SUMMER SCHOOL

GROW

AGROBIODIVERSITY IN A CHANGING CLIMATE

14 - 24 September 2021
Online course

With the technical support of the
Food and Agriculture Organization of the United Nations
OBJECTIVES

The course will focus on the importance of biodiversity in agriculture, with particular attention to its role in enhancing resilience and adaptability of cropping and farming systems to climate change.

The lectures will illustrate principles and practices for gathering agro-biodiversity data through either participatory diagnostic and empirical approaches, and for their utilization to develop management approaches that improve resilience and adaptability.

The course will also analyse the economic value of agricultural biodiversity in food systems as an incentive to conservation. The most critical management aspects along the agricultural value chain will be investigated, ranging from production to marketing and consumption.

A set of tools and methodologies for improving market access of neglected and underutilized foods and the role of gastronomic heritage as a driver for rural development will be presented.

The aim of the course is to equip the participants with the necessary tools, knowledge and understanding to enhance productivity and improve marketing strategies in sustainable and resilient agricultural systems.

The training will include joint lectures by speakers from various national and international organizations and hands-on experience on relevant practices.
ONLINE COURSE

Virtual lessons on Microsoft Teams, 4 hours per day, breaks every 45mins

DATE & TIME

14 - 24 September 2020
From 14:00 to 18:00 (Rome time)

LANGUAGE

The official language is English

FEES & CREDITS

Admission fees 200 euro. The course is worth six university credits according to the European Credit Transfer System (ECTS)

SCIENTIFIC DIRECTORS

Fabio Attorre – Department of Environmental Biology, Sapienza University of Rome

Devra Jarvis – Platform for Agrobiodiversity Research (PAR)

COORDINATOR

Giorgio Grussu, FAO - Mountain Partnership Secretariat

COURSE MANAGER

Valeria Barchiesi, FAO - Mountain Partnership Secretariat

Francesca Buffi - Department of Environmental Biology, Sapienza University of Rome

AGENDA
Module 1: Management of Agrobiodiversity

Tuesday, 14 September

14:00  Welcome, introductions, presentation of participants

15:00  Crop genetic diversity, domestication and traditional varieties (Chapters 1,2,3) - T. Hodgkin/ D.I. Jarvis (PAR)/ P. De Santis (Alliance)

- Introduction to traditional varieties (pag 1 - 11)
- The origins of agriculture and crops (pag 13 - 28)
- Centres of crop diversity and centres of origin (pag 28 - 33)
- Nature, biodiversity and genetic resources (pag 35 - 40)

15:30  The origins and centres of diversity for perennial crops (the case of Apple) - M. Turdieva (Alliance)

16:00  Diversity and its evolution in crop populations (Chapter 4) - K. Naino Jika/ P. De Santis (Alliance)

- The nature of diversity (pag 64 -66)
- Crops, varieties, and populations (pag 67 -70)
- Population genetic structure (pag 71 - 77)
- Evolution in crop varieties and populations (pag 78 - 84)
- Reproductive biology (pag 84 - 89)
- Crop varieties in production systems (pag 91 - 92)

17:00  Measuring diversity in crops (Chapter 5) - P. Colangelo (CNR-IRET) /P. De Santis (Alliance)

- Exploring extent and distribution of diversity - Agronomic, Biochemical, Molecular (pag 92 - 107)

17:45  Introduction to practicum - P. De Santis (Alliance)

The lectures of the first module will be based on the textbook Crop Genetic Diversity in the Field and on the Farm - Principles and applications in Research Practices (see page numbers)
Module 1: Management of Agrobiodiversity

Wednesday, 15 September

14:00  Measuring diversity in crops (Chapter 5) - P. De Santis (Alliance)/ D.I. Jarvis (PAR)
   - Gathering data using participatory approaches (pag 108 - 118)
   - Designing and investigation (pag 119 - 123)
   - Calculating on farm diversity indices: Richness, Evenness, Divergence

15:00  Measuring Diversity Practicum - P. De Santis (Alliance)

16:00  Abiotic components of agricultural ecosystem (Chapter 6/7) - M. Reverberi (Sapienza)
   - Abiotic and biotic components of agroecosystems (pag 126 - 137)
   - Evolution of crop varieties in stress prone environments (pag 154-157)
   - Abiotic stress and crop genetic diversity (pag 157 - 163)
   - Biotic stress and crop genetic diversity (pag 163 - 169)

