### Notes

- X means they are in the FA/INF02 November 2018 but have no food additive provisions, so limited alignment needed; no changes to GSFA but changes needed to individual CXS
- 1 Active committee
- 2 Adjourned *sine die*
- 3 Abolished or dissolved
- 4 Working by correspondence
- a Number listed are the total number of CXS that require alignment while the numbers in brackets are the numbers of CXS designated with an X (requiring no changes to GSFA, just changes to the CXS itself)
- b CXS 181-1991 (*Standard for formula foods for use in weight control diets*) and CXS 203-1995 (*Standard for formula foods for use in very low energy diets for weight reduction*) require advice from CCNFSDU on exactly what food additive provisions are required since none are listed, see extract below

#### 4. FOOD ADDITIVES

Food additives cleared by the Joint FAO/WHO Expert Committee on Food Additives shall be permitted at levels not exceeding the equivalent of their Acceptable Daily Intake.
