Agenda item 6
CX/FICS 20/25/6
January 2020

JOINT FAO/WHO FOOD STANDARDS PROGRAMME
CODEX COMMITTEE ON FOOD IMPORT AND EXPORT INSPECTION
AND CERTIFICATION SYSTEMS
Twenty-fifth Session
Hobart, Tasmania Australia, 27 April – May 1 2020

PROPOSED DRAFT GUIDELINES ON RECOGNITION AND MAINTENANCE OF EQUIVALENCE OF
NATIONAL FOOD CONTROL SYSTEMS (NFCS)

Prepared by an electronic working group1 led by New Zealand with the United States and Chile

(At Step 3)

Codex members and Observers wishing to submit comments at Step 3 on this draft should do so as
instructed in CL 2020/2/OCS-FICS available on the Codex webpage/Circular Letters 2020:

Introduction

1. During discussion at its 21st session, in 2013, on emerging issues and the future direction of its work, the
Codex Committee on Food Import and Export Inspection and Certification Systems (CCFICS) agreed to
the development of a discussion paper, to be prepared by New Zealand, on the possible development of
guidance on the use of systems equivalence/comparability2, especially as a means to further facilitate safe
trade while better utilizing and risk targeting inspection resources.

2. At its 22nd session CCFICS considered the discussion paper (CX/FICS 16/22/7) and a project document
(CRD11) and agreed to establish an electronic Working Group, led by New Zealand with the United States
of America and Chile acting as co-chairs, to revise the discussion paper and the project document. The
Committee noted that while systems equivalence was a complex topic, it was important to expand the
suite of tools that recognized the ability of a competent authority to provide assurances regarding the
safety of food. This work would represent the next stage of evolution of existing CCFICS texts on
equivalence. The Committee further noted that the development of guidance in the area of system
equivalence should address the dual mandate of Codex.3

3. At its 23rd session CCFICS considered the discussion paper (CX/FICS 17/23/6) and project document
(CRD17)4. It was recalled that the the proposed new work would complement the other three texts that
explicitly mentioned equivalence, namely: the Guidelines for the Design, Operation, Assessment and
Accreditation of Food Import and Export Inspection and Certification Systems (CXG 26-1997), the
Guidelines of Equivalence Agreements regarding Food Import and Export Inspection and Certification
Systems (CXG 34-1999) and the Guidelines on the Judgement of Equivalence of Sanitary Measures
associated with Food Inspection and Certification Systems (CXG 53-2003). Moreover, the proposed new
guidance would also fit well with the Guidelines for National Food Control Systems (CXG 82-2013) and the
Principles and Guidelines for the Exchange of Information between Importing and Exporting Countries
to Support the Trade in Food (CXG 89-2016).

4. It was noted that while both CXG 26-1997 and CXG 34-1999 covered the dual mandate of Codex and
anticipated the potential for systems equivalence, neither provided practical guidance on processes and

States of America, United Kingdom, Uruguay, GFSI, SSAFE.
2 Para. 63, REP15/FICS
3 Paras. 49-52, REP16/FICS
4 Paras. 31-33, REP17/FICS
procedures that could assist countries in approaching systems equivalence considerations. Further, CXG 53-2003 had limited application to overarching systems-equivalence processes as its focus was on the equivalence of specific sanitary measures. The examination of CCFICS texts had clearly shown a gap in guidance on how to initiate and conduct a systems-equivalence assessment.

5. CCFICS23 expressed broad support for developing additional guidance on the use of systems equivalence and noted (among other aspects) that the “Guidance would assist countries in tackling this complex issue and may reduce unnecessary trade restrictions and save competent authority resources”⁵. Following revision of the project document the Committee agreed to forward it for approval by CAC40 and to establish an electronic working group, chaired by New Zealand and co-chaired by Chile and the United States of America.⁵ CAC40 approved the new work in July 2017.

6. Draft proposed guidance was prepared by New Zealand with the support of Chile and the United States of America and circulated, in English and Spanish, to the eWG in October 2017. A physical working group was convened in Santiago, Chile in December 2017. The pWG was attended by delegations from 33 Codex members and observers⁷, the Chair of CCFICS and the Codex Secretariat, with several delegations participating via webinar technology. The pWG considered all the written comments received from the eWG and further revised the draft proposed guidance.

