

# Tool for Generating & Analyzing SDD: The AGRI-GENDER TOOLKIT

Regional Workshop on Sex-  
Disaggregated Data  
Food and Agriculture  
Organization (FAO)RAP  
Bangkok  
12 - 16 November, 2012

*Presentation by*  
Nandini Gunewardena  
Gender and Rural Development  
Statistics Officer, ESW/FAO

# AGRI-GENDER DATABASE

a statistical toolkit for the production  
of sex-disaggregated agricultural data

# Purpose of Agri-gender tool

Facilitate documentation of the gender gaps in agriculture

Guide for collecting precise, disaggregated data

Analysis of the data to influence development planning

Support evidence-informed policy

Broaden the evidence base

Feed in to targeted interventions

# Rationale: The Gender Gap in Agriculture

Women make essential contributions to agriculture – yet have less access than men to productive resources and services.

Similar access to productive resources and services by women could increase their farm yields and raise agricultural output significantly

This gender gap in agriculture imposes costs not only on the agriculture sector, but also on society, including women, their households & communities.

The lack of gender disaggregated data, and insufficient analysis of such data hinders a better understanding of the gender gaps

# Gender in FAO's New Strategic Framework

## 5 New Strategic Objectives

Eradicate hunger, food insecurity & malnutrition

Increase production in agriculture, fisheries and forestry in an economic, social & environmentally sustainable manner

Reduce rural poverty

Enable more inclusive and efficient food & agricultural systems - local, national & international

Increase resilience of livelihoods to threats and crises

## System-wide Action Plan on Gender (SWAP)

to increase coordination and coherence among UN agencies by defining and tracking a common set of performance standards

## Rural Women's Economic Empowerment (RWEE): Joint Initiative – UN Women, FAO, IFAD

Improve Food and Nutrition security

Increase incomes of rural women to secure livelihoods

Enhanced leadership & participation of rural women

Gender responsive policy environments

# Content

- Methodology
- Indicators – data items
- Examples
- Region-specific census data/info

# Progress

- Africa Agri-Gender Toolkit Developed 2010
- Translated in to French 2011
- RLC Agri-Gender Tool – Spanish draft in process

# Background Info

## AGRI - GENDER TOOL PRODUCTION

### Developed through:

- collaboration - FAO & NSOs in Africa
- technical input from statisticians
- field support- from men and women farmers responding to census / survey

Questions

# Content

## AGRI-GENDER TOOL

### 9 Data Items

- 1 Agricultural population and households
- 2 Access to productive resources
- 3 Production and productivity
- 4 Destination of agricultural produce
- 5 Labour and time-use
- 6 Income and expenditures
- 7 Membership of agricultural/farmer organisations
- 8 Food security
- 9 Poverty indicators

# Rationale for Data Items

- 1 Agricultural population ► hhld labor, dependency ratio
- 2 Access to productive resources ► gender disparities
- 3 Production/productivity rates ► gender differences
- 4 Destination of agricultural produce ► income levels
- 5 Labour and time-use ► costs + time poverty
- 6 Income and expenditures ► cost-benefit differentials
- 7 Membership in rural organisations ► voice/power
- 8 Food security ► differential outcomes in FNS
- 9 Poverty indicators ► quality of life/FNS disparities

# EXAMPLES of new “gender-relevant” results from WCA 2000 and 2010

- Analysis of demographic data
- Access to productive resources
- Credit, labour and time-use
- Poverty indicators

