Guidance on how to address decent rural employment in FAO country activities

SECOND EDITION
This guidance document will:

- Introduce the concept of decent rural employment (DRE)
- Acknowledge the centrality of DRE for the achievement of the Millennium Development Goals (MDGs)
- Affirm FAO’s comparative advantages in dealing with DRE and identify the main areas of intervention
- Provide a summary of the results of FAO’s “Self-Assessment on Employment and Decent Work”
- Suggest examples of concrete actions that FAO country offices could consider to promote DRE within their existing work programmes
- Encourage the creation of links with International Labour Organization (ILO) field offices and facilitate partnerships and the identification of synergies.

This guidance document is also available online at:

This document has been designed as a living document, so it will be periodically updated to reflect feedback, lessons learned and practical experience gained at country level.

Acknowledgements

The update of this guidance document was coordinated by Ileana Grandelis, Rural Employment Officer, with the support of Cristina Rapone and David Suttie of the Decent Rural Employment Team (DRET) at the Gender, Equity and Rural Employment Division (ESW) of FAO. Special thanks go also to Uwe Grewer, Enrique Nieto, and Fathy Abouelsaad from the DRET for their support in updating this document.

This second edition benefited from the results of a field testing conducted in 31 FAO Decentralized Offices. Special thanks for their valuable suggestions are due to Antony Kellman, Athifa Ali, Eliamoni Lyatuu, Elvis Obbo, Ferdendo Soto Baquero, Fiasili Lam, Kevin Gallagher, Kithinji Mutunga, Lot Mlati, Michel Ngandji, Modibo Toure, Mohamed Daldoum, Neila Ghachen Cherif, Ousmane Guindo, Sylvia Wachira, and Vedasto Rutachokozibw.

This guidance document was published for the first time in 2011. It was originally prepared by Ileana Grandelis, José Ramón Aguín Ferradás and Michelle Mills of the DRET, under the supervision of Peter Wobst, Senior Economist (ESW), and Bernd Seiffert, Rural Livelihoods and Local Institutions Officer (ESW).

Many people within FAO and ILO contributed directly or indirectly to the development of the first edition of this document. Special thanks go to Paola Termine, previously a member of the Decent Rural Employment Team at ESW and now Technical Specialist on Child Labour in Agriculture at the ILO, for contributing to the development of the main considerations behind this guidance document, as well as conducting the underlying FAO “Self-Assessment on Employment and Decent Work”.

This document preparation was truly a team effort: hence, thanks also goes to all members of the ESW DRET for their constructive inputs which were provided throughout the entire process of developing this publication, namely Francesca Dalla Valle, Carol Djeddah, Elisenda Estruch, Nora Ourabah Haddad, Monika Percic and Nikita Shahbazi.

Guidance in shaping the document, technical inputs and continuous feedback from colleagues in the ILO were greatly appreciated. Special thanks are due to Maria Arteta, who led ILO’s support process. Thanks also go to Alice Ouedraogo, Silke Olsen, Loretta de Luca, Philippe Marcacent, Florence Bonnet, Laura Addati, Malte Luebker, Julia Faldt, Samia Kazi Aoul-Chaillou, Shengli Niu, Katerina Tsotroudi, Rajendra Paratian, Kees Van Der Ree, Carlien Van Empel, Patricia Richter, and Elvis Beytullayev who provided various inputs.

Within ESW, several people gave support in different ways. Marcela Villarreal, Director (ESW), and Eve Crowley, Principal Advisor (ESW), provided essential guidance for the completion of the document. We also thank Nandini Gunewardena, Libor Stloukal, Martha Osorio and Hajnalka Petrics for their valuable contributions and advice.

This publication was also improved with inputs from colleagues of other FAO divisions in headquarters, including Jamie Morrison, Vito Cistulli, Shoghag Sherry Ajemian, Barbara Ekwall, Louis Bockel, Helena Eriksson, Anni McLeod and Cora Dankers.

The valuable insights and suggestions received from colleagues at FAO country offices were instrumental in the shaping of this document and are deeply appreciated. Special thanks are due to Gavin Wall, Gopi Gosh, Luca Alinovi, Sylvia Wachira, Ferdendo Soto Baquero, Nejla Ghachem, Robert Basil, Mohamed Daldoum, Susan Minae, Akshay Sinha, Shrawan Adhikary, Diana Tempelman, Albertine de Lange, Michelle Remme, Norah Mwamadi, Karine Garnier, Erminio Sacco and Sarah Leppert.

Finally, we would like to thank Winifred Power for final editing and Andrea Wöh for design and layout.

This guidance document has been prepared with financial assistance from the European Union (EU) under the ILO/EC project “Implementing the UNCEB Toolkit within the Decent Work Campaign”.

Within ESW, several people gave support in different ways. Marcela Villarreal, Director (ESW), and Eve Crowley, Principal Advisor (ESW), provided essential guidance for the completion of the document. We also thank Nandini Gunewardena, Libor Stloukal, Martha Osorio and Hajnalka Petrics for their valuable contributions and advice.
Introduction

Since the adoption by the World Summit for Social Development in 1995 of the goal to establish a people-centred framework for social development, there has been an increasing recognition at the international policy level of the importance of employment promotion for sustainable development. The Decent Work Agenda developed by the International Labour Organization (ILO) in 1999 and subsequently endorsed by the United Nations (UN) System has better refined this goal – underscoring that both the quantity and the quality of employment are essential for human well-being.

In 2005, the inclusion of the decent and full productive work target\(^2\) 1.B in Millennium Development Goal (MDG) 1 – “Eradicate extreme poverty and hunger” – acknowledged explicitly the centrality of employment promotion for the achievement of food security and poverty reduction.

Given its main mandate to defeat hunger, achieve food security and reduce poverty, FAO has a significant responsibility within this framework. Fully addressing the employment dimensions of its mandate is therefore vital for achieving FAO’s global goals.

While the ILO leads the Global Employment and Decent Work Agenda, FAO has a crucial complementary role in promoting decent rural employment (DRE), specifically with respect to informal employment in agriculture\(^3\), in agro-processing and in rural marketing enterprises and industries.

The ILO and FAO share a long history of fruitful collaboration dating back to 1947, when the two organizations signed a Cooperation Agreement. This commitment was then renewed through a Memorandum of Understanding signed in 2004 where the promotion of sustainable agriculture and rural development was outlined as a key priority for reducing hunger and poverty, with a particular emphasis on improving rural livelihoods, decent work and creating employment.

This guidance document will assist FAO Representatives, staff and consultants involved in country-level programmes, projects and activities to better reflect DRE concerns in their work. The document is based on the responses of FAO divisions and decentralized offices to the “Self-Assessment on Employment and Decent Work” conducted in 2008.\(^4\) The self-assessment allowed for the identification of the Organization’s main strengths and areas of expertise related to the employment dimensions of its work, as well as the identification of weaknesses and needs for further mainstreaming and capacity development.

---

2. For further information on the Employment indicators in the MDGs, please refer to ILO Guide to the New Millennium Development Goals Employment Indicators.
3. We adopt here a definition of agriculture that includes cultivation of crops and animal husbandry as well as forestry, fisheries, and the development of land and water resources (FAO-TERM).
4. The self-assessment methodology is part of the CEB Toolkit for Mainstreaming Employment and Decent Work, intended to assist international agencies in understanding the potential contribution of an employment and decent work lens to their policies, strategies, programmes and activities.
1. Decent rural employment

1.1. Rural employment

Agriculture has a central role in the rural economy of most developing countries, which means that rural employment entails mainly agricultural work – including both on-farm self-employment and wage employment. In addition, the non-farm economy (which is becoming an important source of employment growth in rural areas), depends heavily upon agricultural production (e.g. agro-industry, trade in inputs and products, machinery and transportation services, professional services, etc.).

Any approach to rural employment promotion needs to prioritize agriculture and also the rural-to-urban continuum within which employment occurs. It must also recognize that many workers and households obtain revenues from both rural and urban areas, from farm and non-farm activities, in the formal as well as in the informal economy.

Despite this heterogeneity, some features of rural employment are common across sectors. For instance, most rural workers are self-employed, whether on their own small-scale farms (or family farms) or in micro and small enterprises engaged in rural non-farm activities.