7. A second draft based on the written comments and the discussion at the Santiago pWG was prepared by New Zealand with the support of Chile and the United States of America and circulated to the eWG, in English and Spanish, in March 2018. A further physical working group was convened in Edinburgh, Scotland in May 2018. The pWG was attended by delegations from 25 Codex members and observers⁸, the Chair of CCFICS and the Codex Secretariat, with several delegations participating via webinar technology. The pWG considered all the written comments received and further revised the draft proposed guidance.

8. At its 24th session CCFICS considered the draft proposed guidelines (Guidelines on Recognition and Maintenance of Equivalence of National Food Control Systems) and the report of the working group (CX/FICS 18/24/4). CCFICS24 revised the proposed draft guidance and agreed to re-establish the electronic working group chaired by New Zealand and co-chaired by Chile and the United States of America. The eWG was tasked to continue the development of the proposed guidelines, taking into account the comments made and/or submitted at CCFICS24, for circulation and consideration at CCFIC25 with the intention to advance the draft guidance to adoption in line with the timeframe in the original project document.⁹

Post CCFIC24 approach and working group discussion

9. The Chairs of the eWG took into account the additional comments submitted to and made at CCFICS24 and circulated a revised draft of the proposed guideline to the eWG¹⁰ in May 2019.

10. A number of additional questions were also posed for consideration by the eWG, including:

- acceptability of specific words or phrases to be used consistently throughout the text;
- inclusion of footnotes, some with a specific reference to another CCFICS text and some providing an illustrative example;
- inclusion and/or wording of certain definitions and principles;
- the order / reorder of the process steps; and
- requesting suggestions for examples to illustrate the concept of ‘decision criteria’ and how variability and uncertainty estimates could influence the assessment process.

⁹ REP19/FICS paras 16 – 32
¹⁰ The electronic working group comprised representatives of Argentina, Australia, Brazil, Canada, Chile, Costa Rica, Dominican Republic, Ecuador, Egypt, El Salvador, European Commission, India, Indonesia, Jamaica, Japan, Kazakhstan, Republic of Korea, Mexico, Morocco, New Zealand, Nigeria, Norway, Peru, Singapore, Switzerland, Thailand, United States of America, United Kingdom, Uruguay, GFSI, SSAFE.
11. Generally the eWG supported the continued inclusion of footnote references to relevant CCFICS texts and the use of illustrative examples where these could facilitate understanding. The discussion at CCGP31 on the use of examples was also noted.

12. The inclusion of a specific definition for ‘National Food Control Systems’ and the wording of a definition for ‘Decision Criteria’ generated a range of views. There was consensus that a specific definition of ‘National Food Control System’ was not needed.

13. The reorder of the process steps and the reworking of section 5 were generally supported with helpful editorial suggestions also being provided.

14. When commenting on the definition for NFCS Objective’ there was a suggestion to replace the word ‘objectives’ with ‘outcomes’ throughout the text. This was not accepted as a wholesale change and was explained to the eWG noting the definition was drafted to align with existing text (CAC/GL 82-2013) recognising it uses ‘objective’ and ‘goal’ interchangeable in sections 3 and 4.1 but also gives a hierarchy by stating in section 2 that the objective of a NFCS is protection of health of consumers and ensuring fair practices in food trade. Section 4.2 (System Design) then links the ability to achieve the system objectives with elements of the system as described in that section. Objectives is therefore at the higher level and is the starting point in assessing equivalence as you need to know the objective to be able to judge if a particular outcome is actually contributing to achieving the objective.

15. All of the comments received along with a response to each and a further revised draft was again circulated to the eWG in September 2019 for a second round of comment along with some further specific questions relating to changes to the revised text including the:

- wording of the definition for ‘Decision criteria’;

- refinement of illustrative examples in specific footnotes; and

- inclusion of additional guidance on the maintenance and review of recognitions of equivalence.