17:00  Spatial Analysis of Plant Diversity and Distribution in a Changing Climate - F. Attorre (Sapienza)
   - Reducing the dimensionality of complex data sets (pag 146 – 149)
   - Ecosystem diversity and function (pag 150 – 153)
   - Identifying where diversity is used to cope with environmental stress (pag172 – 180)
Thursday, 16 September

14:00  Diversity in, and adaptation to, adverse environments on-farm (Chapter 6/7) - N. Bergamini/ P. De Santis (Alliance)/ P. Colangelo (CNRIRET)

   Farmer characterization and classification of abiotic and biotic components (pag 137 -145)
   Farmer management of crop genetic diversity to cope with environmental stress (pag 169 – 172)
   Genetic diversity, damage, and genetic vulnerability (pag 181 – 190)

15:00  Who are the managers of diversity? Characterizing the social, cultural and economic environments (Chapter 8) - R. Nanyka (Alliance)

   Farmers' roles and the management of crop diversity (pag 191 - 199)
   Social relationships and the distribution of diversity (pag 199 - 200)
   Social capital, collective action and property rights (pag 202 -203)
   Tool and methods for documenting and relating farmer characteristics to crop genetic diversity (pag 203 - 211)

16:00  Measuring the values of on-farm diversity (Chapter 9) - D. Gauchan (PAR)

   Public and private values of diversity (pag 212 - 214)
   Varietal choice and diversity maintenance (pag 215 - 220)
   Econometric models and value chain actors (pag 220 - 226)
   Measuring non-market values of diversity (pag 226 - 231)

17:00  Policy and genetic diversity on-farm (Chapter 3,10) - I.L. Noreiga (Alliance)

   The development and evolution of national programs on plant genetic resources (pag 41 - 44)
   The origins of an international commitments to plant genetic resources conservation (pag 45 - 46)
   Policy debates on conservation- ABS (pag 46 - 57)
   The use of genetic resources for plant breeding (pag 56 - 62)
   Policies and legal frameworks that have a negative impact on farmers' capacities to use diversity on-farm (pag 232 - 242)
   Policy processes: Overview on concepts and methods (pag 242 - 249)
   Developing policies that support farmers' role as generators, managers, and conservers of crop diversity (pag 249 - 254)
Module 1: Management of Agrobiodiversity

Friday, 17 September

14:00 Genetic diversity and selection pressures at different social, spatial, and temporal scales (Chapter 11) - R. Nankya (Alliance Uganda)/ M. Turdieva (Alliance Uzbekistan)
- The crop cycle (pag 225 - 258)
- Use of harvested materials and diversity of traditional varieties (pag 259 - 263)
- Selection during crop production and seed management (pag 263 - 264)

15:00 Patterns of seed supply: The "Seed Systems" (pag 267 - 274) - D.I. Jarvis (PAR)/ P Colangelo (CNR-IRET)
- Social, spatial and temporal dimensions of traditional varieties (pag 275 - 282)

16:00 Assessment and testing of guidelines for economic development of community managed institutions - Eleonora De Falcis (Alliance)

16:20 Strategies for collaboration and intervention (Chapter 12) - P. De Santis (Alliance)
- Institutional and partner diversity (pag 283 - 285)
- Building trust and equitable collaboration (pag 286 - 290)
- Actions that incorporate genetic, ecological, social and economic concerns in support of on-farm management of crop genetic diversity (pag 291 - 303)
- Farmers benefit from the use and conservation of materials (pag 303 - 311)

17:00 Assessment with DATAR (Diversity Assessment Tool for Agrobiodiversity and Resilience) - A. Fonteneau (PAR)

17:30 Traditional varieties and agricultural productivity (Chapter 13) - D.I. Jarvis (PAR)/ P. De Santis (Alliance)
- Socioeconomic, policy, environmental, biological and genetic dimensions (pag 313 - 320)
- The future value of traditional varieties (pag 320 - 323)
- Approaches to maintenance of traditional varieties (pag 323 325)

