

Food and Agriculture Organization of the United Nations

CALL FOR EXPRESSIONS OF INTEREST - VACANCY ANNOUNCEMENT N°: IRC4837

Issued on: 11 October 2017

Deadline For Application: 25 October 2017

JOB TITLE: Senior GIS Specialist

TYPE OF CONTRACT: Consultant or PSA

DUTY STATION: Rome, Italy

ORGANIZATIONAL UNIT: INFORMATION TECHNOLOGY DIVISION (CIO)

DURATION: Up to 11 months

FAO seeks gender, geographical and linguistic diversity in its staff and international consultants in order to best serve FAO Members in all regions.

Qualified female applicants and qualified nationals of non-and under-represented member countries are encouraged to apply.

Persons with disabilities are equally encouraged to apply.

All applications will be treated with the strictest confidence.

Organizational Setting

The CIO defines FAO IT policies, strategy, architecture and standards and monitors organizational compliance and the mechanisms for managing FAO's information and data, on behalf of the business owners, avoiding duplication and ensuring security.

This job is located in the Geospatial information systems area, which falls within the IT Design & Technology unit of the Information Technology Division (CIO).

Reporting Lines

Under the direct supervision of the Information Technology Officer (IT Design and Architecture), the consultant will act as GIS Specialist performing the following functions.

Tasks and responsibilities

The consultant will be responsible for day-to-day development and support of corporate Geospatial applications, platforms and data services. He or she will provide engineering know-how to support data science and remote-sensing activities using Google Earth Engine, JavaScript and Python. Data Science and remote sensing activities include land cover classification, climate change forecasting, aquaculture mapping, and soil and water management. The consultant will also help streamline the geospatial data lifecycle, enabling self-service capabilities for importing, analysing and publishing geospatial data.

The IT Division is in the midst of a digital transformation towards a new platform based approach. As part of this assignment, the consultant will develop new geospatial features and services that align with the Organization's IT Architecture and integrate with the corporate SOA platform.

CANDIDATES WILL BE ASSESSED AGAINST THE FOLLOWING

Minimum Requirements

- **For Consultants:** Advanced university degree in Computer Science, IT Engineering, Professional Software Engineer or closely related discipline.
For PSA: University degree or relevant educational certification in Computer Science, IT Engineering, Professional Software Engineer or closely related discipline.
- **For Consultants:** Working knowledge of English and limited knowledge of one of the following, French, Spanish, Arabic, Chinese, or Russian.
For PSA: Working knowledge of English.
-
-
- At least 10 years hands on experience developing GIS using Java, Python and OGC compliant tools
- At least 5 years developing, testing and deploying SOAP and REST solutions
- At least 1 year developing Google Earth Engine based applications
