

Monitoring and analyzing food and agricultural policies: scope, focus and early results

Jean Balié, MAFAP, FAO

TCI Investment Days 2012
Rome, 17-18 December 2012

Outline

1. Introduction. What is MAFAP?
2. Scope and focus
3. Example of results for one country
4. Examples of cross country comparison
5. Conclusions

What is MAFAP?

Monitoring and Analyzing Food and Agricultural Policies

- Analyses policy impacts on food & agriculture with comparable indicators across commodities, countries and over time
 - Price analysis
 - Expenditure and aid
 - Policy coherence
- Builds capacities of national partners for institutionalization
- Targets policy makers & development partners to promote evidence-based policy dialogue

Which indicators and what kind of analysis?

1. Market price support (NRPs/NRAs and MDGs)
2. Public expenditure level and composition
3. Policy coherence
4. Country and sector performances

Where does MAFAP focus?

MAFAP countries

- five countries with in-depth analysis

- five countries with preparatory activities (policy reviews)

What commodities and expenditures does MAFAP analyze?

Commodity list	Burkina	Mali	Kenya	Tanzania	Uganda	Ethiopia	Ghana	Malawi	Mozamb.	Nigeria	Total
1 Maize	S	S	S	S	S	S	S	S	S	S	10
2 Rice	S	S	S	S	S		S		S	S	8
3 Cassava			S	v	S		S	S	S	S	7
4 Sorghum-Millet	S	S	S	S		S	S			S	7
5 Cotton fiber	S	S	S	S	S			S	S		7
6 Beans - Cowpeas	S	S		S		S	S		S		6
7 Livestock	S	S	S	v	S	v					6
8 Cow milk		S	S	S		v		S			5
9 Sugar cane			S	S	S				S	S	5
10 Groundnuts	S	S		v				S			4
11 Coffee			S	S	S	S					4
12 Palm, Cotton, Sesame oil	S					v	S			S	4
13 Wheat			S		S	S					3
14 Tea			S		S			S			3
15 Tobacco								S	S		2
16 Cocoa							S			S	2
17 Sesame	S										1
18 Arabic gum	S										1
19 Yam							S				1
20 Fish					S						1
21 Oignon	S										1
22 Teff						S					1
Total	11	8	11	11	10	9	8	7	7	7	89
Expenditures	S	S	S	S	S		S			S	

Selected technical notes are already available on the web www.fao.org/mafap

What are the MAFAP products ?

- Data base
- Triennial multi-country report
- Country reports
- Technical notes
- Policy monitoring system
- Support to evidence-based policy dialogue and decision making

