**The MGU – Useful Plants Project**  
Kenya, Botswana, Mali, South Africa and Mexico

*To enhance the capacity of local communities to conserve and use sustainably indigenous plants*

A photograph showing three women in a nursery setting. One woman in a purple patterned dress is on the left, another in a white shirt and headscarf is in the center, and a third in a patterned dress is on the right. They are standing next to large black plastic pots filled with soil and seedlings. In the background, there are more seedlings in trays and a fence made of vertical sticks.

- Improve food security
- Improve human health
- Improve livelihoods
- Climate change mitigation
