MSW	municipal solid waste
PC	provincial council

## Executive summary

Mapping stakeholders and their potential roles for prevention and reduction of food waste (FW) supports a coherent, coordinated and complementary approach to quantification, causes identification and scaling up of feasible solutions for significant returns on investment. State and non-state stakeholders were mapped in selected municipalities: Colombo metropolitan area (Colombo, Sri Jayewardenepura-Kotte, Negombo, Kaduwela and Moratuwa municipal council areas), Jaffna, Kandy, Batticaloa, Kurunegala and Galle.

Stakeholders were grouped into four clusters: producers, enterprises/food business operators, private/public/civil society organizations and households. The stakeholders' maps guided sensitization and capacity-building sessions whose conclusions fed into the preparation of the *National Roadmap on Urban Food Waste Prevention and Reduction for Households, Food services, Retailers and Wholesalers* launched on 17 August 2021.

According to the analysis, the institutions working on food and/or (bio-)waste can be divided into governmental, semi-governmental, private, and non-governmental. Food safety, quality control and waste management in Sri Lanka is under the umbrella of the central government, provincial council (PC) and local authorities (LAs) that cover governance (e.g. policies and regulations), production, trade, input supply, services, welfare support and research. However, duties and responsibilities are, sometimes, crosscutting and interrelated with overlaps that can lead to poor coordination.

An array of institutions at central and provincial levels are engaged to strengthen the food production sector in Sri Lanka. The existing inter-institutional coordination mechanism could be improved. The coordination for knowledge generation and dissemination between national and provincial systems should be strengthened.

The report was produced for the project *Innovative approaches to reduce, recycle and reuse FW in urban Sri Lanka* that was implemented under the oversight of the Ministry of Urban Development and Housing, in collaboration with the Food and Agriculture Organization of the United Nations (FAO) and the International Water Management Institute (IWMI) from June 2019 to August 2021.

## 1. Introduction

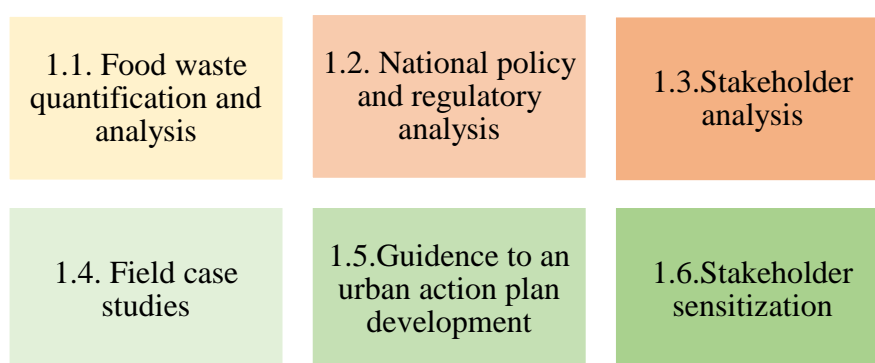

In 2015, the *2030 Agenda* launched Sustainable Development Goal (SDG) 12.3 “by 2030, halve per capita global food waste at the retail and consumer levels and reduce food losses along production and supply chains, including post-harvest losses.” Food waste (FW) prevention and reduction play a major role in supporting food systems’ sustainability while also contributing to effective solid waste management (SWM), minimizing detrimental environmental, climate change and socioeconomic impacts.

Awareness-raising and capacity development for food supply chain actors, the public sector and civil society organizations is required for successful SDG 12.3 interventions. Mapping stakeholders and their potential roles towards prevention and reduction of FW supports a coherent, coordinated, and complementary approach to quantification, causes identification and scaling up of feasible solutions that bring significant returns on investment.

## 2. Context

From June 2019 to August 2021, the project *Innovative approaches to reduce, recycle and reuse FW in urban Sri Lanka* was implemented under the oversight of the Ministry of Urban Development and Housing, in collaboration with the Food and Agriculture Organization of the United Nations (FAO) and the International Water Management Institute (IWMI). The project had six working areas (see **Figure 1**). This report is the deliverable for the 1.3 project component (i.e. stakeholder analysis).

*Figure 1* Major components of the 2019 – 2021 project on innovative approaches to reduce, recycle and reuse FW in urban Sri Lanka

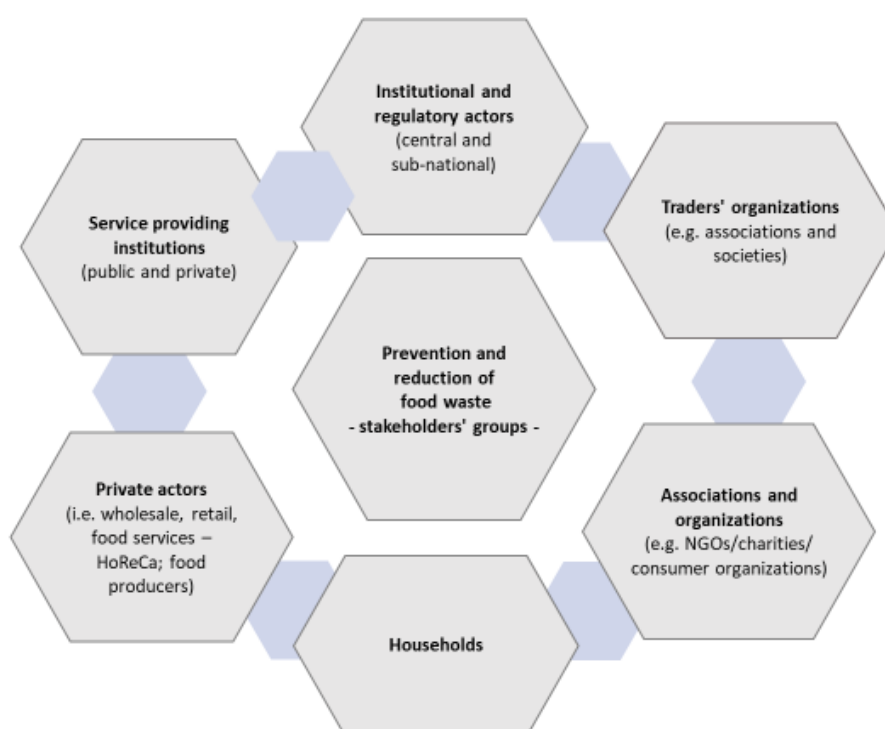

The major output of the project was to facilitate knowledge development for and drafting of the *Urban Roadmap on FW Prevention, Reduction, Management in Sri Lanka*, that includes a comprehensive action plan with monitoring and evaluation criteria.

### 3. Objectives and methodology

The objective of this report is to map<sup>1</sup> state and non-state stakeholders in selected<sup>2</sup> municipalities: Colombo metropolitan area (Colombo, Sri Jayewardenepura-Kotte, Negombo, Kaduwela and Moratuwa municipal council areas), Jaffna, Kandy, Batticaloa, Kurunegala and Galle. Stakeholders were grouped into clusters: producers, enterprises/food business operators, private/public/civil society organizations and households (see **Figure 2**).

