**Persons with disabilities are equally encouraged to apply.**

**All applications will be treated with the strictest confidence.**

**The incumbent may be re-assigned to different activities and/or duty stations depending on the evolving needs of the Organization.**

### Organizational Setting

FAO's Subregional Office for the Gulf Cooperation Council States and Yemen (SNG), is responsible for developing, promoting, overseeing and implementing agreed strategies for addressing subregional food, agriculture and rural development priorities. It develops and maintains relations with subregion-wide institutions including Regional Economic Integration Organizations (REIOs). It assists the FAO Representations (FAORs) in the subregion with addressing subregional food security, agriculture and rural development issues at country level. The Subregional Office is a subsidiary of FAO's Regional Office for the Near East and North Africa (RNE).

The post is located in the United Arab Emirates, Abu Dhabi.

### Reporting Lines

The Water Management and Irrigation Officer reports to the Subregional Coordinator for the Gulf Cooperation Council States and Yemen under functional guidance of the relevant technical divisions in headquarters to ensure corporate technical coherence and quality.

### Technical Focus

This position will lead a programme of work on planning, coordinating and lead supervising SNG's work programme related to water resources and irrigation development and management for agriculture and sustainable agricultural systems.

### Key Results

Leadership and technical policy expertise for the planning, development and implementation of Regional Programmes of work, projects, products, services in accordance with FAO's Strategic Framework.

### Key Functions

- Plans, manages, or leads highly specialized or multidisciplinary teams, leads, coordinates, and/or participates in regional committees, project teams, and working groups, and/or provides technical leadership/secretariat services on technical networks and/or international technical policy and standard setting bodies;
- Analyses global and country specific requirements and relevant technical issues to provide, in collaboration with the Regional Programme Leader, critical input into the FAO Strategic Objectives, Programme of Work, work plans and the supporting budgets and/or resourcing strategies;
- Implements and monitors programmes of work involving the development of the approach, evidence based strategies, and related tools, methodologies and the supporting system/database, monitoring and reporting frameworks;
- Conducts, designs and oversees research and analysis activities to support the development of technical standards, international instruments, innovation, technical reports, publications and/or ongoing programme development as well as the provision of technical and/or policy advisory services;
- Provides technical and policy advice to member countries and technical support to Decentralized Offices in the development and implementation of their programmes;
- Leads and/or collaborates in, provides technical backstopping to and ensures the quality and effectiveness of capacity development and knowledge sharing activities within member countries such as policy support, organizational development and individual learning events including preparation of related information, learning, on-line tools;
- Represents the Organization at international meetings and conferences, identifies, in collaboration with concerned divisions (*inter alia* TCS and OPC) and implements strategic partnerships, advocates best practices and increased policy dialogue and develops and negotiates effective working relationships/consensus and agreements with international and national stakeholders;
- Leads and/or participates in resource mobilization activities in accordance with the FAO Corporate strategy.

### Specific Functions

- Serves as the FAO focal point to all aspects of water development for agriculture in SNG. Lead regional efforts in the collection and regular updating of key information and data on water use and irrigation in agriculture and provide advice in the fields of policy, applied research, technical seminars and training and promotion of integrated land and water development programmes;

- Coordinates, in collaboration with the Regional Programme Leader, the identification and formulation of requests for external assistance by governments in the fields of irrigation, water resources development and management, climate change and other related areas;
- Promotes, organizes and participates in regional studies related to the afore-mentioned fields and follow-up with the initiation of activities emanating from such studies;
- Leads water resources and irrigation related activities in SNG, especially between abovementioned Member Governments and regional governmental and non-governmental organizations, ensuring, through consultations with the Land and Water Division and relevant Functional Technical Networks, that the necessary consistency of approaches is maintained;
- Represents FAO/SNG in regional conferences/meetings/workshops related to water resources, development, management, irrigation, drainage, climate change and related subject matters;
- Organizes agricultural sector review and advises on national/regional needs and projects or the development, management and conservation of water resources;
- Performs other related duties as required.

---

## CANDIDATES WILL BE ASSESSED AGAINST THE FOLLOWING
