

# CODEX ALIMENTARIUS COMMISSION

Food and Agriculture  
Organization of the  
United Nations

World Health  
Organization

Viale delle Terme di Caracalla, 00153 Rome, Italy - Tel: (+39) 06 57051 - E-mail: [codex@fao.org](mailto:codex@fao.org) - [www.codexalimentarius.org](http://www.codexalimentarius.org)

CL 2018/15-PR  
February 2018

**TO** Codex Contact Points  
Contact Points of international organizations having observer status with Codex

**FROM** Secretariat,  
Codex Alimentarius Commission,  
Joint FAO/WHO Food Standards Programme

**SUBJECT** **Revision of the Classification**  
**Class A: Primary commodities of plant origin**  
**Type 04 – Nuts, seeds and saps**

- **Table 4 on examples of representative commodities for commodity groups under Type 04**

**Type 05: Herbs and Spices**

- **Table 5 on examples of representative commodities for commodity groups under Type 05**

**Request for comments at Step 3**

**DEADLINE** 31 March 2018

**COMMENTS** **To:** CCPR Secretariat  
Institute for Control of the Agrochemicals  
Ministry of Agriculture (ICAMA)  
E-mail: [ccpr@agri.gov.cn](mailto:ccpr@agri.gov.cn)

**Copy to:** Secretariat  
Codex Alimentarius Commission  
Joint FAO/WHO Food Standards Programme  
E-mail: [codex@fao.org](mailto:codex@fao.org)

## BACKGROUND

1. See CX/PR 18/50/10.
2. Codex members and observers are reminded that the approach taken by CCPR in the revision of the Classification requires that all commodity groups pertaining to one type and the corresponding examples of representative commodities for commodity groups of the said type be finalized together in order to send a single document for final adoption by CAC and inclusion in the Classification of Food and Feed (CXM 4-1989) and the Guidance on the Selection of Representative Commodities for the Extrapolation of Maximum Residue Limits for Pesticides to Commodity Groups (CXG 84-2012). There is therefore a need of close synchronization between comments submitted in reply to CL 2018/12-PR, CL 2018/13-PR and CL 2018/20-PR.

## REQUEST FOR COMMENTS

3. Codex members and observers are invited to submit comments, through their Contact Points, on tables 4 and 5 for examples of the selection of representative commodities for commodity groups under types 04 and 05 as presented in Appendices I and II of CX/PR 18/50/10 to facilitate their consideration by CCPR.
4. Comments should also:
  - include recommendations regarding the establishment of Group 023D Other Oilseeds, or if these commodities would be more appropriate for location in a miscellaneous group (Agenda Item 7(f), CX/PR 18/50/11)
  - consider the inclusion of additional representative commodities.
  - consider a number of additional herb and spice commodities (shown as shaded commodities), their location in Table 5 and the proposed representative commodities.
  - take into account the guiding principles and the criteria for crop grouping of the Classification as indicated in the Annex.
5. Comments should be submitted in writing in conformity with the Uniform Procedure for the Elaboration of Codex Standards and Related Texts (see Procedural Manual of the Codex Alimentarius Commission) preferably in word file to facilitate compilation and translation of comments.

## **ANNEX**

The Classification of Food and Feed (CXM 4-1993) includes food commodities and animal feedstuffs for which Codex maximum residue limits will not necessarily be established. The Classification is intended:

- to be a listing of food commodities in trade as complete as possible, classified into groups on the basis of the commodity's similar potential for pesticide residues;
- primarily to ensure the use of uniform nomenclature and secondarily to classify foods into groups and/or sub-groups for the purpose of establishing group maximum residue limits for commodities with similar characteristics and residue potential; and
- to promote harmonization of the terms used to describe commodities which are subject to maximum residue limits and of the approach to grouping commodities with similar potential for residue for which a common group maximum residue limit can be set.

### **Characteristics for crop grouping are:**

1. Commodity's similar potential for pesticide residues;
2. Similar morphology;
3. Similar production practices, growth habits, etc;
4. Edible portion;
5. Similar GAP for pesticide uses;
6. Similar residue behavior;
7. To provide flexibility for setting (sub) group tolerances.

The Criteria for the selection of representative commodities include:

1. A representative commodity is most likely to contain the highest residues;
2. A representative commodity is likely to be major in terms of production and/or consumption;
3. A representative commodity is most likely similar in morphology, growth habit, pest problems and edible portion to the related commodities within a group or subgroup.
