

Outcomes from the Third Global Minor Use Summit, and considerations for JMPR

Lunchtime side event - 12:15-14:15 - Monday April 9th, 2018

A "minor use" of a pesticide refers to uses of herbicides, fungicides, or insecticides for use on low-acreage, high-value crops, or where pest control is only needed on a small portion of a farm's overall land. To address these needs, On October 1, 2017, more than 200 experts from 35 countries gathered in Montreal, Québec Canada for a four-day event – the *Third Global Minor Use Summit*. This Side event will share some of the outcomes from that meeting and a going forward plan.
