

Issued on: 10 October 2017

Deadline For Application: 24 October 2017

JOB TITLE: Developer (Frontend)

TYPE OF CONTRACT: PSA.SBS

DUTY STATION: FAO HQ, Rome, Italy

ORGANIZATIONAL UNIT: INFORMATION TECHNOLOGY DIVISION

DURATION: Up to 11 months

FAO seeks gender, geographical and linguistic diversity in its staff and international consultants in order to best serve FAO Members in all regions.

Qualified female applicants and qualified nationals of non-and under-represented member countries are encouraged to apply.

Persons with disabilities are equally encouraged to apply.

All applications will be treated with the strictest confidence.

Organizational Setting

The Information Technology Division (CIO) is responsible for all IT activities within the Organization. CIO performs on behalf of the Organization the following critical roles: defining FAO IT policies and providing strategic advice on IT architecture and standards, governance, policy and operational matters while monitoring organizational compliance; defining the mechanisms for managing FAO's information and data; protecting FAO's information assets and ensuring confidentiality, integrity and availability; ensuring provision of IT services that are core for the Organization's global operations and supporting the information and business processes; coordinating organization-wide IT activities in order to reduce duplication and fragmentation and to increase integration of information data, systems and platforms, mobilizing IT resources from across the Organization.

Reporting Lines

Under the direct supervision of the Information Technology Officer (Development area), the candidate will act as developer performing the following functions.

Technical Focus

The Frontend Developer responsibilities include the translation of the UI/UX design wireframes to actual code that will produce visual elements in web applications and systems. Also including taking an active role on both the graphical design and technical implementation activities and defining how the application looks as well as how it works.

Tasks and responsibilities

- Develop, test and debug of frontend components with HTML, CSS, and modern JavaScript frameworks (React, Angular, Vue).
 - Participate in design and prototyping of websites and web application user interfaces. Ensuring the technical feasibility and compliance of the UI/UX designs
 - Participate in an agile software development team building high quality and effective software products that deliver real business in the shortest time.
 - Ensure the consistency, coherency and compliance of software development with appropriate organizational standards in close collaboration with quality assurance (QA), information security (InfoSec) and user experience functions (UX).
 - Perform other related duties as required, especially in collaboration with other members of the development team.
-

CANDIDATES WILL BE ASSESSED AGAINST THE FOLLOWING

Minimum Requirements

- University degree or relevant educational certification in Computer Science, IT Engineering, Professional Software Engineer or closely related discipline.
- Working knowledge of English.
- At least 5 years of relevant experience in frontend software development and 1 in Agile Methodologies
- Proven experience with modern JavaScript frameworks (Angular, React, Vue)
- Proven experience with web development technologies, particularly with HTML, CSS and JavaScript
- Strong understanding of cloud computing architectures

FAO Core Competencies

- Results Focus
- Teamwork
- Communication
- Building Effective Relationships
- Knowledge Sharing and Continuous Improvement

Technical/Functional Skills

- Work experience in more than one location or area of work
- Extent and relevance of experience in modern frontend development frameworks, such as React, Angular Vue.js, and Typescript.
- Extent and relevance of experience in modern UX/UI design principles, including Responsive Design and Progressive Web Apps (PWA)
- Knowledge of design and implementation RESTful APIs. Including modern authorization mechanisms, such as JSON Web Token
- Knowledge of software development tools for repositories, version control, automation, IDEs, issue tracking, containerization, infrastructure as a code, QA and testing.
- Knowledge of cloud computing (preferably AWS), IaaS, PaaS, SaaS, BaaS (Google Firebase), infrastructure as a code, Server-less applications and System Reliability Engineering.

Please note that all candidates should adhere to *FAO Values of Commitment to FAO, Respect for All and Integrity and Transparency*.

ADDITIONAL INFORMATION