However, the number of workers engaged in paid employment in rural areas is increasing constantly; they are becoming a large group. Many are casual workers within the smallholder sector, and they are often overlooked by policy makers and conventional employment statistics. Given the growing demand for higher-value foods, commercial farming is also becoming more important, and it can be expected that more labour will be needed in modern agro-industries and in the distribution and retail segments of food markets. Agricultural workers in paid employment already account for over 40 percent of the total agricultural labour force (ILO, FAO, IUF, 2007).

Several country studies from the FAO Rural Income Generating Activities (RIGA) project show that, except in certain countries, participation in on-farm activities, and in particular in agricultural wage employment, is generally greater among poor households. Similarly, non-poor households have a higher share of participation in non-farm activities, where daily wages tend to be higher and associated with higher levels of education.

5 Small-scale farming is used here interchangeably with family farming, smallholder agriculture or own-account farming, or small-scale agriculture. It is generally understood as involving production units that rely essentially on the family workforce and only occasionally on casual labour. For further information on family farming please consult the FAO Regional Office for Latin America and the Caribbean website.

6 For additional information on the RIGA project please refer to: http://www.fao.org/economic/riga/en/
As a result, most of the rural poor (and in particular women and youth) are represented in the low-productivity employment segment of the rural economy – often informal – both in subsistence farming and agricultural wage labour and in non-farm self-employment. When labour is hired, it is mostly temporary and seasonal, informal and casual. In the Latin America and the Caribbean region, for instance, the aggregate contribution of family farming to the national sectoral economy (agriculture, livestock, fisheries and forestry) varies from one-quarter to two-thirds. However, its contribution to sectoral employment is much higher, accounting for at least 50 percent of rural employment and as much as 77 percent in Brazil. This difference between share of employment and share of generated product is evidence of the major gap in productivity that faces family farming (FAO, 2010c).

1.2. Rural employment and the achievement of the Millennium Development Goals

Any given growth in the economy will be able to reduce poverty fast only if the employment potential it creates enables poor people to raise their income, either through reduced unemployment or underemployment or through higher returns on labour, or both.9

Because poor people rely mainly on the use of their labour – whether wage-labour or self-employment – for earning their livelihood, more and better rural employment is central to achieving the MDGs, and MDG 1 in particular.9 Creating productive employment opportunities for the rural poor is therefore an essential driver for rural development and for more equitable and inclusive societies. Food insecurity, poverty, income inequalities and the lack of employment opportunities reinforce each other in a vicious cycle by eroding human capital and decreasing labour productivity, thereby perpetuating poverty and social inequalities across generations.

It is estimated that nearly 30 percent of the world’s labour force (about 910 million people) live on less than US $2 a day (ILO, 2012a). Similarly, vulnerable employment, consisting of own-account workers and contributing family workers, makes up around 50 percent of global employment, reaching almost four-fifths of the employed in sub-Saharan Africa and south Asia (ILO, 2012a).

The majority of vulnerable workers work within the informal economy, in rural areas of developing countries and constitute most of the “working poor”.

Given that agriculture is still the main source of income generation and livelihoods for an estimated 86 percent of the rural population worldwide (World Bank, 2007), DRE promotion should focus primarily on the agricultural sector, thus improving the productivity and conditions of the activities already available to poor people. However, ensuring that

---

9 Child labour is defined by the ILO Conventions No. 138 and No. 182 as work that interferes with compulsory schooling and is damaging for health and personal development. Especially in the context of family farming and other rural family endeavours, it is important to recognize that some participation of children in productive non-hazardous activities can be positive as it contributes to the inter-generational transfer of skills.
poor people have access to higher-productivity and higher-wage opportunities in the rural non-farm economy will also be crucial. Hence, rural employment will be a driver of poverty reduction only if it is promoted within an overall context of rural development initiatives, balancing public and private investments in the farm and non-farm economy and promoting upstream and downstream linkages.

Finally, the promotion of social and economic equity, including targeted support to the most vulnerable groups, will be a necessary condition to make rural investments work for the poor. This should be ensured through enabling policy environments, well-functioning rural labour, finance and land markets and effective rural institutions.

Figure 1.1 explores the virtuous dynamics through which enhanced productive rural employment opportunities contribute to increased food security and poverty reduction. Enabling environments (the outer ring), as well as operational elements (programmes, activities) targeting DRE (the inner ring), are both necessary conditions in order to generate productive rural employment opportunities and for ensuring that the rural poor can access them. They will lead to increased income generation and purchasing power, in addition to the enhanced empowerment and bargaining power of rural people, in the end contributing to food security and poverty reduction.

These virtuous dynamics could not be generated without the adoption of a rights-based approach to poverty eradication, in which the interdependency of the right to food and the right to work in dignity is advocated for strongly. The right to food refers directly to the right to work, as the more sustainable and dignified means of food procurement (both in terms of production and economic accessibility). In turn, the right to food must be fulfilled to facilitate the inclusion of the most vulnerable into the rural economy, providing them with the basic capability to pursue opportunities for work or training.
1.3. The Decent Work Agenda and the challenges of addressing decent work in rural areas

Decent work sums up the aspirations of people in their working lives. It involves opportunities for productive work that delivers a fair income, security in the workplace and social protection for families; better prospects for personal development and social integration; freedom for people to express their concerns, to organize and participate in the decisions that affect their lives; and equality of opportunity and treatment for all women and men.10

To address all these dimensions in an integrated way, the ILO has developed the Decent Work Agenda, subsequently endorsed by the UN System, as the basis for a more just and stable framework for global and rural development. Within this framework, decent work is captured in four strategic objectives or pillars: (i) employment creation and enterprise development, (ii) social protection, (iii) standards and rights at work, and (iv) governance and social dialogue.

Promoting decent rural employment is not only about creating new employment opportunities or increasing the productivity of those already existing. It is also about addressing the whole range of decent work deficits that people in rural areas face.

“People throughout the world face deficits, gaps and exclusions in the form of unemployment and underemployment, poor quality and unproductive jobs, unsafe work and insecure and low income, rights which are denied, gender inequality, migrant workers who are exploited, lack of representation and voice, and inadequate protection and solidarity in the face of crises, disease, disability and old age”.11

In particular, rural labour markets are likely to be poorly developed, inequitable and narrow because of high levels of informality, a predominance of casual employment relationships, high rates of self-employment and labour-force fragmentation, information asymmetries, as well as the uncertainties and specificities of agricultural production.

Owing to low labour productivity, underemployment or any form of exploitation, most jobs do not ensure decent levels of income and sustainable livelihoods. Working conditions are poor, labour legislation is rarely enforced and social dialogue is weak.

Did you know that ...

- Of the developing world’s 5.5 billion people, 3 billion live in rural areas: 2.6 billion are in households involved in agriculture, 1.5 in smallholder households (World Bank, 2007)
- Nearly eight out of every ten working poor people live in rural areas (ILO, 2012a)
- There are an estimated 450 million waged agricultural workers out of a total workforce in agriculture of some 1.1 billion. Women waged agricultural workers account generally for 20 to 30 percent of the waged workforce, rising to 40 percent in Latin America and the Caribbean (ILO/FAO/IUF, 2007)
- Women constitute a significant proportion of contributing family workers. They are less likely to engage in wage employment than men, and, when they do, they are more likely to hold part-time, seasonal and/or low-paying jobs in the informal economy (FAO/IFAD/ILO, 2010)
- Young workers aged 15-24 years make up a disproportionately large share of the world’s working poor: they account for 23.5 per cent of the working poor in the countries with available data, compared with only 18.6 per cent of non-poor workers. Most of them are in the agricultural sector (ILO, 2012b)
- Most child labourers (aged 5 to 17) are in agriculture (60 percent). The majority of them work as contributing family workers (ILO, 2010)

10 ILO. 2006. Decent Work FAQ: Making decent work a global goal
11 Ibid.
Furthermore, many producers and workers are employed under poor health, safety and environmental conditions. Rural workers are also more likely to suffer discrimination in terms of access to effective forms of social security and protection.

Gender, age and migrant origin are aggravating factors, as women, youth and migrants in rural areas are more often employed under informal, low-productivity and casual contracts and have limited rights and voice, both within households and in public.

