Table of Contents

Foreword	vii
Chapter 1	Introduction and Overview 1
	1.1 Change and Resilience: The Significance of GIAHS 1
	1.2 The GIAHS Programme 3
	1.3 Three Founding Principles. 4
Chapter 2	Key GIAHS Concepts 7
	2.1 Social-ecological Systems 7
	2.2 Social-ecological Systems and Culture 12
	2.3 Rural Subsistence Societies 16
	2.4 Resilience and Adaptive Co-management Principles 20
Chapter 3	Culture, Biodiversity, and Resilience in Subsistence Social-ecological Systems 23
	3.1 Introduction 23
	3.2 Biodiversity and Ecosystem Resilience 24
	3.3 Conceptualising Agrobiodiversity and Agroecological Systems . . 25
	3.4 Agrobiodiversity, Livelihoods and Resilience 29
	3.5 How Cultural Institutions and Agrobiodiversity are Interrelated . . 31
	3.5.1 Cultural Identity and Agrobiodiversity 32
	3.5.2 Traditional Belief Systems and Ecological Knowledge in Agrobiodiversity Management 33
	3.5.3 Traditional Knowledge: Its Transmission, Distribution, and Erosion 36
	3.5.4 Language, Aesthetics and Agrobiodiversity 40
	3.5.5 Social Status, Social-ecological Systems, and Agrobiodiversity 41

	3.5.6 Property Rights and Management of Agrobiodiversity . . .	44
	3.6 Agrobiodiversity, Adaptation and Resilience Considering Change . 50	
Chapter 4	The Economic Value of Agrobiodiversity, Markets, non-Market Mechanisms, and and Social-ecological System Resilience.	53
	4.1 Introduction	53
	4.2 Economic Valuation Approaches and Their Applicability	54
	4.3 Markets and Agrobiodiversity.	56
	4.4 Markets, Cultural Institutions and Equity.	59
	4.5 Alternatives or Complements to Market-based Means to Increase Well-being and Enhance Subsistence SES Resilience	63
Chapter 5	Drivers of Change in Subsistence Social-ecological Systems.	69
	5.1 Defining and Understanding Drivers	69
	5.2 Climate Change as a Driver and as a Driver of Drivers	71
	5.2.1 Expected Impacts	73
	5.2.2 Expected Consequences	75
	5.2.3 Local Responses.	75
	5.2.4 Local Interpretations	76
	5.3 Biodiversity Change	77
	5.3.1 Types, Magnitudes, and Drivers of Biodiversity Change . .	78
	5.3.2 Threats: Ecological Insights from Invasive Alien Species . .	82
	5.3.3 Human Adaptation: Insights from Invasive Alien Species .	84
	5.3.4 Conclusions for GIAHS and <i>In Situ</i> Conservation	89
	5.4 Changes in Oil Supplies and Prices and the Food Question	89
	5.4.1 Vulnerability of the Modern Oil Economy	90
	5.4.2 Macroeconomic Effects	91
	5.4.3 Household and Poverty Effects	93
	5.4.4 Implications of Peak Oil for GIAHS.	93
	5.5 Cultural Change	94
	5.6 Some Indirect Drivers of Social-ecological System Resilience. . .	97
	5.7 Synergies and Adaptive Capacity.	98
Chapter 6	Defining and Understanding Globally Important Heritage for GIAHS	101
	6.1 Introduction	101
	6.2 Dominant Western Perceptions of ‘Heritage’	102
	6.3 Conflicts Over Heritage	104
	6.4 Lessons from Joint Management of Heritage Programmes	105
	6.5 Heritage as Experience	105
Chapter 7	GIAHS Principles Derived from the Conceptual Framework.	107
	8.1 The Definition and Use of Principles	108
	8.2 GIAHS Strategic Principles	108
References.		111
Appendix	Culture, Food, and Agro-biodiversity in Social-ecological Systems . . .	A.1
	1. Agrobiodiversity, Nutrition, and Food Security in Social-ecological Systems.	A.2
	2. Wild and Indigenous Cultivated Food	A.2
	3. Traditional Food Processing, Preservation and Storage	A.4
	4. Culinary Traditions, Post-harvest Technologies, and Crop Diversity .	A.5