*Figure 2 Identified urban state and non-state stakeholders' groups*

Source: Authors' elaboration

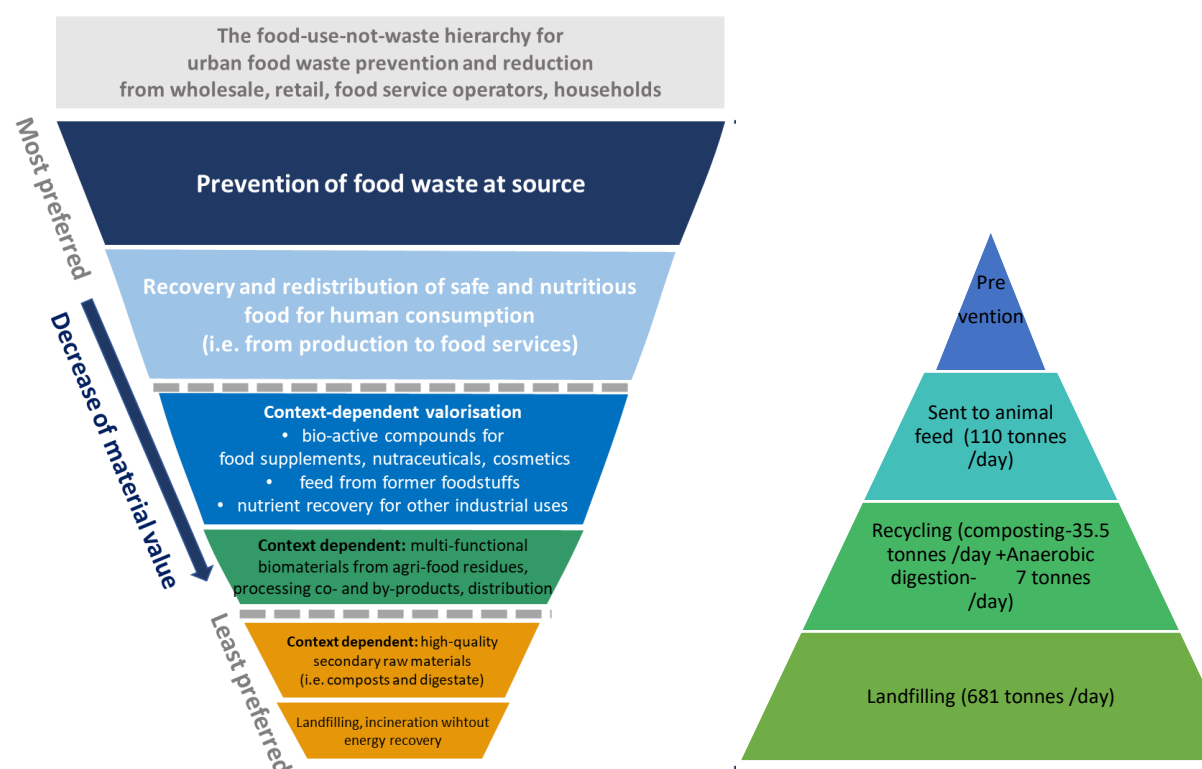

In Sri Lanka, institutions working on food and/or (bio-)waste can be divided into governmental, semi-governmental, private, and non-governmental. These actors cover governance (e.g. policies and regulations), production, trade, input supply, services, welfare support and research. Their duties and responsibilities are, sometimes, crosscutting and interrelated with overlaps that can lead to poor coordination.

The total FW generated in the country was estimated at 3 963 tonnes/day (Jayathilake *et al.*, 2023a). The data for Colombo municipality is presented in **Figure 3** on p.3, while it is compared with the food use-not-waste hierarchy diagram that indicates main actors and actions that can contribute to FW prevention and reduction.

<sup>1</sup> The research was mainly conducted through desk review and telephone interviews.

<sup>2</sup> The selection was based on size of population.

**Figure 3** The food-use-not waste hierarchy (adapted from HLPE 2014), on the left, compared with current food waste management practice in the selected urban study area in Sri Lanka, on the right

## 4. Overview of the political and administrative system

The institutional framework (see **Figure 4** on p.4) set up for food safety and quality control and waste management in Sri Lanka is under the umbrella of the central government, Provincial council (PC) and local authority (LA). The major related central government agencies are the Ministry of Public Services, Provincial Councils and Local Government, the Ministry of Environment, the Ministry of Urban Development and Housing, the Ministry of Health (MoH), the Ministry of Technology and Research and the Ministry of Trade.

Several state stakeholders are relevant to FW prevention and reduction. The role and responsibilities of ministries, line agencies and provincial organizations are summarized in **Figure 6** on p.8. Currently, Sri Lanka faces challenges in MSW management due to gaps in stakeholder participation in the design as well as the implementation and enforcement of measures.<sup>3</sup>

<sup>3</sup> The 13th Amendment to the constitution (1987) and the provincial councils act no. 42 of 1987, the sections 129, 130 and 131 of the municipal council's ordinance (1980), Sections 118, 119 and 120 of the urban councils ordinance, No. 61 of 1989, sections 41 and 93 to 95 of the Pradeshiya saba act, No. 15 of 1987 are the key pieces of legislation on waste management in local authorities (LAs).

Figure 4 Administrative and political structures

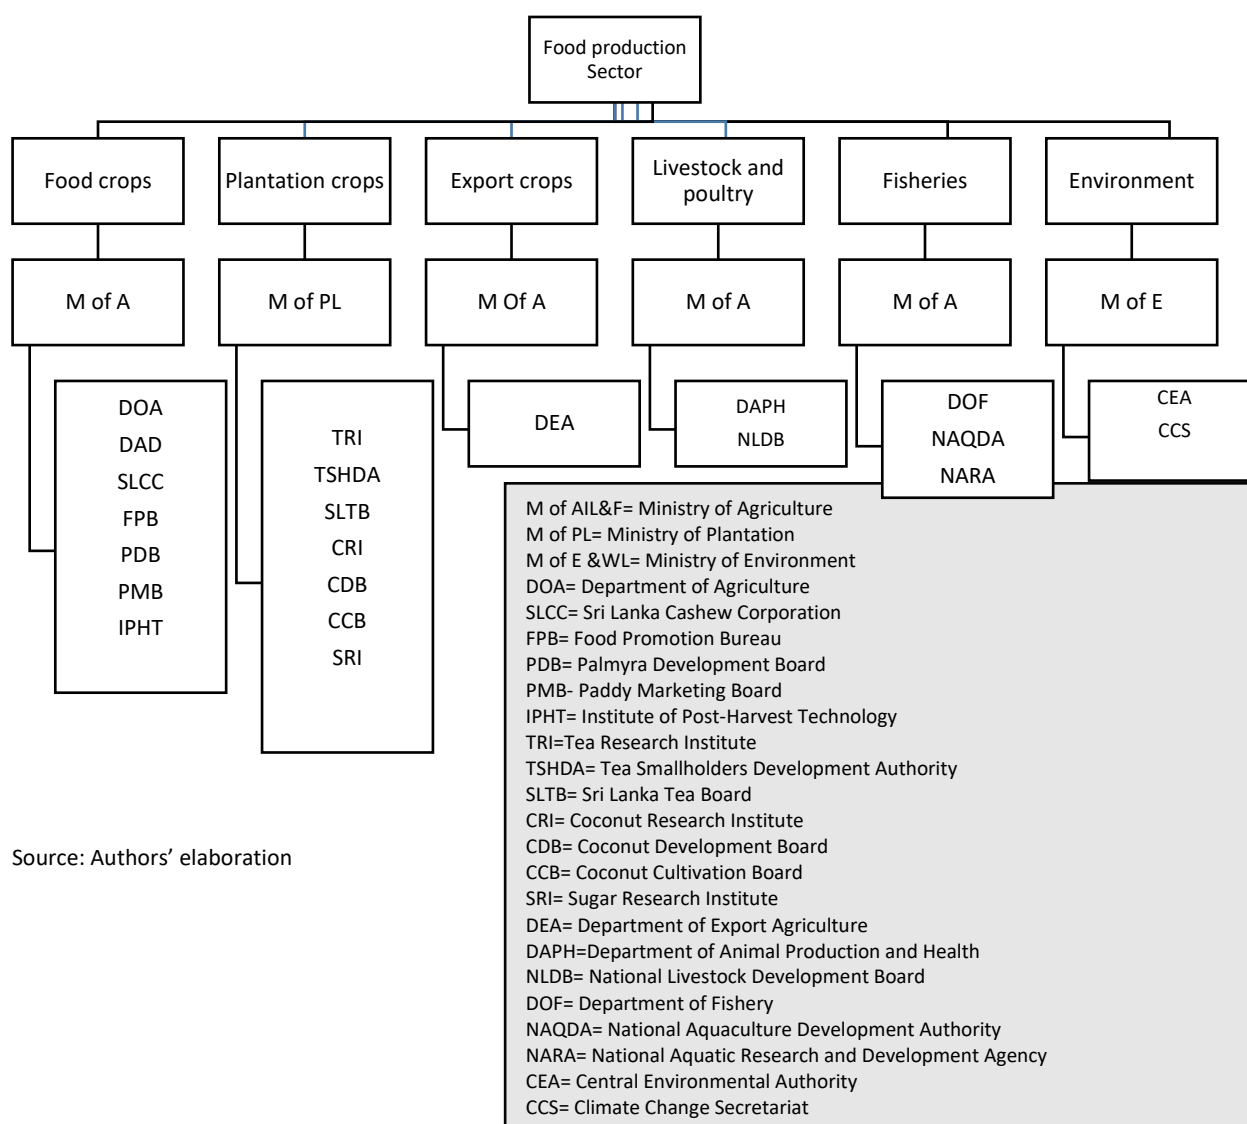

Source: Authors' elaboration

## 5. Analysis of food production governance and its main stakeholders

The Ministry of Agriculture (MoA) is a key central government ministry responsible for formulating and implementing the national policy related to food production. An array of institutions is engaged with the MoA to strengthen the food production sector in Sri Lanka (Ministry of Agriculture, 2010). The institutions governing food production in Sri Lanka could be categorized based on their mandates dealing with food crops, plantation crops, export agricultural crops (export crops other than tea, rubber, and coconut), livestock and poultry, fishery and other allied services such as irrigation, agrarian development and environment. The institutional linkages of the different ministries and agencies are described in **Figure 5** on p.5.

