NEW ON WEB OF SCIENCE

FAO staff can access WoS, the world's largest abstract and citation platform of leading peer-reviewed international and regional scientific literature. For any questions <http://www.fao.org/library/resources/web-of-science-package/en/>.

FAO employees in the field will have to access the WoS the first time through the FAO Secure Access Gateway and create a WoS account. Once you have a WoS account, you are able to enter the platform from any non-FAO computer (for 6 months) by logging in with your credentials.

NEW TRIALS

OXFORD INTERNATIONAL ORGANIZATIONS

TRIAL: FEBRUARY 1 – July 31

"Oxford International Organizations (OXIO) is the first database for analyzing and understanding key documents of international organizations. Each document is accompanied by a concise expert commentary. In order to capture the full bearing of international organizations on various substantive areas of international law as well as on the field of international institutional law in particular, OXIO includes, but is not limited to, resolutions and decisions of organizations, draft normative texts prepared within the framework of organizations, and constituent instruments of organizations. It also contains court decisions relevant for the institutional law of organizations as well as, occasionally, a treaty to which an organization is a party, where this brings light to issues of institutional law. OXIO is a unique repository which brings together a variety of documents that have never been consolidated in one single tool – a tool that will be constantly updated with the latest documents and acts of international organizations".
