

**Preliminary Version of the Zero draft of the
Voluntary Guidelines on Food Systems and Nutrition**

- 1) It would be great to include a resources section, directing users to related technical publications and materials? This would help leverage existing guidance, which seems consistent with the nature and intended use of the guidelines. If this is foreseen, we would propose including the [Compendium of Actions for Nutrition](#) (CAN), which unpacks the multi-sectoral landscape of nutrition actions.
- 2) While the draft mentions the Nutrition Decade and 2030 Agenda for Sustainable development, it does not mention the Scaling Up Nutrition (SUN) Movement. We recommend adding a reference to the SUN Movement, understanding that 60 countries and four Indian states are engaged in the movement as well as a wide range of stakeholders. If possible, we suggest revising paragraph 48 of Section 4. One option could be to say (new text provided in green):

“CFS should provide a forum where all relevant stakeholders can learn from the experiences of others in applying the Voluntary Guidelines and assess their continued relevance, effectiveness and impact on food security and nutrition. The intention is to support countries in making SMART commitments²⁰ and achieving nutrition objectives in the context of the UN Decade of Action on Nutrition 2016-2025, the 2030 Agenda for Sustainable Development and the Scaling Up Nutrition (SUN) Movement, where the latter is applicable.
- 3) We recommend highlighting the role of partnerships – central to the 2030 Agenda – given the multitude of stakeholders involved in food systems and nutrition as well as the multi-dimensional nature of nutrition.