16. The responses and suggestions from the eWG have been incorporated into the Draft Guidelines on recognition and maintenance of equivalence of National Food Control Systems (NFCS) attached to this agenda paper (Appendix 1).

17. The draft has been refined to ensure:

- it continues to addresses the dual mandate of Codex;

- the definitions included are only those necessary for this guideline;

- the explanation of the process steps including a limited number of illustrative examples, is sufficient to provide practical assistance to Codex members without placing an undue burden on either party; and

- duplication of guidance in other existing Codex texts on equivalence is avoided to the maximum extent possible.

18. All the text that was in square brackets [ ] has been reviewed and the brackets removed, except for one instance (paragraph 10, 2nd bullet – referring to international standards) and this is therefore drawn to the committees attention for consideration.

**APPRAOCH FOR PHYSICAL WORKING GROUP DISCUSSION**

19. A physical working group (PWG) will be help on Sunday 26 April 2020 8:30am to 15:30pm. This PWG will consider the comments made in responses to the draft guidelines set out in Appendix I of this paper for report back to CCFICS25.

20. Given the extensive work undertaken via electronic and previous physical working groups and by previous sessions of CCFICS it is the view of the eWG Chair and co–Chairs that, following consideration by CCFICS25, the draft has reached a stage where it is now appropriate for CCFICS to consider recommending accelerated progress within the step process so as to achieve the timeline for completion of this work set out in the project document approved by CAC40 (i.e. to be completed by 2020).

**Recommendations**

21. The Committee consider, and as appropriate recommend the advancement of, the proposed Draft Guidelines on recognition and maintenance of equivalence of National Food Control Systems (NFCSs) as contained in Appendix 1.

SECTION 1 – PREAMBLE / INTRODUCTION

1 A large majority of trade in food occurs without exporting countries being required to undergo a detailed assessment of their National Food Control System (NFCS)\(^1\). However, where an importing country requires additional assurances from the exporting country as a pre-condition of trade then several mechanisms outlined in existing Codex guidelines may facilitate this. For example, CXG 89-2016\(^2\) provides guidance on the exchange of NFCS information between importing and exporting countries to support trade in food and CXG 26-1997\(^3\) provides guidance on, among other elements, the assessment of a Food Inspection and Certification System. Countries may also use CXG 53-2003 for further evaluation of a single sanitary or group of sanitary measures.

2 Recognition of the equivalence of the whole or a part of an exporting country’s NFCS as relevant to the trade in foods can minimize unnecessary duplication of controls while providing an effective means for protecting the health of consumers and ensuring fair practices in the food trade.

3 This guideline complements the existing Codex guidelines on NFCS\(^1\) and food inspection and certification systems (including assessing equivalence\(^3\), and the development of equivalence agreements\(^4\)); the exchange of information to support trade in food\(^2\); and the guidance on the judgement of equivalence of sanitary measures\(^5\).

4 The consideration, assessment, recognition, and maintenance of the equivalence of one country’s NFCS in whole or the relevant part is independent of any reciprocal process occurring. Reciprocal considerations, where requested, may have different scopes and may arrive at different conclusions.

SECTION 2 – SCOPE / PURPOSE

5 These guidelines provide practical guidance for importing and exporting countries to use when considering the appropriateness and/or scope of, as well as the process for assessing, recognising and maintaining the equivalence of the whole or a part of the NFCS at the system level.

6 A request for a recognition of equivalence may relate to either the protection of the health of consumers or ensuring fair practices in the food trade and may be associated with an entire NFCS or the part of a NFCS relevant to the trade in foods covered by the request.\(^6\)

SECTION 3 – DEFINITIONS

Equivalence of systems: the capability of different NFCS or parts of a NFCS to meet the same objectives.

NFCS Objectives: the intent or purpose of the core elements of the NFCS or the relevant part including how these contribute to the overarching goals of the NFCS to protect the health of consumers and ensure fair practice in the food trade.

Outcome: intended effects or results that contribute to achieving the NFCS objectives. Outcomes may be categorized at different levels, such as ultimate, high-level, intermediate, preliminary, or initial.\(^7\)

Decision Criteria: those factors used to determine whether the exporting country’s NFCS or relevant part meet the objectives of the importing country’s NFCS or the relevant part for the products under consideration.

