

Child labour

Course: Promoting youth employment and reducing child labour in agriculture

© FAO/John Spaul

This course presents strategies to strengthen the impact of child labour reduction and youth employment policies and programmes by considering the two issues together. First, it builds an understanding of the differences as well as linkages between child labour and youth employment. Then, it highlights concrete measures to improve policy and programme coherence and support for young people to access decent opportunities in agriculture.

1,5 hours

Available in English

You will learn about

- Understand the differences between youth employment and child labour
- Know how youth under-/unemployment is linked to child labour
- Identify how initiatives designed to reduce child labour and initiatives aimed at promoting rural youth employment, can work together to improve opportunities for young people in agriculture

Who is the course for?

The course is intended for: agricultural producers and their organizations; small and large-scale agribusinesses; agricultural policy makers and advisors; those working in NGOs, and public or private sector working on agricultural value chains or with rural youth.

Key partners

This course was created by the Food and Agriculture Organization of the United Nations (FAO) in collaboration with the International Labour Organization (ILO). It was co-funded by the Kingdom of the Netherlands.

The International Fund for Agricultural Development (IFAD) has contributed to the development of the course.
