JOINT FAO/WHO FOOD STANDARDS PROGRAMME

CODEX COMMITTEE ON FOOD ADDITIVES

Fifty-third Session

REVISED NOTE TO DISCUSSION PAPER ON THE FOOD ADDITIVE PROVISION FOR THE USE OF TRISODIUM CITRATE IN FC 01.1.1 "FLUID MILK (PLAIN)"

(Prepared by Brazil)

PROPOSAL OF REVISED NOTE

1. Brazil, as the author of the Discussion Paper, has prepared the following revised note to be applied to the recommendation proposed for adoption of trisodium citrate (INS 331 (iii)) in the document [CX/FA 23/53/16](#).

Revised note:

YY: Except for use in milk from bovine species at 1000 mg/kg expressed as citric acid, to compensate for low raw milk intrinsic citrate content.

2. This revised note is in the same format as other "except" notes in the GSFA and is presented in this addendum to facilitate the discussions and advance the topic of the use of trisodium citrate (INS 331(iii)) in FC "01.1.1 Fluid milk (plain)" in CCFA53.

3. The limitation to use it as a stabilizer is covered by note 438; and it is not necessary to cite "trisodium citrate (INS 331 (iii))" as this note will only be attached to the trisodium citrate provision.

RECOMMENDATIONS FOR CCFA53

4. Codex Members and Observers are invited to consider:

(i) the revised note to be applied to the recommendation of the document [CX/FA 23/53/16](#).

(ii) to support the advancement to Step 8 of the use of trisodium citrate (INS 331(iii)) in FC 01.1.1 "Fluid milk (plain)" described in the document [CX/FA 23/53/16](#) for final adoption.