---

\(^1\) Refer to Principles and guidelines for National Food Control Systems (CXG 82-2013)

\(^2\) Principles and guidelines on the Exchange of Information between Importing and exporting Countries to Support Trade in Food (CXG 89-2016)

\(^3\) Guidelines for the design, operation, assessment and accreditation of food import and export inspection and certification systems (CXG 26-1997)

\(^6\) For example an equivalence request could be limited to assurances associated with a specified sector such as seafood, or further refined to a subsector such as aquaculture or a processing type such as canned seafood. A request for equivalence recognition could cover a horizontal process for providing assurances such as the recognition of regulatory controls for sampling protocols and/or laboratory or specific methodology approvals.

\(^7\) CXG 91-2017
SECTION 4 – PRINCIPLES

7 Consideration of the recognition of the equivalence of a NFCS should be based on the application of the following principles:

**Equivalence of Systems**

a. Countries should recognize that NFCS’s, or the relevant parts thereof, of importing and exporting countries, although designed and structured differently, may be capable of meeting the same NFCS objectives with respect to protecting the health of consumers and ensuring fair practices in the food trade and can therefore be found to be equivalent.

**Experience, Knowledge and Confidence**

b. Countries should consider relevant experience, knowledge and confidence and may consider appropriate assessments by other countries or international organizations.

**Alignment with International Standards**

c. The use of or reference to Codex standards, guidelines, and/or codes of practise by importing and exporting countries can facilitate the consideration, assessment and recognition of the equivalence of a NFCS, or the relevant part.

**Assessment**

d. The assessment process should evaluate whether the relevant NFCS objectives are met and should be documented; transparent; evidence-based; outcome-focused; efficient; and be conducted in a cooperative and timely manner.

**Formalisation and Maintenance of Recognition**

e. The importing and exporting countries should document and formalise any recognition reached, including how the recognition of equivalence will be implemented and maintained for the trade in food between the countries.

SECTION 5 – PROCESS STEPS

8 The following process steps relate to consideration, assessment, recognition and maintenance of the equivalence of NFCSs.

- Step 1: Initial discussions, scope and decision to commence
- Step 2: Description of the importing country’s NFCS objectives
- Step 3: The decision criteria for comparison
- Step 4: Description of exporting country’s NFCS or relevant part
- Step 5: Assessment process
- Step 6: Decision process
- Step 7: Formalization and maintenance of the recognition

5.1 STEP 1: INITIAL DISCUSSIONS, SCOPE AND DECISION TO COMMENCE

**Initial discussions**

9 Prior to an exporting country formally requesting an importing country to enter into consultations on the recognition of the equivalence of systems, initial discussions should take place between the relevant competent authorities of both countries to identify if commencing an assessment of the equivalence of systems is the most appropriate approach or whether some other mechanism would be better.

10 Relevant matters for the initial discussions and which can also relate to the likelihood of success may include:

- experience, knowledge and confidence derived from, for example: the history and level of trade between the countries; the history of compliance with the importing country’s requirements; the

---

8 The principles and processes described in CXG 89-2016 are also useful in informing the exchange of information.

9 Examples of other mechanisms include, but are not limited to: compliance with importing county requirements; harmonisation of requirements; mutual recognition; memoranda of understanding; or assurances based on some other means acceptable to both countries.

10 Paragraphs 9 and 11 of CXG 34-1999 and paragraph 3 of the Appendix of CXG 53-2003 provide additional guidance.
level of familiarization and/or cooperation between the competent authorities; and the exporting country’s general trading history\textsuperscript{11};

- similarity of design and/or consistency of each country’s NFCS in whole or the relevant part [with international standards] including the legislative foundations and NFCS objectives;
- whether recognition of the equivalence of the NFCS or the relevant part will likely result in cost and resource savings, reduced duplication of control activities and/or removal of impediments to trade, while protecting the health of consumers and ensuring fair practices in the food trade; and
- information exchanges and assessments that may have already occurred (e.g. in accordance with CXG 89-2016) or the existence of other relevant recognitions of equivalence between the two countries or with third countries.

