Persons with disabilities are equally encouraged to apply.**

**All applications will be treated with the strictest confidence.**

**The incumbent may be re-assigned to different activities and/or duty stations depending on the evolving needs of the Organization.**

---

### Organizational Setting

The Forest Policy and Resources Division leads FAO's work in promoting sustainable forest management and providing leadership on the environmental, social and economic dimensions of forestry, including its contributions to poverty reduction and food security and nutrition. It liaises with member countries, civil society and the private sector in aspects ranging from development of effective forest policies to forest conservation and management issues, and strengthens the role of forests in climate change mitigation and adaptation. The Division also collects, analyses and disseminates information on the world's forest resources and on the production, trade and consumption of wood and non-wood forest products.

The post is located in the Sustainable Wildlife Management Programme Team, within the Forest Resources Management Team, Forestry Policy and Resources Division, FOA.

Funded by the French Facility for Global Environment (FFEM) and the 11th European Development fund (EDF) of the European Commission, the RESSOURCE project aims to significantly improve the state of the natural resources of the Sahelian wetlands for the benefit of local populations, particularly in terms of food security and local development. Waterbird populations are the natural resource targeted by the project.

The overall challenge of the project is to significantly improve the state of the natural resources of the Sahelian wetlands, particularly water bird populations, for the benefit of local populations in terms of food security and local development. Improving knowledge on the spatial and temporal dynamics of waterbird populations in relation to climate change, habitat modification and direct harvesting is one of the major challenges of the project because it will contribute to a better definition of public policies for monitoring and conserving global biodiversity. Because of their migratory nature, waterbirds are vectors of cross-border, technical and political collaboration. The project therefore also aims to improve North-South and South-South cross-border collaboration.

### Reporting Lines

The Forestry Officer reports to the Senior Forestry Officer, (Coordinator, Sustainable Wildlife Management Programme) under the overall guidance of the Steering committee of the RESSOURCE Project.

### Technical Focus

The incumbent will provide technical guidance and programmatic coordination of the RESSOURCE Project, donor relations and resource mobilization, while ensuring technical linkage with other FAO teams and partner Organizations, in accordance with relevant FAO Strategic Objectives.

### Key Results

Comprehensive technical and policy expertise to support the planning, development and implementation of Departmental/Division programmes, projects, products and services in accordance with Departmental/Division objectives and FAO Strategic Objectives.

### Key Functions