Women constitute a significant proportion of contributing family workers. They are less likely to engage in wage employment than men, and, when they do, they are more likely to hold part-time, seasonal and/or low-paying jobs in the informal economy (FAO/IFAD/ILO, 2010c). When new employment opportunities arise (as has happened with the emergence of export-oriented cultivations and agro-processing) women are often found to be concentrated in low-value phases or activities of the supply chain (e.g. packaging, post-processing). Such lower status is prevalent among women because of their limited access to resources and assets and their multiple trade-offs in allocating their time between productive and reproductive roles.

A staggering 60 percent of child labour is in agriculture (ILO, 2010). Working long hours in the field undermines children’s ability to attend school or training and compromises their future productivity, employment prospects and general wellbeing. This is a personal tragedy for millions of children as well as a huge waste of productive resources for the society as a whole.

Finally, specific vulnerable groups such as migrant workers, landless people, refugees, internally displaced people (IDPs), demobilized soldiers, the disabled, people living with and affected by HIV, indigenous people, and the elderly may encounter additional challenges in finding decent rural jobs.

1.4. FAO’s role and comparative advantages in promoting decent rural employment

FAO has a crucial complementary role in promoting DRE, specifically with respect to agricultural and informal employment, as well as in non-farm employment in agro-processing and rural marketing enterprises and industries.

Rural employment is part of FAO’s Strategic Framework. Specifically, under FAO Strategic Objective (SO) G “Enabling environment for markets to improve livelihoods and rural development”, the Organizational Result (OR) G02 commits FAO to ensure that “Rural employment creation, access to land and income diversification are integrated into agricultural and rural development policies, projects and partnerships”.

The Gender, Equity and Rural Employment Division (ESW), as lead unit of OR G02, leads FAO’s efforts in strengthening an equitable and integrated approach to DRE and in mainstreaming DRE considerations throughout the work of the Organization. In addition to OR G02, employment issues are directly or indirectly addressed in most of the other ORs, and all FAO departments and divisions deal with some aspects of DRE within their programmes of work.

FAO’s engagement in DRE is in line with historic recommendations and calls:

- The FAO Independent External Evaluation’s (IEE, 2007) recommendation to shift FAO’s strategic emphasis for rural and agriculturally based development to facilitating the production environment, opportunity for value added and employment for income generation and food access
- The Economic and Social Council’s (ECOSOC) ministerial declaration of 2006 requesting all UN funds, programmes and agencies to support efforts to mainstream the goals of full and productive employment and decent work for all in their policies, programmes and activities
- The UN Chief Executive Board’s call in 2007 for greater policy coherence and convergence on decent work across the UN System

FAO country offices stand in a unique position to support their national partners in maximizing the potential of rural employment as a driver of food security and poverty reduction. This builds on the Organization’s technical comparative advantage in supporting agricultural development, and also on the proven potential that agricultural growth has for food security and poverty reduction in developing countries. In addition, FAO has a strong focus on and expertise in small-scale, self-employed and informal agricultural occupations where the majority of workers in developing countries are found.

FAO country offices have the expertise, the network and the holistic approach needed to tackle this complex development issue successfully. Targeted support from headquarters, both in the form of specific assistance and capacity development, should complement their efforts.

The box below provides insights on how to support DRE in rural areas for a FAO country office under each of the pillars of the Decent Work Agenda. Section 2 provides more detailed suggestions for action and also relevant resources and tools.

Taking into account the dynamics of rural labour markets, existing decent work deficits and FAO comparative advantages in promoting rural employment, the priority focus groups for FAO interventions should be:

- Small-scale producers\(^{12}\), including contributing family workers
- Agricultural wage workers, including casual workers and those in the informal economy
- Non-farm self-employed in micro and small businesses in rural areas, particularly in the informal economy

\(^{12}\) There is no unique definition of “small-scale producers”. Using farm size as a criterion, households with less than 2 hectares of land are usually characterized as small-scale. However, the distribution of farm sizes can be very different among countries. Also, this criterion ignores a number of other dimensions of scale. FAO adopts therefore a broader definition of small-scale producers, and includes those who produce low quantities and yields, have low capital and education levels, and lack the skills to participate in markets, produce primarily for home consumption and rely heavily on family labour. About two-thirds of the developing world’s three billion rural people live in smallholder households. Most of them have diverse sources of livelihood, including significant off-farm income (which includes all non-agricultural activities plus agricultural wage labour) (FAO, 2010a).
• Workers in paid employment engaged in secondary/tertiary activities linked directly to food production and agriculture, particularly in the informal sector
• Women and youth within the previous categories, with particular attention to pregnant and nursing women
• Specific vulnerable groups within the previous categories (child labourers, migrant workers, landless people, refugees, IDPs, demobilized soldiers, disabled people, people living with and affected by HIV, indigenous people, and the elderly).

### How can FAO promote the Four Pillars of Decent Work in rural areas?

#### 1. Employment creation and enterprise development

- Support the formulation and implementation of gender-sensitive employment-enhancing agricultural rural development (ARD) policies, strategies and programmes
- Support women and men small-scale producers in accessing markets and modern value chains
- Pilot employment-creation programmes in rural areas, particularly for youth and women (e.g. Junior Farmer Field and Life Schools and Youth Farmers’Associations (JFFLS-YFAs), Green Jobs initiatives, rural eco-tourism, etc.)
- Support micro, small and medium enterprises (MSMEs) in agribusiness and the marketing sector to access markets, training, financial services and other productive assets
- Support vocational education and training programmes that teach employment-related technical and business skills and are adapted to rural people’s needs
- Support employment-enhancing livelihoods diversification as a strategy for coping with risk in emergency prevention and post-crisis recovery
- Support the capacity development of national institutions to collect and analyse age and sex disaggregated data (ASDD) on rural labour markets

#### 2. Social protection

- Promote better conditions of work and employment, in particular with respect to maternity protection and minimum wages
- Promote safer technology for small-scale and commercial agriculture in extension support programmes
- Support the development of labour-saving technologies and care services for poor households in HIV- and AIDS- (or other diseases) affected areas and for reducing women’s domestic and care tasks

#### 3. Standards and rights at work

- Support socially responsible agricultural production for small producers and MSMEs, seeking to reduce gender- and youth-based discrimination
- Support government efforts and Ministry of Agriculture (MoA) involvement in preventing and eliminating child labour by tackling its root causes (e.g. poverty, lack of education, etc.) and providing livelihoods alternatives to poor households
- Support the revision of restrictive regulations on producer organizations (POs) and informal economy workers’ associations
- Promote analysis on prevailing labour contractual arrangements in the informal economy, worst forms of child labour and situations of discrimination

#### 4. Governance and social dialogue

- Support countries in strengthening democratic organizations and networks of producers and workers in the informal rural food economy
- Support the representation of the rural poor, especially women and youth, in social dialogue and policy dialogue through their organizations
- Support participation of rural poor in local decision-making and governance mechanisms and particularly the empowerment of women and youth
1.5. **FAO Self-assessment results**

As noted above, in 2008, FAO carried out a “Self-Assessment on Employment and Decent Work” within its different departments and divisions as well as in decentralized offices. The aim of the exercise was to identify the Organization’s main strengths and areas of expertise related to the employment dimensions of its work, as well as weaknesses and needs for further mainstreaming and capacity development.

A total of 27 units, 10 regional or subregional offices, 2 staff unions, and FAO’s Advisory Committee on Occupational Health and Safety (OSH) were contacted in order to participate in the process.

The questions included in the self-assessment were structured in sections to reflect the four pillars of the Decent Work Agenda. Each respondent was asked to rank the level of involvement of its office or unit with regards to a list of issues related to decent work.

The different pillars seemed to have different priority levels among the different FAO divisions and offices. Depending on the particular characteristics of their programme, some divisions declared a wider expertise in one of the four pillars. In general, the self-assessment exercise showed that FAO has potential strengths and comparative advantages in knowledge and technical skills for addressing DRE. This is particularly true for the first pillar of the Decent Work Agenda (addressing employment creation and enterprise development). However, the challenges and opportunities for improvement are recognized – especially with regards to social protection, standards and rights at work, as well as social dialogue and governance concerns. An integrated approach, aiming to harness the multidisciplinarity of different technical units and involving decentralized offices in knowledge generation and successful mechanisms at country level, appeared to be the task ahead.

