These guidelines serve as recommendations for the Codex member countries in Africa.
The operations of Codex Contact Points and National Codex Committees will differ from country
to country depending on national legislation, government structures and practice.
1. INTRODUCTION

The Codex Alimentarius Commission is a joint Food and Agriculture Organization (FAO) and World Health Organisation (WHO) Food Standards Programme responsible for formulating the standards, codes of practice, guidelines and recommendations that constitute the Codex Alimentarius. Its members consist of government members of the United Nations organization who subscribe to become its members.

Over the years, the Codex Alimentarius has become an important global reference point for consumers, food producers and processors, national food control agencies and all those involved in the international food trade. The code has had an enormous impact on the thinking of food producers and processors as well as on the awareness of the end users - the consumers. Its influence extends to every continent, and its contribution to the protection of public health and fair practices in the food trade is immeasurable.

The role of the Codex Alimentarius Commission has expanded with developments in food trade and the need for enhanced protection of public health. Codex standards and other related texts are now regarded as the international reference points by the World Trade Organisation (WTO) and are also being adopted by many countries as minimum food standards. Several countries are now realising the need to participate actively in the activities of the Codex Alimentarius Commission to protect effectively the rights and interests of their consumers and their traders.

The activities of the Codex Alimentarius Commission are immense since they need a critical balance of the interests of all stakeholders involved, namely the consumers, policy makers and those involved in the food trade industry. Codex activities at the national level are equally intricate as the varying interests of all stakeholders need to be taken on board even when the country's response to the Codex proposals has not been formulated yet.

Creating standards that at the same time protect consumers, ensure fair practices in food trade and facilitate trade, is a process that involves several stakeholders including consumers, food producers and traders among others.

Codex Contact Points and National Codex Committees are amongst the essential organs of the Codex Alimentarius Commission that enhance the active involvement of various stakeholders at the national level. This leads to an effective participation of the Codex member countries in the activities of the Commission, results of which are a reliable food code.

This document outlines basic guidelines for the establishment, structure, functions and organisation of an effective Codex Contact Point and National Codex Committee. Should there be an existing Codex Contact Point and a National Codex Committee, then these guidelines could serve to further improve their efficiency.

2. CODEX CONTACT POINTS

2.1 DESCRIPTION

In order to facilitate an efficient and effective communication and a good working relationship between the Codex Alimentarius Commission and the government, the Commission recommends the establishment of a Codex Contact Point in every Codex member country.

The Codex Contact Point shall serve as the official link between the Codex Alimentarius and the respective member country. In essence, the Codex Contact Point shall serve as the official national communication agent (for and on behalf of the member country) to the Commission. This implies that all communications from the member country to the Commission and vice versa shall go through the Codex Contact Point.
However, this does not mean that the national Codex Contact Point shall usurp the governments’ role in the Codex Alimentarius Commission. Since the activities of the Codex Alimentarius Commission affect and should include all relevant stakeholders such as consumers, food industry etc., the main objective of the Codex Contact Point shall be to facilitate the member country's active and effective participation in the activities of the Codex Alimentarius Commission.

Just like the Codex Secretariat in Rome operates to facilitate the activities of the Codex Alimentarius Commission, so shall the Codex Contact Point operate like the national codex secretariat. The Codex Contact Point shall be headed by a competent and knowledgeable person in matters relating to the Codex Alimentarius Commission’s objectives and functions. Additional staff can be hired as per the needs and capacities of each country. The person who leads the Codex Contact Point shall also serve as the secretary to the National Codex Committee.¹

2.2 FUNCTIONS

In order to meet its main objective, i.e. facilitate the country's active and effective participation in the activities of the Codex Alimentarius Commission, the functions of the national Codex Contact Point shall mainly²:

a) receive all Codex texts: communications, documents and publications from the Commission;

b) study the documents and initiate relevant action either directly or through the National Codex Committee and/or the relevant sub-committee(s) or institution;

c) maintain a library of all Codex standards, Codes of Practice, Guidelines and any other documents and publications on or related to Codex;

d) distribute Codex documents, publications and other information to all stakeholders;

e) serve as the country's link between the Codex Secretariat and other Codex member countries;

f) create a website (or a webpage within an existing website) in order to promote Codex activities;

g) perform any other task that shall be recommended by the NCC and/or the government.

2.3 LOCATION

After having read carefully and understood the role and functions of the national Codex Contact Point, the decision on where to locate the Codex Contact Point basically rests with the respective member country.