In addition to the agencies described in **Figure 5**, there are several provincial ministries (Agriculture, Irrigation, Environment, Local Government, Health, etc.) and departments, under each provincial ministry, handling the devolved function of the agriculture and food production sector. The national overarching agricultural policy of 2019 is available online (Ministry of Agriculture, 2010). The policy highlights that the food production sector has an extended number of institutions with poor inter-institutional coordination owing to the devolution of powers without real decentralization leading to a top-down approach in implementation and rent-seeking behavior due to over-regulation. There is an absence of sound coordination for knowledge generation and dissemination between national and provincial systems.

*Figure 5 Sri Lanka, main institutions handling the food production sector activities at the national level, 2021*

Source: Authors' elaboration

The key functions and mandates of the main governmental institutions dealing with food production are listed and described in **ANNEX 1** on p. 19 (roles and mandates of the key government agencies working with food production). The key private sector players and civil society/producers/consumer organizations engaged in food production are listed in **ANNEX 2** on p. 21 (private sector players in food production, manufacturing, and marketing). Additionally, **ANNEX 3** on p. 23 (major supermarket chains in the country) is presented along with **ANNEX 4** on p. 24 on major restaurant chains in the country. There are many NGOs, civil societies and consumer/trader organizations working in the areas of food production, distribution, and marketing. Some of the main national-level organizations are described in **ANNEX 5** on p. 25 on major national level NGOs and civil societies working on food production, distribution, marketing and waste prevention, minimization, and management.

The MoA and the allied institutions are mandated to conduct research and technology development while also promoting innovative practices in production. The MoA has a dedicated Institute for Post-Harvest Technologies, aimed at reducing food losses in the value chain (i.e. from production up to but

excluding retail) and also a separate division for food research to develop food preservation techniques that would help strengthening value addition, especially for peak production periods.

The Department of Agriculture (DoA) has developed guidelines and good management practices to minimize food losses. However, there is no law, regulation, or enforcing mechanism with the DoA to for the implementation of the guidelines or prevent noncompliance. The organizations dealing with food production have no mandate or authority to regulate packaging, handling and transporting. Efforts to reduce the food losses occurring in the transport of perishables with the introduction of plastic crates by the MoA were not successful due to the significant increase in transport cost with the intervention. Retail markets are under the Ministry of Trade, while public fairs and open markets are the property of LAs where a considerable amount of FW is occurring. Therefore, a common platform to reduce FW is critically important with overarching governance that coordinates the activities of different working groups.

A significant amount of FW is generated in schools, universities, hospitals, and institutional canteens. According to an estimate, hospitals generate about 01 to 04 tonnes of FW/day (Ceylon Digest, February 12, 2020), as patients receive food from the hospital while also receiving food from visitors.

Considerable amounts of FW are occurring in the food services sector and retail markets in the selected urban areas. Interventions targeting FW reduction should focus on supply chain optimization, training of employees, raising awareness and disseminating information for customers and increasing cooperation with charities and social service organizations for recovery and redistribution of safe and nutritious food for direct human consumption. Businesses have an opportunity, for instance, to utilize the resources allocated for corporate social responsibility (CSR) to initiate quantification of FW and stakeholders' mapping.

There are several national-level private sector players engaged in food processing and value addition of fruits and vegetables, dairy and livestock products (see **ANNEX 2** on p. 21). Transferring knowledge on international experiences and best practices to prevent and reduce FW to enhance current capacities would benefit Sri Lanka, in general and the food business sector, in particular.

Different types of food-related civil societies and national level NGOs have been functioning in the country, especially for fruits and vegetables, livestock, dairy industries, fishery, bakery products and food services (see **ANNEX 5** on p. 25). These organizations have a large number of members and sometimes create regional branches throughout the country.

Sri Lanka's Roadmap and Action Plan on Urban Food Waste Prevention and Reduction for Households, Food services, Retailers and Wholesalers (2021) included evidence from all relevant stakeholders, also including case studies (Jayathilake *et al.*, 2023b).

## 6. State and non-state actors in food and bio-waste management

State actors could create an enabling environment for FW reduction through effective policies, regulatory instruments and incentives for better bio-waste management, multi-stakeholders action plans and monitoring and reporting mechanisms for FW data (e.g. from wholesale, storage, processing, distribution, food services and households).

The diverse roles and responsibilities for food and (bio-) waste-related Ministries and Departments are described in **ANNEX 6** on p. 28 (role and mandates of central and provincial agencies for (bio-)

waste). The function of (bio-)waste management is a responsibility of the Ministry of Local Government and Provincial Councils and relevant LAs which is stipulated in the municipal council ordinances No.16, Urban council ordinance No.61, and Pradeshiya sabha act No. 15. Each LA has been given the authority to define the implementation and penalties rules for waste management.

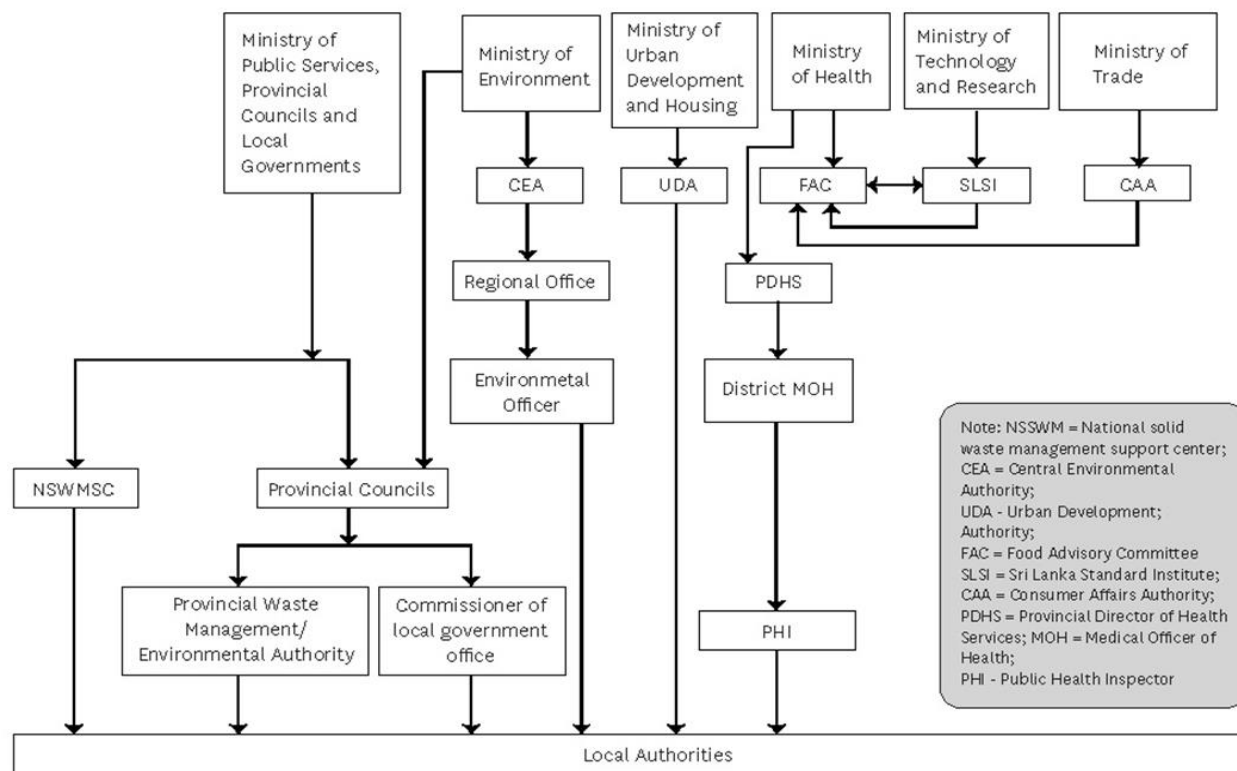

In Sri Lanka, each LA is responsible for the collection and disposal of waste generated by residents and for the development of relevant policies and by-laws that refer to measures related to citizens and businesses. The National solid waste management support center was established to provide technical and financial support for LAs to upgrade the waste management system.