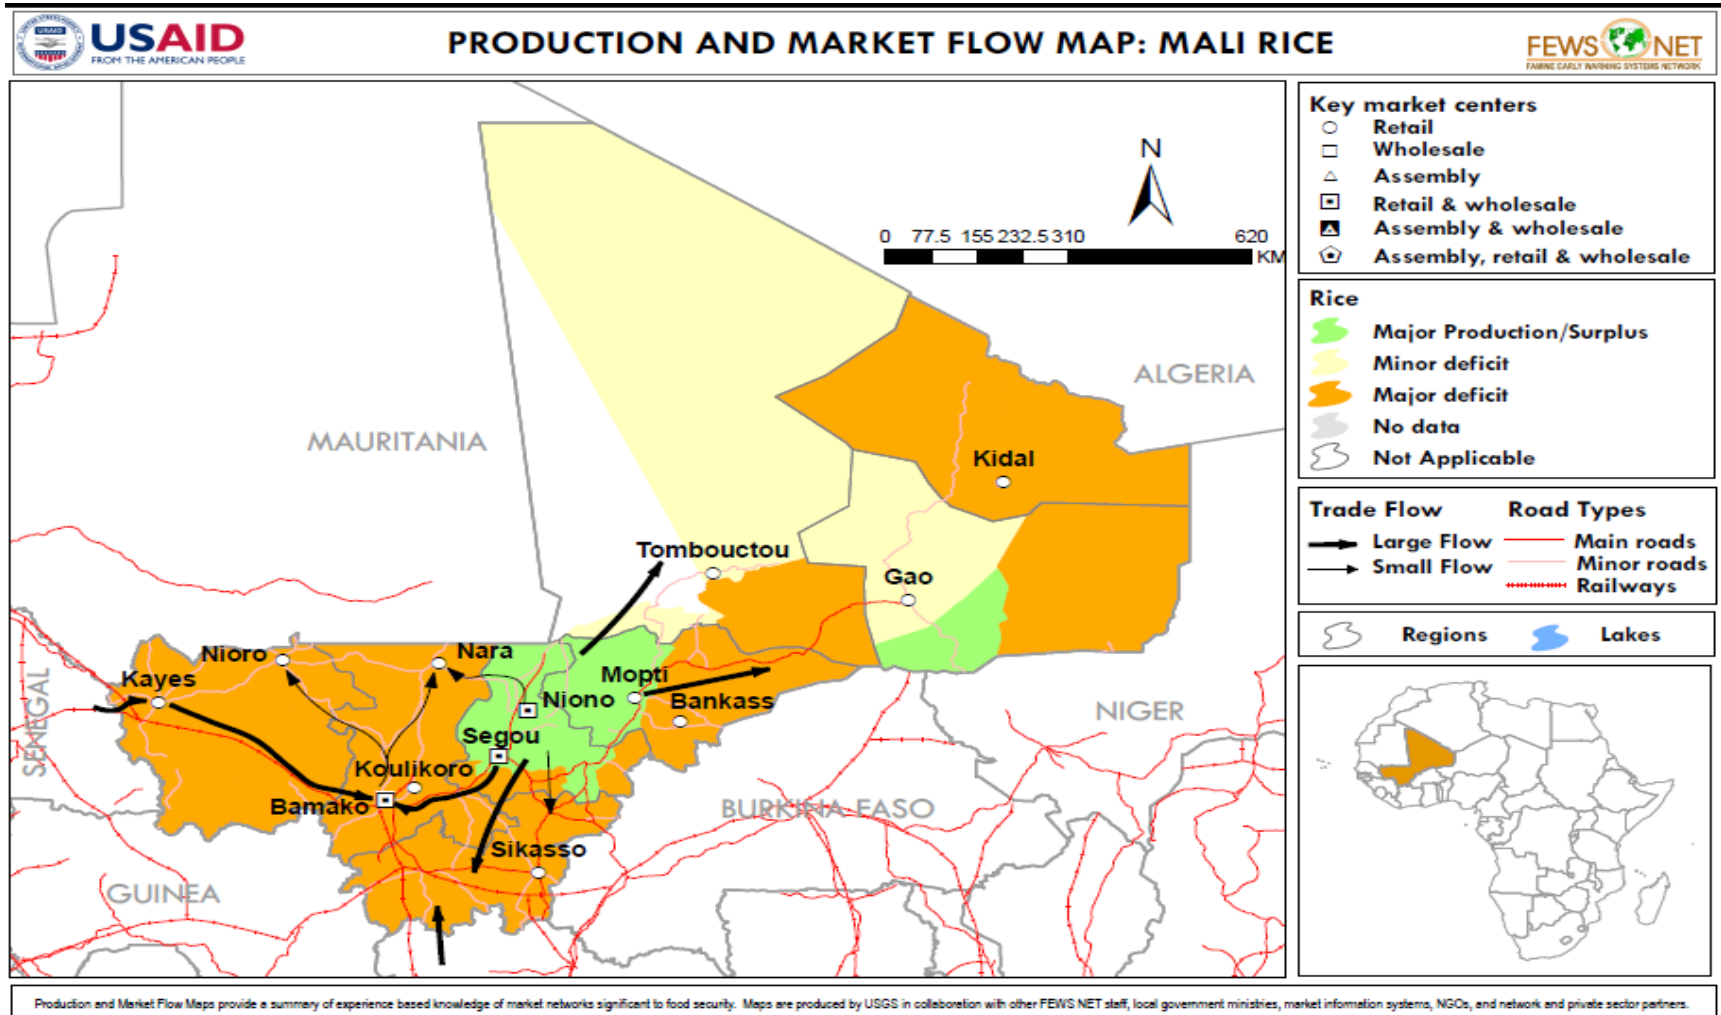

Example of results for one country: Rice analysis in Mali, 2005-2010

- Market price support
- Expenditure and aid
 - Policy coherence

Monitoring African Food and Agricultural Policies

Rice production and marketing in Mali

Rice production and trade

