Modernization of Management, Operation, and Maintenance of Large Irrigation Systems

A photograph showing a large-scale irrigation system. In the foreground, there's a close-up of a green-painted metal valve or fitting. Behind it, several large, circular concrete structures filled with water are visible, likely reservoirs or tanks. The water reflects the sky. The overall scene suggests a well-maintained agricultural or industrial water supply facility.

Robina Wahaj

FAO

Land and Water Division - NRL

OVERVIEW

- Why modernize irrigation systems?
- Increasingly complex irrigation management
- Irrigation Modernization definition
- Service Oriented Management and operation
- MASSCOTE methodology - elements, framework, application

Modernization to improve performance

Irrigation performance often lower than expected -improvements are critically needed.

Modernization a continuing process that aim to bring about improvements.

IRRIGATION SYSTEM MODERNIZATION

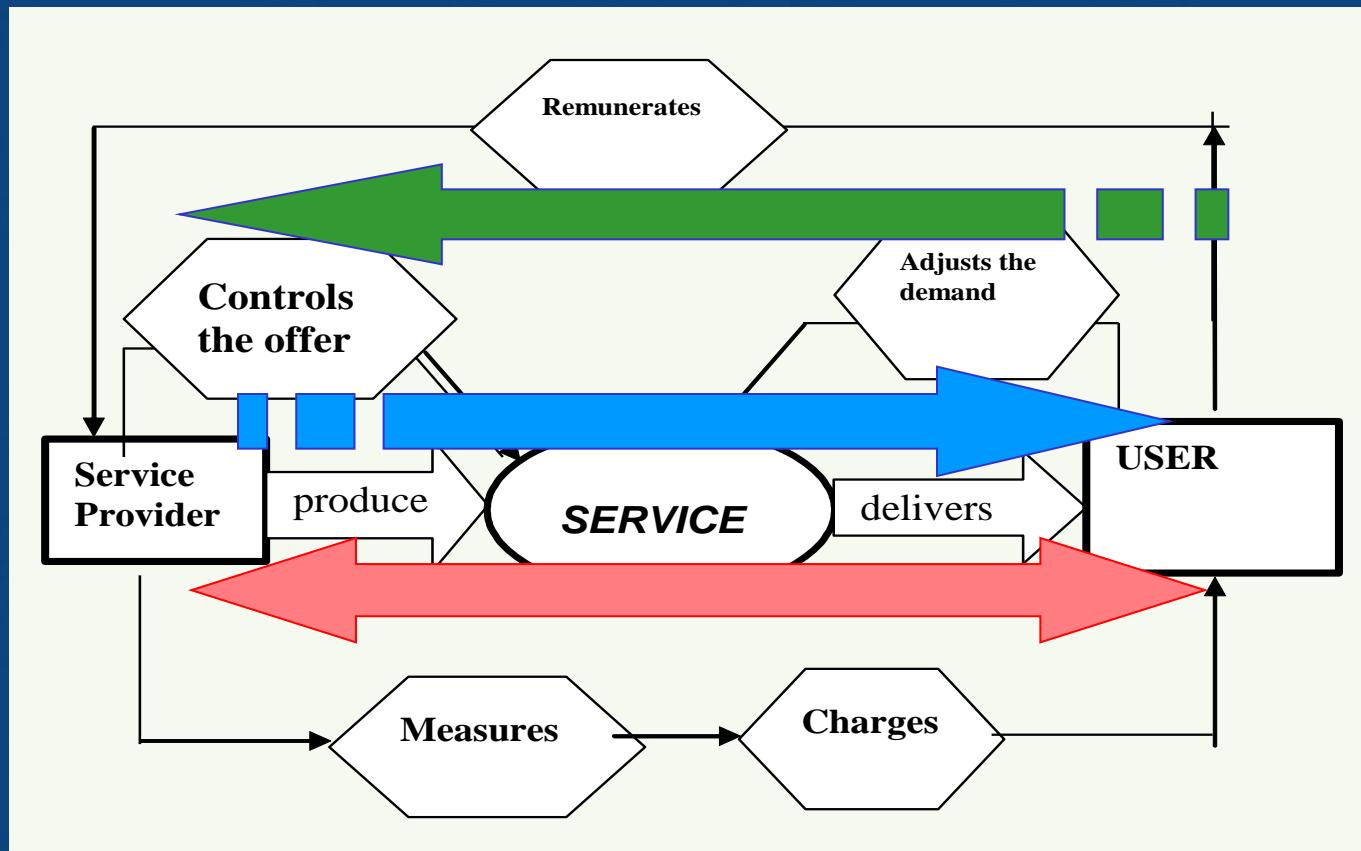

FAO 1997 Definition of Modernization:

a process of **technical and managerial upgrading** (as opposed to mere rehabilitation) of irrigation schemes with the objective to **improve resource utilization** (labor, water, economics, environmental) and **water delivery service** to farms.

