

Inputs from UNSCN on the draft response to evaluation recommendations 10, 13 and 14

Dear CFS Secretariat,

Following your request for written inputs for the discussion on the draft response to evaluation recommendations 10, 13, 14 on 24 January 2018, please find below the UNSCN contribution.

We think that the discussion on the draft response to evaluation Recommendation number 10 could be done in relation to and taking due consideration of the *Results Chain for CFS* and new *MYPoW Structure* presented in the background document for the evaluation meeting of 24 January.

Indeed, as stated in bullet 5 of the document *Proposed response to Recommendations 7, 10, 11, 12, 13, 14*, “*The implementation of Recommendations 1 and 2, which are expected to clarify how CFS intends to achieve its vision, might influence what to monitor, how and by whom.*”

The proposed *Results chain* and especially the *new MYPoW structure*, refer to a series of Outputs and Indicators (see Results section of MYPoW) that could be better clarified. What indicators would be used to measure what, who will be in charge of this exercise and how the exercise will be performed? Will this be part of the discussions on the 24th (and possibly 26th) as well?

Therefore, we suggest CFS stakeholders could discuss these interrelated aspects of CFS work together, in order to better link the strategic planning exercise with the fundamental monitoring function of the CFS platform.

Thank you for considering this.

Kind regards

Stineke Oenema
UNSCN Coordinator