Policy decisions and measures

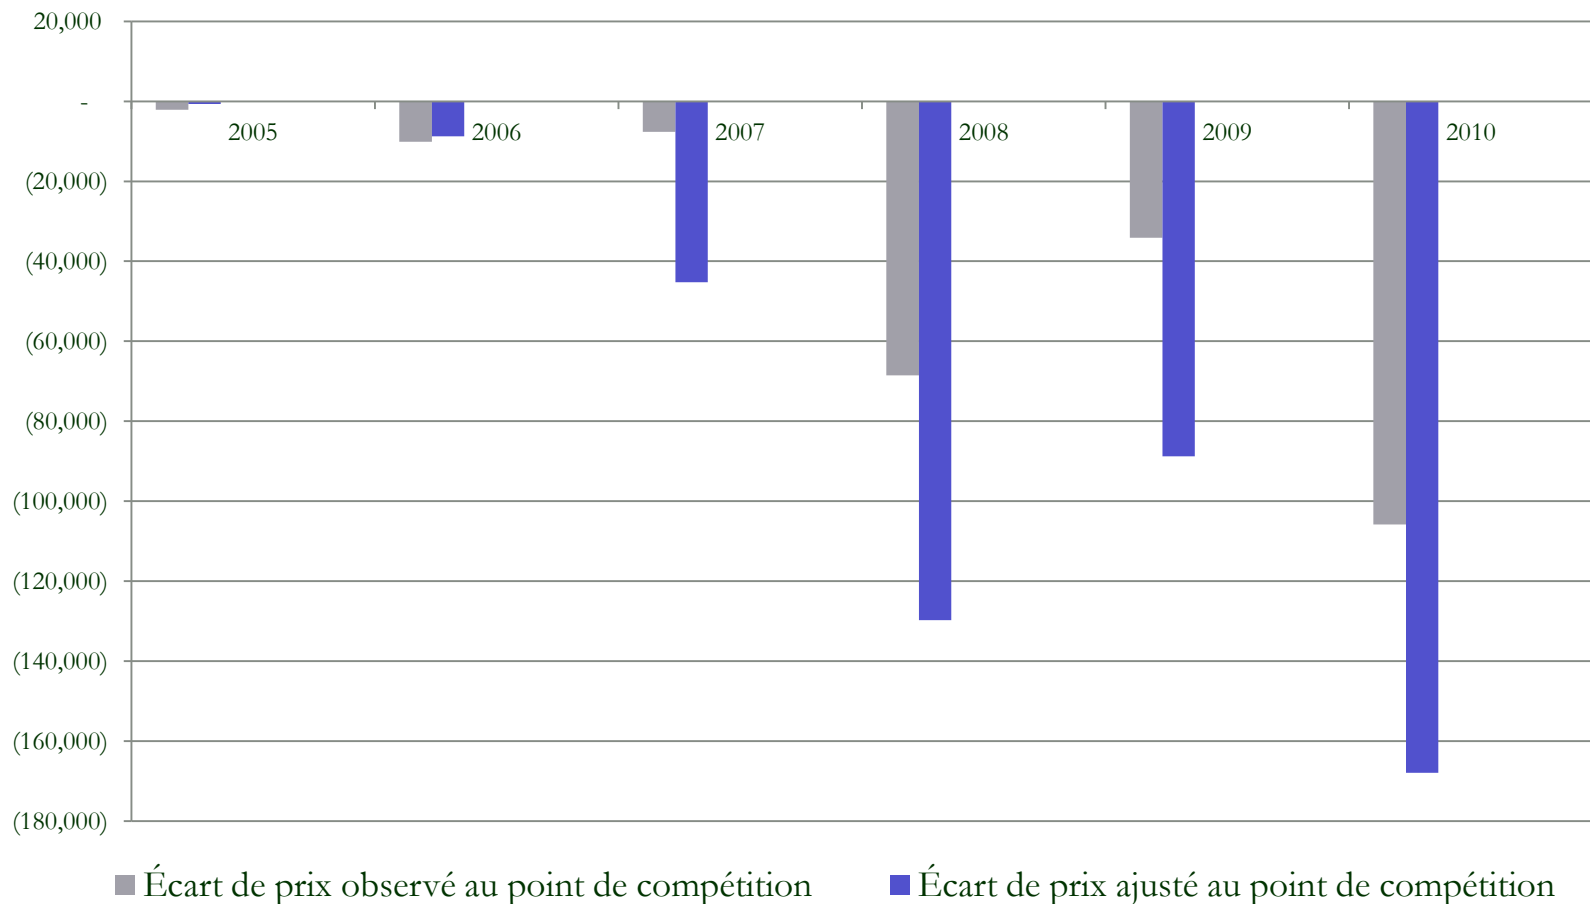

- Input subsidies
- Tax exemptions on imports
- Price ceilings

Are there incentives to rice production ?

Policies effective to absorb the price rise

Surging world food prices yet more disincentives !