**Scope Considerations**

11 During the initial discussions exporting and importing countries should determine the appropriate scope for the assessment. The scope may relate to an entire NFCS or only to that part of a NFCS relevant to the trade in foods to be covered by the request (which may include currently traded foods and/or foods proposed for future trade).\textsuperscript{12}

12 Relevant considerations in determining the scope may include:

- the range of products currently being traded between the countries and/or that are subject to similar controls in the exporting country;
- the range of assurances to be addressed;
- the level of trust and confidence in the performance of the exporting country’s NFCS in whole or the relevant part relating to those products already being traded; and
- the availability of resources likely to be necessary to undertake the process as it relates to the whole or a relevant part of the NFCS proposed to be considered and the possible benefits.

13 Discussions on scope should identify those areas where there may already be sufficient existing experience, knowledge and confidence versus those areas where additional information exchanges are likely to be required\textsuperscript{13}.

**Decision whether to commence**

14 At the conclusion of the initial discussions between the exporting and importing countries and where it has been determined that:

- an assessment of the equivalence of the NFCS is an appropriate mechanism;
- there is a likelihood of success; and
- the potential benefits and resource savings that can be achieved justifies the cost and resource implications of the process;

the exporting country should formalise its request to the importing country for a recognition of equivalence and describe the associated scope.

15 The two countries should then agree on a plan for undertaking the assessment which may include for example, timeframes and if necessary priorities.\textsuperscript{14}

16 Where the initial discussions between the exporting and importing country determine that they are not yet ready to commence a recognition of systems equivalence assessment the countries may wish to consider working jointly toward a future arrangement to reduced impediments to trade and duplication of control activities. CXG 34/1999 (paragraph 11) identifies that amongst other things, information exchange, joint training, technical cooperation, and the development of infrastructure and food control systems can serve as building blocks for a future request for recognition of the equivalence of systems.

\textsuperscript{11} Paragraph 10 of the Appendix to CXG 53-2003 provides some further possible examples which may or may not be relevant depending on the circumstance.\textsuperscript{12}

\textsuperscript{12} Paragraph 5 of CXG 34-1999

\textsuperscript{13} Paragraphs 11 and 12 of CXG 53-2003 provide some additional useful guidance.

\textsuperscript{14} Paragraph 4(d) of Appendix to CACGL/53-2003 and Paragraph 8 and 9 of CXG 34/1999 refers.
5.2 **STEP 2: DESCRIPTION OF IMPORTING COUNTRY’S NFCS OBJECTIVES**

17 The importing country should identify those elements of its NFCS and their associated objectives required for the assessment, which may include for example:  

- regulatory and legislative framework;  
- control and approval programs;  
- verification and audit programs;  
- monitoring, surveillance, investigation and response programs;  
- enforcement and compliance programs;  
- stakeholder engagement, communication and rapid alert systems;  
- system overview monitoring and evaluation programs; and  
- any other elements directly relevant to the specific products or programs under consideration.

18 Other factors relevant to the assessment may include: the transparency of decision making; freedom from conflict of interest; and the adequacy of resourcing.

**Description and evidence on how the importing country’s NFCS meets the objectives**

19 To facilitate the exporting country in describing its own systems, the importing country should describe, with appropriate references, how the relevant parts of its own system achieve each of the identified objectives.

20 In describing its own NFCS or the relevant part, the importing country may include reference to relevant international standards (e.g. Codex, OIE, IPPC).

5.3 **STEP 3: THE DECISION CRITERIA FOR COMPARISON**

21 Once the exporting country has formalized the request for a recognition of equivalence of its NFCS or the relevant part, the importing country should document the decision criteria to be used to evaluate the exporting country’s NFCS associated with the scope of the request. The criteria should reference the objectives and any related outcomes that must be demonstrated for recognition of equivalence. The decision criteria document should be provided to and discussed with the exporting country in a cooperative manner.

22 The decision criteria should facilitate an assessment whether the exporting country’s system design and implementation meets the importing country’s NFCS objectives and any related outcomes associated with the scope of the request.  