Service Oriented Management

3 basic flows

WATER - INFORMATION - MONEY

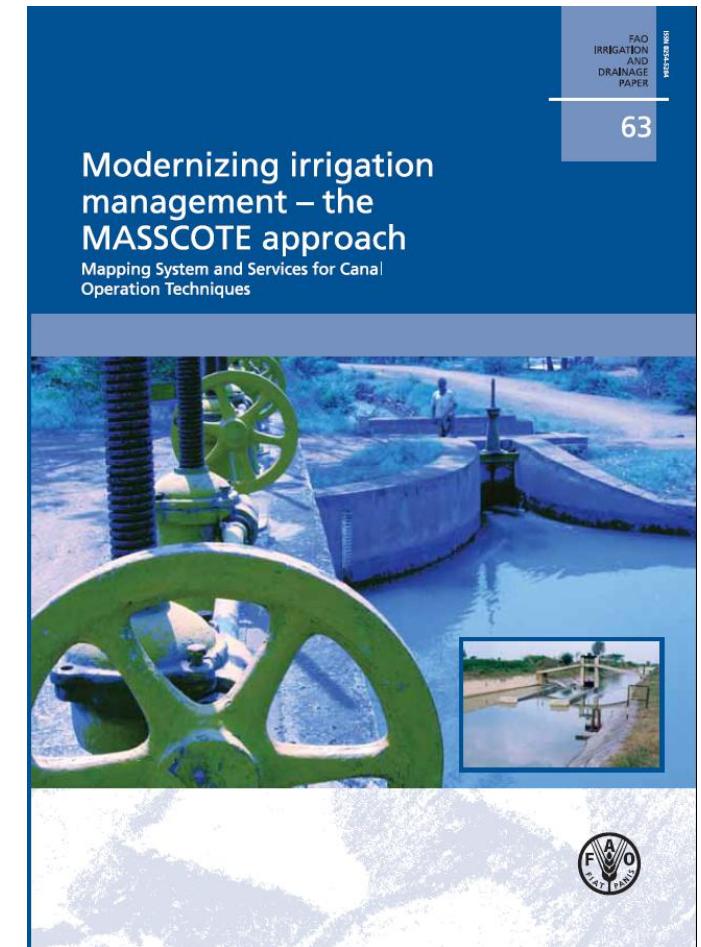

MApping System & Services for Canal Operation Techniques

MASSCOTE

Mapping System and Services for Canal Operation Techniques

Based on FAO experiences in
Asia on Modernization of Canal
Operation

Modernizing irrigation
management – the
MASSCOTE approach

Mapping System and Services for Canal
Operation Techniques

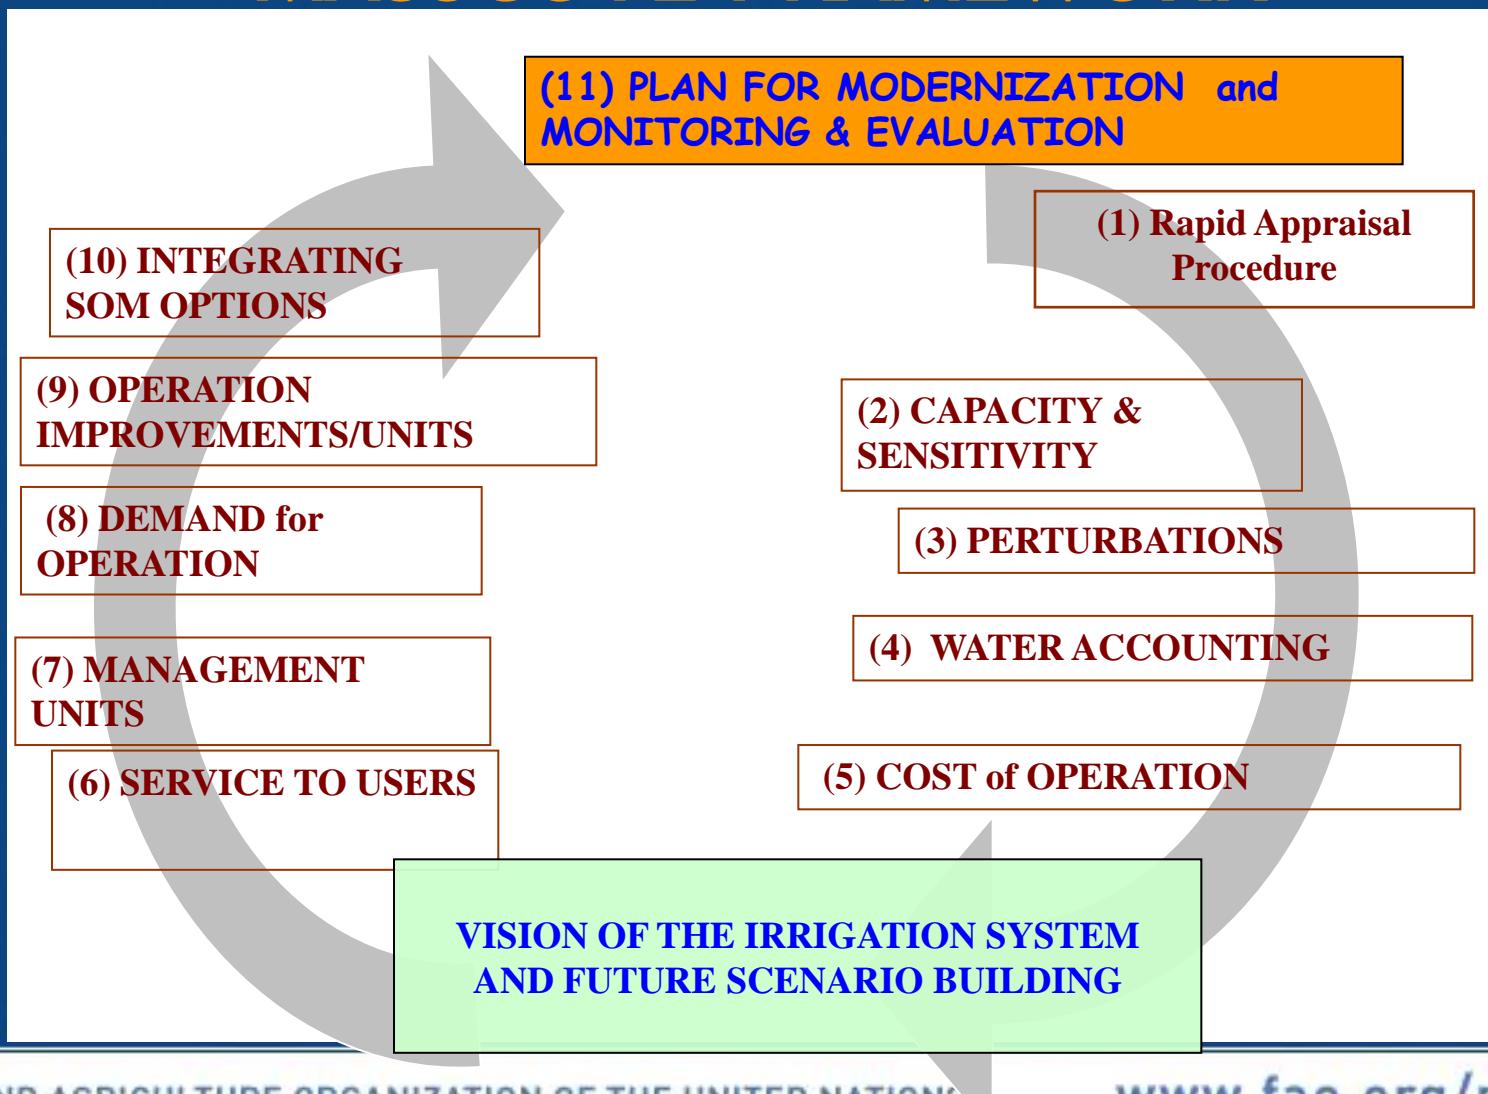

MASSCOTE elements

- **Focus on Canal Operation BUT Scope on Management:** Canal operation produces the service - Canal examination is critical for the appraisal (canals don't lie).
- **Service Oriented Management:** the service to users is the central and only goal of Management, Operation and Maintenance of an irrigation system.
- **Heterogeneity of service:** based on the physical constraints, opportunities, demand for service, willingness to pay.