Expenditure composition

Seeds, ag equipment, fertilizers. Impact of RI

Roads and irrigation. Mainly for rice-promotion projects

Infrastructure 21%

Payments to producers - input subsidies 35%

Agricultural research 3%

Source : MAFAP, FAO

Yet Ag.research very high return on ag prod / poverty reduction

Monitoring African Food and Agricultural Policies

Source : MAFAP, FAO

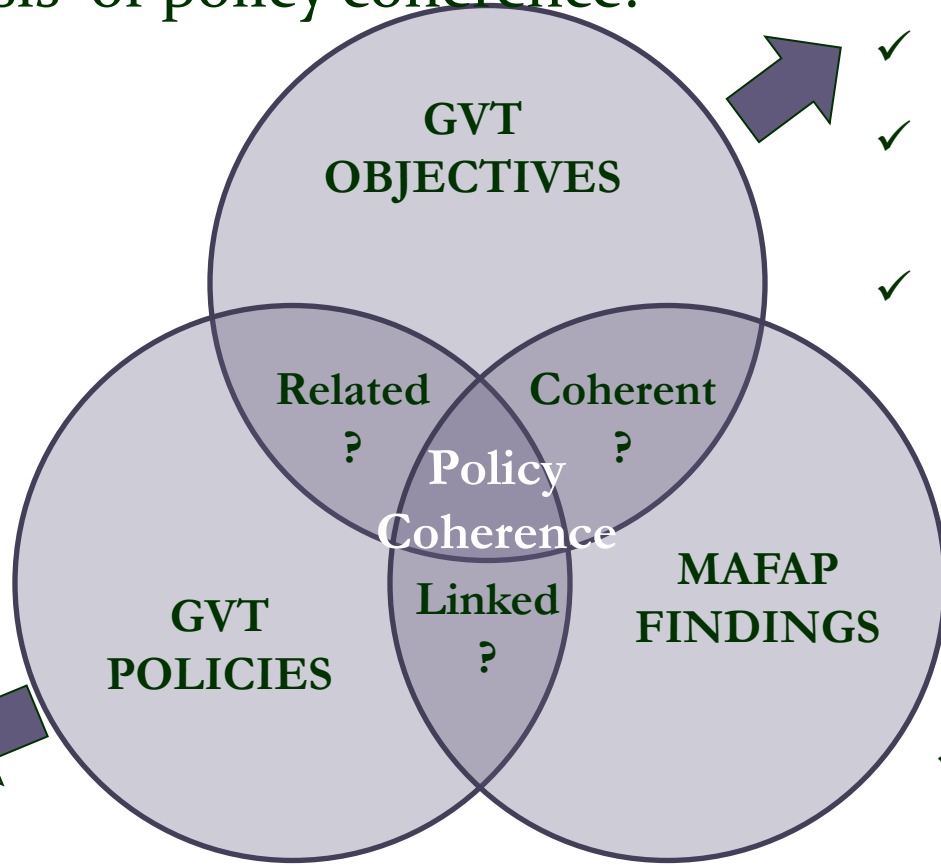

Monitoring African Food and Agricultural Policies

Source : MAFAP, FAO

MAFAP analysis of policy coherence:

- ✓ Net exporter of rice
- ✓ Boosting production
- ✓ Improving producers' revenue
- ✓ Food security

- ✓ Tax exoneration on imports : 08-09
- ✓ Price ceilings: 08-09
- ✓ Input subsidies : 08-ongoing...

- ✓ Incentives or disincentives and for whom ?
- ✓ Public expenditures: going to rice ?
- ✓ Irrigation infrastructures ?
- ✓ Input subsidies ?

Main messages

- Objective (*Mali as a net exporter*) not supported by effects of measures
- Implicit objective to support consumers outweigh support to producers (lowest prices in West Africa)
- Unfavorable environment for investments by farmers
- Exchange rate misalignment increases competitiveness of imports
- MAFAP does not capture all forms of incentives as shown by sustained production growth