Table 1.1 below provides a summary of the results of FAO’s self-assessment on employment and decent work, which identified the main organizational strengths and opportunities for improvement along the four pillars of the Decent Work Agenda.
### TABLE 1.1.
**Summary of the results of FAO self-assessment**

<table>
<thead>
<tr>
<th>Pillars of Decent Work</th>
<th>Organizational strengths</th>
<th>Opportunities for improvement</th>
</tr>
</thead>
</table>
| **1. Employment generation and enterprise development** | • Considering both the quantity and the quality of jobs (income level, working conditions, social security coverage or workers’ rights) when promoting rural employment  
• Promoting sustainable economic growth as a contributor to poverty reduction  
• Aligning concerns in fisheries, forestry and livestock with global programmes  
• Enhancing local economic development through local programmes  
• Providing vocational training activities to support small and medium entrepreneurs and small producers (including training activities for vulnerable groups)  
• Contributing to job creation (including job creation for vulnerable groups)  
• Assisting national programmes on food security which create employment | • Focusing on the macro-economic perspective to promote decent jobs  
• Monitoring and evaluating the quantity and quality of jobs created and the environmental impact of employment-intensive technologies  
• Focusing on women and youth  
• Focusing on specific vulnerable groups such as migrants, people living with and affected by HIV, the elderly, IDPs and refugees, disabled, etc. when promoting entrepreneurship and developing income generation  
• Supporting the sustainable management of fragile ecosystems, such as marshlands, rivers and lakes  
• Strengthening farm/non-farm linkages as a means for enhancing employment creation and income-generation  
• Better researching the roles, needs and constraints of the informal economy as a main sector of employment in rural areas |
| **2. Social protection** | • Improving physical and psychological well-being of workers through food security programmes  
• Mitigating health risks of pesticide use for humans and the environment  
• Promoting occupational safety and health (OSH) at work to prevent injuries, disabilities, death and diseases | • Addressing rural workers’ (especially informal workers’) concerns adequately, such as difficult access to health services for workers and their families  
• Targeting the elimination of discrimination at work and supporting policies that ensure minimum wage levels and fair work conditions in rural areas  
• Supporting the extension of social protection mechanisms for workers in both the formal and informal rural economy |
| **3. Standards and rights at work** | • Addressing concerns about non-discrimination at work when designing a new programme/action  
• Working with other UN agencies for the elimination of child labour in agriculture  
• Gender mainstreaming across all interventions | • Ensuring that fundamental rights at work, including freedom of association are respected in every programme/action carried out by FAO  
• Focusing on International Labour Standards (ILS) when designing new programmes or when evaluating ongoing projects  
• Promoting labour laws, regulations and inspections through FAO programmes/actions  
• Supporting integrated programmes for preventing and eliminating child labour in rural areas (including adapted education, livelihoods alternatives, etc.) |
| **4. Governance and social dialogue** | • Establishing co-management mechanisms that link civil society, producer organizations (POs) and governments | • Increasing support of a tripartite approach by bringing together governments, employers and workers of member states to take unified action in promoting decent work |
2. Guidance on how to address decent rural employment at the country level

2.1. Entry points for FAO country offices to address decent rural employment

FAO country offices need to seize all available opportunities to promote decent rural employment (DRE) as a crucial part of achieving internationally agreed goals on hunger and poverty reduction.

To this end, the employment implications of all FAO interventions and particularly of alternative agricultural and rural development (ARD) policy options should be considered systematically. Often, the challenge is not to create a new programme or project that addresses rural employment issues specifically, but to integrate DRE aspects within an ongoing programme of work.

2.1.1. Entry points in UN-wide level mechanisms

The United Nations Country Team (UNCT) coordination mechanism provides several entry points for FAO to address DRE concerns at country level. The Common Country Assessment (CCA) represents an opportunity for FAO country offices to include DRE concerns in the situation analysis and policy review. FAO can support the involvement of producer organizations (POs) and organizations of informal rural workers as well as women and youth groups in the CCA and related consultation processes. The CCA analysis will then support the prioritization exercise in the United Nations Development Assistance Framework (UNDAF) where DRE concerns should be addressed explicitly.

FAO focal points in inter-agency groups around UNDAF outcomes can ensure that DRE aspects are taken into account – both within the clusters led directly by FAO (e.g. rural development and food security cluster) and within all other clusters where FAO is a collaborating agency. Participation in these groups can facilitate contacts with partners that may not be FAO’s traditional partners, but which should be part of complex coordination mechanisms that address DRE, such as Ministries of Labour (MoL), Education (MoE), Health (MoH), Trade (MoT), Youth (MoY), Gender or Women (MoG or MoW) and Social Affairs (MoSA). UNDAF groups may also be seen as leverage to lobby within the UNCT for the need to focus on rural areas, smallholder agriculture and specific informal agricultural workers’ concerns (e.g. by inviting an MoA representative to specific UNDAF meetings tackling employment issues).

Joint UN programmes present a unique opportunity for FAO to engage in and pilot DRE schemes and programmes, thus contributing to sensitizing the government and in particular FAO’s traditional ministerial partners. Collaboration can be sought with other agencies that have strong comparative advantages in addressing employment issues (e.g. World Food Day and other UN commemoration events).
This will enhance synergies and ensure that vulnerable groups in rural areas are addressed and empowered. Building on the existing global partnership with ILO, FAO should actively seek opportunities for coordination with ILO country offices.

The UN System mechanisms can also be used as opportunities for closer collaboration with external development partners operating in the country in FAO-related areas. These would include Bretton Woods institutions and the broader development community: bilateral donors, international non-governmental organizations (INGOs), mass organizations, civil society and the private sector.

2.1.2. Entry points in FAO-government overall cooperation

Within FAO’s relation with its national partners, the Country Programming Framework (CPF) process represents an opportunity for FAO Representatives and staff to advocate for the centrality of DRE promotion within their broad framework of cooperation. For instance, FAO can lobby for the CPF to include employment-related situation analysis, including age- and sex-disaggregated data (ASDD), capacity assessment and partner mapping. Depending on the timing, this could in turn represent a strong input into the UNDAF process.

Significant gaps remain in the knowledge of rural labour markets and the best policies and interventions for promoting DRE. Hence, FAO should contribute with the ILO and other relevant partners to assist countries in filling these gaps in those areas within its primary comparative advantage. This will be achieved mainly through research and analysis for knowledge generation, and also by supporting the regular collection, interpretation and use of age- and sex-disaggregated data (ASDD) on rural employment, in both the formal and the informal economy (e.g. in agricultural census, household and labour force surveys). The development of capacities for a more disaggregated analysis of rural labour market data will contribute towards acknowledging the needs, constraints and potential of different groups, informing policies and strategies and then measuring equitable progress.

Even if an FAO country office is not engaged in structured programming exercises, any other opportunities for strategic discussion with national partners are appropriate to build consensus on the need to address the employment dimensions of sustainable agriculture and rural development, food security and poverty reduction processes.

Advocacy activities should enhance FAO’s status as a reference point and authoritative source of technical information, on issues related to DRE, with a special focus on small-scale agriculture and informal rural workers.

13 See: FAO Guidelines for addressing rural employment and decent work in the Country Programming Framework.

Examples of entry points in FAO-government cooperation

- FAO CPF formulation and implementation
- All meetings/workshops between FAO and government representatives
- World Food Day commemoration events
- Opportunities for exchange with FAO national partners on capacity development and institutional support needs
2.1.3. Entry points in FAO ongoing activities and programmes

FAO ongoing activities in a country represent a constant opportunity to advocate for DRE. This is the case for almost all FAO technical cooperation programmes and projects, including Technical Cooperation Programmes (TCPs), Government Cooperation Programmes (GCPs), Unilateral Trust Fund (UTF) projects, United Nation Joint Programmes (UNJPs), TeleFood initiatives (TFDs), Disaster Risk Reduction (DRR), and Special Programmes for Food Security (SPFSs) as well as Emergency and Rehabilitation Assistance projects.