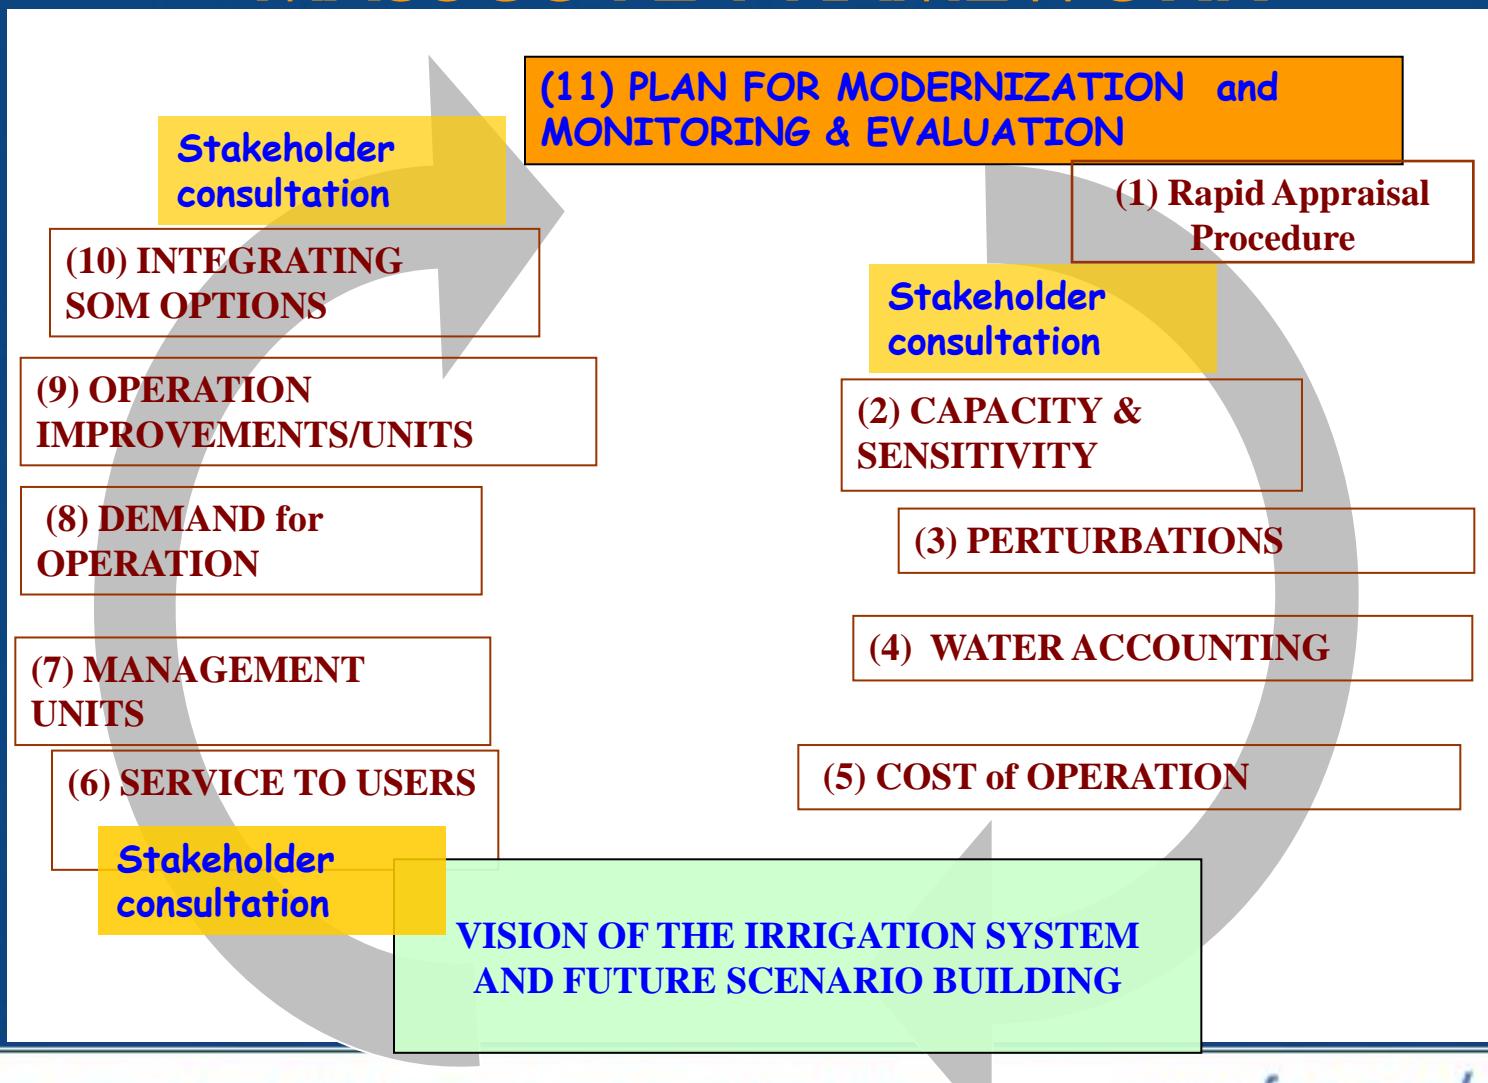

MASSCOTE elements

- **Cost effectiveness:** modernization means for each users the right service at the right cost.
- **Users=payers=decision makers:** Users are the clients, the beneficiaries, the payers and the decision makers
- **Professionalism !!! :** Management, operation and maintenance of large scale irrigation systems are complex tasks and needs skilled professionals.