Monitoring African Food and Agricultural Policies

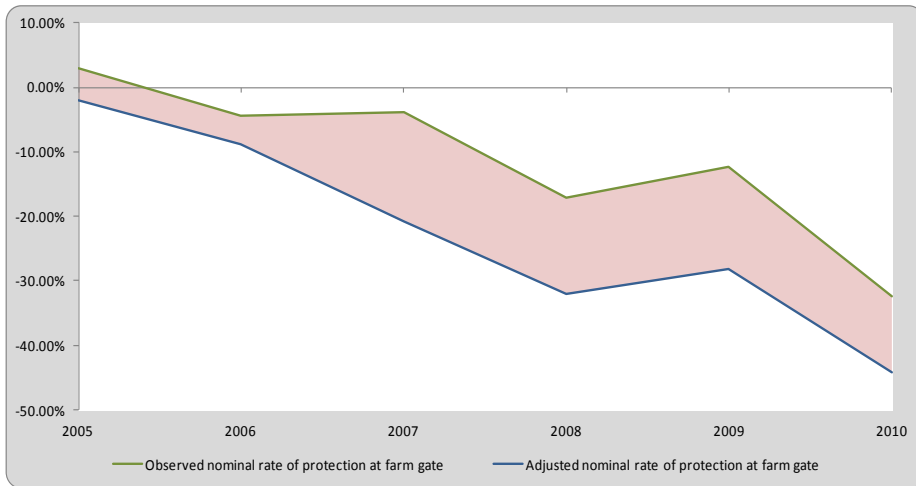

MAFAP allows for cross countries and cross sectors comparisons

Mali, Ghana, Burkina Faso and Tanzania,
2005-2010

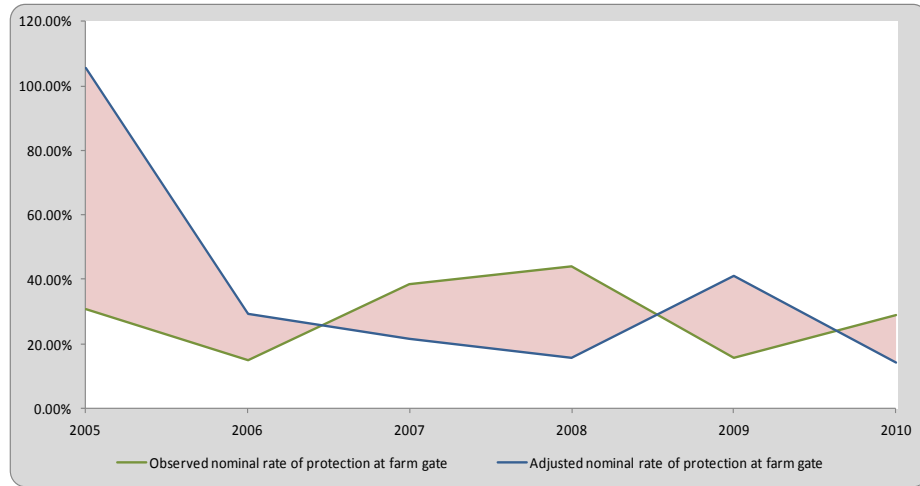

Commodity level analysis: Rice example