Employment quantity and quality considerations should be applied throughout the whole project/programme-cycle management, including during identification, budget and programme allocation, formulation (comprising stakeholder analysis, problem, opportunity and objective analysis), implementation, reporting, and monitoring and evaluation (M&E) (e.g. including relevant indicators)14.

FAO Representatives play an important role: briefing, de-briefing, reminding and guiding project or activity coordinators, national consultants and incoming and outgoing missions about the importance of reflecting DRE concerns in their activities.

To achieve this, country offices will be supported by FAO technical departments. ESW leads and coordinates FAO’s work in promoting decent work in rural areas, with a focus on promoting fairer and more gender-equitable rural employment, promoting youth employment and productive migration, and preventing and reducing child labour, especially in its worst form. In particular, ESW provides support in devising policy options and national strategies and programmes to achieve employment-enhancing rural development. Respective technical departments within FAO Headquarters will be responsible for addressing DRE in specific sub-sectors or under specific perspectives.

### Examples of entry points for policy advice on decent rural employment

- Development of national development strategies and Poverty Reduction Strategies Papers (PRSPs)
- Development of National and Regional Programmes for Food Security (NPFS and RPFS)
- Development of national agricultural and rural development policies, strategies, investment programmes and action plans
- Development of other relevant sectoral development policies, such as agro-industry development and agricultural and rural financing, HIV and AIDS mitigation strategies, etc.
- Comprehensive Africa Agriculture Development Programme (CAADP) and country implementation processes on priority areas of investment (compacts)
- Country and regional Plan of Action (PoA) for emergency and rehabilitation assistance
- Employment, social protection and occupational safety and health (OSH) policies

---

14 See also FAO Quick Guidelines on How to mainstream decent rural employment into project formulation.
Most interventions will probably focus on aspects fitting under just one or two pillars of the Decent Work Agenda. Even if this is the case, being aware of the whole range of implications of every intervention under each pillar will help in designing better and more sustainable interventions.

In terms of policy and strategy advice, FAO offices can support the mainstreaming of DRE concerns in food-security and poverty-reduction strategies, as well as in policies and programmes for sustainable agriculture and rural development. Anticipating the DRE impacts of different agriculture and rural development policy options and advocating for those that increase the employment opportunities of the rural poor are undoubtedly the most important tasks ahead.

### 2.1.4. Entry points offered by regional and global mechanisms

Several regional processes and programmes offer interesting entry points as they increasingly coordinate analysis and responses to employment-related concerns. Regional political groupings and economic communities could be therefore regarded as potential partners in broad regional frameworks in addition to supporting FAO’s advocacy function on DRE at country level. For instance, in Africa, regional programmes such as the New Partnership for Africa’s Development (NEPAD) and the NEPAD Comprehensive Africa Agriculture Development Programme (CAADP) represent important frameworks to take into consideration when defining priorities at country level.

Finally, work at country level should be aligned with the overarching employment-related global frameworks and partnerships in which FAO is involved.

- Cross-cutting issues
2.2. Concrete actions and tools to address rural employment and decent work at country level

This section will help FAO Representatives, managers and other FAO staff as well as consultants working at the country level to identify the main DRE issues relevant to their work. It provides concrete actions and tools that can be adopted and integrated in projects and programme design, according to the four pillars of the Decent Work Agenda – namely employment creation and enterprise development, social protection, standards and rights at work and governance and social dialogue.

This section begins by identifying the main issues that should be addressed by FAO in order to foster employment-enhancing sustainable agriculture and rural development processes. Frequently, FAO country offices are already dealing with many of these issues in their work. The guidance then gives examples of concrete actions that FAO country offices can take that correspond with each issue. These suggestions are based on FAO’s comparative advantages and past experience.

The lists of suggested actions can also be used as checklists to ensure that DRE concerns have been considered adequately in a given intervention. However, not all issues are relevant in all circumstances. Nor is this list exhaustive.

Finally, for each DRE issue identified, knowledge resources and practical tools are suggested. Even if some of these resources are country or region specific, they should not be disregarded by country offices in other geographic areas, as they often represent the most useful material currently available on a topic.

Note that symbols below are used throughout the following section to allow for easy recognition of the type of tools listed for each issue.

### Working with the ILO

When seeking to address rural employment and decent work at country level through the various entry points enumerated above, FAO country offices can receive support from ILO technical specialists present in country and/or regional offices. ILO technical specialists cover a wide range of areas, including social protection, enterprise, occupational safety and health, skills development and infrastructure. In addition, rural focal points have also been appointed in most countries where the ILO has an office. A list of ILO offices and rural focal points is available in Annex 1 to this document and online on the joint FAO-ILO website, at [http://www.fao-ilo.org/](http://www.fao-ilo.org/).

**Pillar I: Employment creation and enterprise development**

1.1 **Employment-enhancing agricultural and rural development policies and strategies**
   - 1.1.1 Diagnosing the rural employment situation
   - 1.1.2 Pro-poor and gender-sensitive employment-enhancing agricultural and rural development policies and strategies
   - 1.1.3 Value chain development for decent work
   - 1.1.4 Gender equality in rural employment promotion

1.2 **Creation of decent rural employment opportunities**
   - 1.2.1 Upgrading of small-scale agriculture
   - 1.2.2 Upgrading of jobs and enterprises in the informal rural economy
   - 1.2.3 Innovative mechanisms for employment creation in rural areas

1.3 **Entrepreneurship promotion in rural areas**
   - 1.3.1 Business environment for micro, small and medium enterprises in agribusiness and marketing sector development
   - 1.3.2 Rural people’s entrepreneurial and managerial skills
   - 1.3.3 Supporting micro, small and medium enterprises in rural areas
   - 1.3.4 Group cooperation and producer organizations

1.4 **Livelihoods diversification for emergency prevention and post-crisis recovery**
   - 1.4.1 Disaster risk management and climate change adaptation
   - 1.4.2 Employment creation for post-crisis recovery

1.5 **Knowledge and skills to enhance employability**
   - 1.5.1 Employment-oriented training and agricultural education

1.6 **Specific groups’ needs to access decent rural employment opportunities**
   - 1.6.1 Rural women and youth
   - 1.6.2 Indigenous communities
   - 1.6.3 Demobilized soldiers, refugees, internally displaced people
   - 1.6.4 Migrant workers and their communities
   - 1.6.5 Persons with disabilities
   - 1.6.6 People living with and affected by HIV
Pillar II: Social protection

2.1 Occupational safety & health
2.1.1 OSH measures for the rural workforce, including small producers and informal wage labourers
2.1.2 HIV and AIDS and other major diseases and the world of work

2.2 Extending social protection coverage to rural areas
2.2.1 Social protection for small-scale producers and workers in the informal rural economy
2.2.2 Social protection floor

2.3 Nutritional well-being and food security of rural people
2.3.1 Nutritional status of rural populations towards food security and productive capacity of the rural workforce
2.3.2 Rural economy and decent work and food security

2.4 Improving working conditions in rural areas
2.4.1 Effective maternity protection and support of unpaid care work for rural women workers
2.4.2 Minimum wage and equal pay policies and decent remuneration for rural workers

Pillar III: Standards and rights at work

3.1 Standards at work in rural settings
3.1.1 International Labour Standards in small-scale agriculture and the informal rural economy

3.2 Protecting the rights of workers in the rural economy
3.2.1 Child labour prevention in small-scale agriculture and among rural workers
3.2.2 The right of small producers and rural workers to get organized
3.2.3 Elimination and prevention of forced labour in rural areas
3.2.4 Elimination and prevention of discrimination at work in rural areas
3.2.5 The rights of rural migrant workers

3.3 Improving agricultural labour legislation and policies
3.3.1 Legal and policy framework protecting workers and employers in the agricultural sector and the informal rural economy

Pillar IV: Governance and social dialogue

4.1 Rural producer and worker organizations
4.1.1 Organizations of small producers in rural areas
4.1.2 Organization and networks of workers in the rural informal economy