Supervision rights over LAs was handed over from the central government to the provincial councils (PCs) through the 13th amendment of the 1987 constitution. Its rights relating to waste management were, accordingly, handed over to the PC in provincial council act No. 42. The Ministry of Environment formulated the National environmental act (NEA) No.47 in 1980 aiming to preserve the environment and to prevent pollution. Consequently, the Central Environmental Authority (CEA) was established.

Food safety falls under the mandate of the Food control administration unit (FCAU) with the leadership of the Director-General of Health Services, Ministry of Health who is also the chairperson of the Food advisory committee (FAC) represented by various stakeholders from government departments/ministries, private sector, and consumer organizations. In addition to the Ministry of Health, other major ministries involved in FAC are the Ministry of Technology and Research, Ministry of Trade, Ministry of Finance (Department of Customs), and Ministry of Agriculture (Livestock).

Institutional linkages between ministries and agencies that could enable FW prevention and reduction are illustrated in **Figure 6** on p.8. The current fragmentation leads to duplicated and overlapping functions. In addition to the mapped government agencies, there are universities, research institutes and NGOs that are keen on food waste prevention and reduction. The government could initiate collaborative research projects with these organizations to generate knowledge that would facilitate behavior change for wholesalers, retailers, food processors, food services and consumers.

**Figure 6** Institutional linkages of central government regulatory agencies and provincial administration on food control and waste management in Sri Lanka as at 2021

Source: Authors' elaboration

Several private organizations are involved in (bio-)waste management in Sri Lanka. Some of them as the executive body for projects or/and donor organizations, while some are service providers for LAs. The major private sector players in (bio-)waste management, at the moment, are Clean Tech of Abans/Abans Environmental Services PVT Ltd and Care Clean. They provide services in solid waste collection and transport. Connections are established with piggery farmers to provide former foodstuffs to be utilized as feed from hotels and restaurants – to reduce the transport cost of biowaste going to landfill sites.

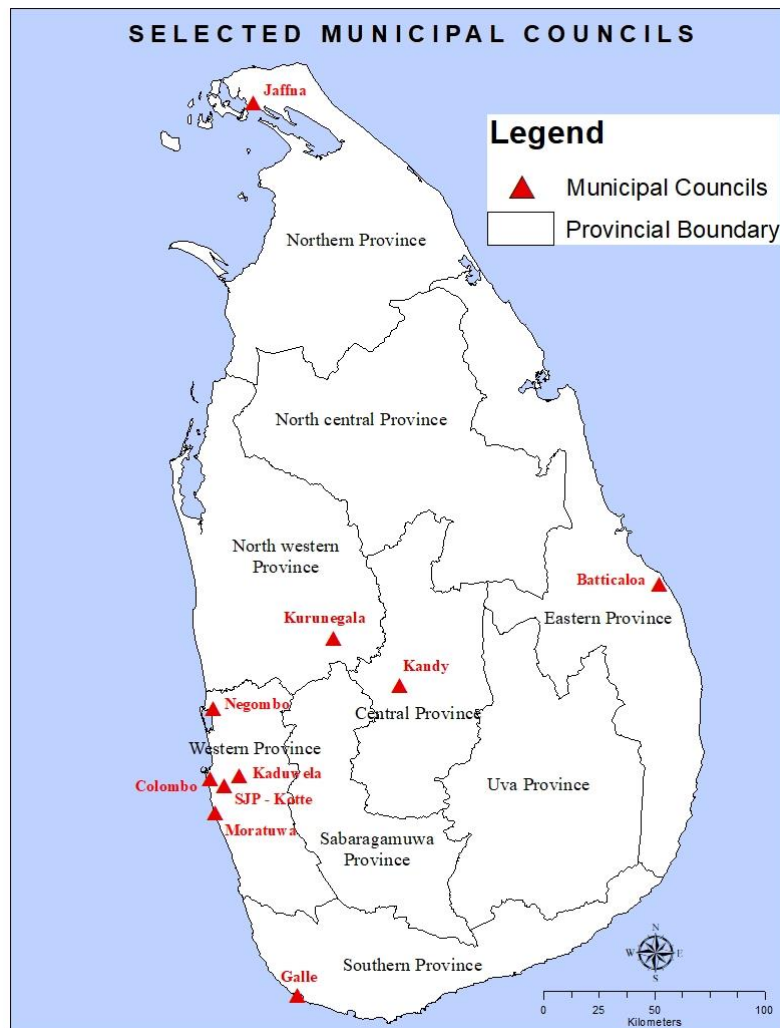

Additionally, there is also the commercial company Carekleen Services active in cleaning services for offices, while also working on solid waste management. However, due to accessibility and logistics challenges, the private sector involvement in waste management is slowly reducing (Basnayake and Viswanathan, 2014).

The private sector interest in projects on waste to energy started recently. For example, Biogreen cycle Pvt. Ltd is providing services to the projects related to the recovery of energy from waste through a variety of processes, including combustion, gasification, pyrolyzation, anaerobic digestion and landfill gas (LFG) recovery. Nevertheless, prevention of FW at source has demonstrated high returns on investment. Current FW management, once the resource becomes waste, should be balanced with reduction efforts.

## 7. Stakeholder analysis in selected municipality council areas

Colombo municipal council (CMC) was established in 1865 and it is one of the oldest municipalities in South Asia. In addition to the resident population in Colombo, there is an estimated floating population of nearly 500 000. Out of the selected areas, Colombo, Sri Jayewardenepura-Kotte, Kaduwela, Moratuwa and Negombo are in the Colombo megapolis area and others are located in other provinces. Colombo registers a higher male to female ratio compared with the other urban areas analysed. The major demographic features of the selected municipality areas are described in **ANNEX 7** on p. 31. The locations of the selected sites are illustrated in **Figure 7** on p.10.

**Figure 7** Locations of the selected municipality areas

Source: United Nations Geospatial. 2022. Map geodata [shapefiles]. New York, USA, United Nations. (modified by the authors)

## 7.1 Colombo municipality

Colombo is the commercial capital of the country and a place to key economic infrastructures. The CMC was established in 1865 and it is one of the oldest municipalities in South Asia. The CMC covers Colombo and Thimbirigasyaya Divisional secretariat divisions.

There are about 697 private food service entities (e.g. hotels, restaurants and caterers) registered with CMC, excluding star grade hotels. The number of star hotels exceeds 100 within the city limits. The city has the largest wholesale fruits and vegetables market in the country (i.e. Colombo Manning Market) and more than 10 public retail markets provide a regular supply of perishables and other food items to the city dwellers. The city has a current network of supermarkets consisting of nine Keells supermarkets, 22 Cargills food cities, four Arpico super centers and five Laugfs super marts. The dedicated economic center in Narahenpita is another popular retail market.

The estimated amount of food waste generated in the CMC area in 2017 was 353 tonnes/day, which is half of the total waste generated in this geographical area. Waste analysis done for the segregated waste collected by the CMC primarily consisted of household food waste, followed by 110 tonnes/day from food services, 25 tonnes/day from markets and 9 tonnes/day from slaughterhouses and meat shops (FAO, IWMI and RUAF, 2018). Therefore, food services are a major group of food waste generators.

**ANNEXES 8 – 12** on pp. 32–38 describe the major stakeholders under different categories (e.g. traders, charities, retailers, service providers, regulatory actors), in Colombo city who could contribute to FW prevention, reduction and recycling.

## 7.2 Sri Jayewardenepura - Kotte municipality

Sri Jayewardenepura - Kotte (commonly known as Kotte) is the official administrative capital of Sri Lanka, located in the southwestern part of the country, about 8 km southeast of the commercial capital of Colombo. The city is one of the planned urban sites with government offices and residential buildings. The Parliament of Sri Lanka and the University of Sri Jayewardenepura are located within the city.

The major identified stakeholders linked with FW generation, management and regulations are listed in **ANNEXES 13 – 15** on pp. 39–41. In addition to listed supermarkets, the city area has ten Keells super, 12 Cargills food city, four Laugfs super mart and two Arpico super centers.