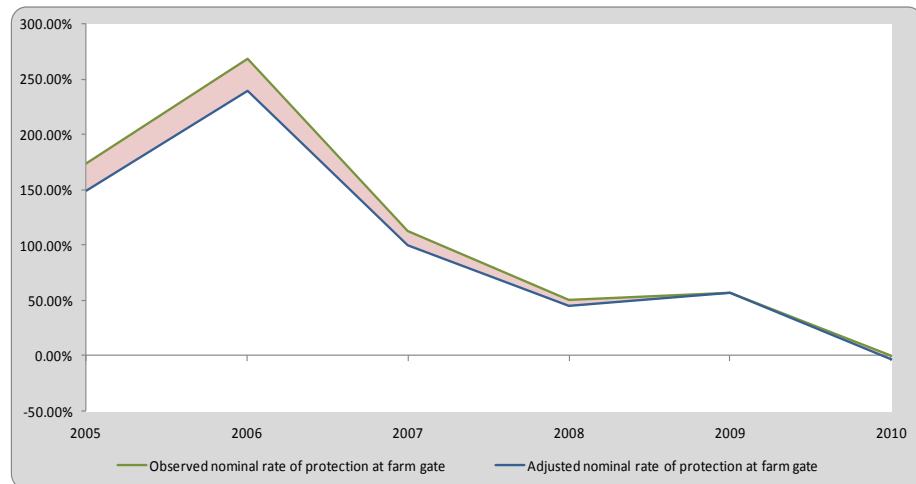

MALI

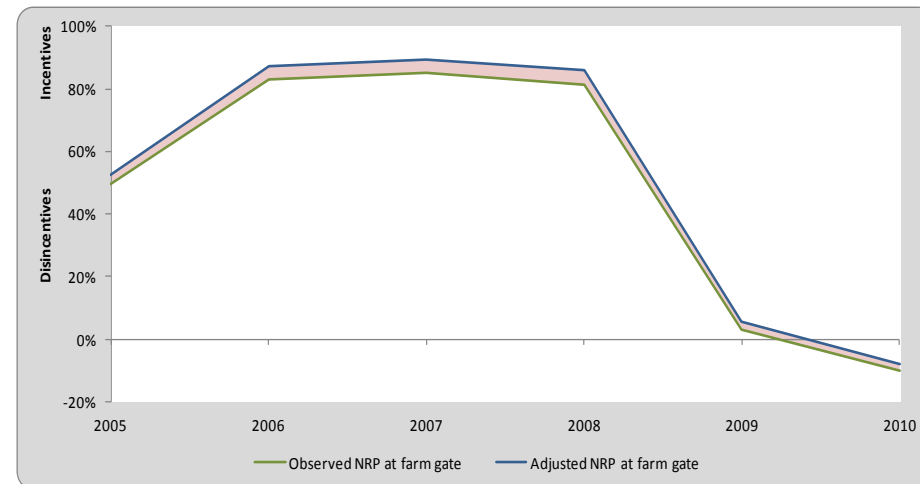

BURKINA FASO

TANZANIA

GHANA

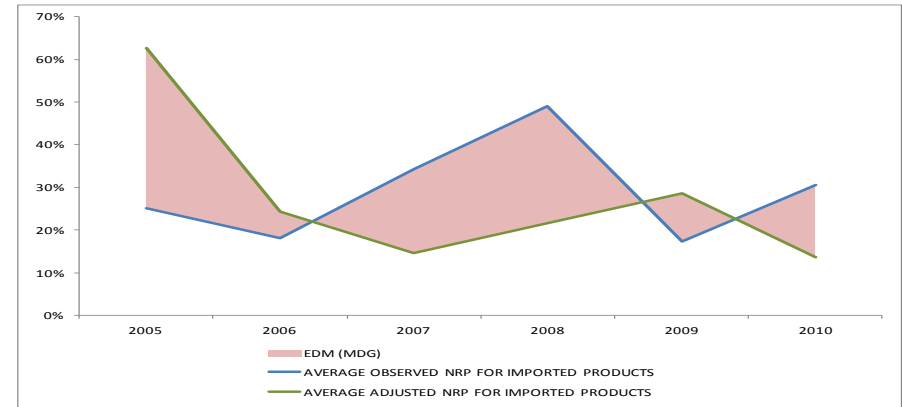

Commodity group level: Imports

MALI (Rice, Milk)

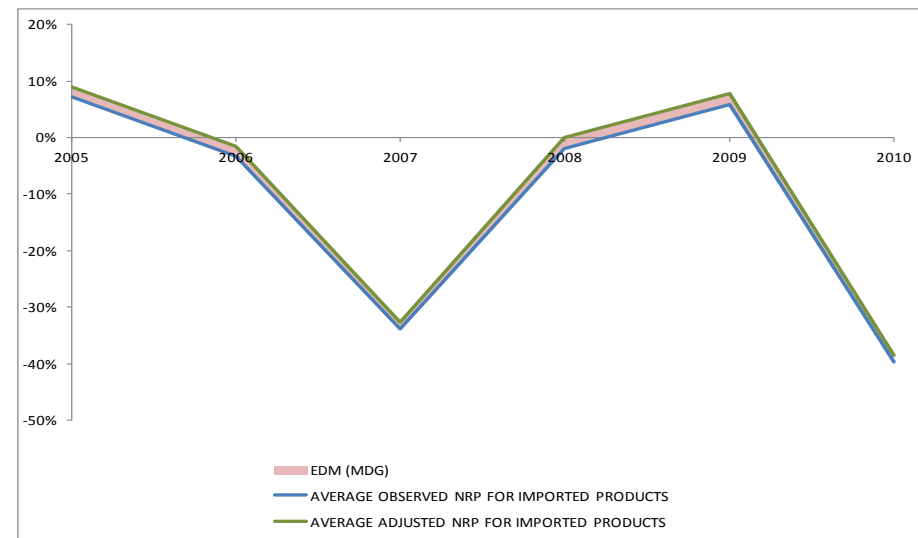

BURKINA FASO (Rice, cottonseed oil)

TANZANIA (Sugar, Wheat, Rice, Milk)