This decision could be made either by the government and/or by consulting the relevant stakeholders at the national level.

However it is common practice that the government takes up the responsibility for hosting the national Codex Contact Points since:

- Codex is an intergovernmental body and it is the governments who take decisions at the Codex Alimentarius Commission, with the expectation that they would interpret and implement them accordingly at the national level; therefore, it is more convenient that the government coordinates Codex activities;

¹ See page 7
² Other possible functions of the Codex Contact Point as outlined in the Codex Alimentarius Commission Procedural Manual eleventh edition are in the annex.
considering the functions\(^3\) and the requirements\(^4\), the government itself in most cases is better placed to effectively host the Codex Contact Point;

There is a need for neutrality in terms of achieving the basic Codex objective in protecting the health of consumers and ensuring loyal practices in the food trade. The government is considered to be the one to provide this neutrality.

If it is agreeable that the government hosts the Codex Contact Point, then a relevant or suitable ministry such as the Ministry of Health or Agriculture or a suitable government department or institution such as the National Bureau of Standards or the Government Chemist could serve as a good host.

Whatever is the location of the national Codex Contact Point, it is desirable that the location meets the following criteria;

- should be as neutral as possible concerning the participation of all interested parties in the Codex activities;
- should be able to perform the functions of the Codex Contact Point;
- should be accessible to all interested parties and/or those involved in the activities of Codex.

### 2.4 Requirements\(^5\)

Noting the functions of the Codex Contact Point, it is imperative that the selected/established Codex Contact Point be fully equipped and facilitated to effectively perform these functions.

The basic requirements for a Codex Contact Point could be;

- committed staff;
- adequate office space;
- communication facilities e.g. telephone, fax, email, postal address etc;
- stationery;
- printing and photocopying equipment, e.g. computers, printers, photocopiers etc.

---

\(^3\) See page 5 on functions.

\(^4\) See page 4 on requirements.

\(^5\) These requirements are not mandatory and/or exclusive and will differ from country to country depending on the available resources and needs.
3. NATIONAL CODEX COMMITTEE

Recognizing the fact that there are many stakeholders within any Codex member country whose interests and concerns need to be taken on board while taking decisions at the Codex Alimentarius Commission meetings, it is essential that a National Codex Committee (NCC) be established. The Codex Alimentarius Commission in some of its publications encourages Codex member states to establish National Codex Committees due to their vital functions. The National Codex Committee provides a forum for discussions and for the formulation of the national position(s) and responses to Codex proposals or policy.

The National Codex Committee also enables stakeholders with no international affiliation or exposure to represent their interests, or those groups unable to attend the international meetings to have an opportunity to discuss the meetings' agenda items with their national delegation.

Therefore the primary objective of the National Codex Committee is to act as a consultative group to the government on matters related to Codex.

Representatives from all relevant national bodies, including consumers organisations, business associations etc., should be invited to attend the National Codex Committee in order to expose their views for consideration and inclusion in the national negotiating position.

3.1 FUNCTIONS

The functions of the National Codex Committee will vary from country to country owing to a number of reasons. However the primary functions could be:

a) formulate the country’s response to the proposals of the Codex Alimentarius Commission;

b) nominate delegates to represent the country at various Codex meetings;

c) advise the government on the best possible decisions regarding Codex standards and their implementation;

d) appoint technical sub-committees whenever necessary for the country's effective participation in Codex;

e) undertake other duties according to the government’s advice.

3.2 COMPOSITION AND STRUCTURE

Ideally, all government departments and organizations concerned with food safety, food production and trade in food should be included in the National Codex Committee. Furthermore, owing to the functions of the NCC, some scientific organisations such as public universities, research institutions and any other notable experts in the relevant field with keen interest in Codex matters, could be co-opted to the NCC.

An example of a National Codex Committee could include representatives from the following institutions:

1. Relevant Ministries/Government institutions such as:
   - Ministry of Health;
   - Ministry of Agriculture, Fisheries & Livestock;
   - Ministry of Trade and Industry;

   These functions are not obligatory and/or exclusive.
• Ministry of Consumer Protection;
• National Bureau of Standards;
• Government Chemist.

