COMMENTS ON THE PROPOSED DRAFT GUIDELINES ON THE ESTIMATION OF UNCERTAINTY OF RESULTS AT STEP 6

AUSTRALIA

Australia supports the need for the development of guidelines for the estimation of uncertainty of results. This document is of considerable relevance to the work of CCPR, however it is of universal importance to all Codex committees responsible for methods of analysis and as such guidance should be consistent across all Codex committees. Australia therefore suggests that before any further consideration of this document by CCPR, the document be referred to CCMAS in its entirety, for consideration and development as a guideline document for all Codex committees that consider methods of analysis within their scope.