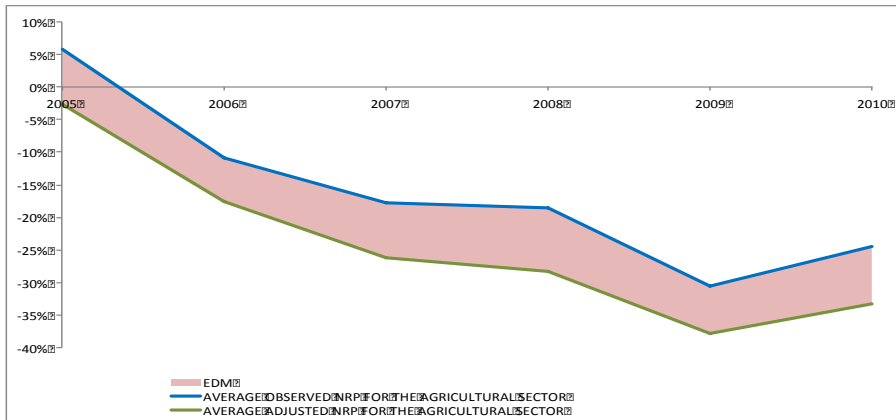

GHANA (Palm oil, Maize, Rice)

Agricultural sector level

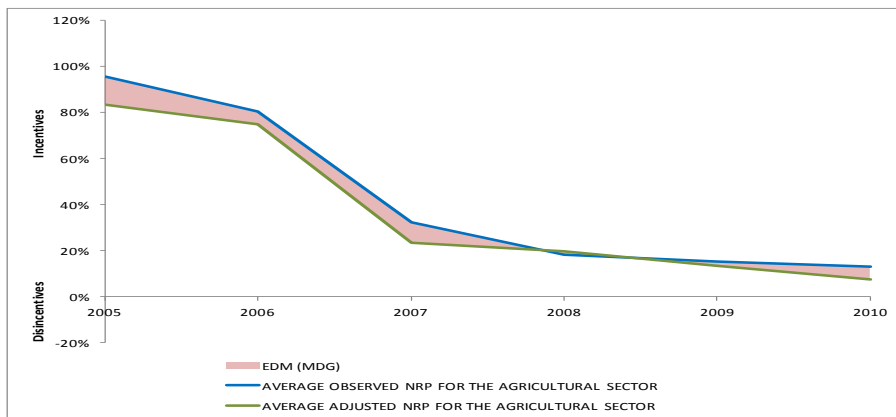

MALI (8 commodities)

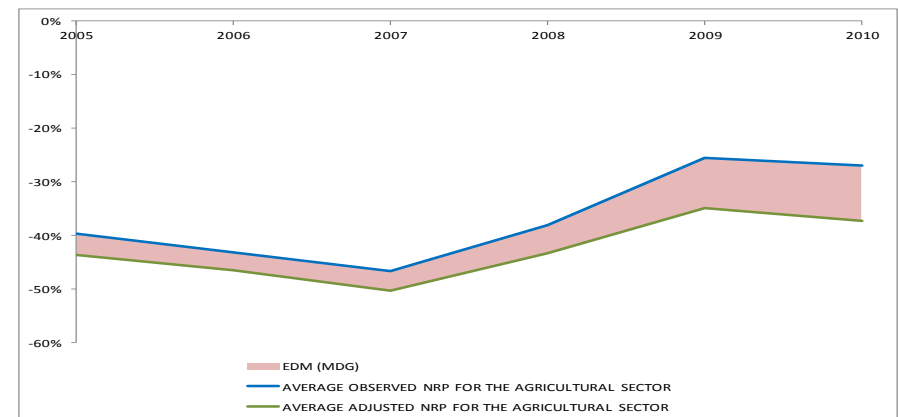

BURKINA FASO (11 commodities)

TANZANIA (8 commodities)

GHANA (8 commodities)