4.2 Social dialogue and enhanced participation of small producers and rural workers, particularly women and youth, in agriculture and rural development processes
4.2.1 Representation and empowerment of the rural poor, particularly women and youth, in social dialogue and policy dialogue through rural workers’ organizations, producer organizations and other civil society organizations
4.2.2 Participation and empowerment of the rural poor, particularly women and youth, in local decision-making and governance processes
# PILLAR 1 Employment creation and enterprise development

Promoting employment-enhancing agricultural and rural development policies, focusing on agriculture potential for pro-poor growth and employment creation

#### 1.2 Creation of decent rural employment opportunities

##### Issues to address | Examples of concrete actions | Relevant tools
---|---|---
1.2.1 Upgrading of small-scale agriculture
See also Section 1.3.3 and Section 1.5.1 | • Ensure that the macroeconomic, budget, trade and sector policy framework provides incentives for a sustainable increase in small-scale agricultural production (with a focus on women and youth) and the development of inputs and outputs markets that serve small-scale producers
• Support small-scale agricultural production, post-harvest management, processing and marketing system, e.g. through programmes for skills upgrading, developing market-oriented extension training materials, etc.
• Pilot business models to facilitate smallholder participation in markets and value chains, e.g. contract farming, initiatives to develop stakeholder linkages among value chain participants, etc.
• Promote market-oriented group cooperation, e.g. provide training on farmer-group formation, facilitation, technology testing, group leadership and networking
• Support gender-sensitive access to adapted technologies and related skills training to increase small-scale agriculture productivity
• Pilot mechanisms to strengthen small-scale producers’ access to financial and risk-management instruments, e.g. warehouse-receipt systems, insurance schemes for risk mitigation, etc. | FAO Guiding principles for responsible contract farming operations

1.2.2 Upgrading of jobs and enterprises in the informal rural economy
• Recognize agricultural workers in paid employment as a group distinct from small farmers, and involve their trade unions/associations in relevant ARD processes directly
• Sustain government efforts to support agro-based enterprises and workers in the informal economy, e.g. support government/MoA in training vendors/enterprises in business and technical skills
• Facilitate contacts between government and informal economy workers/’producers’ groups to give them a voice in informal sector policies/strategies
• IL Work improvement in small enterprises (WISE+), action manual and trainers’ guide

### Issues to address

#### 1.2.3 Innovative mechanisms for employment creation in rural areas

- Cooperate in UN or government-led green jobs initiatives focusing on climate change adaptation and mitigation measures, organic farming, forestry, bioenergy and sustainable forest management, e.g. through UNJPs
- Advocate agricultural potential in creating green jobs, also in terms of greening existing jobs by increasing the ecological literacy of small producers and rural workers
- Support gender-sensitive innovative mechanisms for employment creation in rural areas, e.g. employment-intensive rural infrastructure programmes, rural tourism, geographical indications and territorial strategies, fair trade initiatives
- Advocate and facilitates effective linkages with fair trade unions and support traceability mechanisms (i.e. GLOBALG.A.P.)
- Include sex and age-disaggregated measurable employment indicators in all interventions
- Ensure that new employment/enterprises created through FAO interventions are based on formal agreements
- Support strategic alliances among different stakeholders in all interventions, e.g. with financial institutions, including those that offer small-scale finance
- Support public employment programmes in rural areas, which adopt comprehensive approaches to build self reliance beyond basic survival needs

#### 1.3 Entrepreneurship promotion in rural areas

- Raise awareness of government / UNCT and other relevant partners about existing disparity between rights of men and women to productive assets
- Support policies/laws and regulations to ensure a good business environment for MSMEs, e.g. reduction of cost associated with business creation, access to land and credit

R189 Job Creation in Small and Medium-Sized Enterprises Recommendation, 1998 |
| **1.3.2**  
Rural people’s entrepreneurial and managerial skills | • Support the broadening of the technical mandate of extension services to cover entrepreneurial and managerial skills, e.g., support the preparation of short-term training modules and materials on business-management skills, self-help initiatives and use of revolving funds for development activities.  
• Support establishment of operational linkages between extension departments in the MoA and MoL and MoT.  
• Pilot and support scaling-up of non-formal training on business development adapted to rural people and different groups needs (women, youths), e.g., JFFLS, FBS, FFS. | FAO Modernizing national agricultural extension systems: A practical guide for policy-makers of developing countries

| **1.3.3**  
Supporting micro, small and medium enterprises in rural areas | • Give priority to rural businesses owned/managed by women and youth.  
• Identify and provide technical support to agribusinesses with potential for growth, e.g., in business and technical skills on post-harvest management, processing, product quality and safety standards, etc.  
• Support trainings to enable MSMEs to meet requirements of the new food safety regulations.  
• Support rural MSMEs’ access to markets and services, e.g., facilitate linkages with the banking/microfinance sector.  
• Support adoption of business models that provide opportunities for small-scale producers, towards aggregation of produce and developing backward and forward linkages. | FAO Lessons in microfinance

### 1.3.4 Group cooperation and producer organizations

- Raise awareness of government/UNCT on the role of POs as key stakeholders in DRE promotion, poverty reduction and ARD processes, e.g. use well-established events such as World Food Day, country programming exercises (CPF, UNDAF, SPFS/NPFS, etc.)
- Promote market-oriented group cooperation through all FAO interventions
- Support removal of laws and regulations that may create barriers to POs, e.g. through technical assistance supporting the drafting of agricultural legislation
- Explore, document and disseminate institutional innovations and good practices of organized collective action with strong employment impacts
- Strengthen the institutional and technical capacities of concerned MoA departments to support POs’ development, possibly involving also MoT and MoL and other relevant ministries
- Support national efforts to strengthen the institutional and technical capacities of POs and cooperatives, e.g. in farm commercialization, agribusiness management, post-harvest management, processing, product quality and safety standards
- Support national efforts to enhance POs’ and cooperatives’ access to markets and services, e.g. by facilitating linkages with the banking/microfinance sector

## Issues to address

### 1.4 Livelihoods diversification for emergency prevention and post-crisis recovery

#### 1.4.1 Disaster risk management and climate change adaptation

- Support MoA involvement in disaster risk management (DRM) processes to integrate sustainable agriculture and rural development aspects, including decent rural employment ones.
- Support integration of livelihood diversification measures in disaster risk reduction (DRR) plans and initiatives to decrease dependence of vulnerable groups on climate-sensitive farming.
- Support institutional strengthening and partnership building for DRM, involving POs/ workers’ organizations and other community groups/private sector.
- Support integration of livelihoods-vulnerability assessments in PRSPs and national, regional and local development plans.
- Support analysis of gender-based climate change vulnerability, impacts and risks on food security and employment, e.g. research-action programmes, within CCA/UNDAF etc.

#### 1.4.2 Employment creation for post-crisis recovery

- Address employment concerns in post-crisis agriculture rehabilitation and recovery programmes.
- Include impact assessment of crisis on rural labour markets in initial livelihoods impact appraisals (comprising employment losses and additional demand for jobs), e.g. in multi-sectoral quick impact assessments feeding into Flash Appeal proposals.
- Include impact assessment of crisis on rural labour markets in detailed livelihood assessments to support the identification of employment-centred responses.
- Support first-line labour-intensive mechanisms in rural areas (cash or food-for-work) and promote market-oriented group cooperation through FAO interventions.
- Support community contracting and local level planning in all interventions as part of organization building.
- Adopt a gender/age perspective in employment-enhancing post-crisis planning, taking into account resource control and access to labour by gender/age.

## Relevant tools

---

### 1.3.4 (cont.)

- Promote involvement of POs in the design of agricultural investment programmes and frameworks, e.g. CAADP national compacts.
- Support POs’ involvement in the development of demand-led extension and advisory services.
- Build synergies between organizations, programmes, countries and create producer-to-producer learning opportunities related to governance and social dialogue.