MASSCOTE FRAMEWORK

MASSCOTE FRAMEWORK

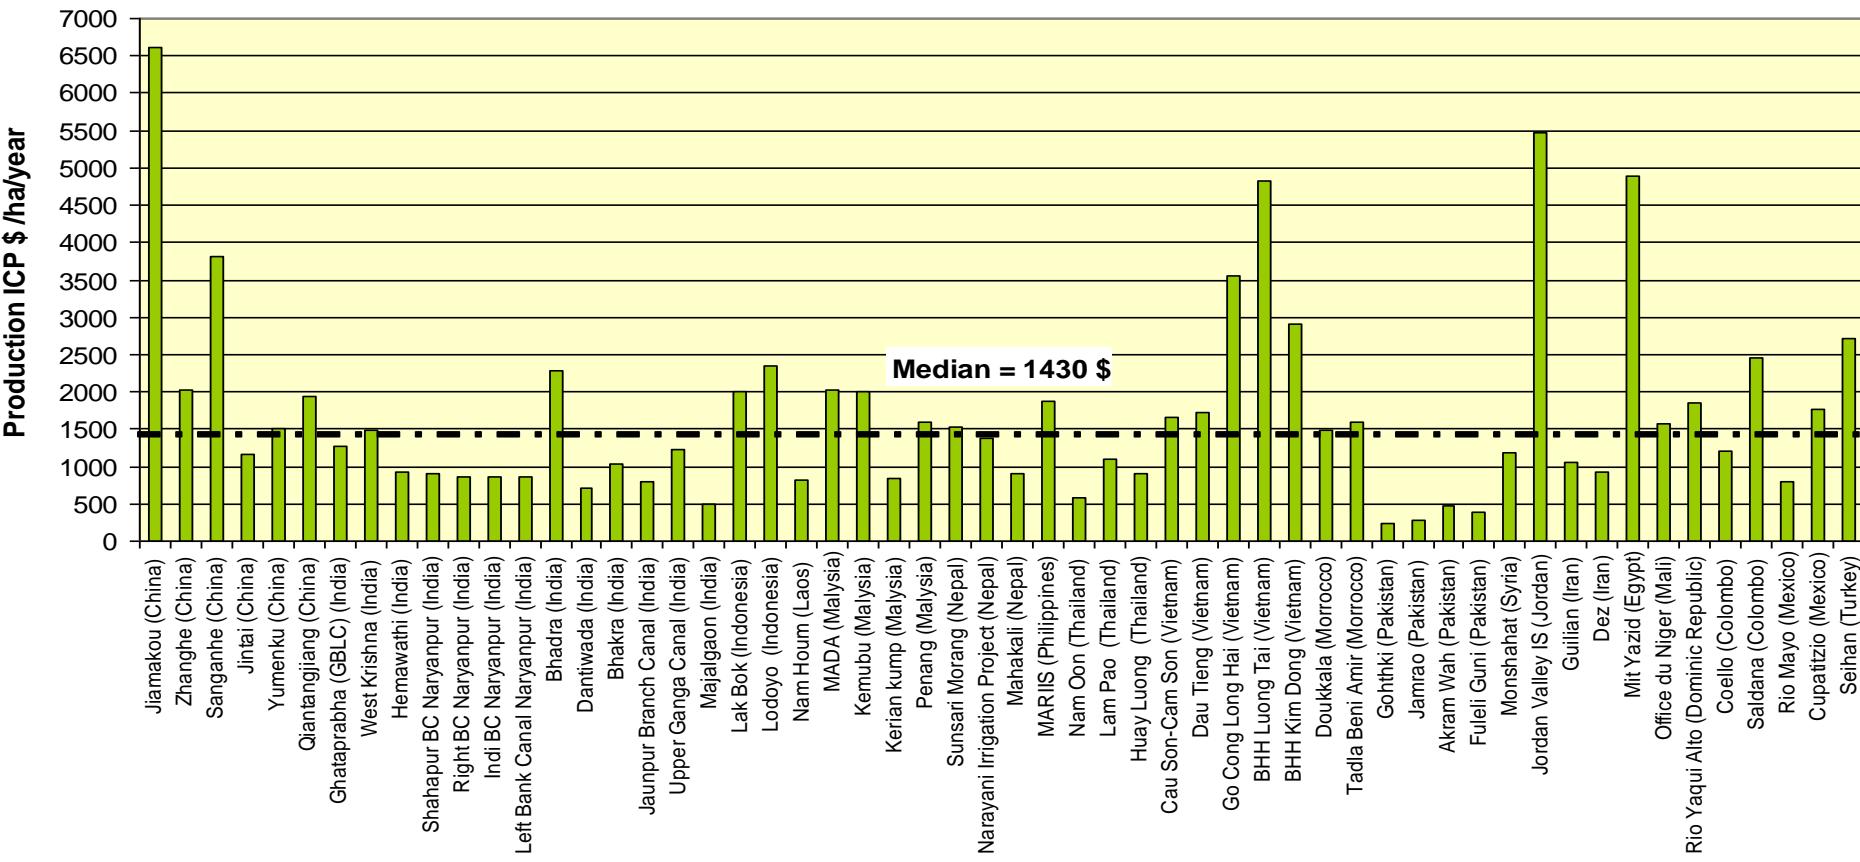

Example RAP results (1)

