.</b> FAO should start planning the support to BFD for the next NFI cycle.	Accepted	FAO has built significant capacity in data collection within the Forest Department, but capacity is still lacking in data analysis and statistical reporting. FAO will explore further supporting the FD in this area	FAOBD	2022	Y
<b>Recommendation 4.</b> FAO should support BFD to complete boundary delineation.	Partially accepted	FAO will continue to offer this support as requested by FD. However, if they choose that this is not first priority, they may choose to use resources in a different way.	FAOBD	2019-2022	Y
