

Farm Planning and management for extension trainers in the Caribbean

The manual is intended for trainers of agricultural extension workers employed by Ministries of Agriculture and other front line change agents working through local government, non-government organizations, civil society and the private sector.

The materials on this CD include training notes, handouts, PowerPoint presentations and a toolkit for farm analysis and planning. The CD is organized according to the design of the training manual and is divided into Modules, Units and Sessions. The CD materials include both PDF and Word versions. The Word files have been purposely included to enable both trainers and extension workers to utilise the material and adapt them to local and specific needs.
