Job Title: Economist / Econometrician (Social Protection and Impact Evaluation)

Organizational Unit: ESP/Social Policies and Rural Institutions

Type of Contract: Consultant or PSA

Duty Station: Rome

Duration: Up to 11 months on a WAE basis

Organizational Setting

The Social Policies and Rural Institutions Division (ESP) coordinates FAO’s work on social protection, gender equality, decent rural employment, rural institutions and people’s empowerment, and the right to food. It is responsible for working with member countries and other partners to reduce rural poverty through strengthening social protection systems, diversifying rural employment opportunities, reducing gender gaps and other social inequalities in agriculture, strengthening producer organizations, improving the rural poor’s access to productive resources and rural services, and achieving the overall goal of realizing the human right to adequate food for all.

The Social Protection (SOCPRO) team is part of the ESP Division. The SOCPRO team provides overall guidance on FAO’s approach to social protection, and technical support to decentralized offices in four core areas: (i) ensuring the expansion of coverage of social protection to rural areas; (ii) promoting policy and programmatic synergies between agriculture, natural resource management and social protection; (iii) promoting nutrition sensitive social protection systems; and (iii) the development of risk-informed and shock responsive social protection.

One specialized area of focus of the SOCPRO team relates to the generation of robust evidence on the economic and productive impacts of cash transfers at individual, household and local economy levels, and the combined impacts of social protection and agriculture interventions as compared to standalone programmes. This evidence is helping to develop an understanding of the role of coherent agricultural and social protection interventions in increasing resilience, fostering productive inclusion and creating pathways for poor and vulnerable rural households to move out of poverty and food insecurity.

FAO International Consultants and Call purpose

The Organization frequently engages experts to work on short-term projects as international consultants. The functions of a consultant are results-oriented and normally involve analysing complex issues, directing seminars or training courses, preparing documents for conferences and meetings, or writing reports on matters within their area of expertise. An international consultant is engaged by the Organization to provide expertise, skills or knowledge for the performance of a specific task or piece of work, which would be short-term by nature. The assignment may involve full-time or part-time functions similar to those of staff members. The assignment can be from 1 month up to 11 months on a When-Actually-Employed (WAE) basis. The possibility of extension is subject to satisfactory performance and depending on the resources and needs of the Organization.

The purpose of this Call is to attract qualified candidates for consultancies in the area of social protection to populate the divisional roster for this profile. Individuals who satisfactorily meet or exceed the requirements of the Call will be included in the divisional Roster of Social Protection Specialists. Candidates who are registered in the Roster will be considered for future contracts when relevant opportunities arise.

Reporting Lines

The Economist / Econometrician (Impact Evaluation) reports to the Senior Economist/Social Protection Team Leader.

Technical Focus

Conceptual, methodological and operational support to the design and implementation of robust impact evaluations and other policy-relevant analytical work geared towards the expansion of social protection and the development of greater coherence between social protection systems and agriculture, natural resource management, food security, nutrition and resilience.
Tasks and responsibilities

For C level consultants

1. Conduct statistical and micro-econometric analysis of census, survey and programme data sets, with a focus on informing the design and implementation of coherent agricultural and social protection policies and programmes
2. Contribute to the design and implementation of household and individual level impact evaluations of agricultural and social protection interventions
3. Provide inputs into the generation of robust evidence on the impacts of social protection and agricultural programmes on agricultural livelihoods
4. Collaborate with the implementation of analytical work to simulate the impact of agricultural and social protection policies on rural households and local economies
5. Provide evidence-based technical inputs to advise FAO country and regional offices and partner governments, upon request
6. Prepare and, as requested, present findings of evidence generation activities in international and national events
7. Perform other duties as necessary.

The position may include international travel in support of project activities.

For B level consultants

1. Lead and coordinate the implementation of statistical and micro-econometric analysis, aimed at informing the design and implementation of coherent agricultural and social protection policies and programmes
2. Serve as technical lead for the design and implementation of household and individual level impact evaluations of agricultural and social protection interventions
3. Coordinate and provide quality assurance to the generation of evidence on the impacts of social protection and agricultural programmes on agricultural livelihoods
4. Oversee and contribute to the design and implementation of analytical work focused on simulating the impact of agricultural and social protection policies on rural households and local economies
5. Advise and provide technical support to FAO country and regional offices, partner governments and development partners in connection with the policy and programme implications of the evidence-based analytical work
6. Present findings of evidence generation activities in international and national events
7. Contribute to the development and delivery of capacity development material and trainings on analytical models and methodologies for evaluating the impacts of agricultural and social protection interventions
8. Perform other duties as necessary.

The position will include international travel in support of project activities.

CANDIDATES WILL BE ASSESSED AGAINST THE FOLLOWING

Minimum Requirements

- PhD in Economics, Econometrics, Agricultural or Development Economics with graduate-level econometrics.
- Expertise with quantitative impact evaluation methods
- At least five (Level B) or three (Level C) years of experience after graduation dealing with household survey datasets and panel data sets
- Familiarity with social protection and rural development issues
- Advanced knowledge of Stata or other statistical software like SPSS, R, SAS, etc.
- Excellent writing skills and oral presentation skills; publication record in peer-reviewed journals highly desirable.
- Prior experience of work in developing countries highly desirable
- Working knowledge of English, French or Spanish and limited knowledge of one of the other two or Arabic, Chinese, Russian.

FAO Core Competencies

- Results Focus
- Teamwork
- Communication
- Building Effective Relationships
- Knowledge Sharing and Continuous Improvement

Please note that all candidates should adhere to FAO Values of Commitment to FAO, Respect for All and Integrity and Transparency.