Saturday and Sunday, 18-19 September

Days off
Module 2: Agrobiodiversity on the Ground

Monday, 20 September

14:00  The Climate-Smart Agriculture Approach (CSA) - F. Matteoli/J. Schnetzer (FAO CBC)/Nadine VanDijk (FAO CBC)
   - The CSA Approach
   - Challenges and opportunities for agriculture in the face of climate change
15:00  - CSA concept and 5 step-process to CSA implementation
   - Practices and production systems for CSA
   Tools and Methods for Evidence-based Decision Making in CSA: Brief introduction
16:00  Tools and Methods for Evidence-based Decision Making: Examples & Exercise - Isaac Guzman (FAO ESA)
   Introduction: Ex-Ante Carbon Assessment Tool (EX-ACT)
17:00  Hands-on exercises in breakout groups (based on participant's preference):
   EX-ACT

Module 2: Agrobiodiversity on the Ground

Tuesday, 21 September

14:00  Fundamental principles and definitions: Organic agriculture - R. Ugas (IFOAM - Organics International)
   Organic agriculture and its relation and contribution to other sustainable agriculture initiatives
15:00  Organic 3.0: Towards truly sustainable food and farming systems to achieve the Agenda 2030 - P. Flores (IFOAM - Organics International)
16:00  An overview of organic guarantee systems - F. Castro (IFOAM - Organics International)
17:00  Focus on PGS: a locally appropriate and smallholder-friendly option for quality assurance
Module 3: Agrobiodiversity values as market drivers

**Wednesday, 22 September**

14:00  **Slow Food** - F. Mattei (*Slowfood*)
       Agrobiodiversity as driver for rural development and the preservation of healthy ecosystems,
       Externalities, ecosystem services and common goods

15:00  **Promoting market access and generating sustainable demand paradigms**
       Education and awareness raising

16:00  **NaturaSi** - C. Murer (*NaturaSi*)
       Organic products in Italy and in the world: growing market, more responsible consumers
       Effective and equitable farming techniques and distribution processes with low environmental impact
       Economic and social wellbeing of producers and their communities

17:00  **How to build long lasting relationships of trust between producers, retailers and consumers**
       Marketing and distribution strategies for small mountain producers
       Organic farming: new approaches and research

**Thursday, 23 September**

14:00  **Agroecology** - A. Bicksler (*FAO NSP*)
       The principles of Agroecology

15:00  Agroecology as a science, practice, and social movement

16:00  Agroecology for resilience and climate change adaptation

17:00  **Group Exercises and Discussions**
Module 3: Agrobiodiversity values as market drivers

Friday, 24 September

14:00  Innovation Contest - Participants' presentations
15:00  Innovation Contest - Participants' presentations
16:00  Innovation Contest - Q&A
17:00  Closing Remarks - G. Grussu (FAO MP)/ F. Attorre (Sapienza)/ C. Murer (NaturaSì)/
       (PAR)/ (Alliance)/ (IFOAM - Organics International)

       Award Ceremony
Devra Jarvis

Devra Jarvis is Principal Scientist at the Alliance of Bioversity International, Rome Italy, Adjunct Faculty at Washington State University, Adjunct Professor at the Institut Agronomique et Veterinaire Hassan II, Morocco, and Coordinator of the Platform For Agrobiodiversity Research (PAR). Her work focuses on developing empirical evidence to assess and support the use of local crop genetic diversity to improve the production and resilience of small-holder farmers. She is the primary author of the textbook used as the scientific basis of this course.

Toby Hodgkin

Research Advisor for the Platform for Agrobiodiversity Research and an Honorary Research Fellow of Bioversity International. After working as geneticist/plant breeder or vegetable crops he joined the International Board for Plant Genetic Resources to work on the maintenance and use of plant crop genetic diversity. He has worked on in situ conservation of crops and their wild relatives since 1990, publishing extensively on different aspects of conservation and use.

Muhabbat Turdieva

Coordinator of the regional project ‘In situ/on farm conservation and use of agrobiodiversity (horticultural crops and wild fruit species) in Central Asia’, focused on sustainable use of local diversity of temperate fruit trees and their wild relatives in the center of their origin. Previously has worked as Bioversity Forest Genetic Resources Scientist for Asia, Pacific and Oceania providing support to Central Asian and Transcaucasian Network on Plant Genetic Resources (CATCN-PGR).

