BAY OF BENGAL PROGRAMME
Madras, India
1992

This paper compares the economic performance of the beachianding craft (BLC) and several other motorized and non-motorized small-scale fishing craft in three villages on the east coast of India, viz. Pentakota (Orissa), Tummelapenta (Andhra Pradesh) and Thirumullaivasal (Tamil Nadu). The relationship between the fishing operations of the different craft and various factors affecting BLC operations are also discussed.

The study, conducted during 1989 through the beginning of 1990, and this paper which reports on it, have been sponsored by the Bay of Bengal Programme's (BOBP) Small-Scale Fisherfolk Communities in the Bay of Bengal (GCP/RAS/118/MUL). Assistance in conducting the study and completing this report was received from Theodore Selvaraj, Deputy Director of Fisheries (Marine), Madras (Tamil Nadu), Prabaharadu, Inspector of Fisheries, Thirumullaivasal (Tamil Nadu), Manindra Nath Ghose, Superintendent of Fisheries, Pun (Orissa), C. Ratnama Chary, Manager (Fisheries), Andhra Pradesh State Cooperative Fishermen's Federation Limited, Kavali (Andhra Pradesh), Y. Balaramiah, Fisheries Development Officer, Andhra Pradesh State Cooperative Fishermen's Federation Limited, Kavali (Andhra Pradesh), A. Alexander, Community Development Officer, BOBP, Thirumullaivasal, M. Venkateswar Rao, Data Collector, Pentakota, Avula Ramanaiah, Data Collector, Tummelapenta, P. Dinakara Rao, General Manager, Andhra Pradesh Fisheries Corporation Limited, Kalunada (Andhra Pradesh), V. Ramesh, Marine Engineer, BOBP, Madras, A. Kamilla, BOBP, Madras.

The Bay of Bengal Programme (BOBP) is a multi-agency regional fisheries programme which covers seven countries around the Bay of Bengal – Bangladesh, India, Indonesia, Malaysia, Maldives, Sri Lanka, Thailand. The Programme plays a catalytic and consultative role : it develops, demonstrates and promotes new techniques, technologies or ideas to help improve the conditions of small-scale fisherfolk communities in member-countries. The BOBP is sponsored by the governments of Denmark, Sweden and the United Kingdom, by member-governments in the Bay of Bengal region, and also by AGFUND (Arab Gulf Fund for United Nations Development Organizations) and UNDP (United Nations Development Programme). The main executing agency is the FAO (Food and Agriculture Organization of the United Nations).

This document is a working paper and has not been cleared by the governments concerned or the FAO.

August 1992

1. Introduction	
2. Objectives of the study	1
3. Methodology	3
4. Limitations of the study	5
5. Villages and fishing craft/gear units selected for data collection	6
5.1 Differences in the three locations	6
5.2 Fishing craft selected and their gear	6
6. Competition between the different types of fishing craft	10
6.1 Area of fishing operations	10
6.2 Timing of the fishing operations	12
6.3 Types of fishing gear used	13
6.4 Species composition of catch	14
6.5 Conclusions	16
7. Marketing	16
8. Analysis of performance	18
8.1 Economic analysis	18
9. Distribution of income	25
10. Some factors affecting BLC operations	30
10.1 The use of the BLC as a beachlanding craft	31
11. Conclusions	32
11.1 Techno-economic and socio-cultural factors resulting in adoption or rejection of the BLC	33
11.2 Competition between BLC and traditional fishing craft	34
11.3 Economic feasibility of commercial BLC operations	34
11.4 Economic performance of the BLC compared to that of other types of fishing craft	35
11.5 Distribution of income between fishing craft-owner and crew	35
11.6 The use of the BLC as a beachlanding craft	35