## 7.3 Kaduwela municipality

Kaduwela municipality is a growing peri-urban city near Colombo. It is located about 16 km from Colombo city center on the Colombo - Avissawella old road. The city area hosts several key ministries and international organizations such as the International Water Management Institute and the Overseas School of Colombo. Several major supermarkets have opened branches in the area including 11 Cargills food city branches, six Keells super outlets, two Laugfs super marts and three Arpico super centers.

An analysis of the sectoral contribution of FW in Kaduwela municipal council (MC) showed that supermarkets and vegetable fairs/markets account for the highest FW generation followed by the hotels and restaurants sector. Typically, the foodservice sector is expected to contribute with the highest amounts of FW. However, in this case, a considerable amount of former foodstuffs generated in hotels and restaurants are diverted to piggery farmers without going to the municipal solid waste collection system (Jayathilake *et al.*, 2021). Therefore, the actual FW generated by hotels and restaurants in this area is underestimated. The list of stakeholders belonging to various categories associated with FW generation, regulation and management are given in **ANNEXES 16–19** on pp. 42–45.

## 7.4 Moratuwa municipality

Moratuwa is an area having the second-highest population density in the Colombo metropolitan region. Moratuwa is a large suburb of Colombo city, on the southwestern coast of Sri Lanka, near Dehiwala-Mount Lavinia. It is situated on the Galle–Colombo (Galle road) main highway, 18 km south of Colombo city center. According to UN-Habitat (2002), the city is important due to various factors namely it is a town with some modern industrial activities, traditional carpentry workshops and timber industry, fisheries activities, educational and religious centers of a higher order, service activities particularly related to tourists and industry and residential suburbs of Colombo.

Moratuwa municipal council collects around 124.5 tons of solid waste/day that includes 66.8 tonnes of residential waste, 10 tonnes of hotel and restaurant waste, 24 tonnes from markets. Waste composition analysis conducted at the disposal site shows that 52.5 percent of the waste is kitchen waste (JICA, 2016). The major food waste generator in the area is households followed by markets and hotels and restaurants.

The city accommodates 23 primary schools, 07 secondary schools, 02 national schools, 02 private schools and 04 international schools. There are several major supermarkets in the area including seven branches of Cargills food city, three branches of Keells super and one Arpico supercenter and Laugf super mart and eight public markets. The key stakeholders associated with food waste generation and management are listed in **ANNEXES 20 – 22**, on pp. 45–47, that cover major private actors, service providing institutions – public and private, regulatory actors and other government organizations responsible for food waste generation and management respectively.

## 7.5 Negombo municipality

Negombo is a city on the west coast of the country and at the shore of Negombo lagoon, close to Colombo international airport. Negombo is one of the fastest-growing tourist destinations in Sri Lanka and it is experiencing a rapid increase in waste generation. The daily waste generation is 157.68 tonnes and data on solid waste indicates 100.77 tonnes of residential waste, 14.23 tonnes of hotels and restaurant waste and 14.99 tonnes of markets, daily fairs, fruits/vegetables retail stalls and fish/meat stalls waste (Karunaratna *et al.*, 2019). Hotel waste generation increases by 50–200 percent during the peak tourist seasons (November to April) and for special events (weddings and parties). Out of the daily collected bio-waste, 10 tonnes is used for compost-making at the municipal compost plant. The remaining quantity is currently disposed of at Ovitiyawatta open dumping site (Negombo municipal council, 2019). Approximately 1–2 tonnes of former foodstuffs are collected by private traders to sell as animal feed for piggery farmers (Karunaratna *et al.*, 2019).

Negombo has a large number of star grade hotels and guest houses. The area has branches of several major supermarkets including nine branches of Cargills food city, four branches of Keells super, one Arpico super center and one Laugf super mart. Households are the dominant FW generators followed by markets, hotels, and restaurants respectively. The major stakeholders associated with FW generation and their potential role in FW reduction and management are listed in **ANNEXES 23 – 26** on pp. 47–49: major private actors, service providing institutions - public and private, regulatory actors and other government responsible for FW generation and management, and major traders organizations, respectively.

## 7.6 Kandy municipality

Kandy is the capital city of the hill country. It is a UNESCO heritage city with a high level of tourist attractions. The municipality area has a population of 98,828 as per the 2012 census, but the city also serves an additional urban fringe population of 116 000. Kandy registers the highest share of in-migrants as a proportion of the total population (Sri Lanka Institute of Local Governance, 2018).

According to the registration records of the Kandy municipal council (KMC), the area consists of over 330 hotels, restaurants, and caterers excluding star hotels. The total number of hotels, including star grade hotels within the Kandy city center, is 96. There are 84 government offices, 33 Schools and 4 hospitals in the KMC area with cafeteria facilities. In addition to 33 supermarkets in the city, the numbers of registered vegetables, fruits, fish, and meat stalls are 34, 15, 14 and 29 respectively. The supermarkets include three numbers of Cargills food city, two numbers of Keells super, One Arpico super center and one Laugf super mart.

The total waste generated in the Kandy municipality area was 127 tonnes/day in 2016 (Karunaratna *et al.*, 2019). According to a waste assessment conducted in 2007, the solid waste generated consisted of 59.2 percent of FW (Menikpura *et al.*, 2007). However, waste composition analysis done by JICA (2003), shows that the waste consisted of on average 58.2 percent of kitchen waste, that included 77.11 percent of residential kitchen waste and 79.67 percent of market waste. Dissanayake (2013) also found similar findings and reports that residential waste in the Kandy landfill consisted of 78.3 percent kitchen waste. Kandy teaching hospital alone generates 4 tonnes of FW per day (Sujeewa Fernando, Ministry of Environment, personal communication, August 2020). **ANNEXES 27 – 30** on pp. 49–53, indicate the main stakeholders representing different groups who have a potential role to play in FW reduction: major private actors, service providing institutions – public and private, regulatory actors and other government organizations responsible for food waste generation and management, main charities, consumer organizations and NGOs related to food waste management, respectively.

## 7.7 Galle municipality

Galle is the capital city of southern province. The city is a UNESCO heritage city with significant tourist attractions. The average per capita waste generation rate of Galle MC area is 0.28 kg/day (i.e. 50.9 tonnes of waste/day). Out of the total waste generated, 80 percent is disposed of in an open dumpsite. Households, food business operators and institutions are the biggest waste generators in Galle, but the contribution from households is the highest (i.e. 51 percent). The results of the waste analysis show that household waste consisted of 68.1 percent of kitchen waste and food business operators waste (i.e. hotels and restaurants) with 70–76 percent of kitchen waste. (Balasooriya *et al.*, 2015)

The city area has more than 350 registered hotels, restaurants, guest houses and caterers excluding star grade hotels. The major supermarkets in the city are three branches of Cargills food city, two branches of Keells super and one branch of Arpico super center. The estimated population in 2017 is 104 000, but the municipal council serves an additional fringe population of 263 000. It has been reported that Galle city has the lowest working-age population out of the nine provincial capital cities (Sri Lanka Institute of Local Governance, 2018).

**ANNEXES 31 – 34** on pp. 53–56, indicate the main stakeholders representing different groups who have a potential role to play in FW reduction: major private actors, service providing institutions –

public and private, regulatory actors and other government organizations responsible for food waste generation and management, main charities, consumer organizations and NGOs related to food waste management, respectively.

## 7.8 Jaffna municipality

Jaffna is the northern capital of the country. The city is a historical colonial port city. Jaffna's economy is mainly driven by the service economy (Sri Lanka Institute of Local Governance, 2018). The amount of solid waste generated is 104.87 tonnes/day and the per capita waste generation rate is 1.297 kg/day (JICA, 2016). The results of the waste analysis show that the collected solid waste consisted of 68.9 percent kitchen waste. According to JICA (2016) Jaffna MC has not implemented any program in an organized manner to reduce, overall, the generation of organic waste nor FW.

The municipality area has 88 registered hotels, restaurants, eateries, and caterers and 7 numbers of star grade hotels. The number of schools with catering facilities is around 17 and also have three degree offering higher educational institutes. The major supermarkets available within the Jaffna municipality area are three branches of Cargills food city and one branch of Arpico super center. **ANNEXES 35 – 38** on pp. 56–58, indicate the main stakeholders representing different groups who have a potential role to play in FW reduction: major private actors, service providing institutions – public and private, regulatory actors and other government organizations responsible for food waste generation and management, main charities, consumer organizations and NGOs related to food waste management, respectively.