# Demographic data Tanzania

## labour constraints in ♀ headed Households

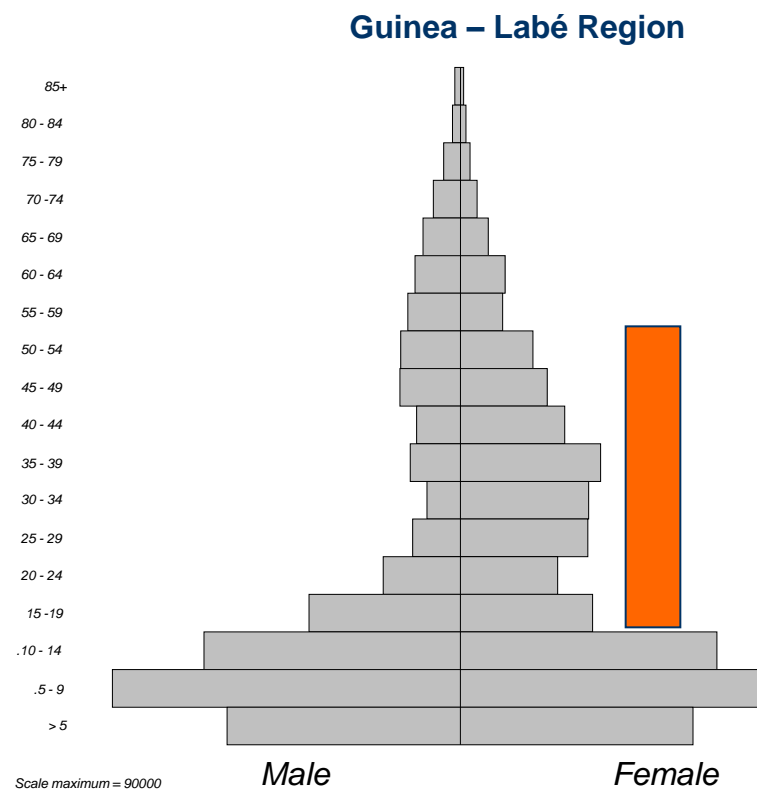

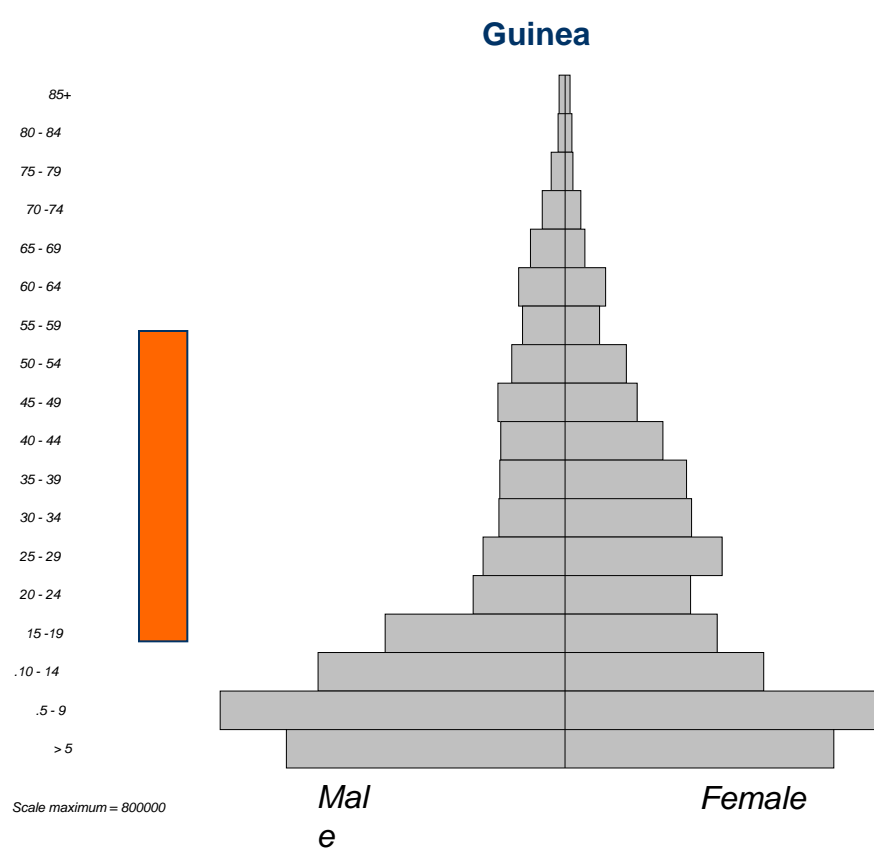

### Active male members/sex of Household head, Tanzania

Selected regions	Male active / sex of HoHH	
	Male HoHH	Female HoHH
Dodoma	1.1	0.3
Mtwara	1.0	0.5
Iringa	1.1	0.2
Mbeya	1.1	0.3
Mara	1.0	0.5
<b>Tanzania</b>	<b>1.1</b>	<b>0.4</b>

# Demographic data Guinea

## DISPROPORTIONATE RURAL OUTMIGRATION

## SIZE of Hhld, Dependency Ratio, & Labour Implications

Average size and dependency ratio of agricultural households by sex of Head of Household at regional and national level

Region	Male HoHH		Female HoHH	
	Average size	Dependency ratio	Average size	Dependency ratio
AGADEZ	5,5	0,87	4,0	0,90
DIFFA	5,8	0,84	3,6	0,92
DOSSO	7,6	0,82	4,4	0,89
MARADI	7,7	0,95	3,9	0,96
TAHOUA	6,6	0,86	4,3	1,16
TILLABERY	8,3	0,83	4,5	0,99
ZINDER	5,9	0,85	3,7	1,07
NIAMEY	6,1	0,69	4,8	0,65
Total	6,9	0,86	4,0	1,03