</thead>
</table>
| **1.5.1 Employment-oriented training and agricultural education** | • Increase awareness amongst national partners of the role of vocational education and training in employability and rural development  
• Pilot demand-driven agricultural education and training programmes that are employment and income-generation oriented and adapted to rural people and different groups’ needs (women, youth, etc.), e.g. JFFLS, FFS, FBS  
• Include a livelihoods-/employment-oriented component in technical FFS, e.g. IPM FFS  
• Support scaling-up/institutionalization of successful training programmes in collaboration with MoA/MOE  
• Pilot funding mechanism (small-grants fund) to support community-learning initiatives  
• Join other UN agencies in promoting collaboration among ministries/NGOs/private sector to increase accessibility of rural people to skills training for self-employment and job creation, e.g. policy support for a joint strategy for non-formal education (NFE) in rural areas  
• Promote participatory analysis in collaboration with government/local communities/rural institutions/research centres to identify needs and constraints that rural poor people face in accessing education and training services, e.g. during UN joint assessments such as CCA. |  
| See also Section 1.3.2 |  
| **1.5.2 Knowledge and skills to enhance employability** |  
| **1.5.3 Specific groups’ needs to access decent rural employment opportunities** |  
| **1.6.1 Rural women and youth**<sup>15</sup> | • Sensitize national partners on the need to prioritize women and youth in employment creation, e.g. use well-established events such as Rural Women Day, World Food Day, etc. |  

---

15 The United Nations defines “youth” as persons between the ages of 15 and 24 years inclusive.

### 1.6.5 Persons with disabilities

- Remain involved, attend meetings, collaborate with government, UN agencies, NGOs, etc. that focus upon persons with disabilities in rural areas, underscoring the potential contribution of the agricultural sector for their inclusion
- Promote prevention of disability through use of agro-chemicals and agricultural tools and implements, e.g. promoting IPM/GAP/OSH in FFS and training of extension services
- Provide technical expertise in training and adaptation methodologies required by persons with disabilities
- Support participatory research and case studies, involving local communities, to identify barriers and employment opportunities in the agriculture and non-farm sector for persons with disabilities

### 1.6.6 People living with and affected by HIV

- Promote access to employment for people living with and affected by HIV
- Promote access to prevention, treatment, care and support for women and men workers in rural areas and in agriculture
- Provide technical expertise in skills building that mainstream HIV prevention activities and establish referral systems for access to voluntary testing (VCT) and counselling, treatment, care and support

## 2.1.2 Extending social protection coverage to rural areas

### Issues to address
- HIV and AIDS and other major diseases and the world of work

### Examples of concrete actions
- As FAOR, participate in UN theme groups on HIV and AIDS to mainstream the role of agriculture in national HIV and AIDS strategies and policies
- Support the mainstreaming of AIDS concerns in ARD policies and strategies, e.g. supporting formulation of Agricultural Sector Strategies for HIV and AIDS
- Collaborate with ILO/MoA/MoL and organizations for people living with and affected by HIV to mainstream the role of agriculture in national strategies/policies on HIV and AIDS, e.g. national policy on HIV and AIDS and the world of work
- Support introduction of labour-saving technologies to support poor households in HIV- and AIDS-affected areas
- Support inclusion in extension workers’ training of a module on the impact of any disability and major epidemic, such as HIV and AIDS, on farmers and farming practices and how to mitigate it
- Apply the same consideration to other major diseases/epidemics relevant for country: e.g. tuberculosis and malaria

### Relevant tools
- FAO HIV/AIDS extension fact sheet

- ILO: Recommendation concerning HIV and AIDS and the World of Work, No. 200, 2010

## 2.2 Extending social protection coverage to rural areas

### Issues to address
- HIV and AIDS and other major diseases and the world of work

### Social protection for small-scale producers and workers in the informal rural economy

### Examples of concrete actions
- Link social protection with support to small producers’ productivity and capabilities, e.g. supporting productivity-enhancing safety nets, cash transfers and public employment programmes
- Ensure that UN food-based social transfers source food locally (collaborating with WFP similar initiatives, e.g. P4P) and that impacts on production and markets are monitored closely
- Participate actively in UN coordination mechanisms on social protection and support MoA involvement to raise awareness on specific need of workers in the agricultural sector (e.g. seasonality and instability of incomes in agriculture)
- Support mechanisms for extending social protection to workers in the informal economy, which involve their associations and communities/households, e.g. through mutual benefit groups/micro-insurance schemes/community care groups for HIV- and AIDS-affected people/health service cooperatives
- Ensure that national or UN-supported public employment programmes for rural people pay careful attention to wage setting; do not compete with farming calendars; prevent gender and age biases; and build self-reliance beyond basic survival needs e.g. by supporting capacity building and skills development

### Relevant tools
- Wiego Tools for advocacy: Social protection for informal workers
- EC 2012: Social transfers in the fight against hunger

### Issues to address | Examples of concrete actions | Relevant tools
--- | --- | ---
#### 2.2.1 Employment Creation and Enterprise Development (cont.)
- Support the provision of income security for poor rural people in old-age and invalidity through non-contributory pensions
- Explore, document and disseminate institutional innovations and good practices of organized collective action with strong impacts on social protection

#### 2.2.2 Social protection floor
- Engage in UN social protection floor (SPF)-initiatives to ensure their outreach to rural areas (FAO is a cooperating agency in this UN Initiative)
- Support the inclusion of measures for small producers/agricultural workers and other vulnerable rural groups in country-specific social protection policies
- Support implementation/M&E of social protection programmes in areas of FAO comparative advantage (e.g. nutrition and food security surveillance systems; vocational education and training through FFS, FBS, JFFLS; homestead gardening; community-level nutrition; food safety aspects; school feeding; child labour and youth programmes)

#### 2.3 Nutritional well-being and food security of rural people
- Support MoA to ensure that goals of national agricultural policies go beyond increasing agricultural production to promote food security, income generation, equity and improved nutritional status of vulnerable groups
- Support the incorporation of nutrition issues in ARD and poverty-reduction programmes/projects and in all agriculture-related training programmes, e.g. trainings for extension workers
- Address needs for improved nutrition for people living with and affected by HIV, e.g. in trainings for extension workers

### Issues to address

#### 2.3.2  
**Decent rural employment and food security**

- Advocate for DRE as a driver of more stable livelihoods and improved food security
- Advocate for interdependence between right to food and right to work within broader right-based approaches, e.g. within UNCT, UNDAF
- Support mainstreaming of DRE in strategies and programmes for food security

**Examples of concrete actions**

- Advocate for DRE as a driver of more stable livelihoods and improved food security
- Advocate for interdependence between right to food and right to work within broader right-based approaches, e.g. within UNCT, UNDAF
- Support mainstreaming of DRE in strategies and programmes for food security

**Relevant tools**

- FAO Supporting programmes for Food Security
- FAO Right to Food Portal and Tools
- FAO Nutrition and consumer protection

### Issues to address

#### 2.4  
**Improving working conditions in rural areas**

**Examples of concrete actions**

- Support government capacity and structures for collecting and analysing data (through labour force, time use and health and demographic surveys) to assess the maternity protection conditions and care needs of rural women
- Identify the legal, policy and service provision gaps through the development of legal reviews, policy and social budget analysis
- Raise awareness of government, MoA, trade unions, employers’ organizations and women’s groups on the need for maternity protection and care needs of rural women (e.g. via the development of national campaigns; technical workshops on research and policy analysis results; capacity development of national stakeholders)
- Support the elaboration and funding of national and local strategies to extend maternity protection at work and care services for rural women, including: a) protection against hazardous work during pre- and postnatal periods; b) time for rest, healing and recovery after childbirth; c) income support and access to health care for the mother and her child; d) protection from discrimination based on pregnancy, maternity and family responsibilities; e) support for breastfeeding at work and childcare.