## 7.9 Kurunegala municipality

Kurunegala is the provincial capital city of north-western province. The city provides a good example of ribbon development progressing into urban sprawl. The economy of the city is based on the industrial and service sectors. Kurunegala city has the highest level of tertiary education attainment compared to other provincial capital cities (Sri Lanka Institute of Local Governance, 2018). The large number of service-oriented institutions and higher education centers located within the boundaries of Kurunegala MC serve a floating population of about 250 000. According to the solid waste management action plan of 2008 (JICA, 2016), the total waste generated in the Kurunegala MC area is 48 tonnes/day, including 2.46 tonnes of waste generated from hotels and restaurants. Overall, the total waste consisted of 52 percent of kitchen waste.

The supermarket list excludes the major supermarkets including two Cargills food city outlets, one each of Keells super, Laugf super mart and Arpico super centre.

**ANNEXES 39 – 41** on pp. 59–60, indicate the main stakeholders representing different groups who have a potential role to play in FW reduction: major private actors, service providing institutions – public and private, regulatory actors and other government organizations responsible for food waste generation and management, main charities, consumer organizations and NGOs related to food waste management, respectively.

## 7.10 Batticaloa municipality

Batticaloa is an eastern coastal town surrounded by the Indian Ocean and Batticaloa lagoon. The quantity of waste generated in the Batticaloa MC area is 52.5 tonnes/day (Otoo *et al.*, 2016) of which 57 percent is organic waste (Bandara, 2011). Out of the total waste collected, 12 tonnes of waste is segregated at the source. Segregated waste consists of 8 percent of food and market waste. Households are the major waste generators in Batticaloa followed by markets, hotels, restaurants, institutions (e.g. hospitals, universities) and commercial entities.

The MC area consisted of 23 721 households, five markets, one slaughterhouse, 55 hotels and restaurants, three hospitals and 44 commercial and institutional establishments (Otoo *et al.*, 2016). Waste analysis done for the collected household waste indicates that FW generation is the highest category of waste from the total waste generated at the household level amounting to 3.4 tonnes/day. The study further reveals that every person generates 260 g of FW per day and FW contributes nearly 88 percent of the total waste generated by the households in the study area (Sivakumar and Sugitharan, 2010).

The area has the highest poverty headcount index out of all selected municipalities given in Table 7. In addition to the resident population of 86 200, there is a floating population of around 3 000 that is daily coming to Batticaloa town for their work.

**ANNEXES 42–45** on pp. 61–62, indicate the main stakeholders representing different groups who have a potential role to play in FW reduction: major private actors, service providing institutions – public and private, regulatory actors and other government organizations responsible for food waste generation and management, main charities, consumer organizations and NGOs related to food waste management, respectively.

## 8. Concluding remarks

There is a large array of institutions in the country, starting from food production to consumer affairs, that are performing their duties throughout the food consumption, production and supply chain and can play a role in FW prevention and reduction. The report highlights a lack of coordination that leads to a duplication of tasks and a risk of not realizing the full potential of complementarities for this work area. There is a need for a common platform on the FW topic.

Most state entities seldom work closely with non-state stakeholders, including grass-root organizations. However, civil society could be one of the main stakeholders for local actions involving communities, such as awareness raising. Currently, there is no mechanism to implement or enforce provisions made through many legislations and policies that are linked with FW prevention and reduction.

Most institutions involved in waste management are not fully aware of or concerned about the importance of FW reduction. Additionally, budget allocations should be revised to start investments that would lead to significant socioeconomic and environmental returns.

LAs, as the actors responsible for handling and managing waste, are currently involved in recovering nutrients and resources from former foodstuffs (i.e. through animal feed) and food waste valorization

(i.e. through compost). The private sector and civil society organizations launched initiatives on the redistribution and recovery of safe and nutritious food for direct human consumption. However, the lack of official legal and operational guidelines for redistribution and recovery of safe and nutritious food for direct human consumption as well as for utilization of former foodstuffs for animal feed, combined with a gap in enforcement and monitoring, leads to significant constraints for scaling up these solutions.

Awareness should be raised among stakeholders, from food production up to households, on FW prevention and reduction. Building capacities on measurement, reporting, and identification as well as the implementation of solutions, for all state and non-state stakeholders, is key. The 2021 *Sri Lanka's Roadmap and Action Plan on Urban Food Waste Prevention and Reduction for Households, Food services, Retailers and Wholesale*, that was launched on 17 August 2021, is the starting point towards reaching SDG 12.3.

## Annexes

*Annex 1. Roles and mandates of the key government agencies working with food production*

Agency	Roles and Mandates
<b>Crop production</b>	
Department of Agriculture (DoA)	The objectives of the DoA are focused on maintaining and increasing productivity and production of the food crop sector to enhance the income and living conditions of the farmer and make food available at affordable prices to the consumer. Functions include research, extension, training on food production, seed and planting material production, regulatory services on plant quarantine, soil conservation, and regulation of pesticides. For more details: <a href="https://www.doa.gov.lk/index.php/en/">https://www.doa.gov.lk/index.php/en/</a>
Department of Agrarian Development	The Department of Agrarian Development (earlier Department of Agrarian Services) was established to coordinate all agricultural support services at the grass-root level. Key responsibilities related to food production are the distribution of fertilizer, formulating agricultural law, water resource management (village irrigation), and agricultural land management. For more details: <a href="http://agrariandep.gov.lk:8008/agrarian/home.jsp">http://agrariandep.gov.lk:8008/agrarian/home.jsp</a>
Department of Irrigation	The mandate of the Irrigation Department includes the development of land and water resources for irrigated agriculture, provision of irrigation and drainage facilities for cultivable lands in irrigation and drainage projects, management of water, and water resource management for sustainable agriculture. For more details: <a href="http://www.irrigation.gov.lk/">http://www.irrigation.gov.lk/</a>
National Food Promotion Board	National Food Promotion Board was established under act No. 15 of 1973 to realize the prime goal of establishing an economically independent nation while alleviating the culture of dependency by incorporating sustainable development which achieves through a green revolution. For more details: <a href="https://www.nfpb.lk/">https://www.nfpb.lk/</a>
Institute of Post-Harvest Technology (IPHT)	IPHT is the main Institution in Sri Lanka engaged in improving the post-harvest technology of rice/other grains, field crops, fruits/ vegetables, and spices through research, training/ extension, consultancy/ advisory, and other development activities. The institute develops and promotes post-harvest technology for mandated crops. For more details: <a href="http://www.niphm.gov.lk/contact.html">http://www.niphm.gov.lk/contact.html</a>
Hector Kobbekaduwa Agrarian Research and Training Institute (HARTI)	HARTI is a socioeconomic research institute established mainly for the promotion of policy-oriented research and training needs of the agrarian and rural sectors. For more details, refer the following link: <a href="http://www.harti.gov.lk/index.php/en/">http://www.harti.gov.lk/index.php/en/</a>
Sri Lanka Council for Agricultural Research Policy (SLCARP)	Apex body to fund and mobilize research capabilities of the national agricultural research system, universities, private sector, and others for generation and dissemination of appropriate technology related to food production. For more details: <a href="https://www.slcarp.lk/">https://www.slcarp.lk/</a>
Paddy Marketing Board (PMB)	The objectives of the PMB are purchasing, selling, supplying, and distribution of paddy and rice and carrying on the process of milling. For more details: <a href="http://pmb.gov.lk/">http://pmb.gov.lk/</a>