Land Productivity 56 systems \$/ha

FAO - 56 Systems Survey

D.Renault 2010

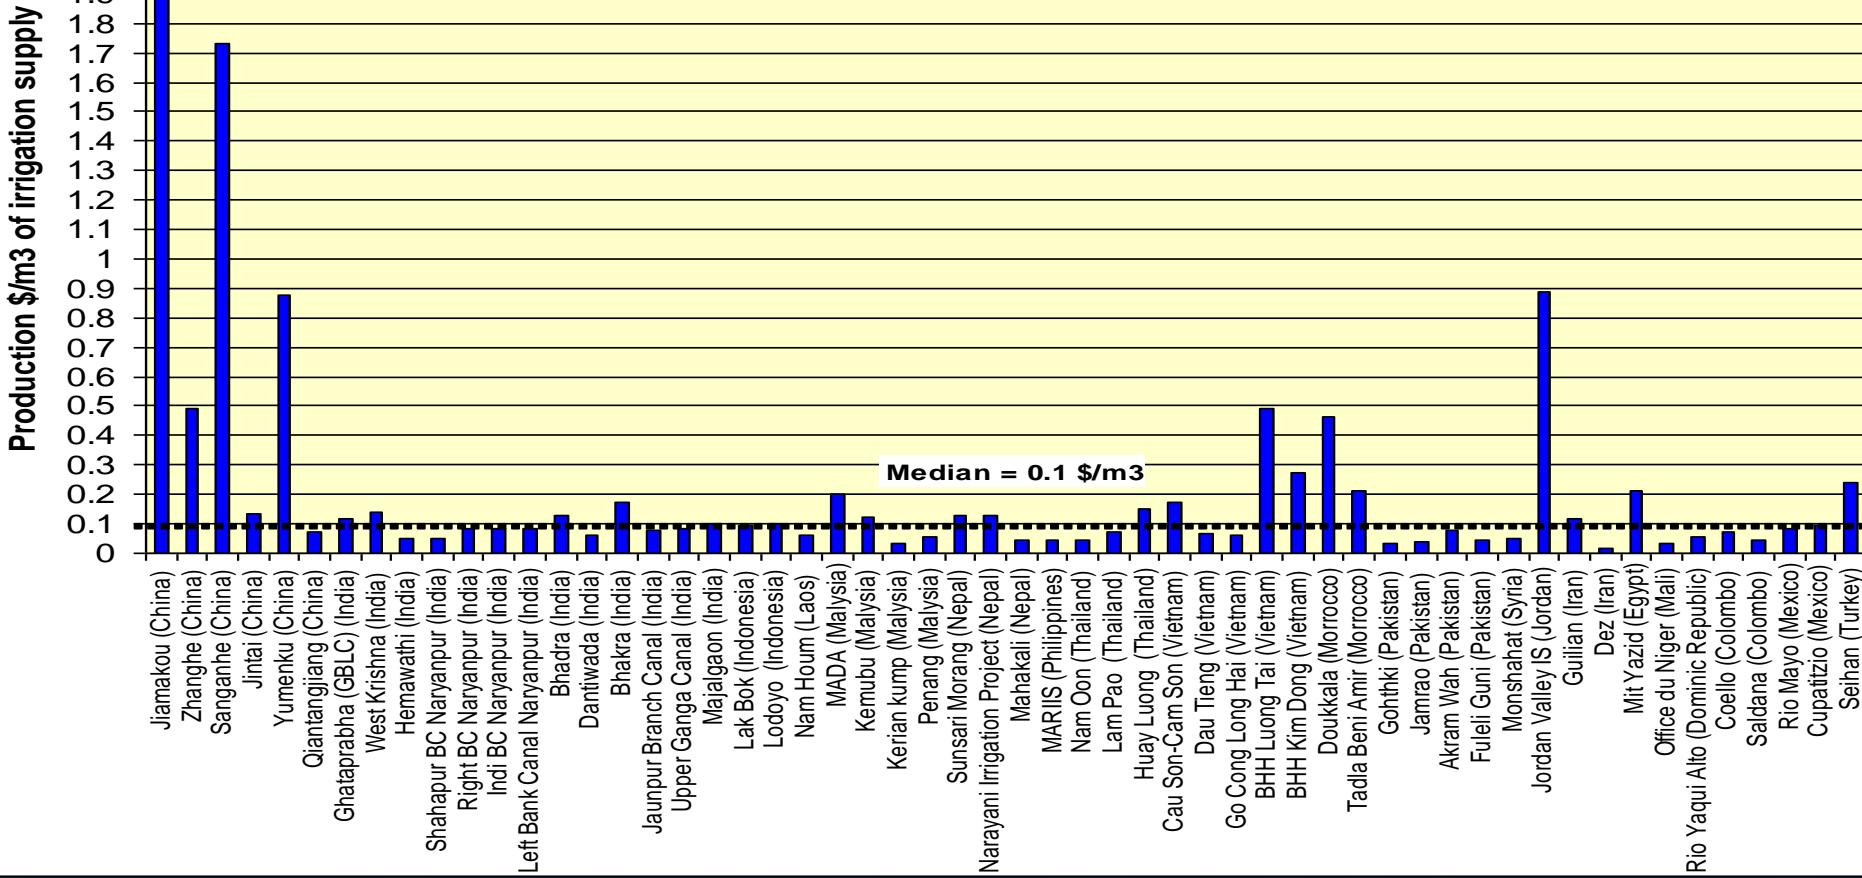

Example RAP Results (2)