Paolo Colangelo

Paolo Colangelo is a researcher at the Research Institute on Terrestrial Ecosystems of the National Research Council (CNR-IRET, Italy). His main research focus is on biodiversity, evolution and conservation combining molecular tools and ecological statistics. In the last decade he collaborated with Bioversity International in the study of relationship between agrobiodiversity and the resilience of agroecosystem to pest, disease and abiotic stress.

Massimo Reverberi

Associate Professor of Plant Pathology at Sapienza University. He participated to several European project on the control of the biosynthesis of some mycotoxins in different foodstuffs and on the application of the integrated control against fungi responsible for post-harvest spoilages. He was coordinator in several Research Unit of National Project, participate to 5 EU project funded under FP7 and one LIFE Project 2018-2023.

Fabio Attorre

Associate Professor of Botany at Sapienza University. He is scientific coordinator of several International Cooperation projects aimed at promoting the sustainable development of local communities and the conservation of biodiversity and natural resources. Areas of interventions included Mozambique, Swaziland, Zimbabwe, South Africa, Papua New Guinea, Albania, Yemen, Ecuador, Perú, Dominican Republic.
Nadia Bergamini
Ecologist, works for Bioversity International in the Productive and Resilient Farms, Forests and Landscapes Initiative. With 8 years’ experience as an information officer in the UN Food and Agricultural Organization and nine years applied research, project management and extension experience in India, Nepal, China, the Philippines, Tunisia, Bolivia and Cuba. Areas of expertise, participatory and field research into sustainable production landscape management and socio-ecological resilience of agro-ecosystems.

Rose Nanyka
Conservation Biologist and a Fellow of the African Women in Agricultural Research and Development. She works with Bioversity International in the Genetic Diversity, Productivity and Resilience Section, managing projects on using crop biodiversity for ecosystems production and resilience. She has eighteen years’ experience with multi-stakeholder processes involving NGOs, CBOs, and Government Institutions in sustainable natural resources management.

Devendra Gauchan
Agricultural Economist with a PhD from the University of Birmingham, specializing in economics of agricultural biodiversity conservation, currently is the National Project Manager at Bioversity International’s Nepal office. He has worked in agricultural R&D sector in Nepal and abroad for over 20 years. Before joining Bioversity International, he was the Senior Scientist and Head of Socioeconomics & Agricultural Research Policy Division, at Nepal Agricultural Research Council (NARC).

Isabel López Noreiga
Policy specialist on the Policies for Crop and Tree Diversity management research area at Bioversity International. Her area of expertise is in biodiversity law and she has been involved in a number of research projects looking at the impacts of policies and legal frameworks on different actors’ capacity to access, use, conserve and exchange natural resources, and particularly crop genetic resources.

Paola De Santis
She works for Bioversity International in the Genetic Diversity, Productivity and Resilience Section. She has been working on several national and international projects to improve productivity, enhance agro-ecosystems production and resilience and climate change adaptation by using crop genetic resources. Areas of expertise include development of partnerships at different levels, participatory approaches, and seed systems.

Abram J. Bicksler
Agricultural Officer with the Food and Agriculture Organization of the United Nations (FAO) based in Rome. He works with the Ecosystem Services and Agroecology Team within the Plant Production and Protection Division (AGP) on various initiatives related to the scaling-up of Agroecology, provision of ecosystem services, and is also the focal point for Pollinators within the division.
Lecturers

**Federica Matteoli**
Over 15 years of experience in the fields of climate change, political science and participatory approaches in international agencies such as FAO, the World Bank and government institutions. She has been a member of the Facilitation Unit of the Global Alliance for Climate Smart Agriculture since 2014. She is the Leader of the CSA Team in the Office of Climate Change, Biodiversity and Environment (OCB) at FAO. She has a degree in law, a master’s degree in international cooperation and a PhD in science and management of climate change.

**Julian Schnetzer**
Environment and Climate Specialist at FAO. He holds a BSc/MSc in geoeconomy from Potsdam University (Germany). Before joining FAO, he worked with the Swiss Federal Agricultural Research Institute on life cycle assessments of crops. In 2012, he joined FAO as a Natural Resources Officer and since then worked on different topics including crop modelling, climate change and climate-smart agriculture.

