Land development is the broad range of public and public/private interventions to adjust the use and/or the ownership structure of land to the current economic, environmental and social reality.

Interventions take place in ‘people oriented’ approaches that are carefully planned and implemented.

Land development is integrated in its nature serving different objectives at local, regional and national level, taking in consideration the territory at stake.

**In between....**

What about us, gathered here? Do we feel like a network? Do we have an identity?

A steady network deserves an identity!

Who comes up with the best name for the network?

**Ideas before the coffee break of Wednesday morning**

You will be rewarded!
