

WFO would like to thank the Chair of the CFS OEWG on SDGs and the CFS Secretariat for the excellent work dispensed so far in preparing this document.

WFO supports the document and would like to make just the following comments:

-as an organization that represents farmers, WFO suggests to replace the expressions such as “small-holder farmers” with “small-scale food producers” or only “farmers” in the whole document;

- regarding the last paragraph on youth, WFO would like to suggest to entitle it as “young rural people” instead of just “young people” since it then makes reference to the majority of young people living in countries with high rates of poverty and hunger as people living in rural areas. Rural areas and agriculture should be seen as more attractive to avoid their abandonment, and creating opportunities as well as enhancing access to resources for young rural people is fundamental.