The Department of Export Agriculture (DEA)	The DEA is the main government institution responsible for the Research and Development through productivity, production and quality improvements of a group of perennials, Export agricultural crops (EAC) namely Cinnamon, Pepper, Cardamom, Clove, Nutmeg, Coffee, Cocoa, Vanilla, Betel, Citronella, Lemongrass, and Arecanut. For more details: <a href="http://www.exportagridept.gov.lk/web/">http://www.exportagridept.gov.lk/web/</a>
Tea Small Holders Development Authority (TSHD)	This is the sole statutory body mandated for the development of tea smallholdings in the country, increase of production, marketing activities, improvement of productivity, and working for the welfare of the tea smallholders. For more details: <a href="http://www.tshda.gov.lk/web/">www.tshda.gov.lk/web/</a>
Tea Research Institute (TRI)	The TRI facilitates research into all matters on tea and thereby enriches the industry through a professional approach to commercial tea cultivation and processing and generating and disseminating new technologies related to tea cultivation and processing. For more details: <a href="http://www.tri.lk/">www.tri.lk/</a>
Sri Lanka Tea Board	The Tea board is in charge of regulatory and administrative matters concerning the Sri Lankan Tea industry. The Tea Board is the apex regulatory and administrative body of the Sri Lankan tea industry comprising representatives from both private and government bodies involved in the industry, including cultivators and manufacturers, traders, exporters, and plantation employees. For more details: <a href="http://www.pureceylontea.com">www.pureceylontea.com</a>
Coconut Cultivation Board (CCB)	Coconut Cultivation Board (CCB) is a government institution that operates in many regions and involved in training. For more details: <a href="http://www.coconut.gov.lk/en/home/">http://www.coconut.gov.lk/en/home/</a>
Coconut Development Authority (CDA)	CDA has been vested with powers and functions in the industry to be its apex body which provides governance, guidelines, technology, approval for projects & programs, and fund management of the CDA as well as for the other affiliated co-groups in the industry. For more details: <a href="http://www.cda.lk/web/">www.cda.lk/web/</a>
Coconut Research Institute (CRI)	The Coconut Research Institute (CRI) undertakes research activities with three Technical Divisions namely, Genetics, Chemistry and Soil Chemistry for assisting coconut growers with technical information on coconut cultivation. For more details: <a href="http://www.cri.gov.lk/">www.cri.gov.lk/</a>
<b>Fisheries</b>	
Department of Fisheries and Aquatic Resources	The main focus of the Department of fisheries is to promote environmental fishing methods providing technical support for the fishermen to upgrade their boats and gears enabling them to transfer to more sustainable methods of harvesting and also uplifting the socioeconomic aspects of the fisherfolk through community development programs. For more information: <a href="https://www.fisheriesdept.gov.lk/web/index.php?lang=en">https://www.fisheriesdept.gov.lk/web/index.php?lang=en</a>
Ceylon Fisheries Corporation	Ceylon Fisheries Corporation (CFC) was established to ensure affordable prices to consumers while securing the producer. CFC is vested with the responsibility of the purchase of fish and sale of fish, provision of cold room facilities and sale of fish and fishery products. For more details: <a href="https://www.cfc.gov.lk/web/index.php?lang=en">https://www.cfc.gov.lk/web/index.php?lang=en</a>
National Aquaculture Development (NAQDA)	NAQDA is the main state organization mandated for the development of the aquaculture and inland fisheries sector in Sri Lanka. For more details: <a href="http://www.naqda.gov.lk/">www.naqda.gov.lk/</a>

National Aquatic Resources Research and Development Authority (NARA)	NARA is the apex national institute vested with the responsibility of carrying out and coordinating research, development, and management activities on the subject of aquatic resources in Sri Lanka. NARA also provides services for the development and sustainable utilization of living and non-living aquatic resources. For more details: <a href="http://www.nara.ac.lk">www.nara.ac.lk</a>
<b>Livestock</b>	
Department of Animal Production and Health (DAPH)	The DAPH is the apex government institution responsible for providing leadership in the technical functions of animal health, animal breeding, livestock research, and human resources development for livestock development activities. For more details <a href="http://www.daph.gov.lk/web/index.php?lang=en">www.daph.gov.lk/web/index.php?lang=en</a>
National Livestock Development Board (NLDB)	The mandate of the NLDB is to introduce new technology, expertise, and better management to improve productivity and successfully compete in the market and maintain all farm activities at an optimum level. For more details: <a href="http://www.nldb.gov.lk/Home.html">www.nldb.gov.lk/Home.html</a>

*Annex 2. Private sector players in food production, manufacturing, and marketing*

Private organization	Roles	Contact
CIC Holdings PLC	CIC Holdings has a subsidiary called CIC Agribusiness to handle agricultural activities that manages the entire supply chain from seed to shelf connecting rural farmers to urban consumers and facilitating the socioeconomic progress of rural communities. The company consisted of CIC Seeds (Private) Limited, CIC agri produce export (private) limited, CIC agri produce marketing (private) limited, and CIC dairies (private) limited.	205, D.R.Wijewardena Mw, Colombo 10. Email: <a href="mailto:info@cicagri.com">info@cicagri.com</a> Web: <a href="http://www.cicagri.com/">www.cicagri.com/</a>
Hayleys plc	Leading privately own organization in food production and marketing. Currently engaged in agriculture, food production, tea and rubber plantations, and many other industrial production and services.	Jayanthi Dharmasena, No.400, Deans road, Colombo 10, Sri Lanka. Email: <a href="mailto:Jayanthi.Dharmasena@hayleys.com">Jayanthi.Dharmasena@hayleys.com</a> Web: <a href="http://www.hayleysagriculture.com">www.hayleysagriculture.com</a>
Prima Ceylon	The core business of Prima Ceylon (Ltd) is wheat flour milling and related activities. It provides dynamic customer services that include the transfer of baking skills and Bakery Support. Its milling capacity has now expanded to 3600 tonnes of wheat per day and silo capacity to over 200 000 tonnes. The company markets various types of flour, biscuits, cakes, noodles, string hoppers, and other products to suit Sri Lankan lifestyles.	50, Sri Jayewardenepura Mw, Rajagiriya, Sri Lanka. Web: <a href="#">Prima link</a>
Keells food products plc	Keells is one of the market leaders in the processed meat industry with a Sri Lanka standards (SLS) certificate. It produces a range of products including sausages, meat Balls, hams, bacon, frozen meats, and raw meats.	Mr Saliya Nanayakkara, Brand activation manager, No. 16, Minuwangoda road, Ekala, Jaela. Email:

		<a href="mailto:saliya.kfp@keells.com">saliya.kfp@keells.com</a> Web: <a href="https://www.keellsfoods.com/">https://www.keellsfoods.com/</a>
Cargills Ceylon plc	Cargills offers a range of delectable juices, jam, sauces, cordials & accompaniments made from fresh products directly handpicked from orchards. Variety of Cargills Magic ice cream is another range of popular dairy products manufactured and marketed by the company.	Dr Nelum Vithana, Food Safety & Nutrition Manager, Head Office, No:40, York street, Colombo 01. Web: <a href="#">Cargills link</a>
Lanka canneries	Lanka Canneries is manufacturing jam, cordial, chutney and pickle extracted from fresh fruits and vegetables.	MrNilhan Ekanayake - Export Manager, PO. BOX 341, Nawala road, Colombo 05. Email:md-lankacanneries@eureka.lk Web: <a href="#">Lanka canneries link</a>
Edinburgh products (pvt) limited.	The company is involving in manufacturing and marketing a range of quality food products that include sauces, chutneys, pickles, jams, cordials, fruit drinks, concentrate Juices, Syrups, oil, etc.	12, New Kolonnawa road, Moragasmulla, Rajagiriya Email: <a href="mailto:info@edinboroughfoods.com">info@edinboroughfoods.com</a> Web: <a href="http://www.edinburgh.lk/">http://www.edinburgh.lk/</a>
MILCO	The mission of the MICO is to improve the standard of living of the local dairy farmer and increase milk production ensuring customer satisfaction by supplying quality fresh milk and dairy products at competitive prices, through effective and efficient management, encouraging human resources development in the organization. MILCO engages in milk collection from farmers, processing fresh milk, and marketing the milk products under the Highland brand.	No: 45, Nawala road, Narahenpita Colombo 05. Web: <a href="http://www.milco.lk/">www.milco.lk/</a>
Fonterra	Fonterra sells a range of Anchor brand milk products and some other own bands. The company's vision is to provide high-quality dairy products to Sri Lanka and to develop a thriving dairy industry. With nine filling machines working around the clock, the plant packs mm 5270 tonnes of milk powder every month.	No: 100, New Kandy road, Kaduwela 11650. Email: <a href="mailto:fbl.communications@fonterra.com">fbl.communications@fonterra.com</a> Web: <a href="http://Fonterra.lk">Fonterra.lk</a>
Lanka milk foods (LMF) ltd	Lanka Milk Foods (LMF) Ltd is a public-private partnership company, established to package and distribute imported milk powder. They have products ranging from Lakspray, Daily, and My Juice.	Welisara, Ragama. Email: <a href="mailto:lakspray@lmfgroup.lk">lakspray@lmfgroup.lk</a> Web: <a href="https://www.lmfgroup.lk/">https://www.lmfgroup.lk/</a>
Nestlé (Pvt.) ltd	Nestlé's milk collection network currently involves more than 25 000 farms and represents an estimated 40% of the total fresh milk collected nationwide. Nestlé runs a substantial milk powder-processing operation based on locally procured milk.	440, T. B. Jayah Mawatha, Colombo 01. Web: <a href="http://www.nestle.lk/en">www.nestle.lk/en</a>
Pelwatte dairy industries ltd	Pelwatte Dairy Industries Ltd is a leading Company specialized in milk processing, animal feed and dairy products that include liquid milk, milk powder, yogurt, butter, ice cream and ghee	NO: A4, Perahera Mawatha, Colombo – 03. Email: <a href="mailto:info@pelwattedairy.com">info@pelwattedairy.com</a> Web: <a href="https://pelwattedairy.com/">https://pelwattedairy.com/</a>