Public expenditure level

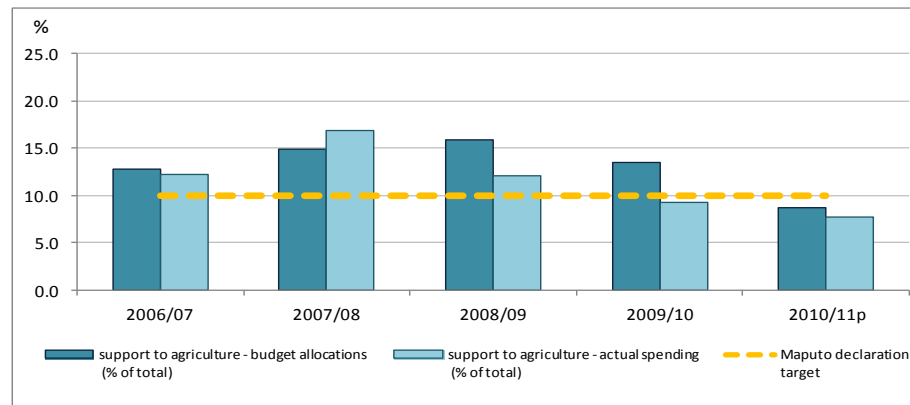

MALI

BURKINA FASO

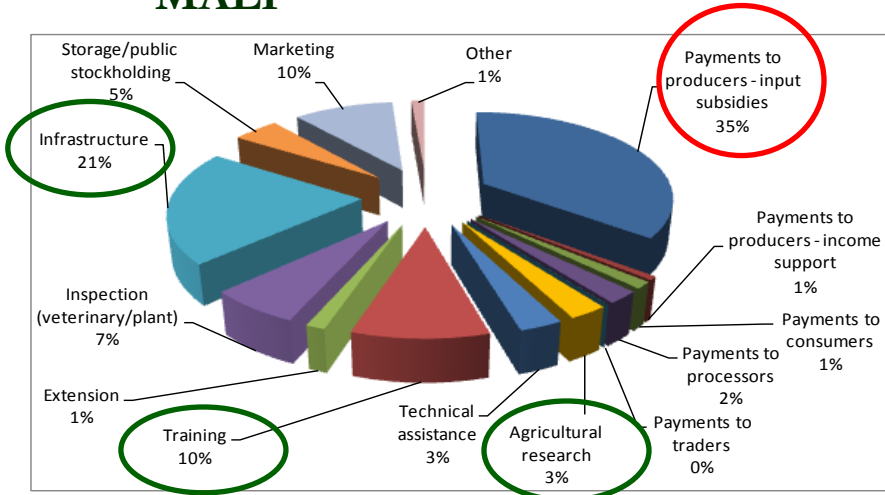

TANZANIA

Public expenditure composition

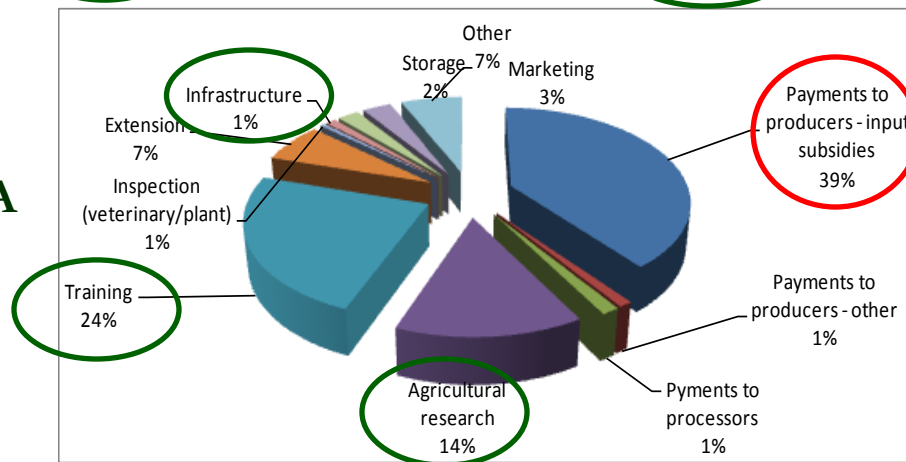

MALI

BURKINA FASO

TANZANIA

Conclusions

- MAFAP a tool for evidence based policy making
- Useful to compare countries & commodities
(Quantitative indicators)
- Useful to identify investment gaps/ priorities
- Policy impacts
- Data intensive (quality + availability)

Monitoring African Food and Agricultural Policies

Thank you!

Monitoring African Food and Agricultural Policies

About MAFAP

A strong food and agriculture sector in Africa will contribute to economic growth, poverty reduction and food security. It is therefore of key importance that government policies are supportive of investments in agriculture. The Monitoring African Food and Agricultural Policies project (MAFAP) supports decision-makers at national, regional and pan-African levels by developing a systematic method for monitoring and analyzing food and agricultural policies in African countries.

Where we work

Latest news

MAFAP activities are starting in the five preparatory countries; Ethiopia, Ghana, Malawi, Mozambique and Nigeria. Read more about

MAFAP Participants

- ▶ Agricultural and Development Economics, **ESA, FAO**
- ▶ Statistics Division, **ESS, FAO**
- ▶ Trade and Markets, **EST, FAO**
- ▶ Policy and Programme Development Support, **TCS, FAO**
- ▶ CountrySTAT, **FAO**
- ▶ ReSAKSS, **IFPRI**
- ▶ CAADP, **NEPAD**
