CHIMAERAS - Chimaeriformes
Four pairs of gill openings hidden by a pair of soft gill covers, thus appearing as a single gill opening on each side of head; no spiracles.

CHIMAERIDAE
Shortnose chimaeras
To 150 cm from 90 to 1100 m depth, demersal.

RHINOCHEMAERIDAE
Longnose chimaeras
To 130 cm; from 200 to 470 m depth, demersal. A single species.