5. Food Exchange and Social Organisation	A.7
6. Food Culture and Agrobiodiversity Loss	A.8
References.	A.8
Box A.1 The Importance of Wild Food Species in Traditional Diets . .	A.3
Box A.2 Wild Plant Detoxification in Nepal	A.5
Box A.3 Food Taboos and Ese Eja Crop Diversity	A.7

Tables

3.1 The composition and levels of agrobiodiversity.	28
3.2 Some of the recognised ethnosciences with societies, journals, books, and other tesources on the World Wide Web	32
3.3 Pathways by which TEK may have been accrued using examples from North American indigenous people.	38
3.4 Design principles from studies of long-enduring institutions for governing sustainable resources.	45
4.1 Potential benefits of commercial consumptive use for biodiversity . .	59
4.2 Potential impacts of environmental service markets for the poor in Latin and Meso-American cases	62
5.1 Estimated costs of invasive alien species, selected cases	85
5.2 Impacts on rural communities of invasive species.	87
5.3 Data on energy, oil and GDP for GIAHS pilot and other selected countries.	92

Figures

2.1 Schematic illustration of different scales and levels that are critical in understanding and responding to human-environment relations.	10
2.2 Social-ecological system	15
2.3 The complete systems-hierarchical model of human adaptive systems, with ten principle variables and fifty-one sub-variables . .	16
3.1 Biodiversity, ecosystem functioning, and ecosystem services	25
3.2 A process-oriented sustainable livelihoods approach.	29
3.3 Cuna crop classification as a system of rights to plants	48
5.1 Main direct drivers of change in biodiversity and ecosystems	79
5.2 An interaction chain effect: mussel invasion in the Mediterranean .	84
5.3 A conceptual framework to interpret impacts of IAS in rural livelihoods	87
5.4 Relation between oil demand and GDP growth.	90
5.5 Hubbert Peak Oil Projection	91
6.1 UNESCO World Heritage Cultural Landscape Sites by Region . .	103

Boxes

1.1 Systemic selection criteria for GIAHS	5
2.1 A description of a pervasive social-ecological system in coastal regions of South China	17
3.1 'Natural' Amazonian ecosystems or co-evolved agroecosystems?. . .	27
3.2 Agrobiodiversity: surpassed suppositions	28
3.3 The cultural significance of bark cloth among the Baganda clan in Uganda	33
3.4 Twenty tenets of rice cultures.	35

3.5 North-western North American aboriginal women's base of knowledge and practical skills	37
3.6 The language and aesthetics of cultivar diversity in the Peruvian Andes.	41
3.7 Social-ecological dynamics and the generation of poor and destitute female headed households in the Highlands of Ethiopia.	43
3.8 Customary Rights to Plants	50
4.1 The Natural Capital Project	56
4.2 Effects of marketing Non-timber Forest Products on rural subsistence households: A review of 61 cases	60
4.3 Building on local resources for drought recovery in Kenya.	65
4.4 Enhancing ecosystem services and welfare	66
4.5 Adapting to climate change with the NGO Practical Action	67
5.1 A hypothetical example of the complexity of, and perspectives on, change drivers	71
5.2 IPCC projected climate change impacts on systems and sectors of particular relevance to subsistence social-ecological systems	72
5.3 The IUCN Red List and species extinctions.	78
5.4 Climate change impacts in the Amazon - Review of the scientific literature.	80
5.5 Ecological and social effects of invasions by <i>Lantana camara</i>	83
5.6 Invasive species in Timor: Livelihoods, adaptations and conflicts of interest.	86
5.7 Impacts of oil price increases on households in Pakistan	93
