Background

In March 2015, the Government of the Kyrgyz Republic adopted and implemented the Export Development Plan (EDP) for 2015-2017. The primary goal of the EDP is to develop the competitive export potential for sustainable economic growth. This is expected to be accomplished by creating necessary conditions for achieving a more attractive foreign trade regime and improving the competitiveness of goods and the liability of producers for their products. Some development partners such as FAO, the EU Commission, EBRD and IFC are supporting the government’s efforts and initiatives in this area. Despite the achieved progress, there are still, however, some problems that constrain export development, including in the areas of the agrifood competitiveness, export support measures and food quality and SPS systems.

Following the request from the Ministry of Agriculture, Food Industry and, Melioration, and the Ministry of Economy of the Kyrgyz Republic FAO organised a workshop on export promotion, which took place on 18-19th of October 2016. This workshop was part of the Regional Initiative on Improving Agrifood Trade and Market Integration and included international experts. During the workshop, the representative of the Ministry of Economy expressed the interest of the Government of the Kyrgyz Republic to receive further support for export development from FAO. Therefore, as part of the project “Export diversification of agrifood products in the Kyrgyz Republic” (TCP/KYR/3605/C3), in 2017 FAO developed detailed guidelines for agrifood export of priority products from the Kyrgyz Republic to EU and an analytical overview about specifics of access to the Chinese agrifood market.

The aim of the workshop is to raise awareness of both the government and exporters of the Kyrgyz Republic about ways to diversify agrifood exports and about entering the EU’s and China’s agricultural markets.

Expected outcomes

In the course of the workshop, the further actions will be identified for the successful implementation of policies and programs to promote the export of agricultural products in the Kyrgyz Republic. The workshop will also facilitate the exchange of information between national and international experts, government agencies and the private sector with an aim of cooperation and jointly solving issues in the field of development of the agrifood exports and supporting the export-oriented producers in the Kyrgyz Republic.
The guidelines for agrifood exports of priority goods prepared under the TCP project will serve as the base for this workshop, where the following issues will be discussed:

- Requirements for export of agricultural products (dried fruits, honey, walnuts, kidney beans) from the Kyrgyz Republic to the European Union and EU agrifood market structure;
- Specifics of access to the Chinese market for agrifood products from the Kyrgyz Republic, in particular, animal products;
- Experience of exporters to supply the goods to the EU and Chinese markets;
- Activities that would allow development of the agrifood exports in the Kyrgyz Republic.

Participants

Representatives of the Ministry of Economy and the Ministry of Agriculture, Food Industry and Melioration of the Kyrgyz Republic, other government authorities involved in promoting exports, exporters, representatives of agricultural associations, the Chamber of Commerce and Industry of the Kyrgyz Republic.