2. Consumers’ Organisations;

3. Food Industry - Manufacturers [representatives from various sectors]

4. Traders in Food items e.g. importers and exporters;

5. Universities

6. Leading Research Institutions

7. Notable experts.

However the NCC should not be too large in order not to make it unmanageable. The NCC shall elect a chairperson among its members. The chairperson can represent any organization or ministry. The position of the chairperson may be rotational, on a two-year term for instance. The responsibilities of the chairperson shall be defined by the NCC and may include conducting meetings of the NCC among others;

The person who serves as the head of the Codex Contact Point shall also serve as the Secretary of the National Codex Committee. As a secretary to the NCC, his/her responsibilities shall be defined by the NCC and may include:

• taking minutes at the NCC meetings;
• keeping all records relating to the activities of the NCC;
• drafting the agenda items and sending invitations to meetings in conjunction with the chairperson;
• undertaking other duties according to the instructions of the NCC and/or the government.

The NCC shall agree itself on the basic operational procedures including the quorum, the schedule and the procedure of the meetings. However it is recommended that the quorum for any meeting should include a representative from all the key stakeholders such as the industry and the consumers. The documents should also be circulated as widely as possible and with ample time in advance in order to enable those who are not able to attend any particular NCC meeting, to submit their contributions which should be considered at the NCC meeting.

All sub-committees appointed by the NCC shall report to the NCC. Decisions at the NCC shall be reached by consensus and implemented by and as agreed at respective NCC meeting. Communication between the government and the NCC is conducted through the Codex Contact Point.

3.3 NOMINATION TO THE NATIONAL CODEX COMMITTEE

As there are several interested parties who would want to be involved in and represent their constituents at the NCC, the procedure for nomination/inclusion into the NCC must be known, open and transparent. Whereas different countries could use different methods to select those to sit at the NCC, depending on the resources and structures available, it is recommended that the Codex Contact Point identifies and lists all key stakeholders and invites them to the inaugural meeting of the NCC. The participants at this meeting would then identify and invite other members to the NCC through the secretary.
Ideally the intention to form the NCC could be advertised in the media and organisations requested to recommend nominees. The sitting NCC could form a small subcommittee to sort out the list of applicants and make a selection based on a NCC predetermined criteria for representation at on the NCC. Possible criteria for selection could include:

- track record on food issues relevant to Codex Alimentarius;
- reasonable prospects of continuous existence;
- expertise;
- availability to attend meetings and comment on Codex documents.

Participation at the NCC meetings should be reviewed annually and new members appointed to replace dormant members.

4. FUNDING

For the Codex Contact Point and the National Codex Committee to operate efficiently and effectively, a sustainable source of funding must be identified for their activities. A secure source of funding for Codex work at the national level would enable prompt response/reactions on Codex proposals, timely and adequate preparation for Codex meetings, representation and effective participation at Codex meetings among other things.

The source of funding for running and/or for activities of the Codex Contact Point and the National Codex Committee must however be known to all members of the NCC. Any contributions must not be submitted to any conditions so as to enable the two bodies operate effectively without fear or favour.

Besides the support from the government, the NCC could seek additional financial support for the activities of Codex through the Chairperson and/or the Codex Contact Point (Secretary) from well-wishers and stakeholders in the Codex work. Possible sources of support for the Codex activities include:

- Central Government
- Foundations & Trust Funds
- Industry Levy
- UN Organisations e.g. WHO, FAO, UNDP
- International Organisations

ANNEX

5. CORE FUNCTIONS OF CODEX CONTACT POINTS

The operation of Codex Contact Points will differ in each country depending on national legislation, government structures and practices.

1. Act as the link between the Codex Secretariat and Member countries;

2. Coordinate all relevant Codex activities within their own countries;

3. Receive all Codex final texts (standards, codes of practice, guidelines and other advisory texts) and working documents of Codex sessions and ensure that they are circulated to those concerned within their own countries;

4. Send comments on Codex documents or proposals to the Codex Alimentarius Commission or its subsidiary bodies and/or the Codex Secretariat;

5. Work in close cooperation with the National Codex Committee, where such has been established. The Codex Contact Point acts as the liaison point with the food industry, consumers, traders and all other concerned to ensure that the government is provided with the appropriate balance of policy and technical advice upon which to base decisions relating to issues raised in the context of the Codex work;

6. Act as a channel for the exchange of information and the coordination of activities within their own countries and with other Codex members;

7. Receive the invitations to Codex sessions and inform the relevant chairpersons and the Codex Secretariat of the names of participants from their own countries;

8. Maintain a library of Codex final texts; and

9. Promote Codex activities throughout their own countries.