23 The decision criteria should describe:  

- how experience, knowledge and confidence is to be used;  
- the level of qualitative or quantitative evidence that is expected; and  
- the indicators\(^\text{17}\) of high level outcomes if these are to be used to facilitate comparisons.

24 The decision criteria should not apply a standard of performance in excess of that which the importing country can objectively show its NFCS or relevant part achieves as it relates to the protection of the health of consumers and ensuring fair practices in the food trade.

5.4 **STEP 4: DESCRIPTION OF EXPORTING COUNTRY’S NFCS OR RELEVANT PART**

25 The exporting country should make available appropriate information, including relevant references and evidence that describes the exporting country’s NFCS or the relevant part and demonstrates how it meets the objectives of the importing country’s NFCS or relevant part for the trade in foods covered by the request. The information made available should also address the adequacy of resources, and how the exporting country ensures the transparency of decision making and freedom from conflicts of interest.

26 As far as practical, and especially where consistent with the relevant Codex guidance, importing

---

\(^{15}\) ref: CXG 34-1999, Section 7; CXG 82-2013, paragraph 43 and CXG 89-2016 Section 7  

\(^{16}\) One example of a possible decision criteria could be: Regulatory decisions are made on the basis of science and risk based measures/requirements, evidenced by relevant historical regulatory decisions, published risk assessments, or compliance actions.

\(^{17}\) See Appendix B of CXG 91-2017 for some illustrative examples of outcomes and examples of potential indicators for those selected outcomes.
countries should allow flexibility in the format of the information submitted by the exporting countries.\textsuperscript{18}

Information exchanges should only be required for those areas which need to be subjected to a more detailed assessment, taking into consideration existing experiences, knowledge and confidence and those areas not within scope of the request.

5.5 **STEP 5: ASSESSMENT PROCESS**

Once the scope of the request is clear and the relevant information or documents are available the assessment process can proceed. The methodology used in the assessment process by the importing country should be transparent, evidence-based and focus on assessing whether the exporting country’s NFCS in whole or the relevant part as described meets the decision criteria. Where significant differences are identified the assessment should evaluate whether the objectives and any related outcomes of the importing country’s NFCS can be achieved using the exporting country’s alternative approach. There should be an effective communication mechanism between both countries, for providing feedback.

The assessment process will normally comprise a number of steps. The exact process may vary depending on: the type of foods in the scope of the request and the complexity of controls; any pre-existing experience, knowledge and confidence; and what sort of modification to existing trade conditions is being sought. In general the importing country should:

- determine which elements of the exporting country’s NFSC need to be assessed for the type of foods and the modification to existing trade conditions being sought and, when relevant, identify which aspects of existing trade are excluded from the assessment;
- clearly set out the importing country’s own NFCS objectives for each of the elements being assessed along with how they relate to the decision criteria;
- consider whether the information submitted by the exporting country or otherwise available is sufficient to enable an appropriate analysis;
- proceed with in-depth assessment applying the decision criteria and requesting additional information if deemed necessary;
- consider any additional information submitted where it has been required, or where it is jointly decided that additional controls are required to facilitate a positive determination.

The assessment process, undertaken by the importing country, should be conducted applying the following:

- focus on whether the exporting country’s NFCS meets the objectives of the importing country’s NFCS or the relevant part in accordance with the decision criteria as opposed to whether specific procedures or functions, undertaken by certain parties in the importing country, are replicated;
- allow for indicators of outcomes different to the importing country’s to be used by the exporting country to demonstrate the performance of its NFCS or the relevant part to achieve the importing country’s objective;
- weigh the outcome of the various elements relative to their impact on achieving the objectives and or overarching goals of the importing country’s NFCS or relevant part;
- be conducted in a cooperative and timely manner and include the use of on-site assessments\textsuperscript{19} as necessary;
- allow for regular discussion/consultations between the countries and the provision of clarifications and or supplementary information as required; and
- appropriately protect commercially sensitive and confidential information.

