

# FAO Hunger Map 2013

Progress in reducing hunger is assessed against two key targets: the 1996 World Food Summit (WFS) target aims at halving the **number** of undernourished by 2015, while the first Millennium Development Goal (MDG) aims at halving the **proportion** of hungry people by 2015.

- ✓ In 2011–13 a total of 827 million people were hungry in developing regions. This number has fallen by 169 million, or 17 percent, since 1990–92.
- ✓ More than 60 countries have reached or are expected to reach the MDG hunger target. Significant reductions have occurred in most countries of Eastern and South-Eastern Asia, and in Latin America.
- ✓ The World Food Summit target is out of reach, at least at the global level. Yet approximately 20 countries have met the target or are estimated to do so by 2015.
- ✓ In 16 countries, undernourishment estimates for 2011–13 either point to a lack of progress or a deterioration of food security conditions since 1990–92. Nine of these countries are in sub-Saharan Africa, the region with the highest prevalence of undernourishment and where only modest progress has been made in recent years.

PROPORTION OF  
Total Population  
Undernourished  
IN 2011-13

Legend	
< 5%	Very low
5 — 14.9%	Moderately low
15 — 24.9%	Moderately high
25 — 34.9%	High
35% and over	Very high
Missing or insufficient data	

**Data Sources**  
Undernourishment data: FAO Statistics Division (ESS)  
Political boundaries: FAO Global Administrative Unit Layers (GAIL)  
Global relief: ETOP01 (National Geophysical Data Center — NOAA)  
Inland water bodies: FAO Land and Water Division (NRL)

**Notes**  
The map shows the prevalence of undernourishment in the total population of developing countries as of 2011-13. The indicator is an estimate of the percentage of the population at risk of caloric inadequacy.  
South Sudan declared its independence on 9 July 2011. Data for Sudan (post-2011) and South Sudan are not yet available.