**Nadine van Dijk**
Nadine van Dijk is from the Netherlands and works on climate-smart agriculture with FAO. Previously she worked for the Netherlands Ministry of Foreign Affairs on gender equality and on food and agriculture. She has a BSc in Cultural Anthropology and Development Sociology from the Radboud University in the Netherlands and an MSc in Wellbeing and Human Development from the University of Bath, UK.

**Isaac Guzman**
Mexican national, he is a climate change policy analyst. He holds an Erasmus Mundus Master’s degree in Environmental Policy and Management from the Central European University, Hungary; and Lund University, Sweden. His master thesis was focused on urban food security and adaptation strategies. Prior to joining the Economic and Policy analysis of Climate Change (EPIC) team at FAO he was a project manager in Mexico City’s Ministry of Environment.

**Abdel Kader Naino Jika**
Population geneticist. He holds a PhD degree in biology obtained at Paris Sud University, a master’s degree in both Genetics (University Pierre et Marie Curie) and in the Philosophy of Science (University Paris 1-Pantheon Sorbonne). Before joining Bioversity as HRF, he worked as a postdoc in Population genetics both in the lab EGCE (French Center for Scientific Research) and the French national institute for agronomic research (GQE-Le Moulon laboratory).

**Agnes Bernis-Fonteneau**
Scientific and technical advisor for Platform for Agrobiodiversity Research (PAR), leading PAR scientist for the development of the Diversity Assessment Tool for Agrobiodiversity and Resilience (DATAR). With over 15 years of experience with the United National FAO and Bioversity International, she has developed her expertise in agroecology, genetic resources for food and agriculture, climate change, biodiversity and ecosystem services. She has worked extensively in the area of formal seed systems and community genebanks.
Eleonora De Falcis
Agricultural economist working as Junior Professional Officer at the Alliance, based in Rome, Italy. She has experience in the areas of SME and agri-food competitiveness, including in international trade. Currently working on the economic sustainability of various agrobiodiversity projects related to on-farm agrobiodiversity conservation, mainly in Asia and Africa.

Carlo Murer
Specialized in Sustainable Tropical Forestry at Copenhagen University. Currently working as buyer of organic raw material for EcorNaturaSì Spa, Italian company specialized on production and distribution of organic food products. He keeps the commercial relation with the 200 farms supplying raw materials (cereals, seeds and pulses) for the EcorNaturaSì’s monitored production chains. He is implementing a Participatory Guarantee System PGS in Italy, among the farms working with EcorNaturaSì.

Federico Mattei
Works in the Project Development and International Relations Office of Slow Food’s Foundation for Biodiversity as a scientific and technical writer. Is responsible for developing project and seeking funding as well as technical or scientific revisions to reports, proposals and publications. Furthermore, leads several Slow Food projects on sustainable development, agriculture and sustainable tourism. Holds a Masters in Human Ecology and a Master in Food Security.

Roberto Ugas
Peruvian agronomist with graduate studies in the Netherlands and Japan in the fields of ecological agriculture, agrobiodiversity, and rural development. Professor at Universidad Nacional Agraria La Molina (Peru), researcher and lecturer on horticulture, agroecology, smallholders, plant genetic resources and food systems. Member of the Latin America continental supervisory board of Solidaridad, participates in the Latin American Scientific Society of Agroecology and in the International Society for Horticultural Sciences. He has been IFOAM - Organics International Vice-President and currently IFOAM ambassador.

Patricia Flores
Senior Project Coordinator and coordinator for the Regional Office of IFOAM in Latin America. She has a background in forestry and MSc in Resource Management (University of Edinburgh, UK), with post graduate studies in Agroecology (UC Berkeley, US). She has over 20 years of experience on Rural Sustainable Development and Agroecology. Currently she is the country Manager in Peru of the global project Nutrition in Mountain Agroecosystem, a trainer of IFOAM Academy and FAO consultant for several topics related to smallholders, agroecology and inclusive markets.

Flavia Castro
Senior Coordinator at IFOAM - Organics International, where she works since 2010 on organic policy and guarantee, with activities in development cooperation, focusing on the promotion of Participatory Guarantee Systems (PGS) for organic agriculture. Currently responsible for the Global PGS Program of IFOAM - Organics International, working with experts and practitioners from all over the world to gather data, compile and publish relevant information, advise decision makers and stakeholders on PGS development and support. She has facilitated trainings on PGS in Europe and Africa.