Source: RGAC 2004-2007, Niger

## Male holder: Area under collective management per type of acquisition - NIGER

## Access to LAND: Niger Collective Management by Head of Household

## Female holder: Area under collective management per type of acquisition - NIGER

## DATA ITEM 2

# LAND Management: Male & Female Sub- holders - NIGER

### Male sub-holder: Area under individual management

### Female sub-holder: Area under individual management

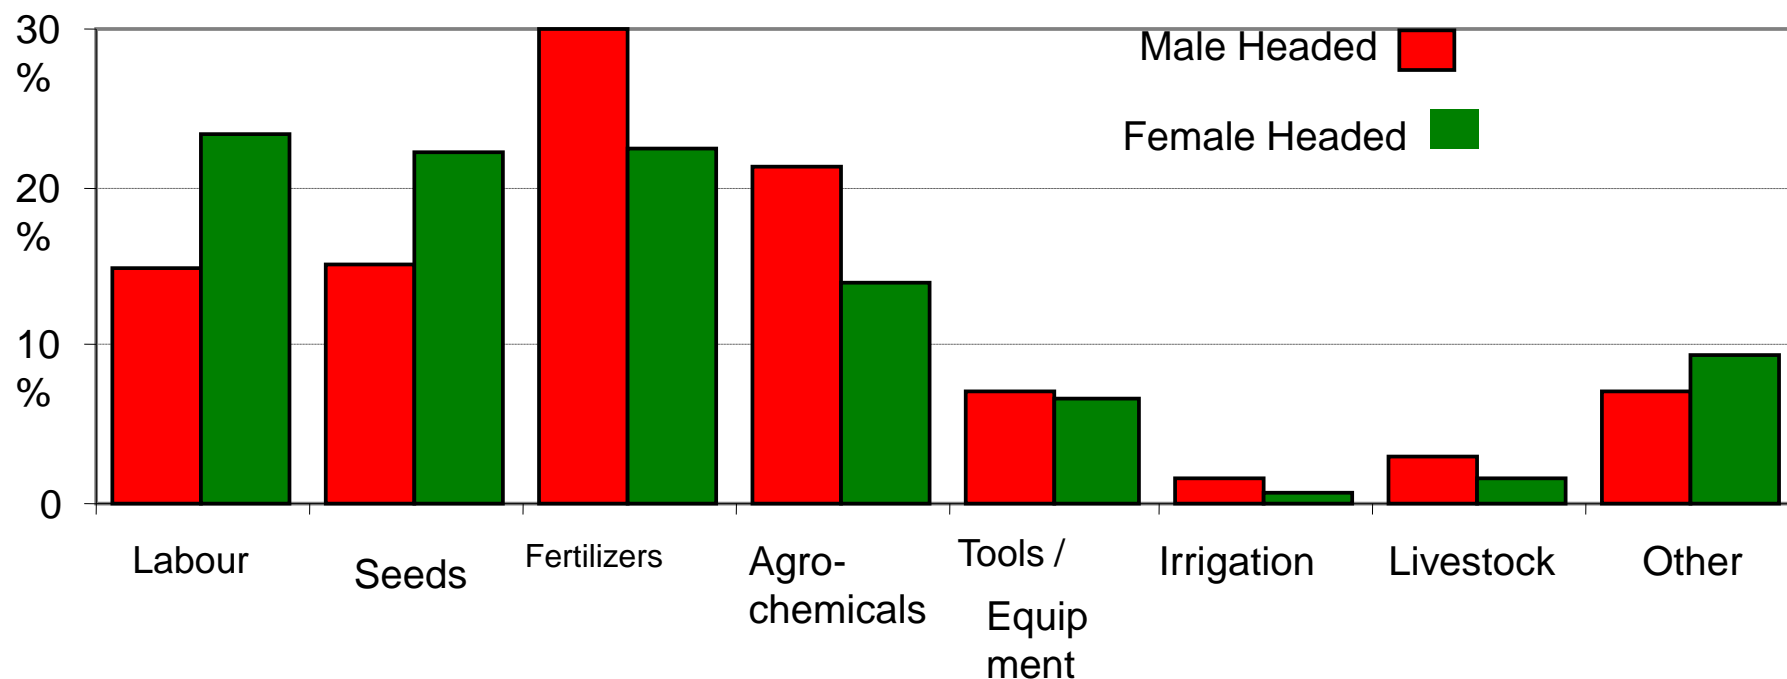

## Productive Resources: Farm Animals - Niger

Type of Farm Animal	Male	Female
Cattle	77%	22.3%
Sheep	60.3%	39.7%
Goats	45.5%	54.5%
Chicken	46%	32%

