

CFS Evaluation – UNSCN inputs on Recommendation 4

i. Joint proposal by Iceland and Egypt on Recommendation 4

UNSCN input:

We agree with the proposal made by Iceland and Egypt but we would like to stress the importance of giving the possibility also to the AG to suggest to add relevant items to its own Agenda (“...*Agenda set by the bureau with substantive questions on FSN matters*”).

As for the number of meetings of the AG, we would like to suggest to allow the AG the possibility to ask the Bureau for an additional meeting. This would be beyond the three fixed ones and only in urgent cases.