Bairaha farms plc	Bairaha Farms PLC is a pioneer quality chicken producer in Sri Lanka. Central agencies	
Agency	Roles and mandates
Ministry of Public Services, Provincial Councils and Local Government	They are responsible for the implementation of policies, plans, and programs at the provincial and local authorities (LA) level. They are mainly responsible for the coordination between the central government and PCs, supporting the formulation and implementation of national policy related to PCs and LAs, and providing financial and technical assistance. E-Mail: <a href="mailto:info@pubad.gov.lk">info@pubad.gov.lk</a> Web: <a href="http://www.pubad.gov.lk/web/index.php?lang=en">http://www.pubad.gov.lk/web/index.php?lang=en</a>
National Solid Waste Management Support Center (NSWMSC)	This is an institution under the Ministry of Local Government and Provincial Councils, which provides assistance to LAs and PCs on waste management, basically backing and guidance for reduce, reuse and recycle (RRR) businesses at local authorities. Web: <a href="http://lgpc.lk">lgpc.lk</a>
Ministry of Environment	The Ministry is committed to the management of the environment and natural resources of the country. It has formulated National policy for solid waste management (NPSWM) to ensure integrated, economically feasible, and environmentally sound solid waste management practices for the country at the national, provincial, and local authority levels. The policy has an impact on RRR businesses in Sri Lanka. All the RRR businesses should function within the provisions made by the NPSWM. Web: <a href="http://www.env.gov.lk/web/">http://www.env.gov.lk/web/</a>
Central Environmental Authority (CEA)	The CEA under the Ministry of Environment is one of the main implementing arms of the National environmental act (NEA) and is responsible to make provisions for the protection, management, and enhancement of the environment, regulation, maintenance and control of the quality of the environment and prevention, abatement and control of pollution. The waste management unit (WMU) in the CEA is in charge of the scheduled waste management and provides necessary awareness and educational assistance for the general public. CEA has been appointed as the implementing agency of the NPSWM and also responsible for giving Environmental protection licence (EPL) and other necessary approvals for RRR businesses. <a href="http://www.cea.lk/web/en">http://www.cea.lk/web/en</a>
Ministry of Urban Development and Housing	The Ministry of Urban Development is in charge of finding innovative solutions to resolve the SWM issues in urban areas to assist LAs and provide a coordinating mechanism for the various related projects implemented by different ministries and agencies.
Urban Development Authority (UDA)	The UDA under the Ministry of Urban Development is a multidisciplinary organization engaged in urban planning and sustainable urban development in Sri Lanka. The UDA has the power to develop environmental standards and formulate schemes for environmental improvements within the respective urban areas. Web: <a href="https://www.uda.gov.lk/">https://www.uda.gov.lk/</a>
Ministry of Health	The ministry has a cadre appointed in all the cities and towns called Public Health Inspector (PHI) to improve and preserve the health and hygiene of the designated areas. The ministry is also responsible for overall food control administration to ensure food safety and hygiene providing leadership to the "Food Advisory Committee (FAC)". Web: <a href="http://www.health.gov.lk/moh_final/english/">http://www.health.gov.lk/moh_final/english/</a>

Food Control Administration Unit (FCAU)	The FCAU is the apex body under the Ministry of Health responsible for the Food Control Administration of the country. The Food Advisory Committee recommends the standards and regulations to be adopted by the Government. Food Advisory Committee (FAC) import food control system authority, regional and peripheral food control system, food authority for excisable food, and food analytical services are major subsidiaries of the FCAU. Web: <a href="http://fcau.lk">fcau.lk</a>
Ministry of Technology and Research	The ministry plays a role in formulating Sri Lanka Standard (SLS) for food products through Sri Lanka Standard Institute (SLSI). The SLSI is also serving as a member of FAC.
Industrial Technology Institute (ITI)	The ITI engages in scientific research on food quality analysis and the development of food technologies. For more details: <a href="http://iti.lk/en/">http://iti.lk/en/</a>
Sri Lanka Standard institution (SLSI)	Standards Institute (SLSI) plays an integral role in the Food Control Administration Unit (FCAU) and formulation of National standards under the provisions of the Food act. The institute is responsible for disseminating information on standards, technical regulations, and standards related activities to the community at the national level. The standards of the SLSI are mostly voluntary. Some of them are declared mandatory for verification of standard parameters at the point of import. For more details: <a href="http://www.slsi.lk/">www.slsi.lk/</a>
Ministry of Trade	The Consumer Affairs Authority (CAA) under the ministry is serving as a member of the FAC and looking after consumer rights and price control.
Consumer Affairs Authority (CAA)	The CAA is empowered to take necessary actions to safeguard the interests of consumers while maintaining effective competition among suppliers of consumer products. Retail prices of food items in Sri Lanka are regulated by the CAA and various commodities designated 'essential commodities' are subjected to price controls periodically to protect consumers. CAA can handle consumer complaints and also has a role to play on consumer education and empowerment. Email: <a href="mailto:chairmancaa@sltnet.lk">chairmancaa@sltnet.lk</a> ; Web: <a href="http://caa.gov.lk/web/">http://caa.gov.lk/web/</a>
Ministry of Highways	Road Development Authority (RDA) is under the purview of the ministry that has regulatory powers to control the dumping of waste along the roadsides and controlling of vehicle movement that affects the waste collection route of the LAs. E-Mail: <a href="mailto:info@mohsl.gov.lk">info@mohsl.gov.lk</a> , Web: <a href="https://www.mohsl.gov.lk/">https://www.mohsl.gov.lk/</a>
Road Development Authority (RDA)	The RDA is empowered through the National thoroughfares act No 40 of 2008 to take action against the dumping of waste in the roadsides. Email: <a href="mailto:cho@rda.gov.lk">cho@rda.gov.lk</a> Web: <a href="http://www.rda.gov.lk/">http://www.rda.gov.lk/</a>
<b>Provincial government agencies</b>	
Provincial council (PC)	The PCs provide financial assistance and administrative and technical guidance to the LAs for waste management. Ministry of local government (Central government) links with the LAs for any request/s or guidance, through the PC. All the PCS have provincial ministries of agriculture, irrigation, health, and other related subjects.
Waste Management Authority of Western Province (WMA)	The WMA is responsible for the supervision of waste management of the entire WP. As per the WMA Statute No.1 adopted by the WMA has a role to provide technical and financial assistance to all LAs of the WP to build their capacities in

	<p>SWM, collecting waste data in WP, developing common final disposal sites to LAs and also assisting to LAs to conduct public awareness and environmental education to develop waste management discipline among the public. Email: <a href="mailto:wmawp.gov@gmail.com">wmawp.gov@gmail.com</a></p> <p>Web: <a href="http://www.wma.wp.gov.lk/">http://www.wma.wp.gov.lk/</a></p>
Central Environmental Authority regional offices	<p>CEA has established provincial offices and District offices to have easy access to the entrusted services to the people and industrialists. The regional offices have the cadre force with a Regional Director Assistant Director, and Senior Environmental Officers (SEO).</p>
Local authority (LA)	<p>LAs, under the supervision of the PCs, are responsible for health and hygiene, waste disposal, and regional environmental protection of the designated area. According to the power vested to the LAs, they are responsible for the ownership and resource allocation of waste in the area of concern. The local authorities have to create awareness among the people, on how LAs can assist people in collecting solid waste through notices and announcements.</p>