Source: RGAC 2004-2007, Niger

## Use of Credit – Tanzania

## Division of Labour, Tanzania

**Chart 5.17 Percent of Households by Type of Labour - MALE Headed Households**

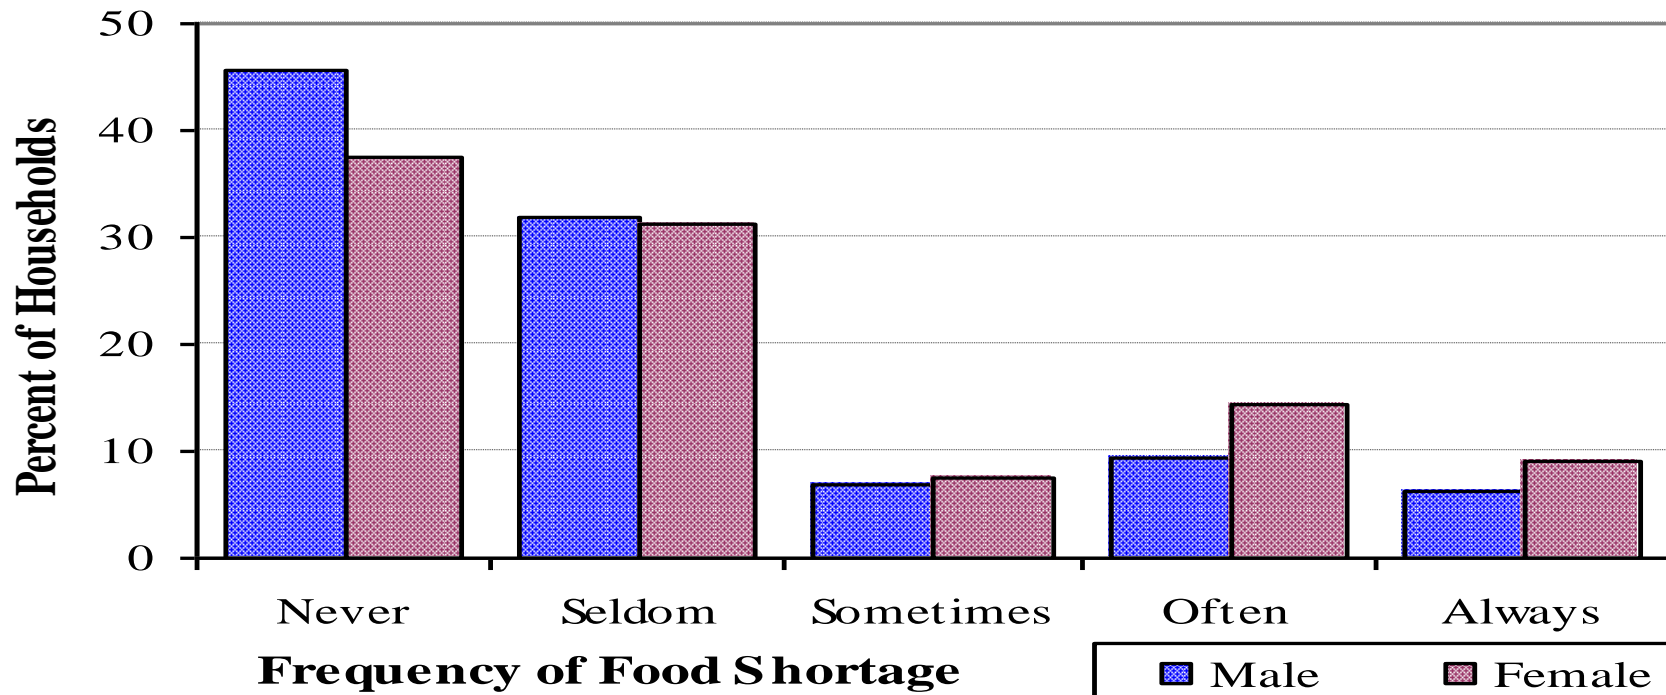

**Chart 5.18 Percent of Households by Type of Labour - Female Headed Households**

# Food security Differences - Tanzania

**Chart 9.4 Percent of Male and Female Headed Households by Frequency of Facing Food Shortages**

Higher % of Mhhs reported never having food shortages

Higher percent of Fhhs reported often or always experiencing food shortages.

# Next steps RAP Agri-Gender Toolkit?

The image features the words "THANK YOU" in a large, bold, 3D font. The letters are a vibrant yellow with a gradient that transitions to a darker orange at the base, giving them a three-dimensional appearance. A thick, solid blue horizontal bar passes behind the text, intersecting it. The background is white, with a green decorative element in the top-left corner and a green vertical bar on the left side.

THANK YOU