Other overarching considerations relevant to the assessment process may include:

- freedom from conflicts of interest;
- transparency of decisions and actions;
- how the exporting country NFCS maintains the three characteristics of; situational awareness

\textsuperscript{18} Paragraph 6 d) CXG89-2016

\textsuperscript{19} See Annex to CXG 26/1997 for further guidance on the conduct of assessments
proactivity and continuous improvement; and

- the ability of infrastructure and resources to maintain an appropriate NFCS or the relevant part as represented in documentation and implemented by the exporting country.

The assessment process may include teleconferences or meetings and where necessary country visits to conduct onsite audits. The use of such approaches should be included in the planning for the equivalence of systems assessment, as appropriate. Countries are encouraged to communicate and conduct meetings electronically, where practicable. Where relevant, the provision of technical assistance may support the assessment process.

5.6 **STEP 6: DECISION PROCESS**

The decision process should be transparent. The importing country should document the assessment conclusion and the rationale. The exporting country should be given the opportunity to comment on the draft conclusions. In the case of a finding that the exporting country’s NFCS or the relevant part is not equivalent, the exporting country should have the opportunity to provide additional information for consideration by the importing country prior to the finalization of the decision.

The decision process should:

- be conducted in a timely manner; and
- focus on whether the exporting country’s NFCS meets the decision criteria; and
- not introduce an objective, outcome, standard or process in excess of what is being applied within the importing country without justification.

5.7. **STEP 7: FORMALIZATION AND MAINTENANCE OF THE RECOGNITION**

The importing and exporting countries should document any recognition reached including how the recognition of equivalence will be implemented for the trade in food between the countries. This may be done for example, through an exchange of letters or through the negotiation of a more comprehensive equivalence agreement or arrangement.

The documentation of the recognition of the equivalence of systems should include provisions on maintenance and review of the recognition. Maintenance of recognition arrangements should allow regulatory frameworks, programs and oversight to evolve over time.

The countries should document their expectations with respect to ongoing communication and cooperation. This should include what level of change to their NFCSs or other changes in circumstance requires notification to the other country and when a review of the recognition of equivalence may be required.

Maintenance and review of recognitions of the equivalence of NFCS may include activities such as:

- regular provision of summary information on the performance of the NFCS or the relevant part;
- advice of and potential review of any proposed significant changes to the laws, regulations or performance measures underpinning the components of NFCS covered by the recognition of equivalence arrangement;
- regular technical discussions between relevant experts;
- intermittent country visits or technical exchanges so as to maintain the currency of experience, knowledge and confidence.

---

20 Reference paragraph 36 CXG 82-2013
21 See the Annex to CXG53-2003 paragraph 34 (Use of on-site visits) for examples of when on-site visits may be justified.
22 Examples could include technical exchanges to help facilitate better understanding of each country’s systems, or assistance with making changes to those parts of the NFCS that are identified during the assessment process as needing further development.
23 Although this guideline refers to “countries” and “agreements,” in many cases the relevant competent authorities will enter into agreements or other arrangements. CXG 34-1999 Appendix A provides a list of information that could, as appropriate, be included in an equivalence agreement.
24 See Section 1(2) of the Annex to CXG 26-1997 (Principles and Guidelines for the Conduct of Assessments of Foreign Official Inspection and Certification Systems)
Figure 1: Equivalence of National Food Control Systems Process

Simplified flow chart for recognition and maintenance of equivalence of NFCS
(individual steps may be iterated)

**Exporting country**

Initiate Initial discussions (Step 1)

Scope identified and Formal request made (Step 1)

Develop and present case for equivalence in line with importing country objectives and Decision Criteria (Step 4)

Respond to importing country (Step 5 iterative dialogue)

Opportunity to respond to importing country prior to final decision (step 5 / 6)

**Importing country**

Initial discussion (Step 1)

Description of importing country NFCS and objectives relevant to scope (Step 2)

Document decision criteria for comparison (Step 3)

Assessment of equivalence (Step 5)

Seek clarification or further information if required (Step 5 iterative dialogue)

Decision on equivalence (Step 6)

Importing country supplies reason for no equivalence (Step 6)

Yes

No

Formalisation and document equivalence arrangement (Step 7)

Ongoing Maintenance (Step 7)