| 3.2.1 (cont.)                                                                    | • Join forces with MoA and ILO to support mainstreaming of child labour concerns into ARD and poverty reduction policies, programmes and projects, and in extension services, e.g. through CCA/UNDAF/CPF  
  • Increase inter-ministerial cooperation on child labour, especially to consider how agriculture policies and programmes can impact both boys’ and girls’ involvement in child labour  
  • Document good practices in the country to reduce child labour in the agricultural sector  
  • Sensitize rural communities on national minimum age legislation for the agricultural sector and child labour negative impacts, e.g. through FFS, FBS, JFFLS, joint FAO-ILO extension workers’ training  
  • Support development and implementation of curricula relevant to the rural and agricultural context for primary and secondary schools and adjust holidays to seasonal agricultural calendar where possible, e.g. support adoption of agricultural, business, life-skills modules in national curricula  
  • Support vocational training models for low-literacy agricultural populations, including children and youth, adapted for child-labour prevention (e.g. JFFLS)  
  • Support government efforts to improve national surveys and to establish a sex-disaggregated database on children’s economic activities in agriculture (including household chores), linking with ILO/IPEC and other UNICEF or WB initiative  
  • Support action-oriented research and case studies, involving local communities, to identify the worst forms of child labour in agriculture and child labour hot spots (e.g. establish a partnership with a national university)  
  • Start a child labour-prevention programme, combining approaches to livelihoods diversification and income generation with Community Based Information and Monitoring Systems (CBIMS), e.g. conditional agricultural credit for parents/guardians who withdraw their children from the worst forms of child labour  
  • Encourage private companies and public institutions to work with suppliers to provide alternatives to child labour that are viable for both the business and the children  
  • Consider adopting appropriate technology that reduce child labour, including substitutes for hazardous substances, technologies and practices, e.g. IPM  
  • Promote greater engagement of POs and organizations of rural workers in monitoring and preventing child labour  
  • Promote use of monitoring mechanisms already in place in existing voluntary guidelines and codes of practice used at country level to improve child labour monitoring, e.g. Code of Conduct of Responsible Fisheries, GAP certification, GLOBALG.A.P, Fair Trade unions, etc. |                                                                                                              | ILO Handbook on combating child labour among indigenous peoples

</tr>
</tbody>
</table>
### Issues to address

3.2.4 (cont.)

- Remember that FAO Strategic Framework identifies gender equity in rural areas as a key objective (SOK) (UNFPA is usually the UN’s gender focal agency)
- Support action-oriented research and case studies on gender/age discrimination in rural labour markets and modern supply chains, in collaboration with ILO, national research institutes and women and youth groups

### Examples of concrete actions

3.2.5

**The rights of rural migrant workers**

- Support government initiatives aiming to provide rural migrant workers with information about their rights and protection against all forms of discrimination in employment and occupation
- Support government policies that protect rural migrant workers from conditions of forced labour, trafficking and abuses in origin and destination countries
- Join forces with ILO and IOM to support revision of discriminatory regulations that may create barriers for migrant workers to join rural workers’ organizations
- Account for potential vulnerability of certain migrant groups, mainly women, youth and children, e.g. by promoting gender/age-sensitive labour-migration policies
- Support changes in gender norms: empower women where men have migrated, encourage men to take on reproductive tasks where women have migrated such as child care and food preparation, e.g. via training of extension workers or project-based training
- Support MoA involvement in mechanisms to provide pre-departure information on rights and risks to both female and male, youth and adult potential migrants, e.g. support development of information mechanisms and pre-training for seasonal employment in the agricultural sector

### Improving agricultural labour legislation and policies

#### Issues to address

**Legal and policy framework protecting workers in the agricultural sector and the informal rural economy**

- Ensure that labour rights are addressed when assisting MoA in drafting agricultural and agro-industries legislation and policy (ensuring collaboration with MoL and ILO), e.g. within TCPs in support of agricultural Acts, pesticide Acts, etc.
- Ensure that labour rights aspects are addressed in capacity development support to MoA to implement agricultural and agro-industries legislation and policy (ensuring collaboration with MoL and ILO)
- Ensure that rights of small producers/rural workers, particularly women and youth, in accessing land, financial services, training and other productive resources are considered when assisting MoA in the drafting of agricultural legislation and reforms, e.g. within TCPs
- Support the establishment of inter-ministerial mechanisms, partnerships or exchanges to enhance synergies between policies on agriculture and rural development, employment, trade, technology, education, health for efficient and non-discriminatory rural labour markets

<tr>
<td><strong>4.1.2 Organization and networks of workers in the rural informal economy</strong></td>
<td>• Recognize agricultural workers in paid employment as a distinct group from producers: directly work with their trade unions and associations&lt;br&gt;• Support government efforts to organize informal rural workers (e.g. promote street vendor organizations through collaboration with NGOs and municipalities)&lt;br&gt;• Promote cooperatives/associations as one step on the path towards trade-unions formalization/registration&lt;br&gt;• Support organizations to form partnerships with NGOs for training and technical assistance in areas such as farm management and agricultural techniques&lt;br&gt;• Develop and diffuse “Know your rights” materials and provide training to associations’ committee members and staff in negotiation and advocacy, e.g. organize a joint training with ILO for extension workers&lt;br&gt;• Remember that the majority of workers in the informal economy are women and youth – address explicitly their concerns and needs</td>
<td>ILO/ICA/ICFTU Handbook for trade unions and cooperatives about organizing workers in the informal economy&lt;br&gt;ILO Handbook on cooperatives for use by workers’ organizations&lt;br&gt;FAO Workers in the urban “informal” food sector: innovative organizing strategies&lt;br&gt;FAO Associations of market traders: Their roles and potential for further development&lt;br&gt;ILO policy brief on addressing informality for rural development&lt;br&gt;WIEGO Report on informal workers’ organizing&lt;br&gt;WIEGO Social Protection and the informal economy: linkages and good practices&lt;br&gt;ILO Organizing out of poverty: stories from the grassroots: How the SYNDICOOP approach has worked in East Africa&lt;br&gt;Organizing informal labor in India and Indonesia&lt;br&gt;R149 Rural Workers’ Organizations Recommendation, 1975&lt;br&gt;C135 Workers’ Representatives Convention, 1971&lt;br&gt;C141 Rural Workers’ Organizations Convention, 1975</td>

# 4.2 Social dialogue and enhanced participation of small producers and rural workers, particularly women and youth, in agriculture and rural development processes

<table>
<thead>
<tr>
<th>Issues to address</th>
<th>Examples of concrete actions</th>
<th>Relevant tools</th>
</tr>
</thead>
</table>
| 4.2.1 Representation and empowerment of the rural poor, particularly women and youth, in social dialogue and policy dialogue through rural workers’ organizations, producers’ organizations and civil society organizations | • Advocate with government/MoA and UNCT the role that POs, rural workers’ associations and other CSOs can play in increasing contribution of rural workers to ARD and food security  
• Support institutionalization of coordination mechanisms among POs/CSOs, government (MoA/MoT/MoE, etc.) and the private sector, including in agricultural research  
• Support the involvement of rural women and youth groups in every coordination mechanism supported  
• Facilitate contacts between different workers’ unions and POs and provide a forum where matters of common interest (e.g. legislation regarding land reclamation) can be discussed, e.g. platforms, regional training workshops in collaboration with regional and national POs, etc.  
• Involve both formal and informal POs and rural workers’ organizations, particularly women’s and youths’, in strategic ARD processes supported by FAO  
• Promote dialogue and consultation between government/UNCT/ILO, migrant workers’ associations (if they exist) and POs/workers’ associations on particular concerns posed by rural out-migration and respective roles in assisting migrant workers  
• Consider that social dialogue in the sense of collective bargaining and agreements falls typically within ILO mandate (e.g. collective agreements in the agricultural sector on plantations and commercial farms) | YEN Practical guide to joining forces with young people  
FAO/SARD Policy Brief on Farmers’ Organizations  
FAO The role and capacity of farm workers’ unions in land reform in South Africa

FAO Participation Website  
ILO Portal on Social Dialogue |
| 4.2.2 Participation and empowerment of rural poor, particularly of women and youth, in local decision-making and governance processes | • Support government efforts to map and analyse rural institutions, in particular existing women and youth groups, and organizations for people living with and affected by HIV to identify capacity and institutional needs, e.g. within the CCA/via programme- and project-based studies  
• Foster inclusive inter-institutional collaboration at the various governance levels on ARD, rural employment and poverty reduction processes (e.g. when developing agricultural employment strategies, UNDAF, PRSPs)  
• Support rural women and youth participation as well as people living with and affected by HIV in decision-making bodies at national/ regional/ provincial/municipality and community level  
• Support training of extension services providers to promote group dynamics for lobbying, e.g. support the preparation of short-term training modules and materials  
• Develop/diffuse “Know your rights” materials and training to rural communities on participation, women and youth empowerment etc., e.g. via programme- and project-based training | FAO Rapid guide for missions Analysing local institutions and livelihoods