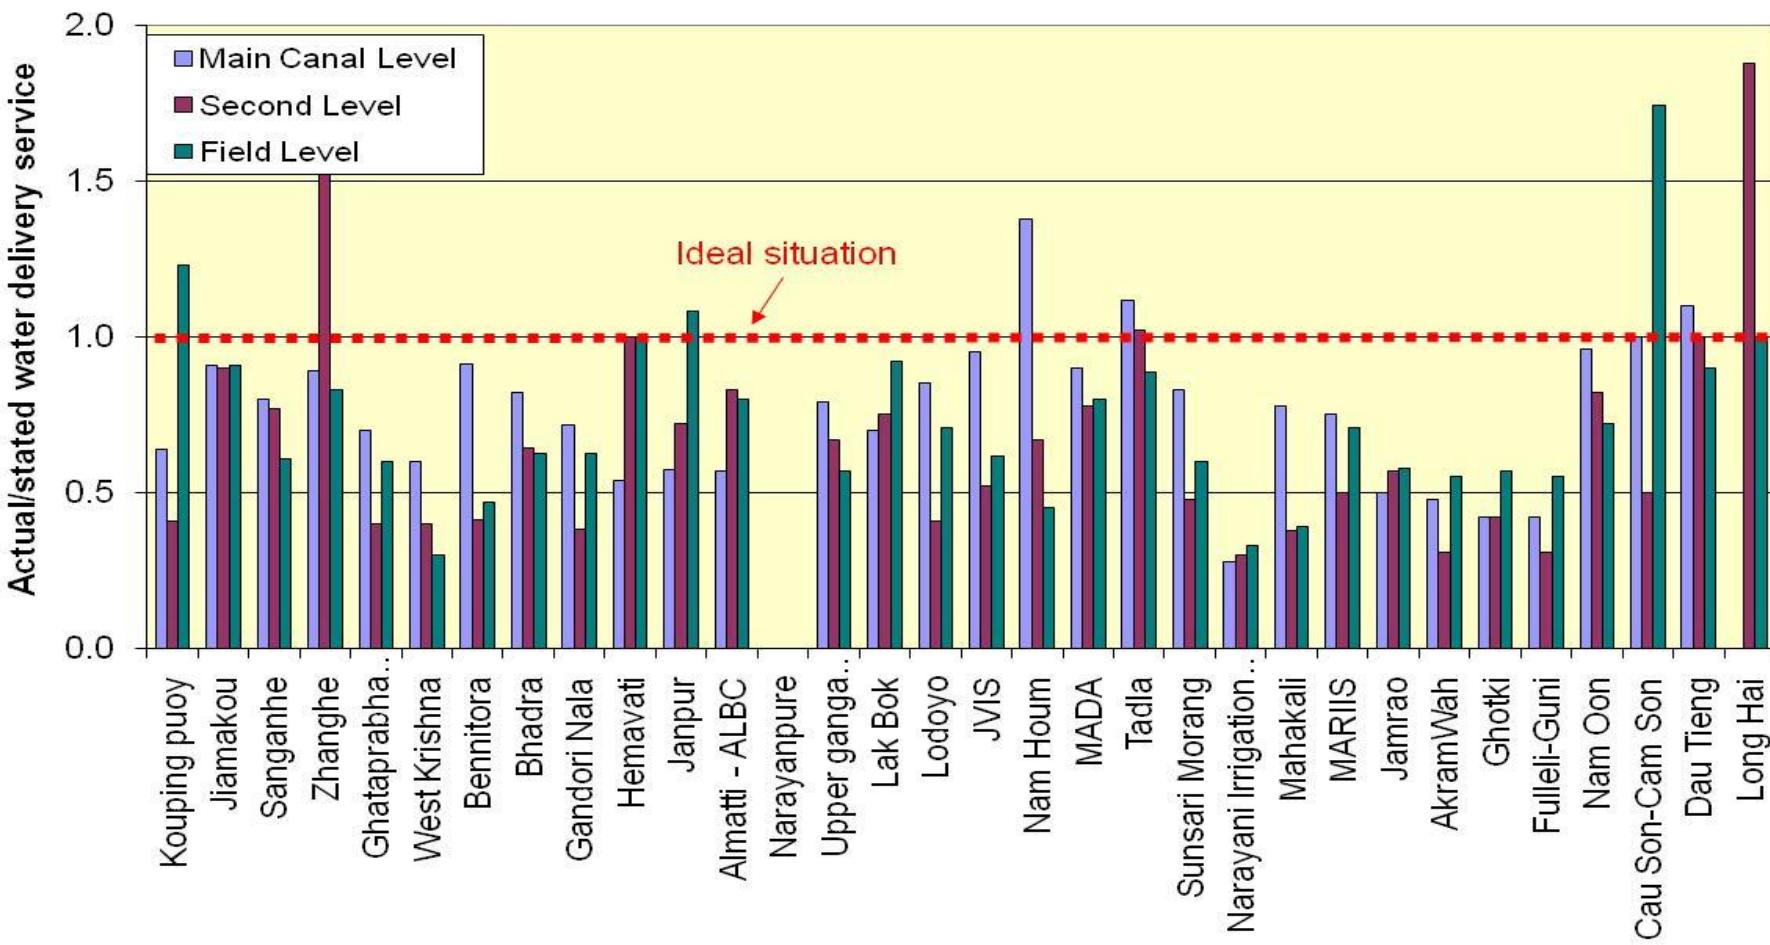

Water Productivity 56 systems \$ /m³

FAO -- 56 Systems Survey

D.Renault 2010

Example RAP results (3)

MASSCOTE has been used for

- Developing modernization plans for implementation as part of investment projects and programmes (China, India, Kyrgyzstan, Morocco, Pakistan, Sri Lanka)
- Capacity development (Central Asia, East Asia, South Asia, Near East and North Africa)
- As research tools by MSc. students (several from IHE delft)

MASSCOTE family

Mapping systems and services for:

- canal operation techniques - MASSCOTE
- lift irrigation systems - MASSLIS
- fisheries in irrigation schemes - MASSIF
- multiple use systems - MASSMUS
- pressurized irrigation techniques - MASSPRES
